COUNTY GOVERNMENT OF TANA RIVER

ANNUAL DEVELOPMENT PLAN

FY 2019/2020

AUGUST 2018

STRATEGIC STATEMENTS

VISION

A peaceful, cohesive and prosperous county offering high quality of life to it citizens.

MISSION

To ensure effective and accountable leadership, promote a just, democratic and secure environment and establish strong governance institutions to empower citizens, for the achievement of socio-economic and political development.

FOREWARD

This Annual Development Plan (ADP) has been prepared in accordance with Section 126 sub-section I of the Public Finance Management (PFM) Act, 2012. The Act stipulates that County Governments shall prepare Annual Development Plans (ADP) in accordance with Article 220 (2) of the constitution.

This Annual Development Plan (ADP) 2019/2020 describes the County in terms of the geographical location, size, physiographic and natural conditions, demographic profiles as well as the administrative units. This ADP outlines the broad strategic priorities, policy thrusts and objectives of the County Government of Tana River. The strategic priorities and government policy objectives inform the identification of priority projects and Programmes to be implemented during the financial year. This is aimed at addressing the development challenges faced by the county after making a review of the status of the previous year's projects.

The County Government of Tana River functions to deliver key and essential services such as health care, water supply, agriculture development, road infrastructure, urban planning and development among others enshrined in the County Governments Act, 2012 Section 5 and the functions are detailed in Part II of the fourth schedule in the Constitution of Kenya, 2010.

The Annual Development Plan (ADP) is an annual document that guides in the implementation of projects and Programmes from each county department for the FY 2019/2020 as enshrined in the County Integrated Development Plan (CIDP). This document is largely aligned to the County Integrated Development Plan and the National Development Framework as envisioned in Vision 2030 and the post 2015 development agenda (Sustainable Development Goals).

The development of this ADP employed a comprehensive consultative process involving all the County Government Departments; members of the public, stakeholders and development partners, where their inputs were gathered and consolidated in this document

for

MATHEW BABWOYA County Executive Committee Member, Finance and Economic Planning

ACKNOWLEDGEMENT

This County Annual Development Plan was prepared with the support and generous contribution of many individuals and organizations. I would like to appreciate the efforts made by H.E Major (Rtd) Dhadho Gadae Godhana, the Deputy Governor Mr. Salim Kea Batuyu, members of the County Assembly, members of the county executive, heads of county government departments, representatives of Public Benefit Organization (PBOs), the County Budget and Economic Forum (CBEF), private sector players and members of the public for their selfless contribution towards the preparation of this 2019/2020 CADP.

Special appreciation goes to the CECM for Finance and Economic Planning Mr. Mathew Buya Babwoya for setting off the pace by providing leadership to this entire process. His guidance enabled the process to be completed within strict timelines.

I would like to appreciate the role played by the entire county government staff for their respective roles in this process. More gratitude goes to the CADP Technical Team (secretariat) for their brains behind this whole process led by the County Director for Economic Planning and Budgeting; Mr. Lennox Chilumo Mbwana. Special mention is made to the CADP technical team members; Mr. Francis Ngigi, Mr. Arnold Odipo, Mr. Patrick Kiongo, Mr. Harrisson Mabonye, Mr. Galgalo Jarso Jilo, Ms. Amanda Korasu and Ms Fauzia N. Hiribae.

Last but not least, I would like to appreciate the contributions made by the various stakeholders, members of the public, professional groups, development partners, the business community and other interest groups.

Mr. Ahmed Maalim Barako

Ag. County Chief Officer, Finance & Economic Planning.

LEGAL BASIS FOR PREPARING ANNUAL DEVELOPMENT PLAN

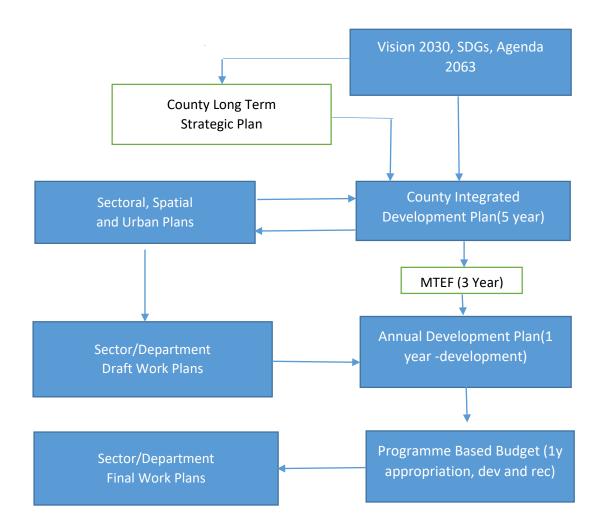

This annual development plan is prepared in accordance with section 126 of the Public Finance Management Act, 2012. The law states that:

- Every county government shall prepare a development plan in accordance with Article 220(2) of the Constitution, that includes
 - a. Strategic priorities for the medium term that reflect the county government's priorities and plans;
 - b. A description of how the county government is responding to changes in the financial and economic environment;
 - c. Programmes to be delivered with details for each programme of
 - i) The strategic priorities to which the programme will contribute;
 - ii) The services or goods to be provided;
 - iii) Measurable indicators of performance where feasible; and
 - iv) The budget allocated to the programme;
 - d. Payments to be made on behalf of the county government, including details of any grants, benefits and subsidies that are to be paid;
 - e. A description of significant capital developments;
 - f. A detailed description of proposals with respect to the development of physical, intellectual, human and other resources of the county, including measurable indicators where those are feasible;
 - g. A summary budget in the format required by regulations; and
 - h. Such other matters as may be required by the Constitution or this Act.
- 2) The County Executive Committee member responsible for planning shall prepare the development plan in accordance with the format prescribed by regulations.
- 3) The County Executive Committee member responsible for planning shall, not later than the 1st September in each year, submit the development plan to the County

Assembly for its approval, and send a copy to the Commission on Revenue Allocation and the National Treasury.

4) The County Executive Committee member responsible for planning shall publish and publicize the annual development plan within seven days after its submission to the county assembly.

CHAPTER ONE: INTRODUCTION

COUNTY GENERAL INFORMATION

1.0 Introduction

This chapter gives the background information on the socio-economic and infrastructural information that has a bearing on the development of the county. It provides description of county overview, position and size, physiographic and natural conditions, administrative and political units, political units (constituencies and wards), demographic features, human development approach, infrastructure development, land and land use, employment, irrigation infrastructure and schemes, crop, livestock, fish production and value addition, tourism and wildlife, industry and trade, the blue economy (including fisheries), forestry, agro forestry and value addition, financial services, environment and climate change, water and sanitation, health access and nutrition, education, skills, literacy and infrastructure, sports, culture and creative arts, community organizations/non-state actors, security, law and order, and social protection.

1.1 Position and Size

Source: Tana River County Development Planning Office, 2018

Figure 1-1: Map of Kenya Showing the Location of the County (Marked in Red)

Tana River County is located in the coastal region of Kenya. The county borders Kitui County to the West, Garissa County to the North East, Isiolo County to the North, Lamu County to the South East and Kilifi County and Indian Ocean to the South. The county straddles between latitudes 0⁰0'53" and 2⁰0'41". South and longitudes 38⁰ 30' and 40⁰15' East and has a total area of 38,862.20 Km². The county has a coastal strip of only 76 Km.

1.2 Physiographic and Natural Conditions

1.2.1 Physical and Topographic Features

The major physical features in Tana River County is an undulating plain that is interrupted in a few places by low hills at Bilibil (around Madogo) and Bura administrative sub-units which are also the highest points in the county. The land in Tana River generally slopes south eastwards with an altitude that ranges between 0m and 200m above sea level.

The most striking topographical feature is the river Tana that traverses the county from the Aberdares in the North to the Indian Ocean in the South covering a stretch of approximately 500km. Besides the river Tana, there are several seasonal rivers in the county popularly known as *lagas*, which flow in a west-east direction from Kitui and Makueni Counties draining into river Tana and eventually into the Indian Ocean. The river beds support livestock as well as wildlife during the dry season since they have high ability to retain water. River beds are most appropriate sites for shallow wells, sub-surface dams as well as earth pans.

1.2.2 Ecological Conditions

The county is divided into four agro- ecological zones namely: CL 3 Coconut – Cassava zone (non ASAL), CL4 Cashew nuts- Cassava zones where the main economic activity is peasantry mixed farming; CL5 Lowland Livestock zone and CL6 Lowland Ranching zones where the locals are involved in pastoral activities. The soils range from sandy, dark clay and sandy loam to alluvial deposits. The soils are deep around the riverine environments but highly susceptible to erosion by water and wind. Soils in the hinterlands are shallow and have undergone seasons of trampling by livestock, thus are easily eroded during rainy seasons.

The vegetation ranges from scrubland to thorny thickets within the riverine area. Shrubs and annual grasses dominate most parts of the region. However, there are enclaves of trees and perennial grasses dominating wetter parts. An invasive tree species called *Prosopis Juliflora*, commonly known in the area as '*Mathenge*' (named after the person who introduced it) has spread rapidly in the area and is threatening to replace most of the indigenous vegetation. It was introduced for fuel-wood production in the Bura Pilot Irrigation Scheme. It grows fast and chokes other vegetation, watering points and the canals, and is colonizing most of the areas that are not cropped, including the riparian environments.

1.2.3 Climatic Conditions

The region has a hot and dry climate within ecological zones ranging from III (in the very high grounds) to VII (in the plains or lowlands). Average annual temperatures are about 30^oC with the highest being 41^oC around January-March and the lowest being 20.6^oC around June-July. Rainfall is low, bimodal, erratic and conventional in nature. The total annual rainfall ranges between 280 mm and 900 mm with long rains occurring in April and May, short rains in October and November with November being the wettest month. The Inter Tropical Conventional Zone (ITCZ), which influences the wind and non-seasonal air pattern for the

river Tana, determines the amount of rainfall along the river line. The dry climate in the hinterland can only support nomadic pastoralism.

1.3 Administrative Units

1.3.1 Administrative Subdivision

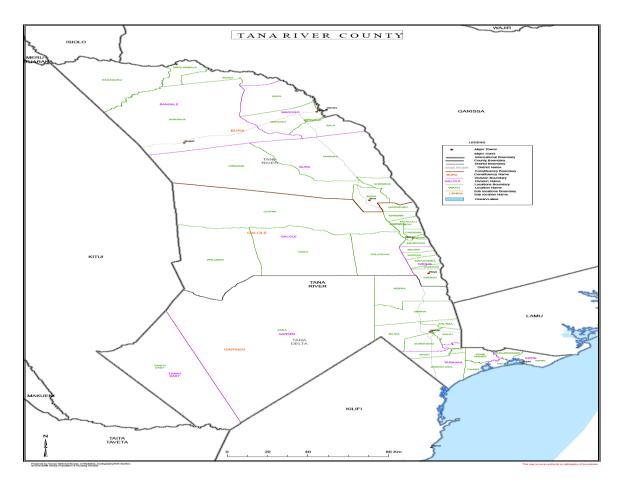

The county is divided into three (3) administrative units namely; Bura, Galole and Tana Delta, 15 wards; 54 locations; and one hundred nine (109) sub-Locations. Table 1-1 shows the area of the county by administrative units.

Constituency	Area(km ²)	No. of wards	No. of Locations	No. of Sub-Locations
Bura	13,191.5	5	16	25
Galole	9,657.3	4	21	45
Tana Delta	16,013.4	6	17	41
Total	38,862.2	15	54	109

Table 1-1: Area of the County by Administrative Units

Source: Tana River County Development Planning Office, 2018

Tana Delta is the largest with 16,013.4 Km² followed by Bura and Galole with 13,191.5Km² and 9,657.3Km² respectively. Figure 1-2 below is a map showing the administrative/political boundaries of Tana River County.

Source: Tana River County Development Planning Office, 2018

Figure 1-2: Map of the Country's Administrative/Political Units

1.4 Political Units (Constituencies, Electoral Wards)

Tana River County has three constituencies namely; Galole, Bura and Garsen with 15 county electoral wards. Table 1-2 and 1-3 shows the county political units by constituency and electoral wards.

Constituency	Number of Electoral Wards
Bura	5
Galole	4
Garsen	6
Total	15

1.4.1 Eligible and Registered Voters by Constituency

In 2017, there were 73,037 registered voters representing about 65.3 per cent of the eligible voters in the county as shown in Table 1-4. The table also indicates the proportion of registered voters to eligible voters.

Table 1-4: Registered Voters by Constituency

Constituency	Registered Voters (2012)
Bura	38,152
Galole	33,356
Garsen	46,819
Total	118,327

Source: IEBC Office, 2018

Garsen constituency with 46,819 registered voters had the highest number of voters followed by Bura and Galole with 38,152 and 33,356 respectively.

1.5 Demographic Features

1.5.1 Population Size and Composition

The projected population of Tana River County in 2018 is estimated at 313,374 with 157,282 being female and 156,092 males. This is expected to increase to 344,595 in 2020 and to 366,661 by 2022, reflecting about 17.7 per cent increase. The county has an inter census population growth rate of 2.83 per cent slightly lower than the national average of 2.9 per cent. The ratio of male to female is 99:100 and the pattern is projected to remain the same over the plan period. Table 1-5 shows population projections by age cohorts.

Age		2017			2018			2020			2022	
Group	Male	Female	Total									
0-4	30,594	29,595	60,191	31,157	30,129	61,294	32,397	31,353	63,750	33,294	32,223	65,516

Source: KNBS, Tana River 2018

Tana River County with 62.2 per cent of the population living in absolute poverty, and with the population growth rate of 2.8 per cent, the projected increase in population has a major and direct impact on the basic needs such as food, water, health and education for all ages. The first priority being food security, it implies that efforts should be made to increase food production to cater for the increased population. In the water sector, the expectation is that the available water sources of River Tana will have to be tapped to increase the volume of clean water for consumption. The health sector is expected to enhance its effort to increase the available facilities, personnel and supply of medicine accordingly.

Additionally, there are special age groups that need targeted interventions because of their special characteristics. These include the under one year, the under five years, 3-5 years, primary school going age, secondary school going age, youth population, female reproductive age, labour force and aged population as shown in Table 1-6 below shows the Tana River County population projection for selected age groups.

Table 1-6: Population Projections for Selected Age Groups

Age Group		2018			2020			2022	
Age Group	Male	Female	Total	Male	Female	Total	Male	Female	Total

Source: KNBS, Tana River, 2018

Under One Year: The county has an estimated population of 12,854 infants in 2018 and is projected to increase to 13,369 by 2020 and 13,740 by 2022. This calls for special interventions in order to significantly reduce the high Infant Mortality Rate (IMR) which stands at 91/1000 (2018), higher than the national figure of 39/1000 in 2016.

Under Five Years: This population comprises of 20 per cent of the total. The population is estimated at 61,294 in 2018 and is projected to increase to 63,750 in 2020 and 65,516 in 2022. The county will implement projects and programmes which are aimed at enhancing immunization coverage and health care. The county will also work towards expanding, equipping and staffing Early Childhood Development Centres (ECDCs) to cater for this group.

Pre-School Education: The County has 322 public ECD centres. Among these, 167 are stand-alone ECDs while 155 are integrated with primary schools. There are 52 private ECDs. The total number of EDC teachers is 298. The teacher - pupil ratio in pre-primary school is 1:82. The total enrolment in public ECDs is 24,666 and 446 in private ECDs. The pre-primary retention rate is 87 per cent with a drop-out rate of 13 per cent while transition rate is 87 per cent. However, this indicates that about 60 per cent of the pre-primary school aged children are at home. There is need for the government to up-scale efforts to ensure all these children access school.

Primary School Age-group (Age Group 6-13): The primary school going age population (6-13 years) in 2018 was estimated at 77,530 and projected to increase to 82,454 and 86,907 in 2020 and 2022, respectively. The increase is expected to put pressure on the existing 165 primary schools in the county. Given this is a national government function, it calls for the construction of more primary schools, improve the facilities in the existing schools and employ more teachers to maintain a reasonable teacher-pupil ratio. The current enrolment stands at 50,348 for public schools and 1,450 for private primary schools, with a total enrolment of 51,798. The teacher-pupil ratio in primary level is 1:55 while dropout rate stands at 40 per cent. The average years of attendance for primary school is 8, retention rate is 60 per cent while transition rate to secondary level is 48 per cent. Efforts need to be put in place to ensure improved retention and transition.

Secondary School Age-group (Age Group 14-17): The population in the age group of 14-17 years (secondary school age) was estimated at 27,368 in 2018 and projected to increase to 29,251 and 31,367, in 2020 and 2022 respectively. This poses a major challenge as the county currently has 32 publics and 3 private secondary schools. The number of teacher stands at 224, making teacher - student ratio1:32 with a total enrolment of 7,215. The dropout rate is 15per cent; while the retention rate is 85 percent.

With the introduction of free day secondary education and increase in bursaries from various devolved funds, the existing schools will not be able to cope with the high demand. There is a need for education stakeholders to invest in constructing more secondary schools, improving the existing

facilities and employment of teachers. Further, investments are required in Youth Polytechnics to absorb those who will not be able to join secondary schools. Secondary school students are vulnerable to HIV infection and drug abuse. The education department, religious leaders and development partners will strengthen in-school counselling and Behavioural Change Campaigns (BCC).

There are six vocational centres in the county with total enrolment of 375 students with 35 vocational training instructors. The teacher student ratio is 1:11; transition rate is 42 per cent while retention rate is 50 percent.

The county has one medical training college in operation and three technical training colleges currently under construction in the three sub-counties.

Special Needs Education: Enrolment of children with special needs remains low. Currently, there are 2 Special units with an enrolment of 152.

Youth (Age Group 15-30): This age group (15-30 years - youth) represents 25 per cent of the whole county population. The population is estimated to be 79,013 in 2018 and will continue increasing to 83,474 and 89,289 in 2020 and 2022 respectively. This population constitutes 58 per cent of the potential labour force thus effective strategies for creating job opportunities should be developed. This is a very active group that needs to be occupied through income generating and sporting activities; investment in skills development so that they can exploit their potential; and information on career opportunities and business development service. The county is challenged in the construction and equipping tertiary institutions and providing bursaries for needy students entering post-secondary school education institutions.

