Foreword

his is an exciting moment for Baringo County as the county turns 10-year-old and a critical moment of reflection for the county and the people of Baringo and our partners in development. Over the past 10 years the county has made strides in shaping its development aspirations, where a milestone achievements has been met that span all sectors. Over the same period, the county has also experienced varied challenges; firstly, a planetary emergency of climate change and Covid 19 pandemic has been felt to the most remote villages and households in the county. The effects of Climate change have led to some of the worst unprecedented disaster incidences in the county with a toll of human suffering including loss of lives, destruction of livelihoods, critical infrastructures,

displacement and disintegration of families and societies. The county was faced with increased resource based conflict emergencies in 2014, 2015, 2018, 2019, and 2021, worst floods situation in 2014, 2016 and 2018, coupled with this, drought related disasters have continued to ravage the county with increasing intensity and frequency, worst case drought incidences reported in 2016, 2017, 2018 and 2022. This spate of disaster occurrences resulted into untold humanitarian emergencies that have continuously altered the counties priority focus on development.

This is also a moment of choice, an opportunity to use our past experience as an important lesson to shape our future, and do things differently by aspiring for greater common goal. The 3rd generation County Integrated Development Plan (CIDP 2023-2027) is a county master plan that illustrates the county development aspirations for the next five years. The development of this plan took cognizance of the role that we (*Baringo Residence, County Government, National Government, Non-Governmental Development Organizations, Private Sector and Faith Based and Special Interest Groups*) play in achieving the development aspirations of the people of Baringo. In these endeavor we took a deliberate effort to ensure extensive consultation across all stakeholders was carried out to get all our input into what constitute county development aspirations over the next five years.

The plan presents a joint collaborative development aspiration for the development stakeholders working in Baringo with an aim of reengineering county development planning and service delivery for an accelerated sustainable, transformational development. This plan is organized under a rallying theme of "Delivering as One to Transform the Lives of the People of Baringo to The Highest Standard of Living" while providing a people centered programme that has been carefully analyzed and synchronized in line with my commitment to invest in:

- Increasing productivity
- Wealth creation
- Project completion and service delivery

The plan elaborates how Baringo County Government intends to work with our development partners to deliver to the people, applying integrated approaches that aim at accelerated transformative change, supporting our community to triumph over the shackles of poverty and rebound from the resultant effects of recent climate based disasters. The plan is grounded on our commitment to Kenya's development aspirations, Supporting the delivery of the "Kenya Kwanza" Government Manifesto "The Plan", the Kenya Vision 2030 Medium Term IV aspirations, the African Union Agenda 2063 Aspirations, the UN 2030 global agenda on Sustainable Development Goals, Sendai Framework of Action on Disaster Risk Reduction and the Paris Agreement on Climate Change Adaptation and Mitigation.

Aside from its outward development planning, the plan also set outs inward looking steps towards making Baringo County Government a more agile and anticipatory organization, investing in our people, our business process and operational excellence to effectively and efficiently provide service delivery to our stakeholders.

The 3rd Generation CIDP 2023-2027 is the result of extensive collaboration with a number of our development partners. I am immensely grateful to them, and to our technical teams from the departments and members of the secretariat, whose ingenuity and expertise have helped in shaping our ideas and inputs in to a plan that truly reflects the diversity of our county, communities and the people whom we serve. I invite you to read the plan and partner with us in delivering these development aspirations of the people of Baringo.

H.E Hon. Benjamin Chesire Cheboi - EBS, EGH Governor Baringo County

Acknowledgment

Baringo CIDP 2023-2027 document is a result of immense collaboration between the county government and its development partners. Firstly, I would like to sincerely appreciate all the county residents who showed up during public participation forums to give their views on development priorities which has formed the core of this document. Your views and proposals helped a great deal in crafting a responsive development programme.

Secondly we send our sincere gratitude to the County Executive Committee Members under the stewardship of His Excellency Hon. Benjamin Chesire Cheboi the Governor, and his deputy His Excellency Hon. Felix Maiyo for their invaluable guidance and advice throughout the CIDP process.

Our sincere gratitude also goes to the County Assembly leadership and the honorable members for support and cooperation at both formulation and approval level. We appreciate the efforts of the national government through the State Department of Planning at the National Treasury and Planning and the Council of Governors for timely release of the National CIDP guidelines whose development included the inputs of County Governments. The guidelines have been of great importance in putting our plan into perspective and ensuring that our plan met all the technical parameters.

This plan would not have been possible without the immense work done by sectoral working groups under the leadership of respective County Executive Committee members, and which brought together county government departments and agencies, national government ministries and agencies and the development partners working in the county. The sector working groups were the focal point areas for identifying, analyzing, aligning and synchronizing development priorities coming from the technical sectors, public participations forums, the development partners and other stakeholder's priorities into programs.

We would like to single out World Vision Kenya, RECONCILE, Hellen Keller, World food Programme, Anglican Development Services, NURU Kenya, GROOT Kenya among others for their financial and material support during 3rd Generation CIDP development Process, we are indeed indebted in gratitude to them. We would like to also acknowledge the technical support received from all our development partners who honor our invite to participate in the sectoral working groups to give inputs in our development priorities over the next five years.

Last and most importantly, we wish to sincerely thank the 3rd generation CIDP technical secretariat for their commitment and dedication in coordinating the entire process of plan development and their expertise and ingenuity in putting together the most pragmatic plan the county has ever had. The team included; CPA. Gikono Kiptoo (Chairperson), CPA. Jacob Kendagor, CPA. Sammy Kibor, Mr. Michael Ngetich, Ms. Roxana Kandie, Mr. Solomon Kimuna, Mr. Richard Tumeiyo and Mr. Ken Nadeiwa of Treasury and Economic Planning Department, Mr. Charles Cherogony and Mr. Abdushakur Khatib Lendapana (Vice Chair) of Research, Public Policy and Resource Mobilization Unit, Ms. Neville Kandie, Mr. Michael Baimet, Mr. Mike Kukat and Ms. Catherine Sumukwo of Department of Public Administration

Devolution and E-government, Mr. Ronald Cherutich of County Assembly, Mr. Naftaly Koojo of County Commissioner's Office and Ms. Leah Sang of National Drought Management Authority(NDMA). Your role in collecting, Collating and analyzing all data and information and piecing them together to coming up with this important plan in a record short period of time is a clear indication of dedication to service.

For any other organizations, institutions and individual whom I may have not recognized individually, we ask you to kindly accept our most sincere appreciation to you all.

Hon. Wilson Cheserek Ruto

<u>County Executive Committee Member</u>

<u>Finance and Economic Planning</u>

Executive Summary

The 3rd generation County Integrated Development Plan (CIDP 2023-2027) is a county master plan that illustrates the county development aspirations for the next five years. The plan is envisaged to provide a framework to guide co-ordination and management of development in the county and presents a joint collaborative development aspiration for the development stakeholders working in Baringo with an aim of re-engineering county development planning and service delivery for an accelerated, transformational and sustainable development. The plan is organized under a rallying theme of "Delivering as One to transform the lives of the people of Baringo to the highest standard of living" and it is tailored towards Increasing productivity; Wealth creation; Project completion and service delivery

This CIDP is organized into six chapters, as outlined below;

Chapter One: This section provides critical statistics about the county and includes; county's background information including inhabitants, location, major economic activities, key demographic statistics and sectoral statistics, Physiographic and Natural Conditions, Climatic and Ecological Conditions relevant to inform development planning.

