

# MALINDI DISTRICT DEVELOPMENT PLAN 2002-2008

# Effective Management for Sustainable Economic Growth and Poverty Reduction

#### **FOREWORD**

The District Development Plan (DDP) for the period 2002-2008 was prepared by the District Departmental Heads of various Ministries under the coordination of the District Commissioner (DC) assisted by the District Development Officer (DDO) and members of the District Planning Team. The Plan is a product of broad-based consultations among various stakeholders undertaken in each of the sixty-nine districts in the country. It has been prepared in the backdrop of the theme of the 9<sup>th</sup> National Development Plan, which is "Effective Management for Sustainable Economic Growth and Poverty Reduction".

The DDP articulates medium term policies and objectives, which are further translated into short-term strategies and programmes to be implemented under the Medium Term Expenditure Framework (MTEF). The latter is part of the budgetary reforms undertaken to strengthen the linkage between policy, planning and budgeting.

The Rural Planning Department of the Ministry of Finance and Planning provided the overall guidance through seminars and training workshops and was responsible for the formulation of guidelines, editing and publication of the Plan.

The Plan is divided into four chapters as follows:

Chapter One: Provides the background description of the district in terms of its

area, administrative divisions and main physical features as well as a summary of data essential for making informed choices while

planning.

Chapter Two: Provides a review of the performance of the 6<sup>th</sup> District

Development Plan for the period 1997-2001 and insight into the major development challenges and cross cutting issues to be

tackled during the 2002-2008 Plan period.

Chapter Three: Forms the core of the Plan and is prepared along the lines of the

PRSP/MTEF sectors. It indicates the priorities, strategies and programmes proposed to overcome the development challenges identified in Chapter Two. The proposals are in line with the people's aspirations as outlined during the Poverty Reduction

Strategy Paper District Consultation Forums.

Chapter Four: Introduces implementation, monitoring and evaluation

mechanisms for the 7<sup>th</sup> DDP. It outlines the institutional framework for monitoring and evaluating the implementation of the 7-year Plan, the indicators and instruments to be used and sets

out clear roles for all stakeholders.

District Planning is the cornerstone of the District Focus for Rural Development Strategy (DFRD). This strategy is currently being revamped to ensure that an effective bottom up delivery system that facilitates two-way communication between the community and development partners through the administrative hierarchy in the district as well as at the national level is established. In order for this Plan to be more effective than before,

communities will be actively and fully involved in the entire planning process from selection, implementation, monitoring and evaluation. However, this requires huge investments in training and capacity building, particularly on participatory methodologies for the communities, and effective delivery of services closer to the people. In this regard, district information systems will be put in place, with District Information and Documentation Centre (DIDC) and District Planning Unit (DPU) playing a central role in the process. This will be actively pursued by the Rural Planning Department through the office of the DDO in collaboration with development partners.

CHAPTER ONE
DISTRICT PROFILE

high are in the County Connell.

Prepared by CBS, 1999 Pop. Census

This map is not an authority over administrative boundaries

#### 1.0 INTRODUCTION

This chapter gives an analysis of the district profile. The information covered includes location, area, administrative divisions, main physical features, and climate and settlement patterns. It also shows sectoral data in a fact sheet that gives a quick look at the district profile and resource base. This chapter provides a base from which programmes will be designed to address the theme of the plan, which is "Effective Management for Sustainable Economic Growth and Poverty Reduction"

### 1.1 ADMINISTRATIVE, GEOGRAPHIC AND PHYSICAL DESCRIPTION

This section provides a description of the district profile, with background formation on administrative boundaries, physiographic and natural conditions, settlement patterns and other background information critical to the overall development strategy for the next seven years.

#### 1.1.1 Administrative Boundaries

Malindi District is one of the seven districts in Coast Province. It borders Kilifi District to the south, Tana River District to the north and northwest and Indian Ocean to the east. It lies between latitude 2° 20 and 4° south and longitude 39° and 4° 14 east. The district covers an area of 7,605 km² and is divided into three divisions namely Malindi, Marafa and Magarini. Table 1.1 shows the area, administrative and political units in the district.

Table 1.1: Area, Administrative and Political Units

Division	Area (Km2)	Locations	Sub-Lo	cation	Wards in MMC	Wards in MCC	Constitu	ıencies
Malindi	5,259	8	-	31	12	3	DMI	1
Marafa	1,617	5		16	-	5		
Magarini	729	3		9	-	3		1
Total	7,605	16		56	12	11		2

Source: District Commissioner's Office, Malindi, 2001

The district has two constituencies, namely Magarini and Malindi. Malindi Constituency follows the administrative boundary of Malindi Division while Magarini Constituency covers Magarini and Marafa Divisions administrative boundaries. The district has two Local Authorities, namely Malindi Municipal Council and Malindi County Council. Malindi County Council has 11 wards, 3 in Malindi Division, 5 in Marafa Division and 3 in Magarini Division. The wards follow the locational boundaries. Malindi Municipal Council has 12 wards, all in Malindi Division. The area under the Magarini Municipality is approximately 360 km<sup>2</sup> excluding the sea. The Municipal wards cover Malindi Division except 3 locations, which are in the County Council.

# 1.1.2 Physiographic and Natural Conditions

The district's socio-economic development activities are determined by the soils, rainfall, Indian Ocean, River Sabaki and Arabuko Sokoke Forest.

The district has four major topographic features, namely Coastal Plains, Foot Plateau, Coastal Range and Nyika Plateau. These topographic features are also closely related to the existing agro-ecological zones. The Nyika Plateau, which is in the hinterland, covers the largest area of the district. The region is sparsely populated and covered by thin vegetation, shallow depression and gently undulating terrain. This is an arid and semi-arid area, which receives less, than 700mm of rainfall annually. The soils are poor causing the area to have low potential for rain-fed crop farming. The Nyika Plateau contains lowland ranching zone and livestock/millet agro-ecological zones. Locations in this region include Chakama, Langobaya, Adu, Fundisa, Garashi, Dagamra and Marafa. The main economic activities in the areas are livestock keeping and growing of drought resistant varieties such as maize and cassava. In areas along river Sabaki like Chakama, Langobaya Garashi and Dagamra, vegetables can be grown through smallholder irrigation.

The Coastal range is another distinct feature in the district. This is an area characterized by low range sandstone hills of 130m-420m above sea level where the cashewnut/cassava zone is found. This is a major cropping zone with high and moderately fertile soils. Annual average rainfall is 1,200mm making it high potential for rain-fed agricultural crops. The zone also has the largest forests in the district. Areas falling in this zone include Magarini, Goshi, Ganda, Gongoni and parts of Jilore Locations. To reduce pressure on the forest and at the same time ensure increased food and cash crop production efforts in agro-forestry programmes need to be doubled. Suitable varieties of forest trees and tree crops need to be inter-planted.

Foot Plateau region is another physical feature in the district. The plateau is characterized by slightly undulating terrain. The area is traversed by a number of dry land water sources and has altitude ranging from 136m to 60m to 60m above sea level and slopes towards the sea. The average rainfall is between 900mm and 1,000mm per annum. The area has grassland and stunted vegetation and is densely populated. Locations in this area are Gede, Watamu, Malindi, and parts of Gongoni and Magarini.

The Coastal Plains runs a long the district's coastline. Its width varies between 3 km and 20 km. The plain's altitude is 30m above sea level with a prominent peak in Mambrui. Across the coastal plains run several creeks with mangroves and estuaries of River Sabaki.

River Sabaki flows across the district, creating many areas with irrigation potential and is source of water to Malindi Town, Mombasa, Kilifi and Watamu. The river, which measures about 150 km long from its entry in the district in Chakama Location to the Sabaki mouth influences human settlement as it provides water for both human and livestock consumption and is a source of fresh water fish. The area also has a high irrigation potential.

The Indian Ocean is a major feature in the district. The district coastline is 155 km running from Mida to Ungwana and has good beaches for tourism and fishing activities.

The two activities have led to high settlement in Watamu, Mida, Malindi Town, Mambrui and Ngomeni. In order to sustain the livelihoods in the areas relying on River Sabaki and the Indian Ocean, measures need to be put in place to protect them from pollution due to human activities.

The west coast line has good beaches attracting tourism activities, which have positive effects on economic growth and poverty reduction through employment creation and promotion of socio-economic activities.