The county will provide this group with behavioural change information and facilities such as youth friendly VCT centres. The county will also invest in expanding sports infrastructure and recreational facilities to make them fully occupied.

Reproductive Age for Women (Age Group 15-49): Women in Age Group 15-49 (Reproductive Age) constitute about 23 per cent (72,274) of the total projected population in 2018. This population is projected to increase to 77,463 and 83,602 in 2020 and 2022 respectively. With total fertility rate of 6.5 births per woman and low levels of contraceptive adoption rates, currently at 21 per cent, the rapid population growth rate of 2.8 per cent is expected to continue. To cater for the increase in females in the reproductive age, investment in health services and facilities is required in the county. Important programmes on family planning, maternal health care and girl child education will be scaled-up.

Labour Force (Age group 15-64 years): This is the economically active age group whose increase will require a commensurate increase in creation of job opportunities. This population stands at 156,097 in 2018, representing about 49.8 per cent of the county total population. This age group is projected to grow to 167,372 and 181,172 in 2020 and 2022 respectively. Of the total labour force, 51 per cent are female and are projected to dominate the age group. Due to the expected increase in the labour force, the county will need to spur growth of many other sectors including manufacturing, processing and trade so that they become more productive.

Currently, 83 per cent of the labour force is engaged in subsistence agricultural and livestock activities. There is therefore a need to ensure that these economic activities are profitable through the support of modern methods and value addition ventures.

The Dependent Population: The dependent population (under 15 years and above 64 years) stands at 164,984 in 2018 and is projected to increase to 177,223 and 185,490 in 2020 and 2022 respectively. The challenge facing the county is to ensure that this dependent population has

adequate food, water and social amenities such as schools and hospitals. The older persons cash transfer and OVC cash transfer programs will be scaled up to take care of the growing needs of the county's old people and vulnerable children respectively.

1.5.2 Urban Population

The county has two urban areas namely Hola and Madogo having a total projected population of 41,586 in 2018 as indicated in Table 1-7. This population represents 13.8 per cent of the total population and is expected to increase at the same rate by the year 2022. This therefore calls for proper town planning.

	2009				2018			2020			2022		
Urban Centres	Male	Fema le	Total										
Hola	8,470	8,867	17,33 7	11,09 5	11,61 5	22,71 1	11,78 2	12,33 4	24,11 5	12,51 0	13,09 6	25,60 6	
Madogo	8,152	7,672	15,82 4	10,67 9	10,05 0	20,72 9	11,33 9	10,67 2	22,01 1	12,04 0	11,33 1	23,37 2

Table 1-7: Population Projections by Urban Centres

Source: KNBS, County Development Planning Office Tana River, 2013

1.5.3 Rural Population

The total rural population is estimated at 47,244 in 2018 representing about 15 per cent of the total population of the county. This population is projected to increase to 50,165 in 2020 and to 53,267 by 2022. Relevant programmes need to be initiated to improve the livelihoods of rural communities and discourage the rural-urban migration.

1.5.4 Population Distribution and Density by Constituency/Sub-county

In 2018, the estimated population density of Tana River County is eight (8) persons per square kilometre. This is however expected to increase to nine (9) persons per square kilometre by 2022.

Table 1-8: Population Distribution and Density by Constituency

Constituenc	Area		Densit		Densit		Densit		Densit
У	Sqkm	2009	У	2018	У	2020	У	2022	У
Galole	9657.3	60,866	6	79,732	8	84,663	8	89,898	9
Bura	13191.5	82,545	6	108,13 1	8	114,81 7	8	121,91 7	9

Source: KNBS, County Development Planning Office - Tana River, 2013

Table 1-9 indicates the population projections of the county by constituency. In 2018, the estimated populations for Bura, Galole and Garsen are 108,131, 79,732 and 126,626 respectively. The population for Garsen Constituency is highest, representing 40.2 per cent, followed by Bura (34.4%) and Galole (25.4%). This trend is expected to remain the same in 2020 and by 2022.

1.5.5 Demographic Dividend (DD)

The Demographic Dividend is the accelerated economic growth that may result from a decline in a country's mortality and fertility and the subsequent change in the age structure of the population.

It is evident that demographic transition is taking place at the county, creating a demographic window of opportunity to harness the Demographic Dividend.

Indicators	2009	2014	2017	2020	2022	2030	2064
	240,00	277,73	303,59	332,15	352,82	446,32	898,17
Population Size	8	4	0	6	2	6	7
% Population below							
15	50.87	48.34	46.36	43.96	42.62	41.77	29.96
% Population 15-64	46.22	49.19	51.32	53.78	55.22	55.77	64.88
%Population above 64	2.90	2.46	2.31	2.26	2.16	2.46	5.16
Dependency ratio	116.34	103.28	94.84	85.96	81.09	79.32	54.13
Total Fertility Rate	6.20	5.8	5.6	5.40	5.3	4.8	2.7

Table 1-10: Demographic Dividend Potential

Source: NCPD, 2018

This demographic window will be achieved when those aged below 15 years in the county are less than 30% of the total population and those aged 65 years and above in the county are less than 15% of the population. The county is expected to achieve this by 2064 as shown in Table 1-10. By then, the population below 15 years will be approximately 29.96 per cent while total fertility will have, on average, dropped to 2.7 per woman of reproductive age. While working age population will have hit 64.88 per cent, only 5.16 per cent of the population will be above 64 years. With this scenario, dependency will drop to 54.13 per cent compared to 116.34 per cent in 2009.

Given the performance of its indicators, Tana River County has two decades in which its leadership can take positive steps in prioritizing youth issues for wealth creation and sustained economic growth.

To harness the DD, the county will implement various interventions in the socio-economic sectors as provided in Chapter Four (4).

1.6 Human Development Indicators (HDI)

The HDI measures human development based on the basic factors of a long and healthy life, the acquisition of knowledge, and a reasonable standard of living. These factors are measured by life expectancy at birth, adult literacy rate and the combined enrolment ratio at primary, secondary and tertiary levels and GDP per capita measured in purchasing power parity (PPP) in US dollars. The county has a life expectancy of 53.8 years compared to the national life expectancy of 57.9 years.

The adult literacy rate of the county is 33.9 per cent compared to national adult literacy rate of 87.38 per cent.

1.7 Infrastructure and Access

1.7.1 Road, Rail Network, Ports and Airports, Airstrips and Jetties

The total road network in the county is 3,377km with about 55 per cent in motorable condition. The total road network is composed of 1,108km (class A - E) of classified roads and 2,269km (class U) of unclassified roads. Out of this only 449km is bitumen surfaced. The major roads in the county include the Madogo – Hola – Malindi road which is dilapidated and impassable at various points during rains. The Kenya National Highways Authority (KeNHA) has however put in place plans to upgrade the 330km stretch to bitumen standard, and the project is in the design phase and construction is set to begin as soon as funds are available. The county boasts of seven airstrips with major ones located at Hola, Bura and Garsen. The county has a 76Km sea front with Kipini operating as a fish landing site which can be potential sea port for fishing vessels. The LAPSSET project will potentially open up the county with road and rail network.

1.7.2 Posts and Telecommunications: Post Offices, Mobile Telephony & Landline.

The county is served by three mobile phone service providers that cover 55 per cent of the county. These services are however concentrated along the Garissa- Malindi road. There are three post offices in the whole county located at Bura, Hola and Garsen. The landline is in deplorable state and does not function in most areas. There are five courier service providers in the county. Internet connectivity is still low with most people using modems from mobile phone service providers. Investments in DSTV, Zuku and other free to air satellite television has nevertheless made access to local and international broadcasts possible in the county. The Kenya Broadcasting Corporation (KBC) Radio is the only media house which has a signal in the county.

1.7.3 Financial Institutions: Banks, SACCOs, Micro Finance Institutions

There are two banks (KCB and Equity bank), three bank agencies (KCB, Equity bank and Coop bank), one SACCO, one Micro-Finance Institution (MFI) and 10 village banks in the county. The banks, SACCO and the microfinance institutions are located in Hola and Garsen as these areas have electricity connection with many commercial activities. These institutions will help to boost the county's economy through provision of various financial services and credit facilities.

1.7.4 Education Institutions: Primary/Secondary schools, Polytechnics, Colleges, Universities

The County has 315 ECDE centres, 152 primary schools and 13 secondary schools. Some of the structures in the institutions are dilapidated. Although the National Government Constituencies Development Fund (NG-CDF) from the three constituencies in the county has been putting concerted efforts to build classrooms, administration blocks, dining halls, laboratories and even dormitories, there is still a glaring shortage of the aforementioned structures. There are three youth polytechnics in the county that need to be expanded to accommodate the rising numbers in enrolment.

1.7.5 Energy Access (Main Sources of Energy, Electricity Coverage)

Majority of the population (87.5%) use wood fuel for cooking and 78.2 per cent use kerosene for lighting. Only 0.9 per cent of the households are connected with electricity. There is a lot of potential for the exploitation of renewable energy sources such as solar and wind, and expansion of electricity transmission in the county through the main grid.

1.7.6 Markets and Urban Centres

There are 10 major trading centres in the county with 24 registered wholesale traders and 773 registered retail traders. There are two registered Jua Kali associations in the county with 31 members. These trading centres are the main economic hubs of the county since major business activities are done here.

1.7.7 Housing Types

Tana River County has 547 pool institutional/government houses that accommodate civil servants. The houses are however, inadequate and not properly maintained. This is due to insufficient funds, lack of cheap and durable raw materials, among others.

Addressing the housing issue in the county will require the operationalization of the National Housing Policy in the county, identification and disseminating of low cost building materials and appropriate building technology, and creation of enabling environment to encourage investors to venture into housing sub-sector.

Majority of the people (41.1 per cent) of Tana River live in mud/wood walled houses, with about 29.5 per cent living in grass straw houses. Twenty-six per cent of the roofing materials used are corrugated iron sheets and 13.9 per cent *makuti*.

1.8 Land and Land Use

The land in the county is largely non-arable covering 29,798.7 km². The rest is either under forest 3,457 km², arable land covering 2,547 km², and 3,059.5 km² under national reserves.

1.8.1 Mean Holding Size

The mean holding land size in the county is 4 ha, especially in the irrigation schemes of Hola and Bura. In the settlement schemes of Witu I and Witu II, the mean land holding size is 15 acres while Ngao adjudication area, the mean holding size is 5 acres. Though the mean holding land size is 4 ha, there is a variation on land holding with some farmers in Bura and Hola irrigation schemes having between 0.6 ha and 3 ha.

1.8.2 Percentage of Land with Title Deeds

Only about 4.3 per cent of the land in the county has title deeds. Most land owners have no title deeds since the land is communally held in trust by the County Government/Government of Kenya.

1.8.3 Incidence of Landlessness

The incidence of landlessness is high at 95.7 per cent with a majority of the communities in the county living as squatters since they hold no titles to the land they occupy. There has been a major

invasion by squatters into Chakamba area of Tana Delta which is a designated grazing corridor; Kurawa holding grounds, a Government land for livestock holding; Majengo area by Ijara people and Madogo area is also invaded by people from Garissa in search of pasture and water for their animals. Spatial planning is therefore necessary to determine the land use patterns in the county.

1.8.4 Land Tenure System

About 90% of land in Tana River County has not been registered, and is either community land or government land. The inhabitants do not therefore have title deeds which can be used as security to acquire loans from banks. This is a major loophole which land prospectors and the National Government take advantage of acquiring land at the expense of the locals this has and can be potential source of conflicts, especially land within and around the county headquarters and along the coast line. The absence of individual or group parcels land title deeds has in some cases led to underutilization of land resources. The challenge for the county is therefore to ensure that land regimes in the county are favourable for productive activities.

1.9 Employment and Other Sources of Income

1.9.1 Wage Earners

The county has an average of about 3.2 per cent under wage employment in the agricultural sector, in government and non-governmental organisations.

1.9.2 Self-Employed

About 7.3 per cent of the population in the county is self-employed in agricultural sector, jua kali sector, boda boda and businesses.

1.9.3 Labour Force

The county has labour force of 46 per cent of the total population. The male and female composition is 48.9 and 51.1 per cent respectively.

1.9.4 Unemployment Levels

A majority of the labour force composed of 42.8 per cent in the county is unemployed. Unemployment levels are still very high in the county with poverty incidence standing at 76.9 per cent.

1.10 Irrigation Infrastructure and Schemes

1.10.1 Irrigation Potential

Irrigation sector in Agriculture department has a commitment in enhancing agricultural productivity through irrigation development. Although irrigation will include private and public participation and partnership, the mandate to provide policy guidelines rests with the department.

Tana River County is endowed with great Irrigation potential. The county irrigation potential areas range between 180,000ha - 200,000ha, out of which only 2% has been put under irrigation

development. On the other hand, about 10% of the exploited potential is under the large scale irrigation schemes (Bura, Hola and Tana Delta).

Out of all area identified and developed for Irrigation, only about 50% is under effective and efficient Irrigation agriculture.

Most of the on-going irrigation practice in Tana River County is group based, under the pump-fed group irrigation category, where by groups of between 10- 200 households have been formed and have invested in irrigation. Most of these groups cannot afford to develop their farms due to high cost associated.

Previous efforts by the county and other development partners, irrigation development has produced inconsistent results due to various socio-economic problems which need to be overcome. The main socio-economic problems and constraints which hinder irrigation development are issues related to; skills, weak farmers' organizations, infrastructure, resource use conflicts, drought and floods, gender, and dependency syndrome

1.10.2 Performance Review

There are over 100 common interest groups, mainly along the river Tana (the main irrigation water source) which have been formed in the county and started minor irrigation schemes. These groups, whether active or dormant remain good entry points for any future community irrigation development in their respective areas.

Name of Sub- County	Gross Irrigation Potential Ha	Number of Small Scale Projects Identified CIGs	Number of Projects Developed	Total Area Under Irrigation Ha
Bura North	67,000	35	12	15,000
Galole	64,000	31	10	12,000
Tana Delta	69,000	34	15	13,000
Total	200,000	100	37	40,000

1.11 Crops, Livestock and Fish Production

1.11.1 Main Crops Produced

The main crops produced in the county are mangoes, cowpeas, bananas and green grams. Farmers in the county mainly rely on rain fed and flood recession farming systems with only a few practicing irrigated farming. Maize production also takes place in the irrigation scheme.

1.11.2 Acreage under Food Crops and Cash Crops

The total acreage of farms under food crop production is 7,527 hectares while that under cash crop production is 7,063 hectares.

1.11.3 Average Farm Sizes

The arable area in the county is $2,547 \text{ Km}^2$ with the average farm size being 0.71 ha. Farmers normally grow subsistence crops.

1.11.4 Main Storage Facilities

The main storage facilities for farm produce in the county include houses, barns and granaries. The NCPB depot is located in Bura and Garsen with capacities of 10,000 bags each. One storage facility with similar capacity has been constructed at Hola Irrigation scheme by the county government. There is need for more storage facilities to be constructed to accommodate the increase in food production.

1.11.5 Agricultural extension, training, research and information services

The department of agriculture is mandated to provide agricultural extension activities in the county. Currently there are 27 field extension officers to cover 31,055 farmers spread in 15 wards in 3 sub counties. This gives a staff to farmer ratio of 1:817 which is lower than the ideal 1: 400. There is urgent need to recruit more personnel in this field so as to increase the ratio and also replace those staff who by attrition have left or are leaving the service in the next five years. 65% of the current extension staff are beyond the age of 50 and, therefore, prudent human resource management is required so as to have a smooth succession.

Extension staff requires regular training to keep up with fast changing farming technologies. More resources should be directed toward capacity building of staff so as to make them relevant.

All agricultural research for the region is under the mandate of KALRO in Kilifi County. Our county relies on research information from this institution and also sister institution in Machakos (Katumani). Other services like soil analysis and maize aflatoxin level determination are referred to the National Agricultural Labs, Kabete.

Market Information services are still undeveloped in the county. One of the stakeholders in the county namely WHH/GAA has however started collecting market information in 3 major markets in the county.

1.11.6 Main Livestock Bred

Livestock keeping is practised mainly through pastoralism by the Orma, Borana, Wardei and Somali. The main livestock types are cattle, donkey, camel and goat. The most common breed are Orma-boran, Galla goats, black head Persian sheep.

1.11.7 Poultry keeping

Poultry is kept at household level by all communities in the county. The main type of poultry kept is indigenous chicken and ducks.

1.11.8 Ranches

There are about seven ranches in the whole county namely Wachu-30,725ha, Kibusu-25,000ha, Haganda-12,000ha, Kitangale-20,000ha, Idasa Godana-51,000ha, Giritu-43,340ha and Kondertu-20,000ha. Out of the seven ranches only Idasa Godana ranch is active with about ten per cent area being exploited.

1.11.9 Main Fishing Activities, Types of Fish Produced, Landing Sites

The main types of fish produced in the county include Tuna, Catfish and Rabbit fish (marine species), Tilapia, and Synodontis. There are three landing sites namely Chara, Ozi and Kipini with the main fishing gear being traps, fishing nets, hooks/lines, fishing boats and marine seine nets. Fishing activities are carried along the river Tana and at the ocean at Kipini, Ozi and Chara. There is potential for fish farming in the area as was demonstrated by the Economic Stimulus Project where about 900 fish ponds were established across the county. Main fishing activities currently being undertaken in the county range from use dugout canoes, anglers, use of fish traps and modern fish boats (trawlers). The main fish species harvested range from fresh water fishes like protopterus, catfish, tilapia species and marine species including fin fishes and crustaceans (crabs, prawns, lobsters and octopuses).

1.12 Mining

1.12.1 Ongoing Activities

The county has four quarry sites where sand and murram are harvested at Madogo and Meti areas in Bura. Sand harvesting is currently heavily practised in Bura and Galole sub-counties. There are two sites where gypsum mining is carried out at Bangale and Nanighi areas in Bura.

1.12.2 Mining Potentials

The county has three more potential gypsum sites located in Bura which have not been fully exploited. Sand is mainly harvested along the dry river beds and lagas and there is a huge potential for exploitation across the county.