Chapter Two: This chapter provides a review on implementation of the previous CIDP 2018-22 and presents an analysis of county performance in terms of revenues, expenditures and key outcomes as well as the major challenges faced in the implementation of the plan. Additionally, the chapter provides a description of Emerging issues and Natural Resource Assessment. The Chapter also provide in summary a conceptual framework of the plan by describing in a nutshell a pyramid of linkage between plan theme with the three pillars and the overall vision.

Chapter Three: The chapter describes the spatial framework within which development projects and programmes will be implemented as outlined in the County Spatial Plans which are aligned to National Spatial Plan 2015–2045. The chapter provides illustrations inform of maps of resource potential growth areas, strategic geographical locations, existing natural resources, existing and proposed infrastructure projects and emerging technologies in ICT that guide development.

Chapter Four: Discusses key county development priorities, strategies, programmes, flagship projects, and cross-sectoral linkages with outcomes, performance indicators and associated budgets as identified by stakeholders during the plan preparation. The section describes Sector Composition, the sub sectors under the sector, Vision and Mission and Sector Goal (s). The Chapter describes the CIDP linkage with other regional, national and international development agenda including the Kenya Vision 2030 MTPIV, Governor's manifesto, Sectoral plans, UN Sustainable Development Goals, AU Agenda 2063, Sendai Framework of Action on Disaster Risk Reduction, and Policies and Strategies.

Chapter Five: This chapter provides the county's institutional arrangement and their specific roles towards implementation of the CIDP. It presents the resource mobilization and management framework, asset management, and risk and mitigation measures.

Chapter Six: This chapter outlines how the plan will be monitored and evaluated during and after its implementation. It also indicates the Monitoring and evaluation processes, methods and tools as guided by Section 232 of the Constitution, legal provisions that provide for M&E, County M&E Policy in line with the National M&E Policy, CIMES Guidelines, Kenya Norms and Standards for M&E and Kenya Evaluation Guidelines. The chapter provides highlight of the proposed M&E structure; data collection, analysis, reporting and learning; M&E outcome indicators tracking; dissemination; feedback mechanism and evaluation plan.

CHAPTER ONE: COUNTY OVERVIEW

1.1 Background

Baringo is one of the largest counties in Kenya covering 11,075 KM sq but with a relatively small population compared to other counties. The County is divided into 7 Sub-Counties, namely Baringo South, Mogotio, Eldama Ravine, Baringo Central, Baringo North, Tiaty West and Tiaty East. The county consists of 30 electoral wards and 184 locations and distributed as shown in table 1 below. Its headquarters is Kabarnet town which is approximately 140 KM and 295 KM from Nakuru City and the capital city, Nairobi respectively. About 80% of the County is arid and semi-arid areas. It is predominantly inhabited by the Tugens, (a Kalenjin Sub tribe) and minority ethnic groups comprising the Ilchamus (a Maa speaking community) in the South, Pokot, Endorois, Kikuyus, Turkanas and the Nubians. The population is mainly concentrated in the highlands and urban centers. The arid parts of the larger Tiaty, part of Baringo North, Marigat and Mogotio are sparsely populated.

Table 1: Administrative and Electoral Units in Baringo County.

Sub county	Area KM sq	Electoral Wards	Locations
Baringo South	1,985	4	17
Mogotio	1,304	3	23
Eldama Ravine	954	6	18
Baringo Central	589	5	21
Baringo North	1,704	5	15
Tiaty West	2500	3	14
Tiaty East	2039	4	15
Total	11,075	30	124

Source: KNBS, Baringo 2022

In 2015/2016, the overall poverty rate in Baringo County was 39.6 percent with 8.5 per cent living in extreme poverty, against overall national rates of 36.1 and 8.6 per cent, respectively. The rate of multidimensional poverty stands at 60.3 percent against national average of 53 per cent. Among children, at least 4 in every 10 were affected by monetary poverty or lack of financial means, which also affected 30.6 percent of the youth and 39.6 percent of the women. Also, 56.6 percent of children were living in multidimensional poverty; that is, deprived in multiple dimensions including nutrition, healthcare, education, housing and sanitation. The proportion of youth and women in multidimensional poverty were 56.7 percent and 67.4 percent, respectively. Clearly, women bear the highest burden of poverty in Baringo County.

Agriculture is the backbone of the county Economy, accounting for approximately 58 percent of GCP¹. Crop farming is mainly practiced in Eldama Ravine and highlands of Baringo North Sub County, with significant horticultural farming in Marigat Sub-county. In the highlands, cash crop farming of coffee and cotton are the main economic activity, although food crops such as maize and beans are also grown in the area. Trade of farm produce; mainly maize and beans is the main economic activity in Kabarnet and other towns. In the low-lands livestock keeping is the main economic activity with cattle, goats, sheep and camels being the major livestock kept. There are major livestock markets in Tiaty, Baringo North and Baringo South

_

¹ KIPPRA Policy Brief No. 49/2019-2020

sub-counties while other forms of business are spread across all urban centers. Poultry, Bee Keeping and Aloe Vera plant cultivation are emerging economic activities in Baringo County.

Because of the many tourist attractions located within the county, tourism is a major income generating activity in Baringo. Attractions such as Lake Bogoria and Lake Baringo draw many domestic and foreign tourists thereby earning the county good revenue.

The county is a member of various regional economic blocks including the North Rift Economic Bloc (NOREB) and Cooperation for Peace and Development (AMAYA Triangle).

1.2 Position and Size

Baringo County is situated in the Rift Valley Region of the Republic of Kenya and borders Turkana and Samburu Counties to the North, Laikipia to the East, Nakuru and Kericho to the South, Uasin Gishu to the South West and Elgeyo-Marakwet, and West Pokot to the West. It is located between longitudes 35 30' and 36 30' East and between latitudes 0 10' South and 1 40'. The Equator cuts across the county at the southern part. Baringo covers an area of 11,075 sq. km of which approximately 221 sq. km is covered by surface water from Lake Baringo, Lake Bogoria,94 and Lake Kamnarok.

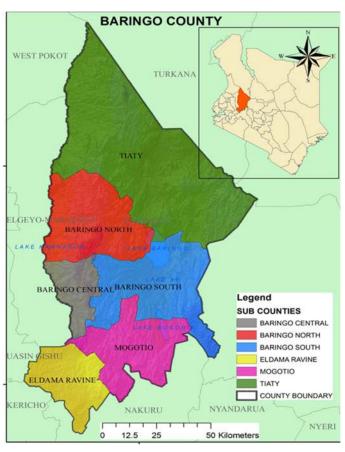

Figure 1:Location of the County in Kenya

1.3 Physiographic and Natural Conditions

1.3.1 Topography

One of the prominent features is the Kerio Valley, which is situated on the western part of the county. In the eastern part of the county near Lake Baringo and Bogoria is the Loboi Plain covered mainly by the latchstring saltimpregnated silts and deposits. The form conspicuous Hills a topographic feature in the county. The trend of the hills is north-south and mainly consists of volcanic rocks. The hills have steep slopes with prominent gullies. On the eastern and western parts of the hills are escarpments. Rivers on the hills flow in very deep gorges.