The district has a monsoon type of climate with hot and humid conditions all the year round. It is hot and dry from January to April while June to August is the coolest period. Average annual temperature range from 22.3°C to 26.6°C in the coastal lowlands while the hinterland temperatures range from 30°C to 34°C. Average temperature range is between 28°C to 32°C between January and March and lowest in July and August when temperature ranges from 21°C in July to 24°C in August. The warm temperatures coupled with beautiful beaches serve as tourist attractions.

#### 1.1.3 Settlement Patterns

Population in the district varies from one division to another with the average density of 36 persons per km<sup>2</sup>. Table 1.2 gives the average density per division and areas with the lowest and highest density.

Table 1.2 Average Density by Division and Areas with Lowest and Highest Density

Division	Average	Highes	st density	Lowes	t density
	Density	Sub-location	Density	Sub-location	Density
Malindi	32	Watamu	1,824	Chakama	ı
Marafa	26	Bate Territoria	213	Kamala	9
Magarini	92	Ngomeni	249	Shomela	41

Source: 1999 Population and Housing Census Report-Volume 1

As shown on Table 1.2, settlement patterns vary from one division to another. Malindi Division has the largest number of people as it has all the topographic features (Coastal Plains to Nyika Plateau) and suitable economic factors that encourage human settlement.

Malindi Town, which is administratively in Malindi Location, has a very high population compared to other areas because of availability of employment opportunities in the tourist establishments, both in the formal and informal sectors. Within Malindi Town, distinct features of settlement patterns can also be seen. The poor people are settled in informal settlements such as Maweni, Majengo Mapya, Maisha Mapya, Kwa Ndomo and Muyeye. The remaining part of division's settlement pattern is determined by rainfall and soils. The Coastal Range has rich agricultural areas like Sabaki, Ganda, Goshi, Gede and Watamu which have relatively higher density. Towards the Nyika Plateau, which covers Jilore, Lango Baya and Chakama, the density decreases with high concentration of settlements skewed towards River Sabaki.

In Magarini Division, high human settlement is found in the Foot Plateau and the Coastal Range areas of Gongoni, Mambrui, Marereni and Magarini. This is because these areas have fairly good soils and high rainfall for agriculture, good road network, (Malindi-

Garsen Highway) and employment opportunities in the salt firms. In the hinterland locations of Fundissa, which have Nyika plateau characteristics, the population density is lower. Generally, the majority of people in the division are poor with poverty level increasing towards the hinterland. In Marafa Division, settlement patterns tends to be fairly homogeneous since climatic and soil conditions are homogeneous. Most parts of the division are in the Nyika region with scattered population with many settlements near River Sabaki.

#### 1.2 DISTRICT FACT SHEET

The district fact sheet consists of very brief data on the district. These include the area, demographic and population profiles, socio-economic indicators and various sectors and sub-sectors in the district. The data is well captured to show how the district looks like at a glance.

#### 2.0 INTRODUCTION

The purpose of this chapter is to provide an overview of the last plan 1997-2001 accompanied by an in depth analysis of the implementation status of the projects that were planned over the plan period. The chapter further addresses the linkages of the current Plan 2002-2008 and other key long and short-term policy documents. An in depth analysis of the major development challenges and cross cutting issues are also discussed with a view to understanding the conditions that obtain in the district that may accelerate or retard the achievement of sustainable growth and poverty reduction.

# 2.1 OVERVIEW OF 1997-2001 DISTRICT DEVELOPMENT PLAN

Malindi District was carved out of Kilifi District in 1996 and therefore a District Development Plan (DDP) was not developed. Although the Kilifi DDP was available, it did not address the priorities of the new district. The District Development Committee in Malindi, therefore, resolved to develop a plan to address the needs of the new district. Though the Plan that was developed covered 5 years, the actual implementation was for 3 years (1998/2001). The projects that were introduced in the Plan were from Kilifi District Development Plan and new project proposals that addressed the district's objective of industrialization.

During the 1997 – 2001 DDP period, various programmes were started and a number came to an end. The major projects that were started during this period include: GOK/UNICEF Child Labour Programme; Roads 2000 Programme; District Health Improvement; and STI/STD Programme. On the other hand, the major programmes that ended in the period include; National Extension Programme (NEP) II; Soil and Water Conservation Programme; Coastal ASAL Development Programme; ILO/IPEC Child Labour Programme; Magarini Integrated Rural Development Programme; Minor Roads Programme; and Arabuko-Sokoke Management Project.

During the Plan period, the district was affected by El-Nino weather phenomenon. El-Nino rains destroyed many private and public facilities. The government responded by rehabilitating the damaged facilities through the El-Nino Emergency Programme, which focused on health, water and road projects.

The long drought season (1999-2000), which came immediately after the El Nino rains adversely affected many parts of the district. Crops and livestock failure forced families to depend on famine relief food.

Insecurity, which rocked the coastal districts of Kwale and Mombasa had negative effect on the district as clashes impacted negatively on the tourism sector. The spill-over effect led to bad publicity internationally and occasioning cancellations of tourist bookings causing loss of jobs in the service sector.

### 2.2 IMPLEMENTATION OF THE 1997-2001 PLAN

A total of 101 projects were proposed in the District Development Plan and out of them only 36 were completed. In the same plan period, 14 projects were implemented but were not reflected in the Plan. Table 2.1 gives a breakdown by sector of projects implemented by government, Non-governmental Organizations, community and

religious organizations.

Table 2.1 1997-2001 District Development Plan Implementation Status by Sector

Source: District Development office, 2001

Overall, the District Plan implementation rate was 35.6 per cent. Inadequate funding in all sectors generally caused this low implementation rate. This was due to over reliance on the government to provide funding.' Malindi District Development Plan was completed in 1999. The absence of the Plan meant that projects to be funded were those from the larger Kilifi District, which were not a priority in the newly created district. This created a situation where each sector had to source for funding based on consultation with a few field officers or Community Action Plans available in the district and not the plan.

Funding has been inadequate. The district has very few NGOs and bilateral organizations. Coast ASAL Development Programme, Magarini Integrated Development Programme, National Extension Programme and National Soil and Water Conservation Project (which has since ended) were the only major donor funded programmes in the district and were in the final phases when the District Development Plan was being implemented. The coming to an end of the major programmes left the district with no reliable source of funding. Programmes such as Roads 2000 which came in during the last two years of the Plan period did not pick up well owing to the restructuring process in the roads sector, absence of equipment in the district to supplement labour based activities and the general poor state of the roads which requires a lot of funding for upgrading and maintenance.

District Treasury had a very low cash float which could not adequately service all government departments. Government funds for projects could not be utilized as in most cases there was either no liquidity or the funds were available at a time when they could not be used. The affected projects were roads, water and others that required to be done during the dry season. In some instances cash was available for few weeks towards the end of the financial year.

El Nino weather conditions shifted priority from projects in the Plan to those that resulted from the El-Nino weather conditions. The El-Nino Programme did not also consult the district on the final selection and works to be done.

High poverty levels affected projects, especially those that required community contribution before donor funds were released. This tended to slow down implementation rate of donor-funded programmes such as Coast ASAL Development Project, Community Development Trust Fund, AMREF and Heifer Project International. Low community resource base affected schools and women group projects especially where they await external assistance, as is the case with most of them.

Lessons learnt: There has been very little reference to the District Development Plan when it comes to resource allocation especially by line ministries and other funding agencies. Most departments prepare annually work plans based on activities and project expenditure guideline determined by their headquarters and not the District Development Plan or the Annual Annexes

Possibility of direct funding of projects to the community should be exploited. This enhances the ownership and sustainability of the project and reduces wastage of time, reduces the cost experienced in the flow of funds when they have to pass through various stages before reaching the actual activity.

Restricting new project proposals to only three created a vacuum, which was filled by projects from Community Action Plans. There is a need for periodic review of the Plan so as to incorporate in new projects.

Ministry of Finance and Planning should coordinate multi-sectoral projects. This will reduce cases of un-coordinated release of funds and absence of monitoring and evaluation system.

The District Development Committee should be given more powers especially legal backing to be able to control development activities. Funds passing through various organs of the government and Non-Governmental Organizations need to be discussed and approved by the committee and there is need to develop community action plans. An open fund to cater for small community projects, which receive little attention in line ministries, needs to be created at the district level. In many instances, project with little funding requirements such as dips, shallow wells, construction of small irrigation schemes are never considered and yet they make a big difference to the communities when completed.