1.13 Tourism and Wildlife

Tourism plays a very crucial role in the Kenyan economy and is a major source of potential growth and employment. As such, the County Government of Tana-River is committed in working with the private sector in removing the bottlenecks that hinder its growth by strengthening the linkages between tourism and other sectors of the economy.

To diversify tourism, the county government will implement marketing campaign of Tana-River county as a major tourism destination by marketing domestic tourism, rehabilitate tourism infrastructure, diversify and develop tourism products, develop high value cultural centres and festivals and develop niche products such as conference, eco based, cultural, bird watching and heritage tourism.

1.13.1 Main Tourist Attractions, National Parks/Reserves

The main tourist attractions in the county are Kora National Reserve, Arawale National Reserve and Tana Primate National Reserve.

1.13.2 Main Wildlife

The main wildlife found in the county is Red Columbus Monkey, Tana River Crested Mangabey monkeys, Elephants and Heartbeast (Hirola). Tana River delta is one of the six deltaic areas of Eastern Africa and the largest freshwater wetland systems in Kenya. The Delta is rich in biodiversity supporting diverse species of flora and fauna. It is internationally important for the survival of no less than 22 species of birds making the delta one of the key sites in the country for water bird conservation. It also holds the breeding sites of valuable edible fish and shellfish and a rich biodiversity of other wildlife.

1.13.3 Tourist Class Hotels/Restaurants, Bed Occupancy

There are no tourist class hotels in Tana River County. All hotels in the county fall under unclassified category.

1.14 Industry

There is a mango and honey processing factory in Tana River County though there is a great potential for agro-based industries for maize, milk and meat processing.

1.15 The Blue Economy

Tana River County has a coastline of about 76 km and forms one of the richest fishing areas of crustaceans around Malindi – Ungwana Bay especially prawns which are highly valued crustaceans. The county needs to tap into it by having right investment towards value addition and use of modern fishing technologies to increase fish catches thus improving household incomes, food security and employment creation to fisher folk. This will boost the county share of revenue.

1.15.1. Aquaculture (Sea weed farming)

Marine conservation for sustainable utilization of fisheries resources; and cushioning of fishing communities from climate change aspects will ensure they adapt to the available technologies for sea weed farming

1.15.2. Main fishing activities, types of fish produced, landing sites

The sub-sector has more potential although the fishermen have limited themselves within the 12nm due to small sizes of their fishing vessels. The county will invest more resources in the following areas. Mariculture development (prawn fattening, crab fattening, culturing of milk fish and construction of marine fish species hatchery); provision of modern and right fishing gears to fisher folk with the right technology; development of cage culture within the brackish waters; construction of a modern fish depot at Kipini to ensure Fish and Fish products are handled in hygienic conditions.

1.15.3. Marine transport and Tourism

The county is endowed with serene natural scenic features which can attract tourists hence will enhance our county revenue; value addition of fish like packaging, filleting and branding of fish and fish products from Tana River County.

1.16 Forestry and Agro Forestry

1.16.1 Main Forest Types and Sizes

The county is dominated by complex ecosystem of high canopy coastal, riverine forests, wooded bush land and thickets as well as the grasslands and mangrove forests covering 355,688.65 ha. The species that are dominant in high canopy forest area include *Chlorophora excelsa, Penicum spp, Manilkara zasibarensis, Brachilina brichantha, Terminalia spp.*

Wooded bush is dominated by *Hyphaene coriacea*, *Terminalia spinosa*, *Digitaria milinjiana*, *Panicum infestum*. Grassland is dominated by *Echinochika spp*, *Sporobolus halvolus*, *Panicum spp*, *Cynodo dactylon*. Mangrove swamps forests include *Brugeira spp*, *Avecenia spp*. In the dry lands dominant species include the Acacia spp, *Dobera glabla*, *Salvodora persica and the invasive Prosopis spp*.

1.16.2 Main Forest Products in Gazetted and Ungazetted Forests

The Zone is endowed with natural and man-made resources that support forestry based socioeconomic investments. The forests support ecotourism due to its rich potentials in diversity of fauna and flora, and livestock production as well as a habitat to rare and endangered wildlife. There is a wide range of tree species including the invasive *Prosopis* species that support production of non-timber forest products like gum and resins. Charcoal trade can be sustained through organized and licensed Charcoal Producers Associations (CPAs). Provision of a range of building products that include poles, posts and timber, herbal medicine used on subsistence and commercial level, and supports the building of cottage industries.

1.16.3 Promotion of Agro-Forestry and Green Economy

a) Income generating activities including farm forests

Attention has been focused on the provision of the on-farm investment form of production of fruits, honey, horticultural crops, woodlots, silage and fodder.

b) Protection of water catchment areas

The water catchment areas in the county include riparian forests areas, springs, rivers, ponds and lakes.

c) Prevention of soil erosion

There is deliberate integration of tree crops and the physical structures like the Fanya Juu Fanya Chini earthworks and terracing, and water harvesting efforts to reduce soil erosion. Planting of the shelter belts and alleys is being done in the county to control both water and wind erosion.

d) Provision of wood fuel and generation of energy for industries:

The county has introduced fast growing trees species of high calorific value that can supply industrial energy.

e) Improvement of Soil fertility by growing fertilizer trees:

The integration of carbon fixing tree species that nourishes and conditions soil in the county.

f) Growing of fruit trees for improved nutrition both for Domestic use and surplus for markets

There have been efforts to introduce value fruit trees, for example through budding and grafting.

g) Provision of carbon sinks like Carbon Trading

The county has been intensifying and planting carbon sequesters tree species that purify air.

h) Beautification activities in Towns, highways, schools, Homes and other public places:

This entails the undertaking of roadside alley planting of trees on paths and highways, establishment of recreation parks, arboretum and botanical gardening in private and public utilities. In this aspect, efforts need to be stepped up to realise this objective.

i) Animal feeds production ventures:

There county is in pursuit of intensify irrigable fodder trees and grass like Napier planting in farms and conservation areas for the mainstay of livestock.

j) Growing and processing for medicinal purposes/Value plants and products

This involves promoting domestication and large scale production of tree species of pharmaceutical value such as Sandal wood both for subsistence and commercialization.

1.17 Financial services

The financial services in the county is still low, this is basically due to low income of households within the county.

1.17.1 Number of banks, Micro finance institutions, mobile money agents and SACCOs with FOSAs

The county has a few banking services and other financial institutions. The entire county has only two banks i.e. Kenya commercial Bank and equity bank. The Kenya women finance Trust also has a branch at Holla. However, the mobile banking is relatively well distributed within the county. The safaricom's Mpesa is the most dominant within the county.

1.17.2 Distribution/coverage of financial services by sub-county

The distribution of financial services in the county is basically skewed in favour of urban centres. Kenya commercial bank has only two branches in the whole county i.e. in Holla and Garsen. Equity Bank has a branch at Holla as well as Kenya women finance Trust. Mpesa services is well distributed in all sub-counties. Efforts should be made to ensure that the local populace

1.18 Environment and Climate Change

Shifting weather patterns, for example, threaten food production through increased unpredictability of precipitation, rising sea levels contaminate coastal freshwater reserves and increase the risk of catastrophic flooding, and a warming atmosphere aids spread of pests and diseases once limited to the tropics.

1.18.1 Major Contributors of Environmental Degradation

Environmental degradation is caused by over exploitation of natural resources such as forests, mining, overstocking and overgrazing, population increase and cultivation along the river banks, urbanization and increase in food insecurity as a result of destroying water catchment areas.

1.18.2 Major Degraded Areas/Hotspots and Major Contributions to Environmental Degradation

Environmental degradation is caused by over exploitation of forest through excessive charcoal burning supported by illegal and unstructured licensing systems; mining practices that do not follow the Environmental Management Plans as outlined in Environmental Impact Assessments and mining licenses e.g. failing to backfill the mining pits; overstocking and overgrazing by livestock, population increase and cultivation along the river banks, urbanization and increase in food insecurity as a result of destroying water catchment areas. In the past years, forest destructions have occurred mainly along the riverine areas where destructions are mainly attributed to human activities especially farming. Many parts of Tana North sub county especially the areas of Kalalani bordering Kitui County.

1.18.3 Environmental Threats

Environment degradation in the county has contributed to loss of biodiversity, degradation of rangelands, and soil erosion particularly on farm lands, deforestation floods, and destruction of habitats along river basins. It has also led to diminishing health and sanitation standards as a result of environmental pollution. Invasive species especially *Prosopis juliflora* (Mathenge) threatens local livelihoods especially livestock keeping by taking almost all the grazing land.

1.18.4 High Spatial and Temporal Variability of Rainfall

Rainfall is low, bimodal, erratic and conventional. Mean annual rainfall varies between 350-450mm, mean annual evaporation is 2,366 mm. Rainfall is highly variable, patchily distributed and often intense which can lead to sheet and gully erosion. Long rains occur in April and May and the short rains fall in October and November. November is the wettest month with the little erratic rainfall especially in the hinterland, the county experiences drought almost every year. The coastline is therefore wetter than the hinterland. Higher rainfall at the coast supports crop production especially around Kipini where cash crops like cashew nuts, cotton, mangoes and food crops like bananas and maize are grown.

1.18.5 Change in Water Levels

The main water sources currently are River Tana, water pans/dams, shallow wells, pipeline and boreholes which are the normal water sources at this time of the year. All the main water sources in the county are not operating at their optimum levels due to failed two consecutive rainfall seasons that is 2015-2016 and 2016-2017. River Tana is the most relied upon source of water in the county. In the mixed farming livelihood zones, the main sources of water are River Tana, shallow wells and a few piped water supplies. In the pastoral and marginal mixed livelihood zones, main water sources include River Tana, shallow wells and water pans.

The recharge level of all the water sources in the county is very low due to prolonged drought spell. The level of flow of River Tana is at 25 percent of its normal level. Water pans had a recharge of less than 50 percent of their normal level. Underground water sources including boreholes and shallow wells were equally affected by poor recharge (Less than 50 percent of normal). It is alarming in the Tana delta area especially the Ngao water works intake where the river is almost drying up due to drying of Matomba channel mouth. Water stressed areas are Chifiri, Hakoka, Kesi, Roka, Koticha Mlima and Koticha odwani in Tana River sub-county. Other water stressed wards are Bangale, Hirimani and Sala Wards in Tana north sub county as well as Kipini west ward in Tana delta sub- county.

1.18.6 Solid Waste Management Facilities

The county has identified dumping sites for major urban areas and is in the process of developing the sites. Previously, a private contractor was engaged to help with collection and dumping of solid waste materials generated from the towns. Moving forward, the county plans to purchase its own garbage collection trucks and engage services of the local people in ensuring that the towns and other residential areas are clean, secure and healthy. Waste recycling will also be prioritized.

1.18.7 Effects of Environmental Degradation

The effects of environmental degradation include degradation of rangelands, soil erosion on farmlands, water and air pollution, deforestation, loss of biodiversity, frequent droughts and occasional flooding, spread of diseases both human and livestock diseases and loss of aquatic life.

1.18.8 Climate Change and its Effects in the County

Effects of climate change affecting the county include droughts, flooding, rise in sea levels along the coastal parts, intrusion of salt waters upstream, reduced fish population in the sea, drying of the ox bow lakes, reduced crop productivity, loss of biodiversity, changing ecosystems and destruction of infrastructure.

1.18.9 Climate Change Mitigation Measures and Adaptation Strategies

The county is putting in place some climate change mitigation measures which include good governance, practicing sustainable approaches to development, developing a comprehensive land use planning, creation of awareness on the effects of climate change among the population, identifying and protecting ecologically sensitive and fragile areas and discarding old practices and embracing modern and sustainable practices/technologies.

1.19 Water and Sanitation

1.19.1 Water Resources and Quality

River Tana is the longest river in Kenya covering about 850 Km long with catchments area of about 95,000 Km² traversing the landscape from its source in Aberdare Ranges in central Kenya to the Indian Ocean. It discharges on average 4,000 million litres of fresh water annually into the ocean near Kipini at Ungwana Bay. The Seven Folks Hydro Electric Power Stations and Bura and Hola irrigation schemes are located upstream of the delta. Tana River supports industrial and other socioeconomic functions such as power generation upstream, agriculture, livestock, tourism and micro-enterprises found within the basin.

Water in the county remains a problem for domestic use, livestock and irrigation. The county has 492 shallow wells, 120water pans, 8 Small earth dams and 36 boreholes. The proportion of households with access to piped water is 17% while proportion of households with access to portable water is 40%.

1.19.2 Water Supply Schemes

Tana River County has a total of five (5) Gazetted Water Supplies, three (3) community water supplies, 36 Boreholes, 492 shallow wells and 120 water pans. Some of these water supplies were done by the County Government and other by the National Government through development partners. The major water supplies serve a total area of 140Km^2 , with a total production of $6610.\text{m}^3/\text{day}$. The total population served is 50,000 directly by these water supplies. The number of storage tanks in these water supplies range between 10m^3 to 500m^3 . This gives the County a total storage capacity of 2265m^3 with a total pipe network covering 200Km.

The county is served by two Water Service Providers (WSP) namely Tana Water and Sanitation Company and Lamu Water and Sanitation Company and Community managed supplies with majority of these water supplies concentrated in Tana Delta Sub-County. In its effort to ensure an integrated water resources management and development through stakeholder's participation to ensure availability and accessibility to water, The Ministry of Water & Irrigation through Coast Water Services Board (CWSB) and development partners have been rehabilitating most of these water supplies within each sub-county and assisting community water supplies. There are also institutions with private water supplies which, other than supplying their various institutions, also serve the neighbourhoods.

Name of Water Supply	Sub-county	Status	WSP
Madogo Water supply	Tana North	Partial treatment	TAWASCO
Bura Water Supply	Tana North	Full treatment	TAWASCO
Hola Water Supply	Tana River	Full treatment	TAWASCO
Garsen Water Supply	Tana Delta	Partial treatment	TAWASCO
Ngao Water Supply	Tana Delta	Partial treatment	TAWASCO

Gazetted Water Supplies

Major Community Water Supplies

Name of water supply	Sub-county	Service area	Management
Chardende	Tana North		CBO/County Govt
Bokawan	Tana North		СВО
WIWA	Tana Delta		СВО
Kipwa	Tana Delta		СВО
Katsangani	Tana Delta		СВО

Proposed new water supplies include Kipini Water Supplies, Handarako Water Supplies, Wema Water Supplies, Emmaus Water Supplies, Kelokelo Water Supplies and Boji Water Supplies.

1.19.3 Actors in the water sector

The efforts of several actors in the sector cannot go unnoticed under the umbrella of WASH network. Several water supplies, especially community water supply projects have been implemented by these partners. There are over 13 active water-based NGOs doing a number of water projects in the county. These are; - Water Services Trust Fund (WSTF), Kenya Red Cross Society (KRCS), German Agro Action (GAA), UNICEF, Team & Team, Global one, State department of Irrigation, State department of Livestock, State Department of Water, Coast water services board, Coast Development Authority, National Drought Management Authority, Nature Kenya and UNDP.

1.19.4 Water Sources (Average Distance to the Nearest Water Points)

The River Tana

The county's water resource comprises of both ground and surface water. Surface water consists of permanent rivers such as River Tana and ground water sources that include; boreholes, shallow wells, and earth pans. In Tana River County, the average distance to nearest water point (either surface or underground) is four kilometres.

1.19.5 Water Management

The responsibility for water supply and sewerage in Tana River falls under Tana Water and Sanitation Company (TAWASCO). Also, some of water is managed by CBOs like Witu Water Users Association (WIWA) in Kipini. Sewerage services in the county is yet to be developed. Coast Water Services Board carried out a feasibility study on solid waste management and gave out some recommendations for implementation of urban solid waste management which is yet to be implemented. Service standards are set and monitored by a national water regulatory agency called the Water Services Regulatory Board (WASREB).

1.19.6 Sanitation

The reference on sanitation is on housing-ventilation and rendering of floors and walls of buildings, provision of dish-racks, cloth hang-line, waste disposal at household level and public in general at market centres. At the market centre level the attention is on waste disposal. Of all the centres, only Hola has a Public toilet, collection of waste is done by the county government within Hola town and there is no designated disposal point for the waste. The situation in most of our institutions especially schools, is reasonably good as they have latrines albeit not adequate.

Generally, the average sanitation level in the county is at 48 per cent. As much as 40 percent of the households in the county have pit latrines, five percent of which are uncovered. Open defecation by adults and disposal of children feaces in the open is still rampant in most rural areas of the county. The use of buckets is disappearing and only three households still use them. The County has never developed a sewerage system but Coast Water Services Board commissioned a feasibility study on Water and Sanitation Improvement. The project objective was to identify sound, feasible and rational strategies through to 2040 for the development of wastewater management services for the growing urban centres on the Coast region including developing logical Framework Matrix for Planning, Design, implementation and Evaluation of the Wastewater Management Strategies.

1.20 Health Access and Nutrition

1.20.1 Health Access (Health Facilities, Personnel)

There are 71 health facilities in the county with two level four public hospitals located in Hola and Ngao. There is one sub-county hospital in Bura, five public health centres, 40 dispensaries and 20 private clinics, two mission dispensaries and one private health centre. The bed capacity is 158 while the average distance to a health facility is six kilometres. The county has six doctors, 126 nurses, 1,149 CHEWs, 25 PHOs, and three nutritionists against a projected population of 265,854.

Tana River County has low numbers of healthcare providers owing to difficulties in attracting and retaining them. There are chronic shortage personnel in almost all areas of medical practice and management. There has never been a medical officer specialist in the county. However, the situation has been steadily improving since devolution, with core clinical staff numbers growing in almost twofold. There still remains a big room for improvement as shortage of staff exists in all critical areas.

In service capacity building has been weak, both in technical and management areas. There is need to provide opportunities for training in specialty areas for all technical staff. Management staff need to be offered opportunities to build their capacity in training.