The floor of the Rift Valley owes its

origin to the tectonic and volcanic disturbances, which have dislocated surfaces, forming separate ridges. The troughs of the rift that have a north-south alignment are occupied by Lake Baringo, 94 and Bogoria, which occupy 221 km2. Lake Bogoria is particularly spectacular because it is one of the few hot, salt water lakes in the world, with a number of hot springs and is the breeding ground for flamingoes. Lake Baringo is a freshwater lake

which is the home of crocodiles and hippopotamus. Lake Kamnarok, an ox-bow lake covers 1 Sq. Km, and a home of elephants and crocodiles, at the verge of being silted due to climate change and excess environmental devastation (deforestation). It is also located in the larger Rimoi game reserve which occupies Baringo and Elgeyo Marakwet counties.

1.3.2 Climatic conditions

The rainfall varies from 1,000mm to 1,500mm in the highlands to 600mm per annum in the lowlands. Due to their varied altitudes, the sub-counties receive different levels of rainfall. Koibatek sub-county receives the highest amount of rainfall. The lowland sub-counties of Mogotio, Tiaty East, Tiaty west and Baringo North receive relatively low amounts. The temperatures range from a minimum of 10°C to a maximum of 35°C in different parts of the county. Average wind speed is 2m/s and the humidity is low. The climate of Baringo varies from humid highlands to arid lowlands while some regions are between these extremes.

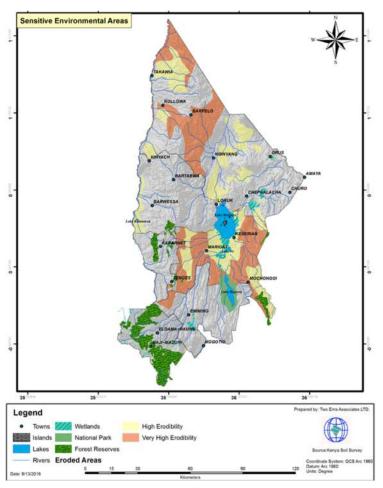

Figure 2: Topography of Baringo County

1.3.3 Ecological Conditions

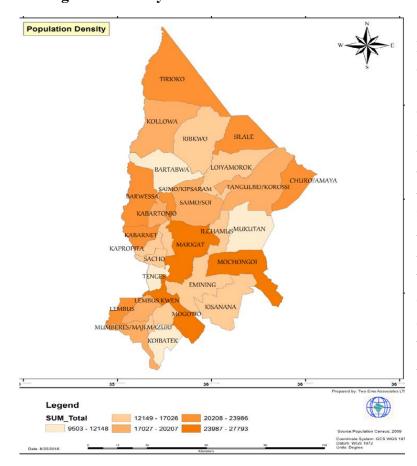

Exotic forests exist in the county but the known indigenous forests found Kabarnet, are in Kabartonjo, Tenges, Lembus. Saimo, Sacho, Ol' Arable and Eldama Ravine. The main exotic species are: Grevillea Robusta, Cuppressuslusitanic and Eucalyptus saligna. Prosopisjuliflora also exists in the Marigat area. Kipng'ochoch forest in Sacho, one of the 10 forest blocks under Tenges forest station, is an example of a well indigenous conserved forest where visitors and nature lovers could view the entire Lake Baringo basin, fluorspar mines, Laikipia ranges, Elgeyo escarpment, Kerio Valley and

other touristic attractions that the county offers.

The county is classified as arid and semi-arid. Most parts of Tiaty west, Tiaty east, Baringo Central, Baringo South, Baringo North, Mogotio sub-counties are arid and semi-arid except for Koibatek sub-county, which is in a highland zone. Most of these arid and semi-arid zones are covered by acacia trees and shrubs. Rainfall ranges between 300 mm and 500 mm, decreasing from south to north.

1.4 Administrative and Political Units

Figure 3: County's Administrative and Political Units

1.4.1 Administrative Units

Baringo county administrative units comprises seven sub counties and 30 wards, with the largest sub county being Tiaty west with an area of 2500 square kilometers and the smallest being Baringo Central with 786.5 square kilometers. The wards are also vast in size with the largest ward being Tirioko ward with 1102.68 square kilometers and the smallest being Ravine ward being 33.55 square kilometers. The County Government is yet to establish the village administration units as per the county government Act.

Table 2: Number of administrative units and Area (Km2) by Sub-County based on the National Government.

Sub-County	No. of Divisions	No. of Locations	No. of Sub locations	Area (Km²)
Baringo Central	4	21	53	786.5
Baringo North	5	15	45	1678
Eldama Ravine	4	18	36	954
Mogotio	5	23	50	1,375.3
Baringo South	3	18	37	1,453.4

According to the above table, Tiaty West, Tiaty East, Baringo North and Marigat Sub counties are vast. Therefore, there should be some deliberate plans to ensure the areas are easily accessible or the operationalization of the already gazette administrative units.

1.4.2 County Government Administrative wards by constituency

The County of Baringo is administered by the County Government through 7 Sub-Counties, namely Baringo South, Mogotio, Eldama Ravine, Baringo Central, Baringo North, Tiaty West and Tiaty East consisting of 30 electoral wards and about 160 village administrative

units distributed as shown in table 3 below. The vastness of each of the sub-counties and wards vary as indicated in table 4.

1.4.3 National Government Administrative wards by Sub county

The National government administrative units consist of the following; 7 Sub-counties, 28 Divisions, 124 locations and 286 sub-locations in Baringo. There are various other divisions, locations and sub-locations proposed and gazetted across the County and are awaiting

delimitation of Boundaries by the Independent Electoral and Boundaries Commission (IEBC) and operationalization. The summary per Sub-county is tabulated in Table 5:

Table 5: National Government administrative units.

Sub County	No. of Divisions	No. of Locations	No. Sub-Locations	No. Villages
Baringo Central	4	21	53	284
Baringo North	5	15	45	355
Marigat	3	18	37	348
Mogotio	5	23	50	216

Tiaty West	4	14	33	325
Tiaty East	3	15	32	243
Baringo County	27	124	286	1996

Source: Ministry of Interior and National Administration, 2022

1.4.4 Political Units

The county has a total of 6 constituencies and 30 county assembly wards. Most of the constituency boundaries align with the sub county boundaries except Tiaty constituency which comprises the Tiaty East and Tiaty West sub counties.

Table 6: County's Electoral Wards by Constituency

Constituency	County Assembly Wards
Baringo Central	5
Baringo North	5
Eldama Ravine	6
Mogotio	3
Baringo South	4
Tiaty	7
Baringo County	30

Source: IEBC

The number of wards is determined both by the population and the geographical area. Tiaty constituency is the largest in size while Eldama ravine has the highest population. The wards are used as service delivery units and therefore, the more they are, the closer the services are taken to the people. The wards are also critical in as far as resource allocation is concerned and in essence devolving development.