Preparing the communities through training and involvement during implementation needs to be part of the cost of the project. A small percentage of the project costs needs to be reserved for projects committee capacity building.

# 2.3 DISTRICT DEVELOPMENT PLAN LINKAGES WITH THE 2002-2008 NATIONAL DEVELOPMENT PLAN AND OTHER POLICY PAPERS

In order address the theme of "Effective Management for Sustainable Economic Growth and Poverty Reduction," this plan will incorporate all issues raised during various consultation processes in the district including the Malindi District Poverty Reduction

Consultation Process. The theme in the DDP is a reflection of the theme of the 2002-2008 National Development Plan (NDP). The DDP has therefore attempted to translate the broad national objectives and strategies as concerned in the NDP to draw out specific programmes and projects aimed at economic growth and reducing poverty. The Plan has also reflected issues of concern in various Government policy documents such as sessional papers. The National Poverty Eradication Plan (1999-2015) which is a long term plan (15 years) to address poverty, the short term (3 years) Malindi District Poverty Reduction Strategy Paper (PRSP) 2000-2003 and NGO documents available in the district have all been considered. The views of multi-sectoral documents have also been incorporated, including the Poverty Assessment Report of 2000, Malindi Municipal and Malindi County Council 5 years Local Authority Development Programmes, which start from 2002-2006.

The District Development Plan has taken cognisance of the District Health Plan, Water Policy, Forest Master Plan and other documents prepared by such organizations like the Coast Development Authority, Non-Governmental Organizations and Kenya Chamber of Commerce and Industry. To make the Plan more representative, Divisional and Locational Development Committee views were also sought during Plan preparation. Further efforts will be made during implementation of the Plan to involve all the stakeholders.

# 2.4 MAJOR DEVELOPMENT CHALLENGES AND CROSS CUTTING ISSUES

This section provides an analysis of the major development challenges and cross cutting issues that are likely to affect the implementations of this plan. The major challenges addressed relate to decline in tourism sector and landlessness. This is followed by an analysis of the cross cutting issues including population growth, poverty, HIV/AIDS disaster and environmental conservation and management.

Decline in Tourism Sector: Tourism is one of the most important sectors in the district. The district has a number of hotels, 80 registered restaurants, and 350-registered tourist related enterprises. The district has a total bed capacity of 5,700 hotel beds and it is estimated that there are 3,500 beds in private villas and homes used by tourists. The sector supports the district economy by providing employment and business opportunities that have improved the incomes of the population.

Table 2.2 Hotel Bed Occupancy (1995-2000)

Year	1995	1996	1997	1998	1999	2000
Average Hotel Bed		15 CHA A . 1	1.			J r ard.
Occupancy (%)	62	46	37	25	25	25

Source: District Tourist Office, Malindi, 2001

Table 2.2 above shows the trends in bed occupancy in the district over the period 1996-2000. Over the period, bed occupancy has shown a declining trend. While the average bed occupancy in 1995 stood at 62 per cent it declined to a paltry 25 per cent in the year 2000. The observed trend impacted negatively on the economy of the district. A number of tourist hotels closed down while others operated at sub-optimal levels. This affected the income levels and therefore poverty levels in the district. Inadequate micro

marketing on the part of investors, negative publicity abroad that was occasioned by tribal clashes in parts of Coast Province and poor infrastructure are to blame for the observed downward trend.

High Number of Landless: Data available in the district from Welfare and Monitoring Survey 1997 shows that 11.3 percent of the households in the district are landless. Many of these people are squatters in private land. Although the government has adjudicated several schemes, the number of people settled is below target. This has led to an emergence of informal and unorganised settlements in Malindi Town resulting in slums. Some of such slums include Muyeye, Maweni, Kwa Ndomo, Kisumu Ndogo, Kwa Chocha, and Majengo Mapya. These are the areas where pockets of the poor are found.

In the rural parts of the district, many people have no legal documents for land ownership. The people own the land customarily. Absence of title deeds has discouraged full utilization of land. Investment in land remains low with no permanent structures in place.

# 2.4.1 Population Growth

The district has witnessed a high population growth rate from 1979 to 1999. The growth rate between 1979 and 1989 was 3.41 per cent. This however rose to 3.9 per cent between 1989 and 1999. Factors attributed to the high population increase range from improved health services which have reduced infant and child mortality rates, reduced cases of mortality from curable diseases and increase in fertility. Another factor that explains the increase in population has been in-migration from other districts and countries. Migration from other districts has basically been for the purpose of looking for employment opportunities in the tourism industry. As the population grows, resources in the district have remained the same. Therefore population growth has not been commensurate with the provision of socio-economic facilities.

**Population Size and Growth:** According to the 1999 Population and Housing Census, the district had a total population of 275,552 persons in 1999. This figure is projected to increase to 305,142 persons in the year 2002 and 374,194 persons in the year 2008.

The population growth rate increased from 3.41 per cent to a relatively higher level of 3.9 per cent between the 1979 and 1989 censuses then stagnated at 3.9 per cent in the 1989 and 1999 census periods. Table 2.3 gives the district population projections by age and sex for the Plan period. The implications of the population increase over the Plan period is that arable land per population head will decrease while the population will continue to encroach forest trail land.

Source: District Statistics Office, Malindi, 2001

An analysis of the population projections shows that the population pyramid is bottom heavy. The percentage of population less than 15 years form about 47 per cent of the total population at the beginning of the plan period in 2002. Population of age group 60 and above accounts for 4.7 per cent of the total population. The cluster formed by age groups 0-14 and 60 and above constitutes about 52 per cent of the total district population. Table 2.4 shows the population projections for selected age groups, namely primary school going age (6-13 years), secondary school going age (14-17 years), the youth (15-25 years), female reproductive age (15-49 years), and the labour force (15-64 years). These age groups have been selected for analysis because of their importance in the socio-economic development of the district.

Age Group 6–13 (Primary School Going Age): The 1999 Population and Housing Census captured 31,603 boys and 30,891 girls within this age bracket. These figures are expected to be 34,999 boys and 34,208 girls in 2002 further rising to 42,916 boys and 41,949 girls in 2008. This age group has a female/male sex ratio of 100:102.

Table 2.4 Population Projections for Selected Age Group 1999-2008

Source: District Statisticas Office, Malindi, 2001

Primary school dropout rate as given by the District Education Office Malindi is 44.7 per cent for boys and 59.9 per cent for girls. Total primary enrolment in year 2000 was 26,671 boys and 20,402 girls thus a total 47,073 children were enrolled for primary education.

During the same year, 6,462 boys and 12,022 girls of primary school age did not enrol in school accounting for 19.5 per cent and 37.1 per cent for boys and girls in the district respectively. Reasons attributed to the large number of children not in school and the low enrolments include lack of educational facilities, low incomes and therefore inability to afford to pay various school levies, and general negative attitude towards education. The immediate challenges therefore is to address high school drop out rate, reduce the cost of school education and increase educational facilities for the ever growing young population especially in Malindi Town. The other challenge is the need to sensitise the people on the importance of education and to discard negative cultural practices.

Age Group 14 - 17 (Secondary School Going Age): The 1999 Population and Housing Census captured 12,582 boys and 11,839 girls in this age bracket. The number is expected to grow to 13,933 boys and 13,110 girls in 2002 and to 17,086 boys and 16,077 girls in the year 2008. The female/male sex ratio of this group is 100:106 indicating that males are more than females. This age group accounts for 9 per cent of the total population.

The district has 12 (twelve) secondary schools and teacher pupil ratio of 1:10. Secondary school drop out rate is 0.3 per cent for boys and 1.7 per cent for girls. Total enrolment in year 2000 was 1,783 boys and 730 girls out of the 13,197 boys and 12,427 girls eligible for secondary school education. Though the secondary school drop out rate is negligible efforts are required to encourage more students as only 13.5 per cent of the boys and 5.9 per cent girls are actually in school and 179 males and 915 females are in tertiary institutions

Age Group 15 – 64 (Labour Force): The district registered 138,469 persons in the age groups 15-64 during the 1999 Census. This is 50 per cent of the total population. The labour force in 1999 consisted of 70,051 males and 68,418 females. This number is expected to be 153,338 (77,573 males and 75,765 females) and 188,038 (95,128 males and 92,910 females) by the year 2002 and 2008 respectively. The labour force has a female/male sex ratio of 100:102. The district has a dependency ratio of 100:99 implying that for every 100 persons in the labour force, there are 99 dependants. This growing labour force needs to be deployed in productive activities such agriculture and Jua Kali.