On the advent of devolution, the number of health facilities has tremendously increased. However there is need for expansion of the current facilities to enable them offer services in line with best practices. Some existing facilities need to be improved. Laboratories need to be refurbished to mirror current best practices in infection control and meet standards towards accreditation. Hospitals need to be improved to offer more patient friendly environment to clients. Supportive infrastructure like offices need to be equipped with furniture and other office equipment to enable management officers discharge their duties in a supportive environment. There is need to take inventory of exiting laboratory, pharmacy and other hospital equipment with the view of establishing obsolescence and shortage of critical equipment due for replacement. This will increase quality service delivery and will significantly reduce referrals.

There is need to increase staff houses in most facilities, being a factor towards retention of the health workforce.

The table below illustrated the state of health workforce and respective gap for each cadre.

Cadre	Number availabl e	Gap	Cadre	Numbe r Availabl e	Gap
Medical Doctors	10	10	Physiotherapists	2	8
Specialized clinical officers	4	15	Medical Laboratory Technologist	32	18

Security officers	25	0	Mortuary attendants	1	6
All others non-technical HR	10	0	Cleaners	10	20

1.20.2 Morbidity: Five Most Common Diseases in Order of Prevalence

The most prevalent diseases in the county in order of priority are respiratory track infections, diarrhoea, malaria, skin diseases and pneumonia.

1.20.3 Nutritional Status

As shown below, the percentage underweight for 2012 has reduced due to the various interventions put in place. That is increased nutrition surveillance, SFP/OTP programmes and Infant and Young Child Feeding (IYCF) activities.

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2011	12.4	13.7	16.2	15.2	13.9	14.9	14.1	10.3	17.4	11.2	11.6	12.1

Source: MOH Tana River, 2018

1.20.4 Immunization Coverage

The county has an average immunization coverage of 76 per cent which is below the World Health Organisation/National average of 90 per cent. The major challenges for low immunisation

coverage are attributed to nomadic lifestyle and frequent depletion of stock of the required antigens.

1.20.5 Access to Family Planning Services/Contraceptive Prevalence

The county target for Family Planning (FP) services is to the women of child bearing age (15-49 years). The county's average uptake of FP services is 34.3 per cent. The uptake is low due to the religious faith of the communities. Otherwise all FP methods are available in the county.

1.21 Education and Literacy

1.21.1 Pre-School Education

The county has 315 ECDE centres with 462 teachers. The gross enrolment rate is at 56.3 per cent with a teacher pupil ratio of 1:51. The enrolment of boys and girls is at 55.6 and 42.7 per cent respectively.

1.21.2 Primary Education

The county has 152 primary schools with 1,219 teachers giving rise to a teacher pupil ratio of 1:40. However, the available schools are not evenly distributed. The average gross enrolment is at 60.4 per cent with boys' enrolment rate standing at 68.5 per cent while that of girls stands at 51.9 per cent.

1.21.3 Literacy

The literacy rate for the county is 33.7 per cent and the illiteracy rate is at 66.3 per cent. However, this data is not disaggregated between male and female.

1.21.4 Secondary Education

The county has 52 secondary schools with 150 teachers. The teacher/student ratio is 1:32. The net enrolment is 4,903 with 1,603 being girls and 3,300 boys. The girl population is so low due the high drop-out rate arising from early marriages and pregnancies.

1.21.5 Tertiary Education

There are no colleges or universities in the county. Concerted efforts need to be directed towards the construction of tertiary institutions in the county to boost transition rates and build on the human resource base.

1.22 Sports, Culture and Creative Arts

The county has one community cultural centre and one social hall situated in Tana Delta Sub County and both still under construction

1.22.1 Heritage and Cultural sites

There are several unexploited cultural sites

1.22.2 Talent Academies

Despite having a huge potential for talent development, the county has no talent academy.

1.22.3 Sports facilities

The county has a huge talent base for sporting activities but is hampered by limited technical personnel and facilities. There is one County Sports Office with only three staff members, three sports grounds one each in Tana River, Tana North and Tana Delta Sub Counties.

1.22.4 Libraries /information documentation centres/ Citizen service centres

There are no community libraries. The County has and on Documentation and Information Centre and one newly launched Huduma Centre both in Hola

1.22.5 Registered traditional herbalists and medicine-men

The county has a presence of traditional herbalists and medicine men but data on their registration status is unavailable.

1.23 Community Organizations/Non-State Actors

1.23.1 Cooperative Societies

There are 28 cooperative societies in the county with only 12 being active. The cooperative societies in the county are composed of six SACCOs, seven agriculture based societies, eight livestock cooperative societies, two consumer societies and five multipurpose societies. The cooperative movement in the county needs to be strengthened to improve on the levels of income and reduce the poverty levels in the county.

1.23.2 Non-Governmental Organizations

There are 18 NGOs which include among others German Agro Action, Samaritans' Purse, Girl Child Network, Nature Kenya, International Medical Corps, Action Against Hunger, and Catholic Relief Services that are actively operating in the county. These NGOs undertake development activities including; provision of drinking water for humans and animals, construction of water facilities and Water, Sanitation and Hygiene (WASH) in schools.

1.23.3 Self Help Women & Youth Groups

The county has 405 self-help groups, 340 women groups and about 385 youth groups. These groups, however, require training in order to equip them with entrepreneurial skills for self-employment. This shall facilitate them to benefit from the Youth and Women Enterprise Funds.

1.24 Security, Law and Order

1.24.1 Number of police stations and posts by sub county

The county has five police stations at Hola, garsen, Bura, Madogo and wenje. However there are several police posts distributed within the county

1.24.2 Types, trends and crime prone areas

Tana River has a crime index of 259 per 100,000 people, implying that it is among the counties with the highest crime rate in Kenya. The most common crime is theft of vehicles and other parts, offences against morality, breakings, use of dangerous drugs and stealing. The urban areas constitute the most crime prone areas i.e. Hola, Bura and Madogo.

1.24.3 Types and number of courts

The county courts at Hola and Garsen. In garsen we have the High court, senior principal magistrate's court, principal margistrates court and resident magistrate's court. In Hola we only have principal magistrates court. We also have the Kadhis courts at Hola and Garsen.

1.24.4 Prisons and probation services

There is a prison facility within the county located at Hola. The probation services are also in Hola

1.24.5 Number of public prosecution offices

There is an established office of the director of public prosecutions in at Hola and Garsen.

1.24.6 Community policing activities

The county has an established community policing. This is a collaboration between the national police service, the county government and the local public.

1.25 Social Protection

1.25.1 Number of Orphans and Vulnerable children (OVCs)

The county has a total of 3099 orphans and vulnerable children households, 797 in Tan River, 1203 in Tana North Sub and 1099 in Tana Delta Sub Counties.

1.25.2 Cases of Street children

The county has 10 families hosting retarded children but no documented cases of street children.

1.25.3 Child care facilities and Institutions by sub-county (children offices, Number of orphanages, rescue centres, and correction/rehabilitation facilities

The county has 4 Children Officers but lacks children facilities like children offices, orphanages, rescue centres, and correction/rehabilitation facilities.

1.25.4 Social net programmes in the county

The following social safety net programmes are offered in the County -Cash Transfer to Older Persons (OPCT) of above 65+ years, Cash Transfer to Orphans and Vulnerable Children (CT-OVC) and Cash Transfer to Persons with Severe Disabilities (CT-PWSD). According to the provisional 2013 and 2014 statistical abstracts from the Department of Social Services, Tana River County had 293 and 302 consolidated number of beneficiaries with an annual disbursement of Kshs. 4,711,000 and Kshs. 1,120,000 respectively.

2.0 CHAPTER 2: REVIEW OF IMPLEMENTATION OF PREVIOUS ANNUAL DEVELOPMENT PLAN

2.1 Introduction

This chapter reviews the performance of the 2018/19 ADP by comparing programmes and projects planned therein against the budgeted ones. It further analyses the strategic priorities by sector, planned and allocated budget as well as achievements and analysis of capital projects. The chapter concludes by highlighting the challenges experienced, lessons learnt and providing a list of payments of grants, benefits and subsidies.

2.1.1 OFFICE OF THE GOVERNOR

Sector/Sub-Sector

This sector comprises of Governance, Justice, Law and Order

The Projects and programme priorities for this sector have been presented annually in the CIDP which then was used to develop quarterly priorities as presented in table 2

Sector achievements in the previous financial year

Table 1: Summary of the Sector Programs for the planned vs achieved targets in the previous ADP

Programme N	Programme Name:										
Objec	Objective: General administration and support services.

Construct a Girls probation Hostel in the county	Improved rehabilitation services	Number of drug addicts rehabilitated	Once in CIDP II	Girls aged 13yrs-21yrs.	Nil	
Supplement in constructing a court at Bura	Improved service delivery	Number of courts constructed	Once in CIDP II	One court to serve Bura, Madogo, Bangale.	Nil	

Challenges experienced during implementation of previous ADP

- i. Lack of disbursement of voted funds to implement the projects
- ii. Lack of logistical support
- iii. Low investments coming into the sector has hindered realization of its full potential
- iv. Lack of ownership from the community on the projects initiated leads to low sustainability levels

Lessons learnt and recommendations

Failure to disburse funds for the planned and budgeted projects to the sub-sector ended up in not implementing even a single project. And therefore strongly recommend that in the future funds to be released in time as voted in the MTEP to ensure delivery of the planned project within the specified timelines.

2.1.2 SPECIAL PROGRAMME

Sector/sub-sector achievements in the previous financial year 2017/18

Program outcome: Reduced vulnerability and enhanced capacities to climate shocks

1. Distribution of relief food to over 98,000H/H as general food distribution amounting to 165M

2. Response to floods to the most affected families in Ziwani, Bakuyu, and Mathengeni amounting to 14M

Program outcome: Improved peaceful environment for sustainable development

- 3. Response to conflict in malkamansa amounting to 4M
- 4. Purchase of 2 No motorboats 4M
- 5. Partitioning and renovation of office, 1.8M

6. Purchase of 19 No Laptops and other office stationeries for field officers and office amounting to Ksh 5.4M.

Sector / sub-sector name: Department of cohesion and special programmes

Sector/Sub-Sector

This consist of Department of cohesion and special programmes

Payment of Grants, Benefits and Subsidies

Table 4: Payment of Grants, Benefits and Subsidies

Type of payment (e.g. education bursary, biashara fund etc.)	Budget amount (Ksh.)	Actual amount paid (Ksh.)	Beneficiary	Remarks
Nil	Nil	Nil	Nil	Nil

Challenges Experienced During Implementation of the Previous ADP

- 1. Delayed disbursement of funds from the treasury
- 2. Diversion of the Budget from the Departments Priorities
- 3. Lack of Departmental Autonomy in Decision Making and Execution of Mandates

Mitigation measures/Recommendations

- 1. Timely disbursement of funds from the treasury
- 2. Strict adherence to the work plans and budget
- 3. The finance department to provide A.I.Es to the accounting officer.

Lesson Learnt and Recommendations

- 1. There was no timely implementation of programs
- 2. Access to funds to carry out an activity was a very big problem
- 3. Most of the programs remained un implemented

2.1.3 CULTURE RECREATION, GENDER AND SOCIAL SERVICES SUB-SECTOR

N/A	N/A	N/A	N/A	N/A

Challenges experienced during implementation of the previous ADP

- 4. Delayed disbursement of funds from the treasury
- 5. Diversion of the Budget from the Departments Priorities
- 6. Lack of Departmental Autonomy in Decision Making and Execution of Mandates

Mitigation measures/Recommendations

- 4. Timely disbursement of funds from the treasury
- 5. The sector needs to urgently recruit and train critical staff for effective service delivery
- 6. Strict adherence to the work plans and budget lines

Lessons learnt and recommendations

- 4. Timely disbursement of funds is critical in the implementation of programs
- 5. The finance department to provide A.I.Es to the accounting officer to enable uninterrupted programs implementation.
- 6. Enhanced collaboration with the National Government and key stakeholders in the sector

2.1.4 EDUCATION AND VOCATIONAL TRAINING

During the financial year 2018/2019 the department planned to undertake several activities for the purpose of improving service delivery. The total budget estimate was Ksh 644,704,000 of this Ksh 255,990,000 was set aside for capital expenditure while Ksh 408,714,000 for recurrent expenditure.

Sector/ Sub-sector Achievements in the FY2018/2019

This sector comprises of two sub-sectors; Early Years Education and Vocational Training

Early Years Education

The Strategic priorities of this sub-sector entailed; 1) Construction of ECD centres 2) Provision of adequate EYE services through institutional development; developed bills and policies on E.C.D.E 3) Improve work environment at ECDE centres through infrastructure development 4) Delivery of quality and affordable education

Vocational Training

The Strategic priorities for this sub-sector majorly focused on the following areas;

- 1. Capacity building and staff empowerment
- 2. Performance management
- 3. Monitoring and evaluation
- 4. Quality and affordable training
- 5. Co-curriculum activities
- 6. Internship and industrial attachment
- 7. Partnership and collaborations
- 8. Entrepreneurship and life skills development

County bursary fund	150,000,000	150,000,000	-	In progress

Challenges experienced during implementation of the previous ADP

The challenges facing the department as it discharges its mandate include: insufficient policy guidelines and standards, inadequate human resource capacity; inadequate recreational and

educational infrastructure facilities, insufficient training program and natural occurrences that greatly impact on infrastructure.

It is also important to note that the tertiary education sector is grossly underdeveloped in the county this therefore calls for concerted efforts from all the stakeholders in the sector including the county government. Priority activities targeted to address these problems relate largely to improving ECDE and vocational training.

Lesson Learnt and Recommendations

The following were major lessons learnt during implementation period;

Capacity building should be emphasized since it's a major determinant of success.

Monitoring and evaluation should be a priority in tracking performance as well as a key determinant for staff appraisal

Best practices should be adopted and learnt through benchmarking in areas deemed critical in service delivery

Industrial attachment and apprenticeship should be encouraged to cement skills acquired through learning and provide on job experiences to VTC trainees

Challenges Experienced During Implementation of the Previous ADP

Lesson Learnt and Recommendations

2.1.7 AGRICULTURE

Sector/Sub-Sector Achievements in the Previous Financial Year 2018/19

A number of activities were implemented during the previous year key among them purchase of tractors. However, many activities that had been targeted were not achieved the main reason being lack of funds. Some of the key activities that were affected by limited funding include purchase of fuel for mechanization and for extension, purchase of workshop tools, purchase of motor cycles, feasibility studies and construction/rehabilitation of minor irrigation schemes. Due to financing challenges the department often relied on cooperating development partners to implement some of its activities which includes;

1. Extension and training

About 8952 farmers out of 15000 targeted were reached with extension messages on crop production. This represents about 50 per cent of the target. The main challenge was lack of adequate extension facilitation in terms of fuel or other. During the same period 500 liters of pest control pesticide was purchased out of a target of 4000 liters. The achievement of this activity was faced with lack of funds and the fact that the chemical was sourced from the National pest control office. Also, farm tools were purchased for all the 15 targeted schools, implying that this activity was one of the highly achieved.

2. Agricultural mechanization services (AMS)

Two tractors were purchased during the period. The total number of tractors that had been targeted was four (4). Only 100 liters of diesel were purchased for ploughing against a target fuel target of 50, 000 liters.

3. ATC

All the 30 beds/mattresses/desks/chairs that had been targeted for the ATC were purchased.

4. Capital projects

Preparation of tendering documents for the rehabilitation of minor irrigation schemes was done. What is remaining is the actual rehabilitation work.

Non-capital projects

Three lap tops were purchased out of the targeted 4.

Sector/Sub-Sector

Comprises of Agriculture subsectors. The Strategic priorities of the sub-sector include;

- 1. To improve on food security, enhance farm incomes; promote market accessibility & linkages by training farmers and providing them with market information and other support services (Produce and sell).
- 2. To timely control all the crop related notifiable pests and diseases outbreaks by cultural, physical and chemical measures possible annually.
- 3. To increase household incomes and create employment by promoting high value crops which give high returns per unit area.
- 4. To empower the farming community through capacity building to improve their farming skills to enhance productivity
- 5. To introduce youth into agriculture to improve on food security and impart agricultural knowledge to Young farmers and all 4-K Clubs in the County.
- 6. To revive minor irrigation schemes and constructing more so as to improve food security and income in the county

- 7. To promote affordable agricultural land mechanization and efficiency in farm operations.
- 8. To transform agriculture into a viable business venture for all stakeholders who engage in it

The sub sector planned for a budget of 444,887,982 of which 188,188,647 was recurrent and 256,699,334 was development. This money was not issued to the department as an AIE but remained at the treasury only to be accessed through imprests – a tedious process which proved futile due to the bureaucracy involved. Hence the department could not access all the money as given in the estimates. For the few instances where money was available the sub sector was able to do some work and a number of activities were done.

		No of old schemes rehabilitated	0	15	0	
		No. of Solar powered pumps purchased	3	3	0	

Analysis of Capital and Non-Capital Projects of the Previous ADP 2018/19

Three activities were targeted under this component. However, only one activity was achieved.

The main challenge was unavailability of funds.

Project name/ location	Objective/ Purpose	Output	Performance indicators	Status	Planned cost	Actual costs	Source of funds
Minor irrigation schemes 5 per sub county	Rehabilitate dormant irrigation schemes	Water pumps and canals in place	Tender documents prepared	Not started	51,800,000	250,000	TRCG
Grain drying facility	To reduce incidences of aflatoxins in harvested grains	Grain dryers in place in the 2 major schemes	No of dryers purchased	New project	3,000,000	0	-
Produce collection centres	To reduce post- harvest losses	Collection centres built	No of centres constructed	Not started	4,150,000	0	

Table 2: Performance of Capital Projects for the Previous Year

The performance of non-capital projects was also affected lack of funds. Only one activity was achieved. I.e. purchase of tractors for mechanization. The funding had been expected to come from the county government.

Project name/ location	Objective/ Purpose	Output	Performan ce indicators	Statu s	Planned cost	Actual costs	Sourc e of funds
Improved extension services County wide	Improve extension delivery	Purchase of motorcycle s (4)	No. of motor cycles purchased	0	1,289,32 6	0	TRC G

Challenges Experienced During Implementation of the Previous ADP 2018/19

A key challenge that that affected the implementation of the sub-sector's activities was availability of funds. Many of the targeted activities were either done partially or abandoned altogether. It is interesting to note that funds for agriculture were available at the county but unavailable at director's level which greatly affected implementation.

