FOREWORD

The Public Finance Management (PFM) Act, 2012 outlines the county planning framework which provides for the preparation of various kinds of plans and among them is the County Annual Development Plans (CADPs). The CADP provides the basis for implementing the CIDP and guiding resource allocation to priority projects and programmes. Thus the CADP is prepared within the framework defined by section 126 of Public Finance Management (PFM) Act 2012.

The CADP which is submitted for approval to the county assembly not later than 1st September of each year provides for, *inter alia*, strategic priorities for the medium term that reflect the county government's priorities and plans; county programmes and projects to be delivered; measurable indicators of performance where feasible; and the budget allocated to the programme and projects.

The county government has over the last four and half years implemented a five year County Integrated Development Plan (CIDP) through annual plans (CADP) which are prepared in a participatory manner ensuring meaningful engagement of citizens in the preparation process.

Finally, the demand to demonstrate significant development results from the resources allocated in each plan period calls for a proper planning. As such preparation of plans not only requires laying out of priorities but a clear mechanism for measuring implementation if you are to realise the desired outcome.

CHAPTER ONE : INTRODUCTION

This chapter gives a short description of the county in terms of the location; size; demographic profiles; administrative and political units. It also highlights a summary of the socio-economic and infrastructural information that has a bearing on the development of the county. In addition, the chapter also provides the linkage of the County Annual Development Plan with the CIDP.

1.1 Overview of the County

Uasin Gishu County is one of the forty seven counties in Kenya and is located within the Rift Valley region. The county has its headquarters in Eldoret town. It extends between longitudes 34° 50' east and 35° 37' east and latitudes 0° 03' south and 0° 55' North. The County shares common borders with Trans Nzoia County to the North, Elgeyo Marakwet County to the East, Baringo County to the South East, Kericho County to the South, Nandi County to the South West and Kakamega County to the North West. It covers a total area of 3,345.2 Km².

Administratively, the county is divided into six sub-counties namely Ainabakoi, Moiben, Kesses, Kapseret, Turbo and Soy. The county is further sub-divided into thirty wards which are further sub-divided into fifty-seven locations and one hundred and five sub-locations.

The county experiences a high and reliable rainfall which is evenly distributed throughout the year with average rainfall ranging between 624.9mm-1560.4mm. It occurs between the months of March and September with two distinct peaks in May and August. The dry spells begin in the month of November and end in February. Temperatures range between 7°C and 29°C. The rainfall and temperatures in the county are conducive for both livestock and crop farming.

According to the 2009 Population and Housing Census, the population for the county was 894,179. This population is projected to increase to 1,211,853 in 2017 at an inter-censual population growth rate of 3.8 per cent which is slightly higher than the national rate of 2.9 per cent.

The county is the region's transport and service hub as it lies along the northern corridor transport route which links Kenya with other East Africa countries; linked with a railway line and eight stations; and has an international airport. In addition, the county has a good road

network. Improvement of these facilities will play a significant role in the county's economic growth and poverty reduction.

Agriculture is the main economic stay of the county. The major crops grown in the county are maize, wheat and beans which can grow in any part of the county. Horticultural crops such as passion fruits are also grown in the county. The main livestock bred are dairy and beef cattle, goats, sheep, rabbit, pig, chicken (both hybrid and indigenous) and beekeeping. Dairy cattle do well in Ainabkoi, Kapseret and Turbo areas of the county. However, all livestock are reared across the county.

Industrial development of the county is mostly for processing agricultural products. Major manufacturing industries in the county include Rivatex, Ken Knit, Raiply, Coca Cola Bottlers, New KCC and Mombasa Millers. Proximity to big commercial centres like Kisumu, Kakamega, Bungoma, Nakuru and Kitale provides a wide market for industrial products. There is however a huge unexploited industrial potential given the ready availability of raw materials, labor and strategic air, rail and road transport infrastructure. In addition, the cottage industry can also be exploited gainfully for wealth and employment creation as they require minimal setup costs and makes use of locally available raw materials.

1.2 Annual Development Plan Linkage with CIDP

This County Annual Plan has been developed from the County Integrated Development Plan (CIDP). The plan has domesticated the county policy objectives laid out in the CIDP into sector specific objectives that will be implemented through unique sector strategies to attain the desired policy outcomes. This plan therefore forms the basis for county budgeting by providing the requisite information required for preparation of the 2018/19 County Budget.

1.3 Preparation process of the Annual Development Plan

All County Departments were issued with the guidelines for preparation of their individual plans which they submitted to the Economic Planning Department for compilation. Upon receipt of the individual development plans, the department ensured they were aligned to the CIDP and prepared within the framework defined by section 126 of the PFM Act 2012. The plan was then subjected further to consultations with a view of validating it before submission to the County Assembly.

1.4 Outline of the CADP FY2018/19

Introduction

Chapter I gives a short description of the county; a summary of the socio-economic development and linkage of the County Annual Development Plan with the CIDP.

Review of the Implementation of the Previous CADP FY 2016/17

Chapter II provides a review of sector/sub-sector achievements for the previous CADP - FY2016/17.

County Strategic Priorities, Programmes and Projects

Chapter III presents sector/sub-sector strategic priorities, programmes and projects for the next Financial Year 2018/19.

Resource Allocation

Chapter IV gives a summary of the proposed budget by programme and sector/ sub sector for the next Financial Year 2018/19.

Monitoring and Evaluation

Chapter V presents a monitoring and evaluation framework to be used in tracking implementation of programmes/projects identified in chapter III.

Annex

The annex provides a summary of implementation status of capital projects for the previous financial year 2016/17.

CHAPTER FIVE : MONITORING AND EVALUATION

This chapter discusses the county monitoring and evaluation framework as outlined in the County Integrated Monitoring and Evaluation System (CIMES). The county has draft M & E policy which, though awaits ratification, informs M & E activities in the county development discourse. Uasin Gishu County also has draft indicator work book containing various performance indicator which will be used to monitor implementation of 2018/2019 County Annual Development Plan programmes and projects.

Each department in the county government has M&E committees (called M&E champions) in charge of M&E activities within the respective departments. These champions will carry out their departmental routine M&E exercises and compile periodic reports and share with the department of Economic Planning. The department will also conduct scheduled M&E on programmes/projects to ascertain their implementation status and compile M&E reports.