Age Group 15-49 (Female Reproductive Age): The size of population of females in reproductive age bracket determines the crude birth rate, the rate of population growth and the demand for health services. High population of females in the reproductive age group implies increased population growth rate hence predominance of young people in the population.

This group form 23.5 per cent of the total district population. There was a marginal increase in number of females from the previous development plans to the current plan by 0.5 per cent from 23.0 per cent. The total population of females of childbearing age

was 66,209 females in the 1999 Census. The figure is projected to 74,429, 80,465, 86,992 and 94,049 by end of year 2002, 2004, 2006 and 2008 respectively. District total fertility rate is 6.1 children/women, which is higher than the national figure of 4.7 Children/women. This high fertility rate needs to be checked to lower the population growth rate.

The main cause of the high fertility rate marriages. The district face difficulties in inadequate maternal health care. In order to combat the high growth rate better facilities especially family planning programme should be stepped up as the contraceptive acceptance stand at 20 per cent, which is still low.

**Urbanization:** Malindi Municipality and Ngomeni Town centre are the only towns with population of 2000 and above. Urban population has a growth rate of 4.2 per cent per annum. The major urban population is expected to be 141,124 and 181,383 by the year 2002 and 2008 respectively.

Goshi, Ganda and Mambrui town Centres which boarders the Municipality featuring a peri urban settlement pattern have high population densities ranging from 343 persons per km<sup>2</sup> to 263 persons per km<sup>2</sup>.

Tourism, industry and fishing are well established within Malindi and Ngomeni. Malindi Town has the best tourist hotels and attraction in the country. This explains the high concentration of people.

Urbanization is the major course of migration and settlement pattern in Malindi District. This is well illustrated in Table 2.5.

Table 2.5 Employment by Industry in Malindi Town 1997 – 1998

Industry	1998			1999

Total	6,512		¥ .	7,542

Source: District Statistics Office, Malindi, 2001

From Table 2.5, it is observed that wholesale, retail; restaurant and hotel industry is the main employer in Malindi District followed by community, social and personal services; agriculture taking the third leading role.

Mortality Rate: The district reported a crude death rate of 13 per thousand on average and life expectancy of 56 years. Infant mortality rate in the district is 85/1000 while child mortality rate is 187/1000. The three mortality rates are on the upper side of the national proportions (rates). Statistics from the district hospital indicates that maternal mortality rate in the district is 62/1000 live births and total fertility rate of 6.1 children per women. All these are higher than the national figures of 59/1000 live births and on average 4.7 children/woman.

There was a 24 per cent increase in the family planning attendance in the year 2000 compared to 1999 when 12,742 persons were attended in public health facilities.

### 2.4.2 Poverty

According to data contained in the Malindi District Poverty Assessment Report-2000, the district has an estimated 198,120 persons considered to be in absolute poverty. They are defined as persons who are unable to meet basic food and non-food requirements. Table 2.6 illustrates the poverty situation in the 3 divisions in the district.

Table 2.6 Poverty Levels by Division

Division	No. of Poor	% of Total Population

Source: Malindi District Poverty Assessment Report; 2000

The poor persons or households in the district are characterized by the following: high diseases incidence high cost of drugs and treatment, food shortages, poor state of dwelling units (shanties) both in the rural and urban areas, over indulgence in consumption of local palm wine and drugs, poor sanitary conditions both in the urban and rural areas and lack of access to clean water. The poverty situation in the district has been exacerbated by the decline in the tourism industry, poor returns from agricultural produce and adverse weather conditions experienced in the recent past.

#### 2.4.3 HIV/AIDS

According to the Ministry of Health, the district's HIV/AIDS prevalence rate is between 15-17 per cent. The high prevalence rate in the district is caused by promiscuity, prostitution, drug addiction and alcoholism, traditional practices such as wife inheritance, polygamy, and belief in witchcraft. This trend has led to increased poverty levels in the district.

Major challenges brought about by the emergence of HIV/AIDS in the district include increase in number of children in need of special protection. An estimated number of 23,604 persons are infected with HIV in Malindi District, with a cumulative number of about 4,013 people having died of AIDS. The HIV/AIDS prevalence in the district is estimated at 15 per cent implying that one in every seven adults is infected with the virus.

Records from the District HIV/AIDS screening centre indicates that 11.5 per cent of the people tested for HIV were positive during the 1992 to 1998 period. The HIV screening status is as shown in Table 2.7.

Total	12,552	1,445	11.5

Source: Medical Officer of Health, Malindi, 2001

Bed occupancy in the District Hospital by HIV/AIDS patients is estimated to be 30 per cent. It is observed that HIV prevalence is very high among patients accounting for more than 47 per cent of those tested. The total HIV screening status for the district annually from 1992 to 2000 is shown in Table 2.6.

Table 2.8 Annual HIV Screening Status, 1992-2000

Year	No. Tested	No. Positive	Percentage
1992	1,368	: 135	9.9

Source: Ministry of Health Annual Reports, 2001

The percentage of those testing HIV positive has been increasing over the years from 9.9 percent in 1992 to 16.8 per cent by 1999.

HIV/AIDS Distribution: The distribution of the epidemic by division shows that, Malindi Division has the highest prevalence with 75 per cent of the total while Magarini Division has 20 per cent and Marafa Division has only 5 per cent of the total as shown in Table 2.9.

Table 2.9 HIV Prevalence by Division

Division	No.	Percentage
Malindi	17,703	75.6
Magarini	4,721	19.8
Marafa	1,180	4.6
Total	23,604	100.0

Source: Medical Officer of Health Office, Malindi 2001

Malindi Division, which is also the District Headquarters, leads the other divisions in terms of HIV prevalence due to its higher concentration of migrant labour and tourism. The latter attract commercial sex workers from the rural areas and other parts of the Republic.

On the distribution of HIV by age, it is observed that about 87 per cent of the HIV positive people in the district are between the ages of 21 to 40 years, Table 2.10 shows the distribution of the HIV people by age groups.

Water: Scritt-And areas (Marale, Chakama, aga yellong district have acute water problem, Women transport to the district have acute water problem. Women transport to the district have acute water problem. Women transport to the district have acute water problem.

There is no marked difference between the district prevalence by age group when compared to the national situation. Regarding the marital status, it is observed that 77 per cent of the HIV people are married while only 23 per cent are single.

The distribution of the HIV people by occupation indicates that the hotel and trade industry account for 43 per cent of the total HIV cases in the district as the prevalence by Industry is as shown in Table 2.9.

People within the hotel industry form the highest percentage of the total of those with HIV. The percentage of people recorded as unemployed is also very high, though some of those in this category may be commercial sex workers. The record of the percentage of those in this category may be commercial sex workers. The record of the recor

### 2.4.4 Gender Inequality

Gender concerns in Malindi District relate to the place of men and women in society, education, economic activities, land and other property ownership. In the district women form the bulk of subsistence agricultural labour are engaged in activities such as growing and marketing of farm produce. Other chores include caring for children and other domestic chores. Many women in the district do not own land and other property and therefore cannot use land as collateral to get bank credit. In semi-arid areas such as Marafa, Chakama, Lango Baya, Jilore, Fundisa and Gongoni women devote many more hours looking for water. The semi-arid areas of semi-arid areas and semi-arid semi-arid areas such as Marafa, Chakama, Lango Baya, Jilore, Fundisa and Gongoni women devote many more

Health Care: The district has inadequate health facilities especially in the rural areas. Issues concerning mother and childcare are not adequately addressed in most rural facilities. The same rural health facilities are also far from the community making them inaccessible. Also as a result of high poverty levels, women are discouraged from visiting the facilities due to fee charges.