Lesson Learnt and Recommendations

It is important to make familiar the system of financing that the county wants the AIE holders and directors to implement. This can be done through training. This will ensure that incidences of delay in implementation are reduced.

2.1.8 LIVESTOCK

Introduction

The livestock sub sector had planned to implement five broad programmes in the year 2018-2019 and the total budget planned for the implementation o these projects was Ksh313,140,000. However, no implementation has taken place so far because the funding has not been availed to the county from the ex-checker.

Sector/Sub-Sector Achievements in the Previous Financial Year 2018/19

The sub sector has not managed any achievements for the financial year 2018-2019 so far.

Sector/Sub-Sector Name: Livestock Production

The strategic priorities of the sub-sector

1.0 General administrative, planning and support services

To facilitate general administrative, planning and support services

2.0 Livestock Production Extension Services

To improve efficiency and effectiveness in extension services delivery to farmers and pastoralists in the county

3.0 Develop Livestock Markets

To facilitate growth in market access for the sub-sector products by improving domestic market infrastructure, promoting exports and disseminating market information to various users.

4.0 Develop milk value chain

Increase incomes of pastoralists by improving value of products. Create employment opportunities

5.0 Livestock Improvement:

To facilitate improved production of livestock and livestock products;

To facilitate increased productivity of the indigenous beef cattle, goats and poultry;.

To facilitate improved access to milk to poor households;

To facilitate improved incomes through increased eggs and meat production per household

To facilitate improved production of high quality honey,

To facilitate increased household incomes through honey and product sales

6.0 Establish strategic feed reserves

To sustain livelihoods during dry season and avoid unwanted sale of animals during times of drought for fear of deaths

7.0 Develop livestock marketing holding ground (LMD)

To improve the handling capacity of the holding grounds for ensuring high quality quarantine and disease control services that includes dipping, watering grazing and screening.

8.0 Ending Drought Emergencies /mainstreaming disaster risk reduction

To improve community preparedness and resilience to disasters

9.0 Transport and infrastructure

Facilitate movement of officers as they serve farmers and pastoralist in the field

Analysis of planned versus allocated budget

Key achievements

The one major achievement was the remuneration of employees

Another key achievement was the establishment of grazing management committees in Wayu Ward through support from FAO funded by the European Union

NIL	NIL	NIL		

Challenges Experienced During Implementation of the Previous ADP2018/19

- Prolonged drought
- Delayed and inadequate funding
- Insufficient number of extension personnel
- Inadequate and poorly maintained vehicles
- Insufficient refresher trainings for extension staff

Lesson Learnt and Recommendations

• Livestock producers require regular capacity building in order to benefit from their investments

- Exposure tours can increase the adoption of new technologies for both farmers and staff
- Value addition of livestock products is required in order to increase income for farmers.
- The county should establish livestock industries to promote value addition.
- The high cost of inputs is discouraging farmers from investing in new technologies in livestock production
- Drought preparedness and EWS are the most important aspects towards EDE and should be given special attention

2.1.9 FISHERIES

Sector/ Sub-sector Achievements in the Previous Financial Year 2018/19 REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS ADP

2.1 Introduction

The sub-sector had planned to undertake the following projects to improve the livelihoods of fisher folk in the entire county through construction and installation of ice plant and cold storage at Kipini so as to enhance value addition of fish, rehabilitation of fish ponds to improve food security and household incomes through fish farming. The other area for consideration was the refurbishment of Tarasaa offices for effective and efficient service delivery for the residents.

2.1 Sector/ Sub-sector Achievements in the Previous Financial Year

During the previous financial year the sub- sector was unable to deliver on its mandate due to challenges dealing with disbursement and prioritizing on the flagship projects which were not planned and budgeted in the CIDP I.

2.2 Sector

Agriculture and Rural Development

Sub-sector name: Fisheries Development

□ The strategic priorities of the sector/sub-sector

The sub-sector strategic priorities include;

- Fisheries policy formulation and review
- ➢ Fisheries licensing
- Management and development of marine fisheries including the Exclusive Economic Zones (EEZ)
- > Management and development of fresh water fisheries
- > Commercialization including formation of fisheries groups for local fishermen
- > Promotion of fish safety, quality assurance, value addition and marketing.
- Development of Aquaculture

Marine and Fisheries research

$\hfill\square$ Analysis of planned versus allocated budget

□ Key achievements

The sub-sector managed to carry out extension services through support of the county government.

2.3 Analysis of Capital and Non-Capital projects of the Previous ADP

Table 2: Performance of Capital Projects for the previous year

		Output			Actual	
		Performance	Status (based on	Planned	cost(Ks	Source
Project Name/location	Objective/purpose	indicators	the indicators	cost(m)	h)	of funds

Construction of an ice plant and cold storage at Kipini	Improve fish handling and preservation through use of ice	EIA study reports	Reports are available awaiting construction works to start and ensure with EMP	7.5	1.09	TRCG
Installation of pelletizing machine at Idsowe	To supply fish farmers with cheaper source of fish feeds	None	None	3.0	0	TRCG
Total				10.5		

Table 3: Performance of Non-Capital Projects for previous ADP

Project Name/location	Objective/pupose	Output Performance indicators	Status (based on the indicators	Planned cost(Ksh)	Actual cost(Ksh)	Source of funds
Compensation to employees				7,287,684		TRCG
Use of goods and services				1,253,298		TRCG

2.5 Challenges experienced during implementation of previous ADP

- v. Lack of disbursement of voted funds to implement the projects
- vi. Lack of logistical support
- vii. Low investments coming into the sector has hindered realization of its full potential
- viii. Lack of ownership from the community on the projects initiated leads to low sustainability levels

2.6 Lessons learnt and recommendations

Failure to disburse funds for the planned and budgeted projects to the sub-sector ended up in not implementing even a single project. And therefore strongly recommend that in the future funds to be released in time as voted in the MTEP to ensure delivery of the planned project within the specified timelines.

2.1.8 Veterinary services

REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS ADP (2018/2019)

2.1 Introduction

In 2017/2018 financial year, very little was achieved as a result of a prolonged political period which consumed almost half of the year. Hiring of the county executives also took long leaving the county with only a few months to implement the programmes.

A carry-over of pending bills also took a good share of the development funds. This left very little money for any meaningful development. However, service delivery continued with our partners like FAO and RPLRP assisting the department with vaccination and disease surveillance.

Sector/ Sub-sector Achievements in the Previous Financial Year

Sector/ Sub-sector name: Veterinary services

Key achievements

Key achievements were noted in service delivery like vaccinations, disease surveillance and veterinary public health. The overall implementation of the last ADP was far below average and funds for cost of the planned activities were not availed to the department during the implementation period. Most of the achievements for non-capital projects were sponsored by stakeholders like FAO and RPLRP. One vaccination programme funded by the department took place in June. Two surveillance missions took place. One was funded by RPLRP and one by the county.

It was in one of these missions that the deadly Rift Valley Fever disease was discovered in Tana Delta prompting closure of Garsen market and all slaughter points in the subcounty.

On capital projects, no project was accomplished. However, preliminary preparations for construction of Madogo slaughter house were carried out. These included BQ preparation and sourcing for land for the project. The veterinary sub-sector had a total budget of Ksh. 53,042,790 for recurrent and Ksh35,164,320 for development.

Type of payment	Budgeted amount(Ksh.)	Actual amount paid(Ksh)	Beneficiary	Remarks

2.5 Challenges experienced during implementation of previous ADP

The challenges experienced in the implementation of last ADP revolved around availability of funds from the treasury and process of awarding tenders. Execution of the awarded projects was also a major issue as some were awarded without the knowledge of line department technical officers. This led to poor quality works especially in specifications as there was no supervision.

2.6 Lessons learnt and recommendations

It's important to decentralize funds to department so they could implement projects according to planned priorities.

2.1.10 WATER, IRRIGATION, ENVIRONMENT AND NATURAL RESOURCES

WATER & SANITATION SUB-SECTOR The strategic priorities of the Water Department for FY 2018/19

PROGRAMMES	PROGRAMME OBJECTIVE	ESTIMATED COST
Programme 1: GENERAL ADMINISTRATION & SUPPORT SERVICES	To enhance and improve service delivery at departmental level	
Programme 2: WATER SUPPLY RESOURCES MANAGEMENT	To provide effective management of water supplies services to enhance Clean & Safe water and to improve Sanitation in all urban centres.	
Programme 3: WATER HARVESTING AND STORAGE	To ensure adequate rainwater is harvested and stored for drought resilience, livestock and human needs and flood mitigation.	
Programme 4: URBAN WATER SUPPLY	To guarantee supply of quality and safe water to the urban areas	
Programme 5: RURAL WATER SUPPLY	To guarantee supply of quality and safe water to the rural areas	
Programme 6: WATER USE EFFICIENCY	To provide effective management through reduction of unaccounted for water for all water supplies with a target of water services that are efficient, affordable, reliable and sustainable	
TOTAL		

Analysis of planned versus allocated budget

Key achievements

Performance Review for FY 2018-2019

Name of Programme	Broad strategic priorities and policy objectives 2018/2019	Achievements	Status
General Administrative and support Services	To enhance departmental capacity and conducive work environment for quality service delivery	 Purchase of computers Rehabilitation of staff offices at the head office Purchase of furniture Purchase of a supervision vehicle by CWSB through the equalization fund programme Purchase of 3No. water bowsers of 20cm capacity Training on Monitoring & Evaluation through the Department of Finance and Economic Planning 	50% complete
Water Supply Resources Management	To provide effective management of water supplies services to enhance Clean & Safe water and to improve Sanitation in all urban centres.	 Reclamation of Shakababo dam in Tana Delta Training of officers on GIS (Training sponsored by FAO) 	
Water Harvesting and Storage	To ensure adequate rainwater is harvested and stored for drought resilience, livestock and human needs and flood mitigation.	 Purchase of 1No. drilling rig 	
Urban Water Supply	To guarantee supply of quality and safe water to the urban areas	 Construction of the Bura extension water supply project by CWSB 	75% complete
Rural Water Supply	To guarantee supply of quality and safe water to the rural areas	 Construction and completion of Bulto Abarufa water pan by NDMA Construction of Tank E water pan by the State Department of irrigation Servicing of strategic boreholes by Resiliency program 	
Water Use Efficiency	To provide effective management through reduction of unaccounted for water for all water supplies with a target of water services that are efficient, affordable, reliable and sustainable	 Rolling out billing system by Coast Water Services Board 	

2.3. Analysis of Capital and Non-Capital projects of the previous of 2018/19

Recruitment of support staff for Tana North and Tana Delta SCW offices	Staff establishment Requisition by the department Advertisement Interviews Recruitment		Improved Efficiency in service delivery		6M		TRCG
Purchase of 4 supervision vehicles	Enhance mobility during supervision of projects and reaching out vulnerable communities		Improved mobility and prompt response for supervision of ongoing projects at the sub-county levels		28M		TRCG
Conduct hydrological surveys whose report will give direction of where to invest in ground water within the county. Each sub county 360 sites	Mapping out potential groundwater resources for immediate tapping, conservation and strategic allocation		Increased water supply to meet the increase water demand Increased access to portable water		1M		TRCG
Consultancy services for an integrated masterplan for all water resources			An integrated water resources Master plan done and operational		6M		TRCG
Purchase of 3No. Bulldozers (D10) machine	Prompt service delivery Increased revenue base for the county government				75M		TRCG
Purchase of pipes & fittings for repair of water supplies (Madogo, Bura, Hola, Garsen and Ngao)	Prompt maintenance and rehabilitation of our water works		Continuous supply of water in all water works		8M		TRCG
Consultancy services on the rehabilitation of Matomba Brook (closure) diversion channel	Restored river channel to Ngao, Tarasaa, Oda, Kipao, Mandingo, Chara		Reduced distance to water points Irrigation of farmlands Water for livestock at the delta		10M		TRCG
Diversion of laghabuna brook to Kitangale towards lake shakababu in Garsen south ward	Feasibility study Recommendations given Construction of the diversion works		Water flow restored in the channel		20M		TRCG

		Irrigation		
		schemes		
		operational		
Rehabilitation of 8No. existing boreholes in Kipini west ward (Kikomo, Semikaro, Konemasa, Chara, Lailoni, Darga, Milimani and Mandingo)		700hh	8M	TRCG
Rehabilitation of Saware Borehole	Equipping of the borehole	Universal and equitable access to safe and affordable drinking water for all	5M	TRCG
Rehabilitation of Oda Water Pan	 ✓ Increase storage capacity and Fencing 	Increase capacity and securing of water facility	5M	TRCG
Consultancy services for construction of 100,000- 300,000m ³ capacity small dams (3 per sub-county)	Feasibility done and recommendations done Identification of new sites	6No. mega dams constructed, 2 in every sub- county	36M	TRCG
Purchase of 3No. Drilling Rigs		Reduced cost of drilling of boreholes Direct implementation of water projects by the county government	60M	TRCG
Conduct hydrological surveys and sinking of dedicated larger diameter boreholes (3sites) in 4 water supplies, Hola, Ngao Madogo and Garsen	Mapping out potential groundwater resources for immediate tapping, conservation and strategic allocation	Increased water supply to meet the increase water demand Increased access to quality and safe water Planning for sinking of boreholes	1M	TRCG
Purchase of 10,000Ltrs PVC water tanks	Tender advertisement Issuance of LPOs	Increase storage capacity at domestic level	20M	TRCG
Purchase of 10,000Ltrs bladder tanks	Tender advertisement Issuance of LPOs	Increase storage capacity for the nomadic livestock keepers	30M	TRCG
Rehabilitation Of 2no. Borehole at Madogo	Drilling and test pumping	Increased access to portable water	11M	TRCG

Supply & Laying Of 6" Pipeline Extension from Hola water works	Pipeline extension	Ditto	5M	TRCG
Purchase of back-up power units for 5No. water supplies	To supplement power rationing to water works	Increased efficiency in water supplies	25M	TRCG
Purchase of 7No. Water bowsers	Water trucking to needy areas during emergencies Prompt service delivery to the community		84M	3No. TRCG
Rehabilitation of Ziwani dyke in Sala ward	Mass excavations Construction of gabion boxes	Restoration of the degraded dyke	10M	TRCG
Rehabilitation of WIWA project in Kipini East ward	Rehabilitation and maintenance	3000hh	10M	TRCG
Diversion of the Mtomoni brook in in Kipini East ward	Feasibility study Recommendations given Construction of the diversion works	Water flow restored in the channel Irrigation schemes operational	20M	TRCG
Formulation of key policies to guide management of water distribution in urban centres	Efficiency in water supplies management	Key policy drafted and passed at the county assembly	20M	TRCG
Construction of water quality laboratories in sub	Efficiency in water supplies management	5No. of water quality labs constructed and equipped	5M	TRCG
Installation of solar powered submersible water pumps and installation of solar panels	Efficiency in water supplies management	Solar powered submersible pumps installed	20M	TRCG
Purchase and Installation of meters to customers in all urban	Efficiency in water supplies management	Metering all hh water connections	2.4M	TRCG
Digitization of revenue collection in water works	Efficiency in water supplies management	No. of water works digitized and operational	2M	TRCG
Automation of water supply systems	Efficiency in water supplies management	No of pipeline systems connected with leak detection equipments	5M	TRCG

2.5. Challenges experienced during implementation of the previous ADP Constraints and Challenges in the Water Sub-sector

During the preparation of this ADP for FY 2019-2020, nothing much had been done for the previous ADP FY 2018-2019. The main reason for slow implementation of the ADP was the payment of pending bills. Among other challenges faced by the department, the County Government of Tana River had resolved to clear all the bills incurred in the previous financial years so that it could start its new programmes.

The County department of water on the other hand is faced with other various challenges and constraints which has also seriously hampered its operations resulting in low outputs. The major challenge being recurrent drought in the county for a period of FYs 2017/2018 and the floods experienced during FY 2018/2019. The other challenge is lack of supervision vehicle and lack of

adequate staff. The department had pushed for procurement of one supervision vehicle through the equalization fund projects but has not been delivered yet. The other challenge is NRW which stands at approximately 60%. This has really affected the O&M for the water company, Tawasco. The following table has summarized the challenges facing the department and the company.

Challenges/Constraints	Proposed Action to be taken
1. Lack of office vehicle for supervision	a) Purchase of at least 3No. double cabin for supervision.
2. Poor facilitation of supervision activities	b) Devolving expenditure of AIEs from Finance to respective department
3. Delayed disbursement of finances	c) Adherence to procurement plan timelines and strict adherence to the budget
4. Lack of adequate staff	d) 5No. staff recruited
5. Non-Revenue water in the Company	e) Address all the issues highlighted by the study done by CWSB
6. Access to improved sanitation	 f) Promotion of sanitation facilities. In every water supply and storage, toilets will be constructed to enhance sanitation and reduce contamination
 Water shortages are experienced by users across the county that is Tana River is plagued with chronic drought that is increasing in frequency and severity 	g) More projects have been mainstreamed in the II CIDP to address this shortage of water
8. The sector still needs more resources to be developed	 h) More funds will be sort from partners to bridge the gap of low funding to develop the county projects
9. A rapidly growing demand for water for multi-sectoral uses and diminution of natural storage capacity and lack of development of artificial storage capacity to meet demand	i) More water supplies have been proposed in the II CIDP
10. Climate change	 More projects addressing climate change adaptation and resilience building will be done to address this problem
11. Lack of funding for major projects	k) More partners will be sort to fund projects
12. Flooding	 More funding for mega dams to mitigate flooding in the County

Major services/outputs

- 1. Maintenance and rehabilitation of water supplies and sewerage
- 2. Purchase of 1No. drilling rigs
- 3. Purchase of 3No. water bowsers
- 4. Construction/Expansions/Extensions of new p/lines
- 5. Purchase of standby units
- 6. Rehabilitation of staff offices

- 7. Construction and rehabilitation of water pans, boreholes and shallow wells
- 8. Supply of NFI purchase and distribution of Plastic storage tanks (10,000cm)
- 9. Maintenance of water bowsers
- 10. Investigation, planning and designs

2.6. Lessons learned and recommendations

ENVIRONMENT AND NATURAL RESOURCES SUB-SECTOR Analysis of planned versus allocated budget

The Department had implemented various programs such as; Administrative services, Forest development, Wildlife management, Land reclamation, Solid waste management, Environmental laws and policies (Enforcement & surveillance) and Climate Change Mitigation and adaptation. The sector focused on sustainable exploitation, utilization and management of natural resources. Situation analysis reviews key achievements, lessons learnt, emerging issues and challenges during the implementation period. The department had little achievement from the proposed programs due to inadequate funds and the funds were completely not disbursed.