1.5 Demographic Features

1.5.1 Population Size, Composition and Distribution

According to the population and housing census 2019, the population of Baringo County was 666,773, comprising 336,322 males and 330,428 females. Eldama Ravine Sub county had the highest population (129,535) and Tiaty East had the lowest (73,434). It was projected to be 717,794 in 2022. Further projection indicates that the population will increase to 764,411 in 2025; and 794,793 by 2027 using intercensal population growth rate for the county.

The projections in the table above show the age cohorts 20-24, 25-29, 30-34 and 35-39 increasing at higher rate compared to other cohorts. This group majorly consists of the youth and working age population. It is therefore important to plan for the developmental needs of this category. Increase in the youth population in the county indicates a positive force for development. However, there are issues and concerns of this age group that the county has to plan for. These include; health (sexual and reproductive health), education and skills development (including ICT), employment, participation in governance and urbanization (as a result of migration to urban areas in search of jobs).

Large working age population indicates huge labor force hence potential for economic growth. There is however the challenge of providing and/or sustaining creation of jobs for new labor market entrants. The major concerns for this age group that the county should plan for include unemployment, dependency and poverty.

1.5.2 Population data by urban area

The County of Baringo is majorly rural with 89 per cent of its citizens inhabiting in rural areas and another 11 per cent by average living in the key urban centers majorly in Baringo Central with 32 %, Eldama Ravine with 25%, and Marigat and Mogotio with 9% and 6% respectively. Tiaty and Baringo North had no recorded populations in urban centers as at 2019 census but a dozen of the centers in these sub-counties are now inhabited by a sizeable population. There is an expected increase in population migrations to six key urban centers in the county namely: Kabarnet, Marigat, Mogotio, Eldama Ravine, Kabartonjo and Chemolingot.

Population in all urban centers across the county is projected to continue increasing over time. This translates to increase in urban workforce in all sectors. However, there are related challenges and issues of concern that can inform county plans, such include; inadequate social amenities, joblessness, crime trends, emergence of urban poor, inadequate infrastructure and housing needs.

1.5.3 Population Density and Distribution

Population density is the average number of persons per square kilometer. According to 2022 projections, Koibatek Sub county is the most densely populated with an average density of 142 while Tiaty west has the least population density of 34. The Baringo county projected population density stands at 66.

The sub counties with high population density have more urban centers, high population and small geographical area/ land mass. On the other hand, the sub counties those have low population density have few urban centers, less population and are vast. The population density figures will guide on land use planning which includes opening up the remote areas of the county for inhabitation and optimal use, managing effects of pressure on the environmental and natural resources, creation of adequate opportunities for the high population as well as tapping on the abundant supply of labor force in the densely populated areas.

1.5.4 Population Projection by Broad Age Groups

The different categories of population per age groups in the county include; the infants, the schooling population, the youth, the reproductive age women, economically active and the aged. Their current distribution and projections per Sub county is as shown in the table 12:

Table 12: Population Projections by Broad Age Groups

Age Group	2019 (C	ensus)		2022 (Pr	ojection)		2025 (Proj	ection)		2027 (Projection)

Source: KNBS

The special age groups are categorized as follows:

Pre-school going age-under 5: According the 2019 Population and Housing census, a total of 115,779 boys and girls were enumerated in the County, comprising of 59,209 and 56,570 boys and girls respectively. This population was projected to rise to 123,627 in 2022 and further to 127,493 in 2025. The county government needs to put in place measures to invest in ECDE development as well as increasing immunization coverage to cater for the interests of this age bracket.

Primary school going age (6 -13): The total populations in this age brackets is 161,308 comprising of 82,640 and 78,668 boys and girls respectively as per 2019 census. This population was projected to rise to 155,455 in 2022 and further to 158,798 in 2025.

This population puts pressure on existing primary schools and thus there is need for the county and national government to collaborate in increasing the number of primary schools and teachers to balance the pupil-teacher ratio.

Secondary school going age (14-19): A total of 118,933 boys and girls were enumerated to be under this age bracket by the Kenya National Bureau of Statistics census exercise of 2019; majority being school going. Their figure was projected to increase to 119,018 and 121,474 in 2022 and 2025 respectively. The national and county governments need to plan for more secondary schools to manage enrolments and teachers as well as provision of bursary Funds to retain the learners in school.

Youth Population (15-34): The County youthful population under this age bracket was established to be 229,891 comprised of 115,184 male and 114,707 female genders. This youthful population represents 34.5 percent of the entire county population as per the 2019 census results. This population is projected to rise to 280,522 and 305,369 in 2022 and 2025 respectively.

Noting that this is the skill acquiring age bracket, there is need to plan for vocational training centers, capacity building, and youth empowerment programs to cater for this increasing population.

Female reproductive age (15-49): A total of 151,637 women in the County were established to be under this female age category, representing 46 percent of the entire female gender population in the County as per the 2019 Kenya Population and Housing Census. This category was projected to grow to 181,559 in 2022 and further to 198,653 in 2025. This implies that there is need to increase resources towards improving maternal and child health care and nutritional standards. There is also need to intensify reproductive health and family order control population education in to the Labor force (15-64): The county labor force under this age bracket account for 51 percent of the total county population, with only 64 percent of them actually working. This implies that there is need to create more opportunities for employment.

The Aged population (65 and above): The population and housing census of 2019 established

that 3.9 percent (25,746) of the County population is above the aging. This implies that more resources are needed to cater for the aged people in terms of health provision, safety nets programs and pensions for those employed.

1.5.5 Population of Persons with Disability

The number of persons living with disabilities in Baringo is calculated to be 2 percent of the population as per the 2019 Kenya Population Census analytical report (volume iv); which established that 13,121 persons are living with various disabilities including visual, hearing, mobility, Cognition, Self-care and Communication. Table 13 below indicates the type of disability by gender and the sub-county. The numbers are categorized by type of disability and gender. These numbers are projected to be around 26,300 persons by 2022 in relation to the increase in the county population. More surveys need to be done to ascertain the exact number, specific age categories and disability types in the County.

Source: 2019 KPHC, KNBS

The population of persons with disabilities is projected to be around 26,300 persons by 2022 in relation to the increase in the county population. This figure is significant to ensure the county adopts disability sensitive development programme.

1.5.6 Demographic Dividend Potential

Demographic dividend refers to the accelerated economic development that a country can attain by slowing down the pace of population growth while at the same time making strategic investments in the health, education, economic, and governance sectors. It results to accelerated economic growth that a county can experience as a result of declining fertility levels that occasion a reduction in the dependency levels and an increase in the proportion of the population in the working ages (15-64 years). With fewer dependents to support, those in the working ages will have more savings that can be invested for the economic growth of the county thereby improving the wellbeing of the county's residents. However, the attainment of a demographic dividend is not automatic. As the fertility levels decline, the county needs to make simultaneous strategic investments in the health, education, economic and governance sectors. The aim of these investments is to ensure that as the county's children and youth get older, they remain healthy, are able to access education and training opportunities, as they enter the labor force they get income and employment opportunities, they invest for their life in old age, and they participate fully in governance matters affecting the county.