Clashes, banditry and violence: This man-made calamines can happen slywhere in the district. Serious banditry incidences can occur in areas bordering Tanz River District,

Water: Semi-Arid areas (Marafa, Chakama, Lango Baya, Jilore, Fundisa, Gongoni) of the district have acute water problem. Women travel long distances looking for water for domestic use. This takes most of their time, which they could have used elsewhere in productive and economic activities. The water quality in most areas is low thus exposing them to diseases.

Education: Large number of women in the district remain uneducated due customs, which favour the man. The level of girl child education remains low as indicated by statistics from the Ministry of Education which show that only a small percentage of girls complete class eight and a further small number join form one as indicated in Table 2.12. It is reado at it sums bearing and graphic and contents famous and or bearing.

Table 2.12 Status of Girl Child Education

Magarini		. 18	Q. L. 10.7	I ni nwore sa si vaso 260
Marafa		8	8.7	127

Source: District Education Office, 2001

Other detrimental practises affecting girls in the district include early marriages and placement in casual employment as domestic workers.

HIV Prevalence by Industry

#### 2.4.5 Disaster Management

Fire disaster: Areas vulnerable to fire include unplanned settlement areas such as schools; hospitals, markets, airports and petrol stations are also Maweni, Gongoni, Kisumu Ndogo, Muyeye, Watamu village and Mambrui. Planned areas prone to disasters.

Most of the roofs in hotels and residential houses in the district are makuti thatched and in the event of fire, loses tend to be enormous. In the hotel industry, a fire incidence leads to loss of employment and markets thus contributing more to poverty in the district

Human and animal diseases: Major diseases which are fatal and can occur anywhere in the district includes: viral diseases, malaria, cholera, meningitis, kalazaar and other water borne diseases. Areas along the Sabaki River and the informal settlements are prone to cholera and other water borne diseases due to poor disposal of wastes. The two most dangerous diseases to livestock are Contagious Borne Pneumonia (CBPP) and rinderpest occurs anywhere in the district. The costs associated with disease treatment are very high and there is usually with minimal government subsidies.

Maraia, Chale and Longo Baya, Hone, Fauthsa and Concon women devote many more Road accidents: Areas that are vulnerable to road accidents are those along Mombasa – Malindi – Garsen Road.

Health Care: The district has inadequate health facilities especially in the rural areas areas of the search of th

Clashes, banditry and violence: This man-made calamities can happen anywhere in the district. Serious banditry incidences can occur in areas bordering Tana River District,

while violent clashes can occur in such multi-ethnic areas as Watamu and Malindi. Clashes can also occur due to land issues, water point control, disputes and pasture and especially in areas bordering Tana River District.

Water disaster: Disaster can occur because of oil spills in the ocean. Contamination of water can also happen along the Sabaki pipeline, dams and wells.

Air pollution can occur due to emission of toxic substances from tankers. The areas likely to be affected are Parking Bays in Malindi town and those adjacent to the roads.

Army worms: Outbreak of armyworms can occur in any part of the district. The pests can lead to complete loss in cereals and destruction of pasture. To control them needs mobilization of the field level extension staff, chiefs, local community leaders and the public. In case of severe outbreak, control measures requires pumps mounted on vehicles coupled by aerial spraying and installing armyworm traps in various parts of the district.

Famine: The district is vulnerable to famine particularly marginal areas like Lango Baya, Chakama, Adu, Fundisa, Bungale and Garashi. To address this issue, it requires provision of relief food and seeds for planting.

Disaster preparedness: There are a number of measures that can be taken in the district to minimise the effect of various disasters discussed above. These measures include:

Early Warning System: An Early Warning System needs to be established and information disseminated to the District Disaster Management Committee. Members of the public should also be encouraged to forward such information.

Data requirements for such system include rainfall, condition of roads and bridges, hydrants, water quality, monitoring results, number and state of fire extinguishers in public places, food security, disease incidences, structural conditions in all buildings in the district, gas emissions and oil spills.

Training: All members of the District Disaster Management Committee, medical personnel, firemen and policemen should get basic disaster management skills. Training on disaster management should include first aid, fire fighting and rescue operations in high rise buildings, swimming and rescue operations from shipwrecks, road accidents victims' management and rescue and evacuation skills for disaster.

Resource Identification and Mobilization: To control disasters effectively, requires a high level of alertness. Stocking of various items and supplies for disaster response should include medical drugs and equipment, food, refrigerators and vaccines, communication equipment, and transport facilities. Since government resource are not adequate, the District Disaster Management Committee should have an inventory of equipments which can be availed by NGOs and the private sector.

the district include, Marafa, Jilore, Mambrui Hills, Magaruni, Timboni and Mjanaheri.

Establishment of a Disaster Fund: A Disaster Fund needs to be established in the district.

District Disaster Management Committee: The district needs an operational Disaster Management Committee with membership drawn from government departments, private sector, NGOs, and other stakeholders.

# 2.4.6 Environmental Conservation and Management

Climate and physiographic conditions have a great influence on socio-economic activities in the district. Poor farming practices, deforestation and settlement patterns have caused great environmental impact in the district. The major adverse environmental effects include land degradation, deforestation, sea erosion, and water pollution, dumping of commercial and domestic waste in town, marine pollution and soil erosion.

Deforestation: Tree felling without replacement in non-gazetted forests such as Marafa, Mida and Madunguni have reduced the forest area in the district. These areas have been opened up for agriculture and settlement because they are viewed as a common resource to the community. The indigenous trees in Mkilifi, Mrihi and Mhuhu areas are exploited for timber, poles and firewood. Most of the charcoal in the district comes from Fundissa, Adu, Marereni, Chakama, Jilore, Lango Baya, Marafa and Bangale. These activities have greatly reduced the forest area in the district. Mangrove forests in creeks and estuaries are also targeted for firewood, poles, salt and lime burning. These forests are a natural nursery for the fish and migratory birds and uncontrolled exploitation is likely to affect marine life here.

Waste Disposal: The Municipal Council of Malindi and Green Town Movement has provided bins for litter but they are not enough. The amount of plastic papers and polythene seen in town is increasing and needs urgent action. This can be done by encouraging the establishment of an industry, which can convert the waste into other useful products, can do this. Most of the houses and hotels built along the beaches use septic tanks and sewage pits as a means of waste disposal and allows affluent to seep into the ocean. This practice is likely to affect the flora and fauna along the shores. Trawling close to the seashore has also been responsible for the destruction of marine life. Regulation of trawling, tourism activities and centralisation of waste treatment are essential for pollution control.

Water Pollution: Water pollution is common in Timboni and Magarini where salt and sand harvesting is prevalent. These activities have increased water salinity and erosion. River Sabaki is also heavily polluted due to poor sanitation and human activities up stream.

Soil Erosion and Degradation: Sloping terrain and poor land use practices in most parts of the district have increased vulnerability of these areas to soil erosion. The most common practices include, slash and burn and shift cultivation. Areas mostly affected in the district include, Marafa, Jilore, Mambrui Hills, Magarini, Timboni and Mjanaheri.

# 3.1.6 Project and Programme Priorities

## B: On-going Projects and Programmes: Crop Development

Project Name Location/Division	Objectives	Target	Description of Activities
Cashew Nut Rehabilitation Project District wide	Improvement of cashew nut production.	25 farmers as pilot, then spread to all the farmers.	Rehabilitation and management of cashew nut trees through pruning, weeding, pest and disease control and planting of seedlings from high yielder.
Integrated Tree Crop Development Project Malindi Division Mijomboni, Kakuyuni and Sabaki	Per Suchem	To cover tree crops namely, cashew nuts, mangoes, and citrus; Establishment of 5 Group nurseries; Over 700 acres to be brought under tree crops; 1,000 farmers will benefit from 100,000 seedlings; 150 farmers to be trained on management for better/increased production.	Train the farmers on tree crop husbandry; Avail the tree crop orchards by establishing tree nursery for mangoes, cashew nut and citrus; Build the capacity of relevant groups and societies involved in marketing and processing of tree crop products.
Farmers Field Schools Extension Approach (FFS) District wide  Meanwood from again and from again and from again and from again	To improve production through adoption of new technologies to increase food production; Poverty reduction through farming activities.	To empower farmers to make management decisions relating to their farming activities; Establishment of 48 FFS (1,440 farmers trained in FFS).	Participatory technology transfer to the rural communities in crop/livestock production.
Sabaki/Bridge Horticultural Development Project Malindi, Magarini Divisions	To increase horticultural production through utilization of Sabaki River water resource.	2,000 small-scale horticultural farmers along Sabaki River.	Small-scale horticultural production through irrigation.
Coconut Development Project Malindi and Magarini Divisions	To increase yields and improve the living standards of coconut farmers through increased incomes.	120 smallholder coconut farmers.	Participatory development of rhinoceros beetle control methods, dissemination and impact assessment.
Cotton Rehabilitation Project Marafa, Magarini and Malindi Divisions	To increase cotton production and increase earnings by cotton farmers through high quality cotton.	500 small scale cotton farmers; Rehabilitation of the cotton industry; Introduce cotton in marginal areas as a cash crop.	Seed production, introduction of new production technologies and marketing.