Key achievements

The department managed to implement the following programs; creation awareness of the importance of protection and conservation of environment, garbage collection within 8 urban centers, purchased solid waste segregation equipment, purchase uniform for town cleaners, management of prosopis, establishing the areas which have been degraded (Kipini sea shoreline) and furnishing the office.

Forest and Wildlife Conservation and Management:

The department managed to create awareness on the important of protection and conservation on environmental resources. The invasive species (Mathenge) existing in the ecosystem of the county has been most irritating issues to the communities living in the area, thus inhibiting agricultural activities and killing the livestock. Due to this the department in collaboration with the Kenya Forest service, created awareness on the way of utilizing the prosopis (Mathenge) for charcoal production, medicinal use and food production.

2.3. Analysis of Capital and Non-Capital projects of the previous of 2018/2019

Table 2: Performance of Non Capital Projects for the previous year

Project	Objective/	Output	Performance	Status	Planned	Actual	Source
Name/	Purpose		indicators	(based on	Cost	Cost	of
Location				the	(Ksh.)	(Ksh.)	funds

2.4. Payments of Grants, Benefits and Subsidies

Table 4: Payments of Grants, Benefits and Subsidies

Type of payment	Budgeted Amount (Kshs.)	Actual Amount paid (Kshs.)	Beneficiary	Remarks

2.5. Challenges experienced during implementation of the previous ADP Constraints and Challenges in the Environment Sub-sector

The department is faced with various challenges and constraints which seriously hampered with its operations resulting in low outputs. The major challenge under staffing ,minimal budgetary allocation of funds, non disbursement of funds in the 3 FYs now.

The destruction of forest increased in most of the county and there was need to curb the situation on the ground. The department was not able to address the issue of illegal logging due to funds operations constraints and these has led to loss of indigenous trees, increase harsh climatic conditions, loss of animals and water scarcity. Furthermore, mining has become most irritating issues, for the department was not able to control the investors licensing and this led to devastating land deforestation no land reclamation effort done on the big holes created by miners and this has resulted to loss of wildlife habitat.

Lack of institutional capacity to enhance environmental stewardship such as the County Environment Committees have not been set-up in most counties

- Invasive plant species have posed a remarkable challenge to the integrity of the various ecosystems across the country
- Resource use conflict particularly competition for pasture between human and wildlife
- Increased demand for natural resources due to population pressure.

- Low level of capacity and high cost of technology
- Long consultative process which requires a lot of resources to meet the Constitutional requirement of stakeholder participation and ownership.
- Environmental degradation

Challenges/Constraints	Proposed Action to be taken
13. Lack of office vehicle for supervision	m) Purchase on 4No. double cabin
14. Poor facilitation of departmental activities	n) Devolving expenditure of AIEs from Finance to respective department
15. Delayed disbursement of finances	o) Adherence to procurement plan timelines and strict adherence to the budget
16. Lack of adequate staff	p) 5No. Of staffs to be recruited
17. Access to improved sanitation	q)
18. Water shortages are experienced by users across the county that is Tana River is plagued with chronic drought that is increasing in frequency and severity	r)
19. The sector still needs more resources to be developed	s)
20. Climate change	t)
21. Lack of funding for major projects	u)

2.6. Lessons learned and recommendations

There were no county policies which will enable the department to execute its activies and stop illegal logging and charcoal production.

The need to establish policies that will guide on illegal loggers and illegal charcoal production by proposing a well structured coordinated way of apprehending those involved in the abolished activities .

The National Adaptation Plan (NAP) views all our socio-economic sectors as vulnerable to climate change impacts. There is need to elaborate the adaptation needs at the local level.

- Collaboration between the private sector and Government is necessary to overcome market and investment barriers for sustainability of climate related investments.
- The county needs to take advantage of the current climate change activities and programmes financing including opportunities presented by the Green Climate Fund and other bilateral engagements.
- There is an urgent need to enhance county government capacity to understand, design and implement climate change programmes.

- **The Plastic Bags initiative:** The programme involves continuous monitoring, compliance enforcement and stakeholders' engagements on the total ban of plastic bags pursuant to the Gazette notice No. 2334 on the ban on use, manufacture and importation of all plastic bags.
- Forest Conservation and Management: Under this programme, the sector will continue to implement the flagship projects identified under Vision 2030 that includes establishment of forest plantation, Promotion of forest based nature enterprises, Establishment of commercial woodlot, Promotion of bamboo establishment and utilization and Control of invasive species.
- **Forestry Research and Development:** This programme will undertake research activities related to; promotion of sustainable forest products utilization, forestry conservation and management, biodiversity and environment management, and strengthening environmental governance as well as enhancing forest information management and dissemination.
- Wildlife Conservation and Management: The programme aims to sustainably conserve, manage, and enhance Kenya's wildlife, its habitats, and provide a wide range of public uses in collaboration with stakeholders for posterity
- Land reclamation: In this programme, the sector will undertake rehabilitation and reclamation of 60,000ha in the counties prone to landslides, floods, heavy soil loss and identify and map all degraded land in the country.
- Other Programmes and Projects
- **National Environment Support Programme:** This programme focuses on enhancing and promoting conservation, protection and management of Environment through domestication and implementation of Multilateral Environmental Agreements as well supporting development and implementation of strategies and Action Plans.
- **Communication, Education and Awareness:** The programme focuses on enhancing sharing of existing technical knowledge and implementation experiences at regional, national local and community levels.
- Green technologies and innovations programme: Under this programme, the sector will focus on creating awareness of green technologies/ initiatives; recognizing and awarding best practice; and, creating an enabling environment for the promotion of green growth as well as promoting financial inclusion and investments in green initiatives.

Legal and Institutional Reforms

To support development of the sector, the following policy, legal and institutional reforms will be developed. (review this section)

- Develop county Policy and Bill on plastics
- Develop county solid waste management policy and bill
- Develop county policy on population, health and environment.
- Review Environmental Impact/Audit Regulations of 2003
- Review Environmental Management and Co-ordination (Wetlands, river banks, lake shores and sea shore management) Regulations, 2009
- Review Environmental Management and Co-ordination (Water Quality) Regulations, 2006

- Finalization of County Wildlife Conservation and Management Policy,
- Enact regulations and guidelines to operationalize the Wildlife act 2013
- Development of regulations and guidelines to operationalize the Forest Conservation and Management Act 2016.
- Drafting of Biodiversity bill

2.1.11 ROADS, TRANSPORT, PUBLIC WORKS, HOUSING AND URBAN DEVELOPMENT

URBAN DEVELOPMENT

Analysis of planned versus allocated budget

Key achievements

Table 1: Summary of Sub-sector Programmes

Programme	1: General	administration	and sup	port services

Objective: To provide administrative support services

Outcome: Conducive working environment.

CHALLENGES IN IMPLEMENTATION OF THE PREVIOUS ADP

1. Inadequate and delayed funding from county treasury.

Lessons Learnt and Recommendations

Lessons learnt

1. Inadequate and delayed funding negatively affects successful implementation of projects.

Recommendations

1. The county treasury to disburse project funds at the required time

ROADS AND PUBLIC WORKS

Sector/ subsector Goal

The sector strives to achieve three main goals namely: improved Access and mobility, Improved efficiency and effectiveness of the infrastructure development Process, Prompt response to fire emergencies and increased access to electricity.

These goals will be achieved through the following: -

- i. Design, construction, rehabilitation and maintenance of county infrastructure
- ii. Provision of an efficient and effective fire emergency response system.
- iii. Development and maintenance of Government/Public/Institutional buildings

iv. Installation of street lights in urban areas

Sector/subsector Development needs, Priorities and Strategies

Programme	Needs	Strategy
Roads Improvement	 Accessibility to all areas for easy mobility of people, goods & services Emergency funds to address disaster occurrences Need of roads construction equipment Need for baseline data Need for materials testing lab 	 Upgrading existing gravel roads Maintaining gravel roads to optimal levels. Opening new roads to improve accessibility to all economically rich areas. Data collection for planning Purchase of new equipment
Public Works	 Appropriate building technology centre Need for operational fire services 	 Operationalize fire services Establishment of appropriate building technology centers

Type of payment	Budgeted amount(Ksh.)	Actual amount paid(Ksh)	Beneficiary	Remarks

2.5 Challenges experienced during implementation of previous ADP

The challenges experienced in the implementation of last ADP revolved around availability of funds from the treasury and process of awarding tenders. Execution of the awarded projects was also a major issue as some were awarded without the knowledge of line department technical officers. This led to poor quality works especially in specifications as there was no supervision.

2.6 Lessons learnt and recommendations

It's important to decentralize funds to department so they could implement projects according to planned priorities.

2.1.12 FINANCE AND ECONOMIC PLANNING SECTOR

Sector/Sub-Sector Achievements in the Previous Financial Year 2018/19

Sector/Sub-Sector

The sector comprises of finance department

Payments of Grants, Benefits and Subsidies

The department did not commit any resources towards payment of grant and subsidies in the year under review.

Table 4: Payments of Grants, Benefits and Subsidies

Type of payment (e.g. Education bursary, biashara fund etc.)	Budgeted Amount (Ksh.)	Actual Amount paid (Ksh.)	Beneficiary	Remarks*
NIL	NIL	NIL		

Challenges experienced during implementation of the previous ADP

The main challenge in FY 2017/18 ADP implementation was capacity issues of human resource and skills in the directorates. Some planned programs for the department also had to be shelved due to reallocation of funds in the supplementary budget to cater for pending bills from FY 16/17 and previous years amounting to Kshs. 1.7 Billion. This came about as a result of implementation of programs outside of the budget for previous fiscal years.

Lessons learnt and recommendations

There is need for recruitment in the department to enhance capacity, and building capacity of officers already recruited through specialized trainings with the National Treasury, IFMIS Department, State Department for Planning and Statistics, and the Kenya School of Government. The county should also endeavor to adhere to PFM Act (2012) in budget implementation and move from issuance of tenders and execution of programs outside of those prescribed in the fiscal year's budget act.

2.1.13 TRADE, TOURISM, WILDLIFE AND COOPERATIVE DEVELOPMENT

TRADE, TOURISM AND WILDLIFE SUB-SECTOR

Sector/Sub-Sector Achievements in the Previous Financial Year 2018/19

Sector Goals and Targets

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all. In the County, the sub sector has continued to support the productive activities in wholesale and retail trade which include, establishment of business producer groups, provision of affordable loans, training on entrepreneurship and business management skills, and encouraging the growth of micro, small- and medium-sized enterprises and promotion of fair trade practices.

Tourism Sub Sector

The goal of this subsector is to devise and implement policies to promote sustainable tourism that creates jobs and promote local culture and products. Towards this goal the subsector has identified

several niche products in the county which include nature based tourism and cultural tourism. The

subsector endeavors to develop, package and market the county as a tourist destination.

Strategic Priorities

The development priorities for the sector are;

- 1. Promotion of trade development and market services through construction of new trading market facilities, rehabilitation of markets, development of business incubation centres, provision of loans and capacity building of MSMEs.
- 2. Licensing and fair trade practises, liquor licensing and regulation through promotion of business by automation of licensing services.
- 3. Establishing of weighing centres, verification of weighing and measuring equipment, calibration of county legal metrology standards and construction of weights and measures laboratory.
- 4. Installation of tourism signage.
- 5. Regulation and control of betting, gaming and lotteries.
- 6. Formulation of policies and establishment of legal framework for industrial development in the county.
- 7. Development of plans and approach to protect MSMIs in the county against key imports e.g. counterfeit and second hand goods.
- 8. Promotion and facilitating the development of SME industrial parks and SEZs.
- 9. Facilitation of the development of technical, entrepreneurial and managerial skills for Micro, Small and Medium Industries (MSMIs).
- 10. Creation and promotion of linkages of MSMIs with source of finance, technology and markets.
- 11. Facilitate orderly growth and development of local tourism
- 12. Develop tourism diversified products
- 13. Develop tourism information centres
- 14. Develop niche products
- 15. Develop high value cultural centres
- 16. Rehabilitate tourism infrastructure.

Payment of Grants, Benefits and Subsidies

The department does not foresee payments of Grants, Benefits and Subsidies

Table 8: Payment of Grants, Benefits and Subsidies

Type of payment	Amount	Beneficiary	Purpose
N/A	NIL	N/A	N/A

2.5 Challenges experienced during implementation of previous ADP

- Inadequate funding
- Inadequate staff
- Lack of capacity building
- Delayed enactment of departmental bills

2.6 Lessons learnt and recommendations

- It's important to decentralize funds to departments so that they could implement projects according to their planned priorities
- For effective service delivery, more staff should be employed and trained

CO-OPERATIVE DEVELOPMENT SUB-SECTOR

Sector/ Sub-sector Achievements in the Previous Financial Year 2018/19

Sector: Trade, Tourism & Co-Operative Development

Sub-sector name: Co-operative Development and Marketing

The strategic priorities of the sector/sub-sector

- 1. Enforce and enhance compliance with the provisions of co-operative Societies Act and subsidiary
- 2. Vibrant and self-sustaining co-operatives

3. Improved decision making, loyalty and improved market access and marketing efficiency in cooperatives.

4. Strengthening capacity for service delivery.

5. Enhance capacity in management.

CHALLENGES IN IMPLEMENTATION OF THE PREVIOUS ADP (2018/2019)

- 1. Lack of funding from county treasury.
- 2. Lack of tools and vehicles to deliver land services.
- 3. Inadequate staff in the lands sub-sector.
- 4. Lack of political good will from political leaders.

LESSONS LEARNT AND RECOMMENDATIONS

- 1. The county treasury to disburse project funds at the required time.
- 2. The County Public Service Board to recruit more lands personnel for effective and efficient service delivery.
- 3. The administration to fund the acquisition of office support tools and equipment such as vehicles.
- 4. Political leaders to appreciate and support land projects.

2.1.15 PUBLIC SERVICE, ADMINISTRATION AND CITIZEN PARTICIPATION

HRM SUB-SECTOR

Achievements in the previous financial year 2018/19

Summary of HRM sub-sector programmes for (2018-19)

Program Name	Human resource management and development						
Objective	To improve service d	To improve service delivery in the county government					
Outcome	Improved public ser	vice delivery					
Sub	Кеу	Кеу	Base	Planned	Achieved	Remarks	
programmes	outcomes/outputs	performance indicators	line	targets	targets		
Training and staff development	To improve employee work performance and enhance achievement of the departmental and individual goals	Proportion of employees trained	36%	50	18	Partially achieved	
	Effectiveness and efficiency in service delivery improved	Proportion of departments on PC	80%	12	11	achieved	
		Performance Assessment Systems	0	1	0	Not Achieved	

Analysis of Capital and Non-Capital projects of the previous ADP

Project Name/ Location	Objective/ Purposes	Output	Performance indicators	Status (Based on the indicators)	Planned Cost (Kshs.)	Actual Cost (Kshs.)	Source of funds
Staff Training	To improve service delivery in the county government	Employee Performance	Proportion of employees trained	18 Employees Trained	3,649,050	3,649,050	TRCG
Working Tools for Staffs	Provide proper working tools to staff to carry out their duties effectively	Effectiveness and efficiency in service delivery improved	Offices connected to the internet	11 Units			TRCG

Annexed below is a summary of what was achieved during the previous year's ADP.

Challenges experienced during implementation of the previous ADP

The main challenge faced in the implementation of the FY 2017/18 CADP for the department was lack of funds to fund the projects.

Lessons learnt and recommendations

Finance and/or budget plays a critical role in ensuring that ADP programmes are achieved. Despite the fact that programmes are budgeted for by the sectors, most ADP programmes fail to achieve their objectives because funds are not readily available when required to undertake the programmes.

Finance department should come up with a proper financial policy and/or framework to ensure that planned ADP programmes are realized by their respective departments, by ensuring that funds are readily available as budgeted for.

INFORMATION & COMMUNICATION TECHNOLOGY SUB-SECTOR

REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS ADP

Introduction

This chapter provides a review of sector/sub-sector achievements, challenges and lessons learnt.

2.16.5 Challenges experienced during implementation of the previous ADP

The main challenge faced in the implementation of the FY 2017/18 CADP for the department was lack of funds to fund the projects.

2.16.6 Lessons learnt and recommendations

Finance and/or budget plays a critical role in ensuring that ADP programmes are achieved. Despite the fact that programmes are budgeted for by the sectors, most ADP programmes fail to achieve their objectives because funds are not readily available when required to undertake the programmes.

3.0 CHAPTER THREE: COUNTY STRATEGIC PRIORITIES, PROGRAMS AND PROJECTS 3.1.0 OFFICE OF THE GOVERNOR

a) Vision and Mission

A prosperous globally competitive county, providing high quality of life for the people of Tana River.

b) Sector Goals and Targets

To Ensure citizen centric service delivery through public participation for social transformation

c) Strategic Priorities

To enhance departmental capacity and conducive work environment for quality service delivery as well as leverage ICT infrastructure and services for quality service delivery and special programs. The department will be mandated to spearhead the thematic area of good governance by promoting peace among all the communities of Tana River to provide an enabling environment for development and economic growth.