Table 15: Demographic Dividend Potential

Source: KNBS September 2022

Table 15 above shows the key demographic indicators for Baringo County. According to 2019 census Baringo County had a total population of 666,750. In 2024, the population was projected to be 748,872 people up from 733,333 people in 2023. This figure is projected to reach 764,411, 779,602 and 794,793 people in 2025, 2026 and 2027 respectively assuming that the county fertility rate continue declining from the current 4 children per woman over the years to reach 2.1 children per woman by the year 2050.

By the end of the MTP IV period in 2027, the fertility is expected to decline to 3.7 from an average of 4.0 in 2019, before declining further to 3.7 in 2027. Given the decline in fertility, the proportion of children below the age 15 is expected to decline from 44 percent in 2019 to 39 percent in 2027. This will result in a corresponding increase in proportion of the population in

working ages (15-64 years) from almost 52 percent to 57 percent over the same period, the proportion of the older persons above 65 years will remain almost unchanged at 3.5 percent.

According to the County 2019 population cohort, 58 percent of the citizens are below 24 years of age, majority within the 10 to 14 years age bracket, and will be entering the county labor force within the next 20 years potentially taking the County into a demographic dividend window. The cohort further indicates a decline in the age brackets 9 years and below but still on a higher rate in relation to the older population.

As the fertility levels decline, the county needs to make simultaneous strategic investments in the health, education, economic and governance sectors. The aim of these investments is to ensure that as the county's children and youth get older, they remain healthy, are able to access education and training opportunities, as they enter the labor force they get income and employment opportunities, they invest for their life in old age, and they participate fully in governance matters affecting the county. Baringo County has the potential to achieve a demographic dividend by 2044 if the right investment in youth, health, education, economic and governance are put in place in this plan and implemented over the coming years.

According to the 2015 National Adolescents and Youth Survey report, Baringo County needs to undertake the following, among other things to harness demographic dividend potential;

On Health there is need for county to enhance guidance and counseling both in the health facilities and schools on issues to do with health issues affecting young people such as HIV/AIDS and teenage pregnancies. Invest on youth friendly services to enable young people access the centers freely. This includes refurbishing the health centers so as to make them youth friendly and build facilities targeting people with disability as they are few in the county.

Under education, there is need to provide more bursaries to poor and bright students so as to enable them gain quality education like their counterparts. enforce laws on child labor so that students stay in school and learn to prepare them for the job market. Employ more teachers so as to ensure that the teacher student ratio is well balanced. sensitize the education sector leaders, including teachers, about the importance of prioritizing initiatives that help young people, especially girls, stay in school so as to avoid early marriages and teenage pregnancies.

On the economic front, address corruption as it is a hindrance for young people to access the government interventions like UWEZO fund. Create public awareness on issues regarding loans, savings and investments. Provide operational skills training and affordable ICT services in several centers in the county to improve access for young people. Sensitize young people on the importance of investments and savings.

Strengthen on governance and security through employing more police officers and expand on the existing police stations so as to curb insecurity. Address issues of corruption when it comes to projects and programme for youth. Involve the youth in project and programme design and implementation and ensure that they are involved in implementation.

The demographic window of opportunity for Baringo County is expected to open anytime from the year 2046 if the right investment in health, education, economic and governance are put in place now and implemented over the coming years. This is based on assumption that fertility rate continues to decline over the years to reach 2.1 by 2075 (investment in family planning is key). This is the period when the county can achieve maximum pace of economic growth as a result of the huge labor force relative to the dependent population. During this period, the proportion of children below age 15 will fall permanently below 30 percent while the proportion of older persons above 64 years will permanently below 15 percent.

1.6 Human Development Index

1.6.1 Human Development Indicators

The Human Development Index (HDI) is a composite statistic of life expectancy, education, and income per capita indicators, which are used to rank countries. A country has a high HDI score when its life expectancy at birth is high (long), the education period is extensive, and the income per capita is high. These factors are measured by considering aspects such as education, healthy living, access to social amenities, the position and condition of women and gross domestic product. The HDI of the county is 0.5108275 which is lower than the national's HDI of 0.575. The human poverty index is 30.6 per cent compared to the national level of 29 per cent.

1.6.2 Youth Development Index (YDI)

The YDI is a composite measure of youth development. The index is a tool developed to raise visibility of youth issues by monitoring the changes that occur in the youth over time. The youth development index at the county is 0.5952, which is above the national index, which is 0.5817

1.6.3 Gender Development Index (GDI) and Gender Empowerment Measure (GEM)

The GDI is a measure of human development that adjusts the HDI for disparities between men and women. It is, therefore, not a measure of gender inequality. GDI is a basic measure of how gender inequalities in knowledge acquisition, longevity and health, and standard of living affect human development.

GEM measures gender equity in political and economic power by assessing the level of female representation. It considers gender gaps in political representation, professional and management positions, and earned incomes. It captures gender inequality in political participation, as measured by the percentage of seats held by women in national parliaments; economic participation and decision-making power, measured by the percentage of women among legislators, senior officials, and managers in professional and technical fields; and power of economic resources measured by the estimated earned income of women and men. On the other hand, the gender development index for the county is 0.50 per cent. The above indices show that the county is generally underdeveloped.

1.6.4 Poverty levels

Baringo County is among the marginalized counties in Kenya with a *Multidimensional Poverty Level* of 60.3% against 53.0% nationally and a contribution of 1.7% to the National poverty Multi-dimensional poverty It is measured by the ability to feed oneself, to access quality housing, to attain quality health and to educate children. Poverty is also reflected through inadequate access to infrastructure and social services.

Table 16: Poverty rankings of Baringo County in relation to National poverty (KNBS)

1.7 Peace, Security and Development

The Baringo like other parts of Northern Kenya, has been affected by banditry, cattle rustling, and resource-based conflicts. These security challenges have had a negative impact on development in the region, hindering economic growth and causing disruptions to trade and travel.

The issue of cattle rustling, in particular, has had a significant impact on the local pastoralist communities who rely on their livestock for their livelihoods. The banditry and criminal activities have hindered economic development and the delivery of government services in the affected areas, it has led to deteriorating community relations and hindered the development of common resources such as irrigation schemes and pasture fields.

The government at both levels have made attempt to address these security challenges and promote development in the region by deploying security forces, implementing development initiatives, and encouraging dialogue and conflict resolution. However, the situation is ongoing and complex, and addressing these issues will require a multifaceted approach that addresses the underlying causes of the security challenges.