## A: On-going Projects and Programmes: Rural Water Supply

Project Name Location/Division	Objectives	Targets	Description of Activities
Mida-Matsangoni Water Pipeline Gede Location Malindi Division	Bring clean piped water supply to the people and livestock to improve economic productivity; Create employment for water vendors; Promote community-based water supply management.	Increase length of pipeline by 5.85km; Incorporate storage reserve (2no. 50m³ tanks) in the system to make it more reliable.	Construction of remaining part of pipeline; Complete construction of storage tanks for the schools.
Mkondoni Water Pipeline Project Lango baya Location Malindi Division	Bring clean piped water supply closer to the people and their livestock; Improve economic productivity and hygiene to raise living standards; Promote community-based water supply management.	Lay 8km pipeline; Include 120m³ water storage reserve in the system.	Construction of water pipeline and storage tanks including livestock watering facilities.
Malaga Water Project Lango Baya Location Malindi Division	Bring clean piped water supply closer to the people and their livestock; Improve economic productivity and hygiene to raise living standards; Promote community-based water supply	Lay 10km pipeline; Include 120m³ water storage reserve in the system.	Construction of water pipeline and storage tanks including livestock watering facilities.

	management.		At
Kadidsivitsini Dam Marafa Location Marafa Division	Provide water for human and livestock.	Complete the dam by 2003.	Construction of dam.

## A: Ongoing Projects and Programmes: Forestry

Project name, Location /Division	Objectives	Target	Description of Activities
Arabuko Sokoke Forest Management and Conservation Project, Malindi Division	Well-conserved and intact ASF for the future generations; Alleviate poverty.	Community, Forest Guards and Game Rangers.	Management systems strengthened; Law enforcement improved; Awareness increased; ASF well conserved, IGA supported.
Farm Forestry and Natural Resources Conservation Project, around ASF, Goshi Location, Malindi Division	Increase tree cover, improve soil fertility, alleviate poverty.	Community around ASF Goshi area.	Farm Forestry activities; Processing of farm produce and marketing.
Forest Extension District wide	Promote tree planting in the district.	Planting of 50,000 seedlings per year.	Training farmers and assisting them acquire seedlings.

## B: New Projects Proposal: Forestry

Project Name Location /Division	Priority Ranking	Objectives	Target	Description of Activities
Conservation Project in Arabuko Sokoke Forest Malindi Division	1 2 3 1 4 5 8 2 5 6 7 9 1 3	To enhance conservation.	All areas adjacent to the forest; Construct 10km of fence.	Elephant fencing management.  Justification: To protect farmers from wildlife from forest areas.
Madunguni Forest Goshi Location Malindi Division	2	Protect the forest and generate income for the council.	Have the forest gazetted by end of 2002.	Gazettment and conservation of the forest.  Justification: The Government will get revenue.

#### On-going Projects and Programmes: Irrigation Development A:

Project Name Location/Division	Objectives	Targets	Description of activities
Chakama Irrigation Scheme Chakama Location Malindi Division	To make the scheme operational so as to increase crop production.	To put all the 60.4 ha under irrigation.	Repair of canals, pump house and engines.
Mongotini Irrigation Scheme Goshi location Malindi Division	To make the scheme operational so as to increase crop production.	To put all the 40.0 ha under irrigation.	Complete construction of the canals, pump house and install the engine.
Sabaki Bridge Irrigation Malindi Location Malindi Division	To make the scheme operational so as to increase crop production.	To put all the 27 ha under irrigation.	Complete construction of the canals, pump house and install the engine.
Sabaki Minor Irrigation Malindi Location Malindi Division	To make the scheme operational so as to increase crop production.	To put all the 8.4 ha under irrigation.	Complete construction of the canals, pump house and install the engine.

#### **B**: New Project Proposals: Conservation

Project Name Division/Location	Priority Ranking	Objectives	Targets	Description of Activities
Management of Marine and Land-Based Programme District wide	7.16	Control pollution, erosion, exploitation, siltation of reef and run offs of chemicals.	Come up with the plan by the year 2003.	Establish integrated management plan for conservation with stakeholders.  Justification: There is currently no plan in place.
Zoning Plans and Regulations District wide	2	Control exploitation and over use of resources.	Come up with clear zone by the end of 2002.	Establish water skiing zone, underwater traits, fishing zones and no use zones.  Justification: Currently there is no zone resulting in conflict of interest.
Infrastructure and Development and Purchase of Equipment District wide	3	Enhance management of the parks.	Undertake two projects every year.	Construct a picnic site, toilets, public paths and access to the beach, shower rooms for visitors; Purchase equipment: computer, vehicles, mooring buoys, spotlights, radios.
Additional Legislation for Parks Management District wide	4	To enhance protection of parks.	Come up with all conclusive laws by 2005.	Justification: The available facilities are inadequate.  Draft more comprehensive regulations for effective law enforcement.
a Transfer of the second of th	marker.	CF (. 1) s.	Land San Carte	Justification: The current law are inadequate.
Education and Awareness Programme District wide	5	To make local people appreciate conservation.	Come up with the programme by the end of 2003.	Develop Conservation lecture programme for schools, visitors and locals.  Justification: There are no such programmes targeting the communities.

## B: New Project Proposals: Environment

Project Name Division/Location	Priority Ranking	Objective	Target	Description of Activities
New Dumping Grounds Malindi Town Watamu Town	1	To Maintain town cleanliness.	Establish the two sites by the year 2004.	Identification and purchase of land; Construction of access roads; Establishing of dumping grounds.
			K EXH TV T III	Justification: The available sites are about to get filled up.

### 3.1.7 Cross Sector Linkages

As the most important sector in the district, Agriculture and Rural Development feeds Trade and Tourism Sectors with products and also creates market for the same. Activities on physical infrustructure, human development done on land thus provide a favourable environment for other sectors to thrive.

Corta Paral Jan Ca

henva Published Sovered

#### 3.2 PHYSICAL INFRASTRUCTURE

This sector consists of roads, electricity, air transport and telecommunication, building, water works, energy, information transmission facilities. Developed physical infrastructure provides an enabling environment for other sectors to flourish in the District.

#### 3.2.1 Sector Vision and Mission

The mission of the sector is "for enhanced sustainable economic growth, the sector will provide physical infrastructure through rehabilitation, improvement and effective management of the existing infrastructure facilities. In the medium term, the sector will focus on measures aimed at improving both quality and equality of facilities that are likely to generate greater economic impacts in the economy. In the long run the sector is expected to be a leading input in the country's overall goal of poverty alleviation by providing an efficient network of basic infrastructure such as roads that will stimulate industrial and agricultural development".

#### 3.2.2 District Response to Sector Vision and Mission

The district will ensure the available physical infrastructure is rehabilitated, well maintained and new facilities are developed. This will uplift the growth of other sectors of the economy of the district.

#### 3.2.3 Importance of the Sector In the District

Improve communication, facilitates the movement of people for socio, cultural and economic activities. Provide energy for the industry trade and tourism activities and also domestic consumers. Provide people with recreational facilities and social amenities.

#### 3.2.4 Roles of Stakeholders in the Sector

Stakeholders	Roles
Works Department	Maintain and repair roads; Fund new roads projects
Telkom	Maintenance of telephone lines; Expansion of telephone services.
Ministry of Energy	Expansion of lower lines.
Kenya Power and Lighting	Distribute and supply of power; Maintenance and Repair of the system.
Kenya airport Authority	Fund the expansion of the airport Maintain standards of the airport
Municipal and County Council Malindi Municipal and Malindi County	Fund road maintenance; Set aside land for infrastructure development.
Council is the same to the first partition of	anted set or mines tomorphic technical set.
National Water Conservation and Pipeline Cooperation	Supply of water and improve the distribution treatment of water; repair and maintain pipeline; Manage water supply.
Kenya Wildlife Service	Maintain roads in the parks and reserves.
Kenya Broadcasting Corporation	Provide radio and television services.
Postal Office	Offer Postal Services.