Table 6: Non Capital Projects 2019/2020 FY

rogramme Name: ervices	General Administration and Support
Objective :	To Improve Service Delivery And Working Environment

3.4.0 EDUCATION

a) Vision

A globally competitive education, vocational training, research and innovation for sustainable development

b) Mission

To provide quality and basic education foundation for the young children; develop technical skills and know how in youth for self-reliance; identify, develop and nurture sports talents in youth and children to enhance socio economic prosperity and cohesion.

c) Key Goals and Targets

The main goals of education sector will focus to enhance;

- 1. Access to education
- 2. Quality of programs
- 3. Infrastructure development
- 4. Life skills and entrepreneurship development
- 5. Co-curriculum activities
- 6. Adoption of best practices
- 7. Collaborations and partnerships

Strategic Priorities

The sector priorities will seek to provide educational foundation for young children by construction of Model EYE centers, Construction of EYE classrooms, provision of play & art materials, Provision of education bursary, Orphans and Vulnerable Childrens'(OVCs). It will also establish new VTCs at Madogo, Bangale & Kipini, Subsidized youth polytechnic tuition, Tree planting program

Significant Capital and Non-Capital Development

The department will undertake to establish three new VTCS and construction of six model EYE centers as capital development during the 2091/2020FY.

In addition the sector will implement high impact programs such as EYE food program, VTC subsidized tuition, bursary fund, EYE learning materials support, Modern tools and equipment support as major non-capital development.

Key Stakeholders

The key stakeholders in the sector include; CAP-Youth Empowerment Institute, Redcross, MoEST, Moving The Goalposts, Agro-Germany, Special programs, KCB, Equity bank, Local media, among others

3.5.0 YOUTH, SPORTS, GENDER, CULTURE AND SOCIAL SERVICES

a) Vision and Mission

Our vision is to promote sustainable and equitable social cultural and economic empowerment for all Kenyans

Our mission is to formulate, mainstream and implement responsive policies through coordinated strategies for a sustained and balanced social cultural and economic development of the county and empowerment of all vulnerable and marginalized groups and areas.

Sustainable and equitable socio-cultural and economic empowerment of all Tana River people

b) Sector Goals and Targets

To promote Social Development and Social Protection support for elderly persons, promote Culture, Arts and Children services. To establish and strengthen community cohesion that promotes peace and justice, competent and committed communities' development

c) Strategic Priorities

To support sports development, the department target to provide sports equipment, construct basketball pitch, upgrade sub-county stadiums and facilitate county sports leagues. Construction of infrastructure which includes; Social Halls, Cultural Centres, Libraries and the construction of Hola stadium for promotion of sports talent in the county. Also the department engaged on refurbishment of Non Residential Buildings as well as Youth and Women Empowerment through INUKA fund initiative.

Table 7: Cross-Sectoral Impacts

3.6.0 MEDICAL SERVICES, PUBLIC HEALTH AND SANITATION

a) Vision and Mission

A prosperous, globally competitive county providing high quality of life to the people of Tana River

b) Sector Goals and Targets

To build a progressive, responsive and sustainable technologically driven, evidence-based and client-cantered health system for accelerated attainment of the highest standard of health to all residents

c) Strategic Priorities

The department will seek to advance promotive and preventive healthcare interventions, while investing in affordable and accessible healthcare through investing in health infrastructure such as completion of Waldena health center, as well as equipping existing health facilities.

d) Capital and Non-Capital Development

e) Key Stakeholders

Capital and Non Capital Projects

3.7.0 AGRICULTURE

In this chapter agricultural strategies that are aimed at addressing immediate agriculture developmental needs are outlined. These strategies include both capital and non-capital projects. The chapter also highlights how agriculture as a sector synergizes with other sectors of the economy and mitigation measures in case of adverse negative impacts.

a) Vision

A leading model department in food security enhancement, poverty eradication, income generation, employment creation and diverse livelihoods in the county.

b) Mission

To enhance agricultural production and development by promoting competitive farming as a business through appropriate policy environment with effective support services and sustainable natural resource management.

c) Sector Goals and Targets

d) Strategic Priorities

Strategic priorities in the sector:

 To improve on food security, enhance farm incomes; promote market accessibility & linkages by training farmers and providing them with market information and other support services (Produce and sell).
 To timely control all the crop related notifiable pests and diseases outbreaks by cultural, physical and chemical measures possible annually.
 To increase household incomes and create employment by promoting high value crops which give high returns per unit area.

4. To empower the farming community through capacity building to improve their farming skills to enhance productivity

5. To introduce youth into agriculture to improve on food security and impart agricultural knowledge to Young farmers and all 4-K Clubs in the County.

6. To revive minor irrigation schemes and constructing more so as to improve food security and income in the county

7. To promote affordable agricultural land mechanization and efficiency in farm operations.

8. To transform agriculture into a viable business venture for all stakeholders who engage in it

e) Capital and Non-Capital Development

Capital and Non Capital Projects

- Harnessing cross-sectoral synergies

- Mitigating adverse cross-sectoral impacts

TABLE 4: CROSS-SECTORAL IMPACTS

Project name	Sector	Cross-sectoral in	npact	Mitigation measures
		Synergies	Adverse impacts	
Irrigation	Livestock	Increased food and fodder production leading to value addition industries being set up	Unproductive acidic soils due to increased use of chemical fertilizers	Use of organic farmyard manure which is plenty because of high livestock population

Mechanization	Environment	Increased idle land some of which is under forest cover opened up for agricultural activities	 More land exposed to soil erosion Deforestation leading to land degradation 	 Soil conservation, Water harvesting and conservation agriculture Reforestation, there is a policy that requires at least 10% forest cover on farm
Irrigation and mechanization	Industrial growth	Increased incomes due to enhanced food production and productivity leads industrial growth due to increased demand for industrial products	Increase in industries leads to heightened rural to urban migration	land Increased subsidy support to fewer farmers that remain in the rural areas so that they produce in bulk to meet increasing demands for food and raw materials (for the good of everyone in the country)

3.8.0 LIVESTOCK

a) Vision

To be the lead agent in facilitating efficient and effective livestock production services for economic growth, poverty reduction and employment creation.

b) Mission

To enhance and promote sustainable livestock production, marketing of livestock and livestock products and by-products and value addition through appropriate policy and legal framework while conserving the natural resource base.

c)Sub sector goals and targets

To promote, regulate and facilitate livestock production for socio-economic development and industrialization.

No	Livestock Species	Number
1	Cattle	496,180
2	Sheep	294,167
3	Goats	670,907
4	Camels	69,150
5	Donkeys	28,126
6	Poultry	137,018
8	Bee Hives	20,498

Key statistics for the sub-sector

3.9.0 FISHERIES

a) Vision

A prosperous, globally competitive county providing high quality life for the people of Tana River

b) Mission

To improve livelihoods of Kenyans through promotion of competitive innovative, sustainable fisheries development, and equitable distribution of resources.

c) Sector Goals and Targets

d) Strategic Priorities

Broad strategic priorities and policy objectives 2019/2020	

To facilitate general administrative, planning and support services

Development of fisheries infrastructure to promote responsible fish handling, marketing, quality assurance and safety

To promote the capacity of and fishers, to increase production for income generation, employment and wealth creation

To promote fish production through fish farming, and productivity in the county

e) Capital and Non-Capital Development

3.11.0 WATER, IRRIGATION, ENVIRONMENT AND NATURAL RESOURCES

3.11.1. Water & Sanitation Sub-Sector

VISION

Be the leading Provider of sustainable high quality, equitable, affordable and accessible Water Service delivery system in the county and nationally

MISSION

To develop, coordinate and implement Quality and Equitable Water Resource and Service delivery system for social and economic development

Sector Goal

The Water & Sanitation sub-sector is committed to ensuring universal access to safe and affordable drinking water through investing in adequate infrastructure, providing sanitation facilities and encourage hygiene at every level.

Strategic Objectives

The strategic objectives for the sector are; -

To establish adequate capacity to provide quality, efficient and effective services

To improve access to water and sanitation services to all county residents and particularly to the vulnerable

To enhance environmental sanitation through provision and management of public toilets

Ending drought emergencies (EDE) through enhanced resiliency of ASAL livelihoods to the effects of drought and climate change.

To reduce Non-Revenue water to world class standards

To develop and institutionalize legal framework to guide all sector activities for posterity, in line with the Constitution

Development Priorities

The development priorities for the Water & Sanitation sub-sector are:

Development of an integrated water resources master plan for the county by identification and mapping of the available water resources

Provision of clean safe water to Tana River residents

Collection and analysis of water samples.

Procurement of drilling rigs to facilitate drilling of boreholes

Procurement of excavation for facilitating desilting of old water pan and excavating new ones

Issues	Strategies
Lack of county specific water policy frameworks and guidelines to address the challenges in the sub sector Inadequate staff to support the development of the sector Inadequate co-ordination Complete lack of a sewerage system. Inadequate water supply. Lack of sub county water officers Water pollution	Formulate and implement county specific policies Develop and implement solid waste management plan Recruit additional staff to take charge of water issues at sub county levels Develop a sewerage system. Expand / increase water supply though drilling of borehole, dams and reduction of water loss through rehabilitation and augmentation of water and sewerage system (Purchase of excavation machines to increase water pan capacities through de-
	Lack of county specific water policy frameworks and guidelines to address the challenges in the sub sector Inadequate staff to support the development of the sector Inadequate co-ordination Complete lack of a sewerage system. Inadequate water supply. Lack of sub county water officers

Sub-Sector Strategies

Procurement of drilling rigs to
00
facilitate borehole drilling)
Develop a county integrated
water resources master plan
Mapping of all ground water
resources
Energy audit of all water works
Audit of water and sewerage
system.
Investing in additional water
production and distribution of
infrastructure.
Reduction of water loss
Promotion of adoption of clean
and sustainable energy sources

Each sub county 360 sites	Mapping out potential groundwater resources for immediate tapping, conservation and strategic allocation	1M			Increased water supply to meet the increase water demand Increased access to portable water	New	TRCG	
Consultancy services for an integrated masterplan for all water resources		6M	TRCG		An integrated water resources Master plan done and operational	New	TRCG	
Consultancy services on the rehabilitatio n of Matomba Brook (closure) diversion channel	Restored river channel to Ngao, Tarasaa, Oda, Kipao, Mandingo, Chara	10M			Reduced distance to water points Irrigation of farmlands Water for livestock at the delta	New	TRCG	
Diversion of laghabuna brook to Kitangale towards lake shakababu in Garsen south ward Programme 3: WATER HARVESTING AND S	Feasibility study Recommend ations given Construction of the diversion works	20M	TRCG		Water flow restored in the channel Irrigation schemes operational	New	TRCG	

Consultancy services for constructior of 100,000- 300,000m ³ capacity small dams (3 per sub- county)	done and	36M			6No. mega dams constructed, 2 in every sub-county	New	TRCG	
Conduct hydrological surveys and sinking of dedicated larger diameter boreholes (3sites) in 4 water supplies, Hola, Ngao Madogo and Garsen	groundwater resources for immediate tapping, conservation and strategic allocation	1M			Increased water supply to meet the increase water demand Increased access to quality and safe water Planning for sinking of boreholes	New	TRCG	
Purchase of 10,000Ltrs PVC water tanks	advertiseme nt Issuance of LPOs	20M	TRCG		Increase storage capacity at domestic level	New	TRCG	
Purchase of 10,000Ltrs bladder tanks	Tender advertiseme nt Issuance of LPOs	30M	TRCG		Increase storage capacity for the nomadic livestock keepers	New	TRCG	
Programme 4: URBAN WATER SUPPLY Programme 5: RURAL WATER SUPPLY Programme 6: WATER USE EFFICIENCY			·	· · · · ·			· · ·	

Water use efficiency	Formulation of key policies to guide managemen t of water distribution in urban centres	Efficiency in water supplies managemen t	20M			Key policy drafted and passed at the county assembly	New	TRCG	
Reduced NRW in water supplies	Digitization of revenue collection in water works	Efficiency in water supplies managemen t	2M			No. of water works digitized and operational	New	TRCG	
	Automation of water supply systems	Efficiency in water supplies managemen t	5M			No of pipeline systems connected with leak detection equipment	New	TRCG	

3.4. Cross-Sectoral Implementation Considerations

Table 7: Cross-sectoral Impacts

Programme Name	Sector	Cross-sector Impact		Measure to Harness or
		Synergies	Adverse Impact	mitigate the impact
New sewerage line	urban planning and Housing, Environment, and Forestry	Sewerage line constructed	Removal of structures along the sewer line	Closer collaboration with urban planning to ensure wayleave are provided and there is encroachment
Recruitment	Public Service Management Finance & Economic planning County Assembly	More productive working force Improved Governance and accountability	High wage Bill Increase of fees & charges Political interference	Voluntary early retirement Enhance efficiency in resource mobilization
Training & Development	Public service management Finance & Economic planning	Effective service delivery Prudent financial management	High training costs Resource mobilization	Partnerships with training institutions Diversify resource of revenue
Procure motor vehicles	Finance & Economic planning Public works, Roads and transport	Enhance compliance of county laws Increase fleet stock	Increase of recurrent expenditure (motor vehicles Maintenance fuel and manpower Increase personnel constraints	Leasing of optional motor vehicles
Devolved services	Sub-county Administration Public service Management	Improved service delivery	Close access to services Cost of recruitment	Public service management
Construction of offices	Public works, Roads & Transport Finance & Economic planning Urban planning Land, housing & Physical planning	Improved work environment	Cost of land and construction	Pooled construction of County offices

3.4. Payments of Grants, Benefits and subsidies

Table 8: Payments of Grants, Benefits and subsidies

Type of payments	Amount (Kshs.)	Beneficiary	Purpose

3.10. ENVIRONMENT AND NATURAL RESOURCES

a) Vision

Being a sector of excellence in provision of healthy and clean environment, sustainable natural resource utilization and Conservation

b) Mission

To enhance and support protection, development and management of Natural resources and its allied developments for environmental stability and socio-economic advancement of the County

c) Sector Goal

To promote sustainable utilization, protection and conservation of natural resources through use various environmental tools.

d) Strategic Objectives

The strategic objectives for the sector are; -

To enhance environmental protection

To increase tree cover in the County through planted nursery management, planting and controlling cutting of trees

To improve aesthetic value of the environment through beautification and landscaping of roundabouts and other open grounds

To manage County public recreational facilities

To engage the public in environmental issues through public private sector participation initiative

To prevent and control environmental pollution through monitoring and enforcement of environmental regulation

To establish adequate capacity to provide quality, efficient and effective services

To realize and maintain a favorable environment for investment and development.

To provide direction on environmental management through formulation and implementation of policies and other regulatory guidelines

To create environmental awareness through public education and sensitization

Ending drought emergencies (EDE) through enhanced resiliency of ASAL livelihoods to the effects of drought and climate change.

To develop and institutionalize legal framework to guide all sector activities for posterity, in line with the Constitution

Development Priorities

The development priorities for the sector are:

Solid waste management

Procurement of waste trucks

Awareness creation on environment matters

Pollution control through procurement of air quality surveillance machinery and enhancement of surveillance to reduce water and noise

Improvement of environmental aesthetics through routine management of parks, planting of tree seedlings and establishment of new gardens

3.11. FINANCE AND ECONOMIC PLANNING

a) Vision and Mission

The vision is to be an institution of excellence in economic planning and financial management.

The mission is to pursue prudent economic, fiscal, and monetary policies and effectively coordinate government financial operations for rapid and sustainable development of Tana River County.

b) Sector Goals and Targets

c) Broad strategic prioritie	es
------------------------------	----

Programmes	Broad strategic priorities and policy objectives 2019/2020
General Administrative and support Services (AIE)	To enhance departmental capacity and conducive work environment for quality service delivery
Own Source Revenue Collection	To mobilize local revenue resources for the county
Budget and Economic Planning	To offer sound economic planning and budget supply services for the county
Accounting and Finance	To offer prudent financial management
Internal Audit	To offer prudent internal audit services and adherence to PFM Act, 2012
Monitoring and Evaluation	To track and evaluate implementation of programs and projects in the county

d) Capital and Non-Capital Development

e) Key Stakeholders

3.12. TRADE, TOURISM, WILDLIFE & CO-OPERATIVE SOCIETY

a) Vision

A globally competitive economy with sustainable and equitable socio-economic development.

b) Mission

To promote, coordinate and implement integrated socio-economic policies, fair trade practices, economic viable co-operative sector, make the county a destination of choice and programmers for a rapidly sustainable industrializing economy.

c) Sector Goals and Targets Trade Sub Sector

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all. In the County, the sub sector has continued to support the productive activities in wholesale and retail trade which include, establishment of business producer groups, provision of affordable loans, training on entrepreneurship and business management skills, and encouraging the growth of micro, small- and medium-sized enterprises and promotion of fair trade practices.

Tourism Sub Sector

The goal of this subsector is to devise and implement policies to promote sustainable tourism that creates jobs and promote local culture and products. Towards this goal the subsector has identified several niche products in the county which include nature based tourism and cultural tourism. The subsector endeavors to develop, package and market the county as a tourist destination.

d) Strategic Priorities

The development priorities for the sector are;

Promotion of trade development and market services through construction of new trading market facilities, rehabilitation of markets, development of business incubation centres, provision of loans and capacity building of MSMEs.

Licensing and fair trade practises, liquor licensing and regulation through promotion of business by automation of licensing services.

Establishing of weighing centres, verification of weighing and measuring equipment, calibration of county legal metrology standards and construction of weights and measures laboratory.

Installation of tourism signage.

Regulation and control of betting, gaming and lotteries.

Formulation of policies and establishment of legal framework for industrial development in the county.

Development of plans and approach to protect MSMIs in the county against key imports e.g. counterfeit and second hand goods.

Promotion and facilitating the development of SME industrial parks and SEZs.

Facilitation of the development of technical, entrepreneurial and managerial skills for Micro, Small and Medium Industries (MSMIs).

Creation and promotion of linkages of MSMIs with source of finance, technology and markets.

Facilitate orderly growth and development of local tourism

Develop tourism diversified products

Develop tourism information centres

Develop niche products

Develop high value cultural centres

Rehabilitate tourism infrastructure.

COUNTY STRATEGIC PRIORITIES, PROGRAMMES AND PROJECTS

CO-OPERATIVE DEVELOPMENT SUB-SECTOR

The strategic priorities of the sector/sub-sector

- 1. Enforce and enhance compliance with the provisions of co-operative Societies Act and subsidiary
- 2. Vibrant and self-sustaining co-operatives

3. Improved decision making, loyalty and improved market access and marketing efficiency in cooperatives.

- 4. Strengthening capacity for service delivery.
- 5. Enhance capacity in management.