CHAPTER TWO: PERFORMANCE REVIEW OF THE PREVIOUS CIDP PERIOD

2.0 Overview

This chapter an analysis of the performance of the previous CIDP (2018-2022). It provides an analysis of revenue sources and expenditures and a narrative discussion on sector performance against the sector targets over the last period as well as the challenges experienced during the implementation period and the lessons drawn that is critical to the next phase of planning. The chapter concludes by providing an analysis of natural resources available, the key development issues informing this planning phase and lastly a conceptual framework on how this plan is envisioned

2.1 Analysis of the County Revenue Sources

This section provides an analysis of the County Revenue Sources and the County Budget expenditure over the last five years (2017-2022). The analysis of the County Revenue Sources highlights the annual projected revenue for the plan period versus the actual receipts and reflects the deficit of unrealized revenue. On the other hand, the analysis of the County Budget Expenditure highlights the total actual expenditure per sector against the total budget allocation hence reflecting the county performance based on the absorption rate.

The County expected to receive a total of Ksh. 43.4 billion in the second-generation plan period (2018-2022) as revenue to finance the prioritized programmes, projects and policies. This comprised mainly of Ksh. 28 billion (64.5%) as equitable shares, Ksh. 5.3 billion (12.6 per cent) conditional grants from GoK & Development partners, Ksh. 1.7 billion (4%) generated from own source of revenue (OSR) and Ksh. 8.2 billion (18.9 %) as cash balance from FY 2017/18.

During the period under review, the County received a total Ksh. 35.5 billion which accounted for 81.7 per cent of the expected revenue. This comprised of Ksh. 22.2 billion equitable shares, Ksh. 4.0 billion as conditional grants and Ksh.8.2 billion as cash balance from FY 2018/19. In relation to OSR, the county generated Ksh. 1.2 billion against a target of Kshs.1.7billion which reflected a performance of 70.6 per cent. The decline in own-source revenue is majorly attributed to the adverse effects of covid-19 pandemic that disrupted most of the economic activities in the county. For instance, the imposed Covid-19 containment measures such as the travel restriction reduced the number of tourist receipts and hotel occupancy and affected businesses across all sectors resulting in reduced local revenue. Additionally, other factors that affected the achievement of the own-source were the effects of climate change e.g., floods that submerged project sites making it impossible to complete the projects, High incidences of insecurity in some parts of the county hampered access to project sites, inadequate legal and policy framework to support project implementation and low staffing levels in critical sectors such as Revenue collectors.

2.2 County Budget Expenditure Analysis

Table 2: County Expenditure Analysis

Table 2. County Expenditure Panalysis									
Sector	Total Budget Allocation (Ksh in millions)	Total Actual Expenditure (Ksh in millions)	Variance	Absorption rate (%)	Remarks				
Energy, Infrastructure and Information, Communications and Technology	5,151,425,841	1,953,972,770	3,197,453,071	38%					
Environmental Protection, Water & Natural Resources	5,084,732,403	1,804,330,665	3,280,401,738	35%					
Agriculture Rural and Urban Development (ARUD)	4,744,350,793	2,455,171,001	2,289,179,792	52%					

General economic and commercial affairs	614,932,870	337,620,866	277,312,004	55%	
Health	9,692,903,225	7,126,896,237	2,566,006,989	74%	
Education	2,371,086,231	1,360,711,741	1,010,374,490	57%	
Social Protection, Culture and Recreation	694,160,330	283,319,742	410,840,588	41%	
Public Administration, Governance and Intergovernmental Relations	15,007,654,372	10,004,231,583	5,003,422,790	67%	
Total	43,361,246,066	25,326,254,605	18,034,991,461	58%	

The County's total expenditure during the CIDP II plan period amounted to Ksh. 25.3 billion against an allocation of 43.4 billion reflecting a 58% performance. Health sector posted the highest absorption rate at 74% which is attributed to the expenditure incurred to implement interventions to combat the Covid-19 pandemic. These interventions included amongst others the construction and equipping of a Covid -19 isolation centre, supply of hand washing facilities in strategic locations across the county and purchase of personal protective equipment's (PPE's) for the health staff. All the other sectors however were unable to achieve their targets for various reasons that hampered smooth implementation of programmes, project and policies. Notable reasons for the low performance across all sectors include the effects of the Covid-19 pandemic, low technical & financial capacity of contractors who were unable to implement and complete projects on time, and slow procurement process as a result of inadequate number of technical officers in the Public Works department who are relied on for data collection and preparation of bill of quantities necessary to FastTrack project implementation.

2.3 Sector Programmes Performance Review

This section provides in a narrative form the sectors' performance trends based on the actual achievements realized during the implementation of the 2nd generation CIDP against the set targets as well as the changes from the baseline values.

2.3.1 Energy, Infrastructure & ICT

2.3.1.1Roads & Infrastructure

During the planning period the county road network was increased by 2,142 kilometers while maintenance was carried out on 3,303 kilometers of our existing network. Crossing structures such as footbridges and major box culverts were increased to 41 from the 27 that were already existing at the beginning of the plan period, 3 kilometers of earth roads were upgraded to bitumen standards and 1 kilometer of drainage systems were constructed within the urban centers. 24 plant equipment were purchased and commissioned. However, the department could not fully implement training and capacity building programmes due to insufficient funds in the recurrent budget as well as other projects such as bridges which were changed during public participation.

2.3.1.2 Energy

In the period under review, there was an increase in rural electrification coverage in 52 sites/ areas implemented by REREC. The sector did not implement any project in street lighting due to a lack of budgetary allocation.

2.3.1.3 ICT

In the period under review, the sub-sector managed to establish and equip 6 Ajira and CIH centers in partnership with the community and the CDF. There was also enhanced access to shared data, public information, and internet connectivity, where 5 more County Government offices were networked, the number of networked offices increased to 37 from a baseline of 32. Hospitals were networked through the support of ICTA, USAID, and WHO. The ICT infrastructure was developed in each government office for effective communication and service delivery. VPN was established in 15 departments and sub-counties to enhance sharing of NOFBI fiber optic internet resources terminated at the County HQ. However, there is a need to establish a data center and procure servers to enhance sharing of information.

There were no Government records digitized due to a lack of budgetary allocation for the digitization program. There is a need to procure an HRIS system that will help in digitizing Personnel records, minutes, and Maps. 1 GIS Lab was established with the support of FAO which helped in digitizing maps hence it was easy to access the location of projects. Electronic Medical Record system enabling technology has been implemented in 4 Referral and sub-county referral hospitals. During the same period the County website was upgraded to include an online interactive portal for public participation and a budget document management platform. A further redesign is to be done to incorporate an online recruitment portal, Tourism and Municipality sub-site. The Surveillance and information security (CCTV) program was also installed in 8 government premises.

The sub sector was able to train 1912 persons on basic and advanced ICT skills packages in Elias ICT center, an increase from a baseline of 3240. This was achieved through a partnership with the World Best friends, Korea. However no ICT center and Innovation center was registered to be an ICT professional examination center to include certification courses such as CISCO, and CCNA despite a target of 2 centers.

2.3.2 Environment Protection, Water & Natural Resources

2.3.2.1 Environment, Mining & Natural Resources

In a bid to improve the conservancies and protected areas the sector purchased, supplied, and planted 550,000 tree seedlings against 700,000 targets. The sector restored and rehabilitated wetlands in Kiborgoch, waseges, and Chuine against a target of 8 areas over the period under review. Further, 3 Sites were protected and conserved covering the following sites- chemususu, Mochongoi catchment, and Orgit catchment.