Stakeholders	Roles	
		*
Physical Planning Department	Plan for the towns.	

## 3.2.5 Sub-Sector Priorities, Constraint and Strategies

Sub-sector	Priorities	Constraint	Strategies
Roads	Repair and maintain the roads.	Low funding; Shortage of equipment.	Increased funding; Purchase of machinery to save on cost of hiring.
Airport	To make the local airport meet international standards.	The small size of the airport making it unable to accommodate large plans leading to reduced passenger traffic.	Improvement and expansion of the facilities; Aggressive marketing of the town; Increase local production to increase volume of cargo.
Energy	Extend the electricity supply to rural areas; Encourage use of solar power; Encourage constant supply of power.	Frequent power fluctuations; High cost of electricity and installation and solar power equipment; Low coverage.	Solicit for finding for the rural electrification programme; Encourage other forms of energy.
Postal Services	To make the service accessible to all the people.	Inadequate land; Inaccessibility in the hinterland due to poor road infrastructure; Poor telecommunication network; Low human migration.	To encourage partnership with the society by giving them agency services; Expand in the rural areas by targeting administrative centres; health centres to put our services there; Intensify marketing of products; Encourage community-based group to own their own private letterboxes; Start facilitation of financial services by offering saving bank accounts in the rural areas to uplift their earnings and saving.
Major Water Works	Improve water reticulation and distribution.	Ageing pipeline leading to frequent bursts; Decrease in yields in the main water wells; Threats on the wells by river Sabaki floods; Inadequate funding.	Protection of the well fields; Rehabilitation of the pipeline; Expansion of the pipeline.
Urbanization	To ensure a planned growth of urban areas.	Upgrading of the informal settlements; Create employment opportunities in the rural areas.	High rate of rural- urban migration; High growth rate of informal settlements.
Transport	Have a well-developed transport system.	Inadequate funding; Uncontrolled growth of the towns.	Development of transport infrastructure; Enforcement of by-laws; Updating of town plans.
Broadcasting Services	Install television services.	Non enforcement of laws; Absence of television service.	Construction of a transmitter.
Telkom	Expand the telephone line.	Low coverage.	and the state of t
Social Services	Provide Social amenities.	Absence of land for social amenities.	Review of town plans Purchase of land.

## B: New Project Proposals: Social Services

Project Name Location/Division	Priority Ranking	Objectives	Target	Description of Activities
District Revolving Fund for Women Groups District wide		Uplift living standards of women through income generating activities; Develop entrepreneurship among rural women.	Benefit 1000 women annually.	Create a credit services scheme.  Justification: The existing loan scheme are inadequate in coverage
Youth to Youth Programme District wide	2	To Involve the out of school youths into various social and economic activities aimed at harnessing their energies and talents into purposeful development activities and thereby ensuring that such youth grow into useful citizens.	Cover 500 youth per year.	Provision of guiding and counselling services. Finding suitable employment for the youth through income generating activities; Assist youth/bright students by providing school fees and related items; Dissemination of information on IV/AIDS; Start income generating activities for youth; Justification: There are no such programmes in the district.

#### B: New Project Proposal: Shelter and Housing

Project Name Location/Division	Priority Ranking	Objective	Target	Description of Activities
Council Houses Ngala Phase One and Two Malindi Location Malindi Division	1 .	Provide better housing.	Renovate 10 units every year.	Rehabilitation of council houses.  Justification: This building is in a poor state.

#### 3.4.7 Cross Sector Linkages

Human resource as a factor of production is very important for stimulation of all the Sectors. The Human Resources sector ensures that educated, skilled and healthy manpower is available in all sectors for sustainable development.

#### 3.5 INFORMATION COMMUNICATION TECHNOLOGY

The district, like other districts has also been concerned about the storage and dissemination of information. This sector addresses information through the strengthening of the District Information and Documentation Centre, adoption of modern technology and structures and institutionalisation of ICT training.

#### 3.5.1 Sector Vision and Mission

The vision for this sector is "for Kenya to be at the forefront in Africa in the use of Information Communication Technology (ICT) to improve the quality of life and competencies". Its mission is "to promote and enable the society by developing a National Information Infrastructure (Nill) and skills for all Kenyans regardless of geographical or socio-economic status".

### 3.5.2 District Response to Sector Vision and Mission

To have local people have access to relevant information for the development of the district.

### 3.5.3 Importance of the Sector in the District

Creation of employment opportunities; ensure that information on socio-economic issues is available; enhance business opportunities through promotion of products in Internet; create speedy and efficient services delivery both in the private and public sector and ensure users are educated, entertained and informed.

## 3.5.4 Role of Stakeholders in The Sector

The main stakeholders in Information Communication Technology include:-

Stakeholders	Roles
Telkoms Kenya	Providing telephone links to the users

14 strand M.	Ensure that the Information Communication Technology facilitates are affordable and accessible to the majority
Will Hall	Avail the facilities

# The Sub Survey Priorities, Constraint and Strategies

mille	Principles (	Constraint	Strategies
Same of a second	property on st.	Inadequate training institutions; High cost of hardware and connection charges; Lenorance on the importance of information technology.	Introduction of skills in schools; Create awareness for increased investment on modern technologies.
Indicates	and all necessary  and an arrange	The users lack the awareness of the need for the DIDC; Lack of funds to put up the DIDC and for procurement of the required equipment and stationary; Scattered information.	Provide awareness to provision of the physical facility and equipment; Training of Staff concerned with data collection and processing the documents; Centralize data centre (DIDC).
	wase he senne ower of all manufactor fraings.	High cost of news paper; Inadequate coverage of local issues; Inadequate funds for wider coverage and in-depth research; High illiteracy level.	Establishment of local radio station which will giv local issues and advertisements more air time; avail adequate funding for detailed research Internet connection; Establishment of local
			newspaper; Finance adult education.

## ISM Project and Programme Proposals

# New Proposats: Information Technology

Prolings Vigano.	Franking	Objectives	Targets	Description of Activities
Service School British Grands Service School		improve services executedly in Treasurer's Expariment.	I no. Computer purchased every year.	Buy and install computers.  Justification: The existing accounting system is slow and cumbersome.
Consider Continue	7	To improve staff performance efficiency to maximize resource.	Training 120 public officers in the plan period.	Training of staff on computer.  Justification: Most public officers are not computer literate.
MANCH STA	J. J. Salletinistis	historie the	Have all public office on the net by the end of Plan period.	Connection to internet.  Justification: Most public officers have no access to vital information, as they are not connected to the internet.
CHARLING CHARLE	The state of the s	Ritarice computer	8 No. by 2004,	Construction and equipping of schools computer laboratories. Justification: This will build the capacity for computer skills at early age.

#### 3.5.7 Cross Sector Linkages

Information Communication Technology Sector provides opportunities for trade, tourism as they market their goods and services via the Internet. Access to information provides better service delivery as institutions concerned with public administration, safety, law and order can be more efficient and fast in responding to people's concerns. The provision of electricity through the physical infrastructure sector will enhance the development of ICT in the district and its proliferation to the rural areas.

#### 3.6 PUBLIC ADMINISTRATION, SAFETY, LAW AND ORDER

This sector looks at the various aspects concerning the use and control of resources in the district. Issues to be tackled include: administration issues, development of policies, financial management, development planning, legal service, penal institutions, local government, probation services, prosecution and administration of justice

#### 3.6.1 Sector Vision and Mission

The vision of the sector is "Prudent Management and governance in order to maximize the welfare of all Kenyans", while its mission is "to promote socio-economic and politically stable development of the country through the provision of good and democratic governance and development administration, efficient management of human resources and capacity building, visionary economic planning and prudent fiscal policies. Ensuring overall macro-economic stability and the creation of an enabling environment of economic growth and development".

### 3.6.2 District Response to Sector Vision and Mission

To ensure that local people are accorded adequate protection against crime through the enforcement of legal laws. The people are also represented in all policy decision-making, process, planning and implementation of the same.