3.14. INFORMATION & COMMUNICATION TECHNOLOGY

COUNTY STRATEGIC PRIORITIES, PROGRAMMES AND PROJECTS

Introduction

This chapter provides a review of sector/sub-sector priorities, programmes and projects for the FY 2019/20.

a) Vision and Mission

The sector vision and mission are:

Vision: A world class provider of cost-effective physical and ICT infrastructure facilities and services.

Mission: To provide efficient, affordable and reliable infrastructure for sustainable economic growth and development through construction, modernization, rehabilitation and effective management of all infrastructure facilities.

b) Capital and Non-Capital Projects

A summary of the Capital and Non-Capital projects to be implemented in the FY 2019/20 are detailed out in the tables below (annexed).

Programme Na	me	General ICT Administration, Planning and Support Services										
Sub	Project name	Description of	Green	Estimated	Source	Time	Performan	Target	Status	Im		
Programme	location	activities	economy	cost (Ksh.)	of	frame -	се			age		
	(Ward/sub-		considera		funds	FY	indicators					
	county/count		tion									
	y wide)											
County News	Production of	Printing of	Online	12M	TRCG	2019/2	No. of	300	New	ICT		
and	County	county	magazine			0	copies	copies				
Information	Stories and	magazines and	access for				printed &					
Services &	News	documentary	the				documenta	2docum				
Website	Features	production	citizens,				ries	entaries				
management	(documentari		less				produced					
(County	es) - HQ		copies									
branding			printed									
initiatives)	County	Continuous	-	3M	TRCG	2019/2	Status of	1	New	ICT		
	website	website				0	signed					
	management	maintenance					agreement					

County ICT and Media Policy and Regulation Services	ICT & media policy development project - HQ	Develop ICT policies & procedures	-	4.5M	TRCG	2019/2 0	No. of policies developed	3 policies	New	ICT
Programme Na	ime	County ICT and b etc.)	proadband in	frastructure	(ICT Infras	tructure D	evelopment –	hardware,	software	, sut
Sub Programme	Project name location (Ward/sub- county/count y wide)	Description of activities	Green economy considera tion	Estimated cost (Ksh.)	Source of funds	Time frame	Performan ce indicators	Target	Status	Im ag
County ICT Infrastructur e, Connectivity and shared services	Procurement of ICT infrastructur e equipment - HQ	Purchase of laptops/PCs, Tablets for ICT officers	Laptops are greener than desktop PC – use less electricity and produce less carbon per/hour than desktop PCs	5M	TRCG	2019/2 0	No of officers (per gender) with computers	30	New	
		Purchase of ICT accessories i.e. office projectors, printers etc	-	2M	TRCG	2019/2 0	Offices with ICT accessories i.e. projectors etc	5	New	ICT
	Proper networked county offices	Networking of the 3 sub county offices	-	1M	TRCG	2019/2 0	No of functioning county offices networked	3	New	ICI
	Software acquisition and/or subscriptions – HQ	Acquiring Microsoft Office 2016 Pro for 50 users	-	3M	TRCG	2019/2 0	Acquired & installed software	50 licenses	New	ICT
		Acquire Kaspersky endpoint anti-	-	800,000	TRCG	2019/2 0	Acquired & installed software	100 licenses	New	ICT

· · · · · · · · · · · · · · · · · · ·			r	1	1	1	I	I	1	1
		virus license for 100 PCs								
		Acquire genuine Windows 10 for 50 computers	-	2.4M	TRCG	2019/2 0	Acquired & installed software	50 licenses	New	ICT
		Renew email license for 100 users – HQ	-	1.5M	TRCG	2019/2 0	Acquired & installed software	100 licenses	New	ІСТ
		Firewall license renewal	-	1.1M	TRCG	2019/2 0	Acquired & installed software	1	New	ІСТ
	Internet & email connectivity	Procurement of network equipment's & Connecting internet at county offices	-	9.2M	TRCG	2019/2 0	No of offices connected	10	Contin uous	ICT
	ICT service & maintenance - HQ	Carry out bi- annual (2) ICT servicing & maintenance	-	5M	TRCG	2019/2 0	ICT service & maintenan ce reports	2	New	ІСТ
	ICT Resource Centers	Establishment and operationalizati on of ICT resource centers in Galole	-	8.9M	TRCG	2019/2 0	Number of functional resource centers established	1	New	ICT
	County Data Center	Establishment and operationalizati on of a County data center at Minjila, Garsen		10M	TRCG	2019/2 0	Operation status of data centre that is gender sensitive	1	New	ICT & I Pai
Programme Na	me	County Informati	ion and Com	munication s	ervices (E-	Governme	ent)			
Sub Programme	Project name location (Ward/sub- county/count y wide)	Description of activities	Green economy considera tion	Estimated cost (Ksh.)	Source of funds	Time frame	Performan ce indicators	Target	Status	Im age
Capacity Development	Capacity building – HQ	Carry out county ICT		2.2M	TRCG	2019/2 0	No of participant	30	New	ICT

		capacity					s trained			
		building of staff					(per gender)			
Computer for school program	Computer donations program	Distribution of computers to secondary schools – 15 wards.		6.6M	TRCG	2019/2 0	No of wards (& schools) donated with computers	5 comput ers per school/ ward	New	ICT
Programme Na	me	Renewable Energ	3Y							
Sub Programme	Project name location (Ward/sub- county/count y wide)	Description of activities	Green economy considera tion	Estimated cost (Ksh.)	Source of funds	Time frame	Performan ce indicators	Target	Status	Im age
Village Electrificatio n	Security lights for villages in each wards	Setup up 5 solar powered security lights in each ward	Solar powered electricity	16.5M	TRCG	2019/2 0	Number of Solar panels installed - Number of LEDs installed	75	New	Pul Wo dej
		Maintenance report preparation of security lights		500,000	TRCG	2019/2 0	Maintenan ce reports	Quarterl y	New	Pul Wo dej
County initiative Stima mashinani – County to partner with KPLC	Electricity expansion to villages – county wide	County to partner & agree with KPLC to roll out electricity connection to houses in the vicinity of main power lines – like last mile program of the national government. County to offset Kes. 1000 connection fees for the beneficiaries.	Reduced reliance on improvise d lantern and firewood	6M	TRCG	2019/2 0	No of household s connected	200 houses per ward	New	Pul Wo dej

Cross sectorial implementation consideration The following measures should be adopted to harness cross sector synergies and mitigate adverse crosssectorial impacts of projects where necessary.

Cross Sectoral Impacts

Programme Name	Sector	Cross-sector Impact		Measures to Harness the Impact
		Synergies	Adverse impact	
County ICT and broadband infrastructure (ICT Infrastructure Development)	Health	Automation of health records and systems will streamline the whole process, helping doctors to serve the patients at a click of a button. This will greatly reduce waiting time at the hospitals		
	Finance & Economic planning	Automation of all revenue streams will greatly improve county revenue collection by sealing all the loopholes. This will enable the county to meets its immediate needs without reliance on the exchequer		
	Human resource	Human resource automation will greatly improve staff management, recruitment, records management etc. of HR		
	All other sectors	Moving from manual to automated systems will greatly increase productivity and service delivery of the employees	Resistance to change might arise from the users	Training and capacity build the users on the importance of using computer systems within an organization
County Information and Communication services	Education	ICT training of our students at schools will expose them to ICT skills at a young age, and once they graduate they will have the necessary skills to explore the world		More schools to be equipped with ICT equipment

Develop ICT policies and branding initiatives	Trade and tourism	Continues county branding events will improve county exposure to the rest of the country, thus improving trade and tourism		
	All other county sectors	Improved standardization of communication and work as a result of policies being in place	Resistance to change to the new policies might arise from the users	Educate and capacity build the users on the importance of policies within an organization
Renewable Energy	Agriculture/Irrigati on	Increased food production – farmers will be provided with solar powered water pumps to irrigate their farms during dry season.		Roll out more green energy solutions in farming
	Water / livestock & fisheries / special programs	More water sources can be explored and boreholes dug and produced with solar water pumps, water will be pumped to villages and towns using green energy		More cooperation between departments

3.15. ROADS, TRANSPORT, PUBLIC WORKS, HOUSING & URBAN DEVELOPMENT

STRATEGIC PRIORITIES PROGRAMES AND PROJECTS

URBAN DEVELOPMENT

a) Vision

Enhance service delivery in urban centres through improved safety and sanitation for conducive business environment.

b) Mission

Vibrant, safe and commercially conducive urban centres.

HRM Sector

The sector comprises the Finance and Economic Planning, Internal Auditing, Revenue, Procurement, County Public Service, Human Resources Management and Devolution.

a) Vision

To be an institution of excellence in economic planning, financial management and prudent resource management.

b) Mission

To pursue prudent economic, fiscal, and monetary policies and effectively coordinate government financial operations for rapid and sustainable development of Tana River County.

c) Sector Development Needs, Priorities and Strategies

The key sector priorities are:

1) Resource mobilization

- 2) Asset management
- 3) Debt Management

4) Strengthening policy formulation, planning, budgeting and implementation of CIDP 2018-2022.

5) Expenditure controls.

6) Tracking of implementation of development policies, strategies and programmes.

7) Human Resource planning, Management and Development

d) Capital and Non-Capital Projects

A summary of the Capital and Non-Capital projects to be implemented in the FY 2019/20 are detailed out in the tables below

Cross sectorial implementation consideration

The following measures should be adopted to harness cross sector synergies and mitigate adverse crosssectorial impacts of projects where necessary.

Programme / sub Programme	Sector	Cross-sector impact		Measures to harness or mitigate the impact	
		Synergies	Adverse Impact		
Revenue Management Services	All sectors All sectors Adequate and sufficient funding for projects and programs		 Incomplete implementation of projects/programs Underfunding of projects 	 Inforce revenue collection and increase revenue points. Prudent management of resource Revenue resource mapping ER system 	
Supply Chain Management	All sectors	 Automation of procurement procedures Timely procurement of services and projects 	 Non completion of projects within the stipulated timelines Litigations Increase in project costs Missing out on grants 	 Adherence to procurement laws and policies Full implementation of IFMIS modules Timely requisition of projects and services by departments 	
Accounting Service	All sectors	Timely payments for goods and services Satisfied clients	 Inaccurate financial reports Low funds absorption rates Delays in project/ programs implementation Adverse audit opinions 	 Training and capacity building Adherence to financial regulations and procedures as provided for in PFM Act 	
Monitoring, Evaluation and Reporting	All sectors	Improved tracking and assessment of	 Poor implementation of projects Inaccurate status reporting 	 Establish M&E unit Acquisition and installation of electronic M&E system 	

		project implementation I Efficient utilization of resources	 Poor quality of works Loss of funds Project/program objective will not be achieved 	
Economic Planning & Budgeting	All sectors	 Enough resource for development (resource mobilization) Streamlined allocation of resources Integrated economic plans Improved funds Absorption Improved service delivery Quality and accountable governance Seamless implementation of plans 	Unsustainable decision making Inadequate resources	Capacity building of technical staff

4.0 CHAPTER FOUR: RESOURCE ALLOCATION

Resource allocation criteria

The 2019/2020 FY allocation criteria was based on the performance of the previous year's MTEF budget, the development priorities of the current administration, the national big 4 agenda, the human resource capacity of each sector and the ceilings provided by the Commission of Revenue Allocation (CRA).

4.1 Proposed Budget by Program

The County will endeavor to adopt an all-inclusive and participatory framework of budget formulation and implementation. As such the county has set aside Kshs. 10 million for development projects in each of the 15 wards (reflected in the Public Participation Forum Reports) as a baseline, with a view of potentially increasing this percentage in outer years depending on implementation and sustainability. A number of flagship projects have been prioritized in this year's ADP to stimulate economic growth, while other development oriented projects that are recurrent in nature have been prioritized to build on foundations laid in previous years. Examples of such high impact projects are construction of Madogo Market; purchase of fire engines; automation of revenue collection; construction of Model EYE Centers; Completion of Waldena Health Centre; and establishment of small irrigation schemes. A comprehensive list of planned projects for the FY 2018/2019 is shown in the table below.

PROGRAMMES	AMOUNT (Kshs.)
OFFICE OF THE GOVERNOR	
Governance Justice, Law and order	1,457,370,000
Total	1,457,370,000
SPECIAL PROGRAMME	
General administration, planning and support services	142,000,000
Disaster Risk Reduction, Resilience and peace buildings	255,000,000
disaster response, social protection and safety	100,000,000

TOTAL			11,098,512,482	

4.3 Financial and Economic Environment

The County will seek to achieve its strategic objectives through decisive investment in the following areas:

Investing in Urban Planning and Development: The County will focus on infrastructural development such as grading and murraming of existing roads; opening of new roads; construction of drifts, bridges and culverts; Installation of street and high mast lights; Construction of parking bays and bus parks.

Investing in accessible and quality education: Through this outcome the county intends to enhance investment in establishing Model Early Years Education (EYE) Centres formally Early Childhood

Education Centres (ECDE); Provision of bursaries to enhance access, retention and transition among the learners and also partner with other institutions to enhance tertiary education.

Investing in quality and accessible healthcare: Through this outcome, the county intends to enhance access to health care by equipping of the existing facilities, completion of stalled projects and construction of 1 level V hospital. The county department of Health Services intends to fill the gaps in service delivery within all the facilities by construction of requisite facilities such as incinerators, soak pit, staff houses and placenta pits and hiring of staffs.

Investing in modern and commercially oriented agriculture: This strategic outcome is geared towards enhancing agricultural productivity hence improving food security and the household incomes among the county residents. The county government intends to invest in: value addition of both livestock and agricultural produce; marketing of livestock and agricultural produce; investing in hay barns; livestock disease control, investment in alternative sources of livelihoods through fish farming, poultry and apiculture; investing in measures that ensure food security through greenhouse farming and promotion of traditional high value crops (THVC). A summary of proposed sectorial budgets is provided in the table below.

Risk	Assumption	Mitigation measures
Financial risk	Funds will be available and	Close working relationship with
	released on time	all stakeholders (Chief officer,
		director, CEC & other high rank
		county government officials)
Climate risk	Traditional rain-fed supported	Should rains fails, adopt drought
	areas (especially the Tana Delta	tolerant varieties and where
	region) will continue to receive	possible shift to irrigated
	rains	agriculture in order to mitigate
		drought risk
Destruction of crops by wild	There will be insignificant	Compensation of farmers by
animals or livestock	destruction of crops as farmers	wildlife agencies since farmers
	will do everything possible to	did their part by protecting crops
	protect their crops of course	Compensation of farmers by
	excluding violence	livestock keepers since farmers
		did their part
		Presence of security to avert

	reduce incidences of insecurity	will ensure communities live in
		harmony and unity
Economic instability	Economic stability will prevail	Good economic and political
	throughout the implementation	stability within the county
	period	
Political instability	Current political stability will	Dialogue and conflict
	prevail.	management

5.0 CHAPTER FIVE: MONITORING AND EVALUATION

5.1.1 Introduction

This chapter gives the monitoring and evaluation framework that will be used at the county level to monitor and evaluate implementation of various projects/programs that will be implemented within the planned period. M&E is a powerful public management tool that can be used to improve the way through which county governments achieve results.

Monitoring is the process of collecting, analyzing and reporting data on a project or programs input, activities, output, outcomes and impacts. These data when analyzed, pinpoint progress or constraints as early as possible to allow the government to adjust project/programme activities as required. It provides the government with regular feedback on progress in the implementation of activities specified in the development plans.

Evaluation on other hand is a systematic and objective assessment of ongoing or completed projects/ programs or policy, its design, implementation and results. It determines the relevance and fulfillment of objectives, efficiency, effectiveness, impact and sustainability. Through evaluation, one is able to tell whether the projects /programmes activities are moving toward or away from projects /programs objectives and why. It further states lessons learnt and recommendations for future improvements.

5.1.2 Rationale for County M & E Framework

It verifies whether the activities of each County's priority projects or programs are happening according to planning timelines and targets presented in the efficient manner. Disseminating M&E results can raise awareness of a county's programme and projects among the general public and help build positive perceptions about the county's leadership; and this may lead to increased resource allocation towards the well performing counties.

The system will also supply the county with regular flow of information throughout the course of CIDP programme implementation in order to make it possible to detect changes in status and utilization of resources allocated to CIDP priority areas.

The M &E system defines relationships among inputs, activities, outputs, outcomes and impacts.

5.1.3 County M & E legal framework

The legal mechanism spelt out in the constitution of Kenya, have necessitated the development of monitoring and evaluation systems for county government. To ensure greater transparency and accountability, the constitution of Kenya 2010 requires that government to use M&E mechanism as an integral part of developing and executing government policies, programs and projects and in resource allocation and management at the two levels of governments.

The County government act No.17 2012 gives the County government the responsibility of preparing CIDP that must include a monitoring and evaluation section

Presently, the county does not have a substantive Monitoring and Evaluation framework policy in place. However, the County Treasury is in the process of formulating an M&E policy for adoption by the beginning of FY 2018/2019. Meanwhile, all departments are expected to employ County Monitoring and Evaluation Framework (CIMES) to track progress, performance and implementation against planned targets, key performance indicators and prescribed time frames. Data collection will be collected regularly and information will be available in quarterly budget implementation reports that will inform M&E reports until a substantive framework is adopted and rolled out. A list of performance indicators that will be used in the 2018/2019 ADP M&E for the respective departments is available in the table below.

Monitoring and Evaluation Performance Indicators

OFFICE OF THE GOVERNOR

Table 5: Monitoring and Evaluation Performance Indicators

Programme Na Services	ame: General Administration	and Support			
	Improve Service Delivery A	nd Working E	Environment		
Outcome: Improved Service Delivery And Working Environment					
		Baseline	Planned Targets	Achieved Targets	Remarks
Administration	Public baraza's and meetings; Mainstream HIV AIDS in public Barazas; sensitization on disaster preparedness and response	1%	203*4= 812 seating's done	100	
	Structured sensitization programs on crime prevention and radicalization	50%	15 forums to 150 participants conducted	75