Through the application of Participatory Rangelands Management (PRM) concept, a strengthened rangeland restoration, rehabilitation and management was realized based on; establishment and strengthening of four rangeland management units namely, Irong Conservancy

Management Committee, Kabarion Conservancy Committee, Koitegan Community Forest Association Executive Committee, and Paka Hills Rangeland Management Committee.

A total of 85,629.2 hectares of rangelands in the four sub-counties were rehabilitated and restored through Participatory Rangeland Management concept, the restoration efforts aimed at reversing degradation while increasing the contributions of these ecosystems on improved livelihoods through manual removal of invasive species (e.g. Alchornea fruiticosa and Dodonea aquidtifolia), pasture reseeding, and reforestation of degraded areas. Protection of the catchment area above the natural springs. There was also increased institutional governance by the community rangelands management committees, women engagement and nature based solutions initiatives for community level investment.

2.3.2.2 Water & Irrigation

During the plan period, the sector achieved 491 water schemes against a target of 858 reflecting 57% of residents accessing clean and safe water. The rainwater harvesting structure surpassed the target of 140 to 263 translating to 188% achievement. In addition, the sector managed to construct 25 water structures under a target of 75, this was affected because the budget was allocated to the covid-19 emergency fund. During the period, the sector surpassed the target of 43 boreholes drilled and equipped to 76 targets, this increase was highly attributed to the use of the county drilling rig.

The sector established Kirandich water company and Chemususu water company implying 100% achievement during the period. The sector targeted to design 6 sewerage systems but managed to complete two that is Kabarnet and Eldama Ravine town. further the irrigation unit managed to establish 11 new irrigation systems against a target of 21 reflecting 48%, the implementation of this was mainly affected by floods and insecurity.

2.3.3 Agriculture, Rural and Urban Development (ARUD)

2.3.3.1 Agriculture, Livestock & Fisheries

During the plan period, the sub-sector targeted to implement various interventions under three programs namely Crop Development and Management, Fisheries Development and Management, and Livestock Development and Management. A review at the end of the plan period highlighted achievements in all three programs as discussed below.

(i) Crop development and management program

Notable achievements under this program include the construction and operationalization of a coffee mill and the provision of 185,333 coffee seedlings subsidies to 13,412 farmers. As a result of these interventions, the area under coffee production in Baringo increased from 2300 hectares in 2018 to 3200 hectares in 2022. The achievement is attributed to the partnership between the County government and a Korean Partner. Through the affruatation intervention, the sub-sector procured and distributed 316,416 assorted seedlings of Mangoes, pawpaw, macadamia, bananas, plums, peaches, and avocado to over 30,000 farmers. This was a remarkable improvement from the baseline distribution of 70,000 assorted seedlings in 2017. Further, 450 bags of potato seeds were distributed to farmers against a target of 300 bags reflecting a 150% performance; 200

households were supported with seed maize against a nil target in Barwessa Irrigation Scheme. The seed maize distribution was achieved through the support of the Drought Regional Livelihood Programme (DRSLP) and 3450 farmers were trained on new technologies against a target of 310 farmers. The achievement is attributed to ongoing programs such as KCSAP, ASDSP, and SHA.

(ii) Fish Development and Management Programme

To increase fish production and productivity for food and nutrition security and sustainable livelihoods in the plan period, the sub-sector stocked 62 water dams with 250,000 tilapia fingerlings against a target of 30,000 fingerlings reflecting an impressive performance. The restocking of the 62 dams is way above the baseline of 30 dams that had been restocked in 2017. During the plan period, the sub-sector also constructed two landing beaches at Kampi ya Samaki and Kiserian. The Landing beaches were intended to improve fish quality and enhance data collection; however, the 2 beaches were submerged by the rising waters of lake Baringo. The sub-sector also purchased 11 water boats against a target of 15, constructed 60 fish ponds against a target of 400, rehabilitated 250 ponds against a target of 170 ponds, re-stocked 390 fish pandas against a target of 150, and constructed a palletizations plant. The plant has not been operationalized as it awaits 3-phase electricity connectivity.

(iii) Livestock Development & Management

A review of the implemented interventions in this program revealed that on pasture and fodder development, the sub-sector exceeded targets in all parameters. Specifically, the sub-sector distributed 18,300 kgs of pasture seed against a target of 14,500.

2.3.3.2 Lands, Housing and Urban Development

A review at the end of the plan period established that on land planning and development, the sub-sector managed to prepare plans for 21 new centers against a target of 52 reflecting a 40% performance; prepared 2 integrated urban development plans (IUDP) against a target of 10 and achieved the development of a spatial plan. On waste disposal and management, the subsector purchased 2 garbage trucks as planned.

In urban infrastructure development and management, the sub-sector installed 41 street lights against a target of 2523; constructed 4 km of storm water drainage against a target of 5km and fenced 4 km of public property to enhance safety. On land administration, 1100 plots were surveyed against a target of 1800 and 11,500 Title Deeds were processed and issued against a target of 25,000. A GIS Lab was also established during the plan period and 1 recreational facility was mapped and fenced against a target of 4 recreational facilities. To enhance disaster preparedness and response management the sub-sector purchased 1 fire engine against a target of 5 fire engines.

2.3.4 General Economics & Commercial Affairs

2.3.4.1 Trade

The sub-sector targeted to train 2500 traders in the plan period on financial and entrepreneurship skills and managed to trained 1617 traders reflecting a performance of 65%. The achievement is attributed to the support from partners, specifically the equity foundation. 321 traders benefitted

from SME loans against a target of 2500 traders and cumulatively a total of 32 million SME loan was disbursed against a target of 100 million.

On infrastructural development, the sub-sector constructed 2 new markets within the plan period against a target of 15 and renovated 3 markets, and 6 retailer stalls against targets of 5 and 10 respectively.

2.3.4.2 Industrialization

The subsector prioritized commercialization of Aloe which entailed the establishment of 300 acres of aloe, establishment of a processing plant and renovation of an existing one in Koriema. By the end of the plan period, the project had not been implemented but an MOU had been signed with a Chinese investor to support the Aloe commercialization.

Other flagship projects prioritized by the sub-sector were the completion and operationalization of Mogotio tannery and the development of 1 industrial park. The projects were also not implemented due to budgetary constraints.

2.3.4.3 Cooperative

The sub-sector targeted to register 120 new co-operative societies and carry out 1190 cooperative audits within the plan period. By the end of the plan, they had registered 78 co-operatives and carried out 113 co-operative audits. 87 co-operatives societies were also trained against a target of 250. Generally, the sub-sector is hard-hit by a shortage of technical staff resulting in low performance

2.3.5 Health

During the plan period the health sector targeted to reduce maternal and infant mortality ratio. The county Infant Mortality Rate ratio (IMR) is 1000: 62 as compared to the national 1000: 35.5. The Neo-natal mortality (NN MR) 1000 was 31 in the county compared to 31 for the country with a maternal mortality rate (MMR/100,000)374 for the country compared to 355 for the country. Baringo County is one of the 15 counties that contribute to 98% of the maternal mortality burden in the country (UNFPA 2014, Report).