### 3.6.3 Importance of the Sector in the District

Will ensure that peace, law and order prevail; make decisions, plan and coordinate development activities; implementation development projects; settle and adjudicate disputes and punish criminals and civil offenders.

#### 3.6.4 Role of Stakeholders in the Sector

Stakeholder		Roles
Police	, N	Maintain law and order.

Probation Department	Providing offenders with guidelines and counselling services and supporting Community Service Order.
Private Security Firms	Supplementing police efforts in maintaining security.
Law Firms	Providing legal services.
Prisons Department	Punish offenders; Rehabilitation of offenders.

# 3.6.5 Sub-sector Priorities, Constraint and Strategies

Sub-sector	Priorities	Constraints	Strategies
Security	Reduce the crime rate.	Inadequate manpower, transport and equipment; Non-corporation by members of the public to give out vital information.	Formation of vigilant groups and community policing; Availing information to the police; Increased funding.
Regional Planning	Harmonize development planning and implementation of projects.	Limited resources and capacity; Lack of grass root consultation in project prioritisation.	Promote community participatory approaches in identification of problems/or projects, design and management.
Development Planning	Prepare implementable plans.	Inadequate data for planning; Inadequate resources such as funds and transport; Sectoral approach to planning and funding; No legal backing of the DDC.	Conduct frequent surveys on various issues; Legalize DDC; Strengthening the co-ordination office; Creation of District Development Fund for Community Action Plans (CAPs).
Probation Services	Improved probation services; Effective community service orders; Programme implementation.	Shortage of personnel; Inadequate funding; Low community awareness.	Increased funding; Increase of personnel and use of local leaders; Campaigns to educate the community on both Probation and Community Service Orders.
Administration of Justice	Ensure justice for all.	Lack of adequate space at the current court building; Shortage of Staff and trained personnel; Delays in the administration of justice.	Construction of modern courthouse; Increase staffing.
Data collection	Ensure effective data collection, analysis and dissemination.	Inadequate skilled and unskilled Staff; Inadequate transport equipment and funds; Inadequate complete data base; Un coordinated Survey by various stakeholders.	Increase staff and train existing ones; Adequately funding data collection and dissemination; Construction of a District Information and Documentation Centre DIDC (install information management system).
Penal nstitutions	Offer corrective services.	High contestation; Inadequate funding.	Increase in the number of wards; Enhance use of non-custodial sentences (CSO).
dministration	Ensure mobilization of the community for development and	Shortage of office accommodation; Large size of	Have adequate office accommodation in all units; Provision of transport facilities especially at the locational

Souther Services	in the thirty to	Inadequate administrative skills.	and sub-locational levels; Intensifying barazas for dissemination of knowledge and information; Training of officers to equip them with better administrative skills/ management.
Laboration Section	Improve the welfare of the residents.	Low revenue base; Inadequate resources; Inadequate by-laws.	Improve revenue administration and collection process; Capacity building of the local authorities for improved service delivery; Strengthening financial management; Staff rationalization and training; Privatisation of services;
Strangler Art of 1991 Strangler	production of the standing of	borrellar i ya m <b>s</b> i militar sa	Aggressive marketing to attract investor; Review and implement the by-laws.
Registration of Persons	To register all legible persons.	Funding inadequate; Inadequate offices.	Conduct awareness on the need to register.
Civil 1 1 1 1 1 Registration 2011 / 2	Ensure complete birth and death registration coverage.	Unreported cases; Lack of personnel and computer; Low funding to conduct workshops for sensitisation on registration.	Conducting sensitisation campaigns; Provide adequate personnel and equipment; Provide adequate funding.
Legal Service	Make legal services affordable.	High cost of legal services.	Identify and invite institutions that offer free legal services.
Financial Management	Have an efficient financial management system.	Unskilled personnel; Use of old financial	Computerization of financial systems; Training personnel.
Development of Polices	Involvement of all the people in coming up with policies.	Weak structures at the community level.	Strengthening of the district focus for rural development policy.

# CHAPTER FOUR IMPLEMENTATION, MONITORING AND EVALUATION

and the company of the company of the company of the company for the company of t

#### 4.0 INTRODUCTION

This chapter looks at the monitoring and evaluation mechanism that will be used during Plan implementation. The areas to be reflected include institutional framework for monitoring and evaluation. An implementation monitoring and evaluation matrix, which gives the project name, cost, time frame, monitoring indicators, instruments for monitoring, and stakeholders and their responsibilities will form the main body of the chapter.

# 4.1 INSTITUTIONAL FRAMEWORK OF THE MONITORING AND EVALUATION

In order to ensure that the 2002-2008 District Development Plan is implemented with stakeholders' involvement, it will be in order that a framework is developed from the grassroots to the national level. At the grass root level, each project will have a project committee, which will report to the sub-locational level. The administrative structure is followed up to the Provincial level, which will in turn be connected to Inter-ministerial Monitoring Committee.

Project Committee: The committee will monitor the day-to-day implementation of projects at the field/site level. The committee will give suggestions and recommendations based on local situation. The secretary of that committee with technical experts would prepare projects reports covering project management, finances, and implementation constraints and propose suggestions.

Sub-Location Monitoring Committee: The committee would discuss, and visit all projects in their jurisdiction. Their recommendations would be used to modify the community action plans for the proposed village and give guidelines for supervision.

Divisional Monitoring Committee: To avoid delays in flow of recommendation from the village, the sub-location and location levels would be absorbed in Village Monitoring Committee and Divisional Monitoring Committee.

The Divisional Monitoring Committee will forward their recommendation to the district in the shortest time in case of any implementation constraints. The committee will have representatives from Village Monitoring Committee, NGOs operating in the division, Divisional Heads of Departments and religious leaders.

District Project Monitoring and Evaluation Committee (D.P.M.E.C.): The committee, shall be composed of District Commissioner as the chairman, have representatives from NGOs, Heads of Departments and Parastatals, prominent personalities and religious leaders. The committee will have its secretariat at the District Development Office. The DPMEC will be able to form sectoral working groups.

Provincial Monitoring and Evaluation Committee: The committee shall be facilitated to make one visit in a year to the districts. The composition of the committee would be Provincial Commissioner as chairman, Provincial Head of Departments and Parastatals.

## 4.2 IMPLEMENTATION, MONITORING AND EVALUATION MATRIX

# 4.2.1 Agriculture and Rural Development

Project Name	Cost ·Kshs	Time Frame	Monitoring Indicators	Monitoring Tools	Implementing Agency	Stakeholder Responsibilities
Cashew Nut Rehabilitation	1.2m	2002- 2008	No of farmers trained.	Report from community; DALEO annual report.	DALEO	Farmers participate in project implementation.
Integrated Tree Crop Development	18.8m	2002- 2008	No. of seedling produced.	Report from community; DALEO annual report.	DALEO	CDA provide funds.
Farmers Field Schools	Im was	2002- 2008	No. of schools started.	Report from community; DALEO annual report.	DALEO J HEED	CDA provide funding.
Sabaki Bridge Horticulture Development Project	2.0m	2002- 2008	No. trained.	Report from community; DALEO annual report.	DALEO	Farmers participate in the project.
Coconut Dev. Project	3m	2002- 2008	No. of farmers trained.	Report from community; DALEO annual report.	DALEO	Farmer participates in the project.
Cotton Rehabilitation	2.5m	2002-2008	No. of farmers trained and acreage on cotton.	Report from community; DALEO annual report.	DALEO	Farmers grow cotton and market.
Irrigation Development	47.1m	2002- 2008	No. of schemes completed and under irrigation.	Report from community; DALEO annual report.	DALEO	Farmers utilise the irrigation land.
Small Dairy Development Project	4m	2002-2008	No. of women groups benefiting and number of heifers distributed.	DALEO reports; HPI reports; Reports to DDC.	DALEO/Heifer Project International (HPI).	Farmers rear the animals and market the milk.
Tick Control	0.67m	2002- 2008	Percentage of animals dipped.	District Veterinary; Officer annual report; Report to DEC and DDC.	District Veterinary Officer.	Livestock farmers take their animals for dipping.
Artificial Insemination Service	0.3m	2002- 2008	No. of services offered.	District Veterinary Officer annual report;	District Veterinary Officer.	Livestock farmers adopt the service.