Maternal and perinatal mortality are preventable through high-impact cost-effective initiatives even in low-resource settings. In order to eliminate maternal and perinatal deaths in the county, several interventions have been put in place by the health sector. The interventions include capacity building of service providers on Emergency Obstetrics and Newborn Care, Promotion of the Linda Mama Initiative, the Beyond Zero campaign, and institutionalizing MPDSR at all levels of the healthcare system. However, despite strategies to improve maternal and newborn outcomes, the county continues to record Maternal and Perinatal Deaths. This is attributed to limited resources and inequitable allocation of funds by the county government. To reduce the MMH and NN MR the county employed staff although the number of HR is still not adequate, the County has made great efforts since 2013 with recruitments and deployment of key HRH staffing (Through the UHC and COVI D-19 in a program sponsored by the national government).

2.3.6 Education

In 2018, the gross enrolment rate in Early Childhood Education was 95%. At the end of the plan period, the rate stood at 97% against a target of 99%. This achievement can be attributed to the construction of 3 ECDE Centers per ward and the implementation of school feeding programs in 753 ECDE centers in the County. Additionally, the sector was able to equip ECDs with learning materials as planned under the review period.

During the plan period tuition subsidy (Secondary schools and VTCs) and supply-driven courses for the VTCs has ensured the retention of learners in school. The consideration has contributed to better performance of students from needy and vulnerable families since the fund is meant to assist the least fortunate in the county. The retention rate has progressively increased from a baseline of 43% in 2022 to 51% against a target of 60%.

2.3.7 Youth, Gender, Culture & Social Protection

2.3.7.1 Youth

The youth (15-35 years) comprise about 34% of the total population in the county. During the period under review, the following was achieved, in order to acquire relevant work experience to be absorbed into the job market the sector recruited 372 youth on internship programs against a target of 600 youth. In addition, 60 youths, and 150 youths were trained in entrepreneurship skills, and leadership skills respectively. In a bid to improve youth participation in all structures of the decision-making process,300 public meetings were held during the review period, and 9 county youth forums were formed against a target of 150 forums. Further,6 guidance and counseling units were established in a bid to address the need of youth addicted to drugs, and home and community-based welfare programs. In addition,2 areas benefited from environmental cleaning activities by the youth in a bid to manage and improve the quality environment and reduce environmental degradation

2.3.7.2 Culture

In a bid to promote reading culture in the county the sector managed to complete one library (Polkadot library) against a target of 6 libraries. In addition, to preserve and promote valuable knowledge the sector conducted 73 language training programme against 127. Further, the sector conducted 468 workshops talent search training against a target of 300. The sector organized 3 community events and cross county cultural festivals

During the plan period, the sector constructed the Kimalel cultural center against a target of one reflecting within the plan period that led to 100% achievement. During the period 8 community cultural events were organized against a target of 15. 9 county music festival was organized against the 35 planned, 3 cultural festivals against a target of 5, 468 artists were also trained on talent development, Kolowa social hall developed and equipped while main Kabarnet social hall/player theatre is at 40 % completion. Further the sub sector was also successful in conducting cultural food exhibition.

2.3.7.3 Sports:

Key achievements during the review period include: 10 sports fields rehabilitated and leveled,5 wards received assorted sports equipment and 9 sports events and fixtures were held. In addition, to identify, nurture and expose raw sports talents the sector organized 16 continental and international events.

2.3.7.4 Gender

During the period under review, 24 Officers and citizens were trained on gender issues, Supported GBV conference activities including sensitization of 13,200 persons through county dialogues on GBV and FGM

2.3.7.3 Social Protection

The vulnerable Groups include PWDs and Elderly persons, and during the period of review 250 beneficiaries are under cash transfer annually totaling to 1250 beneficiaries. With support from World Food Programme 2700 household are currently supported with emergency cash transfer programme of Ksh. 6500= per household per month for six months to cushion them against hunger.

2.3.8 Public Administration, Governance, & Intergovernmental Relations

2.3.8.1 County Assembly

The following was achieved during the period under review; Established an effective County Assembly Service Board, prepared and implemented a four-year Strategic Plan, passed numerous laws, regulations, plans, standing orders, and policies, Refurbished the chambers, developed an ICT infrastructure, Hansard Equipment installed, Research Infrastructure, and Library was established, Renovated the Assembly Restaurant and Established Ward offices and personnel.

2.3.8.2 Devolution and Public Service

During the plan period the Sub Sector recruited for key county departments and structures including the County Public Service Board, ten key departments in line with the county government functions, the county managed to carry out mass promotion ,re-designation and redeployment of staff whose promotions were long overdue, provision of medical cover to all county employees, civic education forums, and peace & conflict resolution engagements and disaster preparedness, mitigation and response across the County. Several research studies to support program formulation and re-engineering of government processes including employee and customer surveys were undertaken.

2.3.8.3 Treasury

The Revenue section in an effort to enhance revenue collection through traders and boda-boda riders constructed market toilets and boda-boda shades during the plan period. The section also acquired a revenue system that has led to improved revenue collections. The Economic planning unit on the other hand achieved in the preparation of quarterly reports, CBROPs, CFSPs, ADPs, Budget circulars, procurement plans, and budget estimates. Further, pavements and parking bays

in Kabarnet town were constructed and upgraded with Cabro works to enhance the aesthetic value.

2.3.8.4 Public Service Board

The County Public Service board championed the development and use of an online recruitment platform during the plan period. The system enhanced the efficacy of the entire recruitment process.

2.4 Challenges encountered during the implementation of the 2nd generation CIDP

During the plan period under review, the county encountered various challenges that hampered smooth implementation of prioritized programmes, Projects and policies. This section presents unique challenges that most affected sector performance.

- The emergence of COVID-19 Pandemic was a major challenge. The effects of this challenge resulted in reduced own-source revenue, delayed project implementation and budgetary constraints as available resources were diverted to support Covid-19 mitigation measures such as construction and equipping of an isolation centre, purchase of personal protection equipment's (PPE's) and supply of hand washing facilities across the county.
- ii Effects of Climate Change—Prolonged droughts and floods experienced during the plan period are some of the effects of climate change. These effects contributed to Resource based conflicts, loss of lives and livelihood's putting pressure on the county resources as many resources had to be diverted to support humanitarian response as opposed to being used on the planned development targets
- iii Low staffing levels, mainly the technical officers in critical sectors such as Public Works, Livestock & Fisheries; Water & Irrigation, Trade & Co-operatives.
- iv Budgetary constraints to support planned programmes, projects and policies. The County revenue received within the plan period was inadequate to finance the prioritized programmes, projects and policies.
- v Inadequate project M&E The County M&E system still requires to be strengthened so as to ensure that projects are implemented as planned and within the contract period.

2.5 Emerging issues

During the plan period a number issues were noted as emerging and critical for consideration during the formulation of the 3rd generation CIDP.

- Emergence of Zoonotic diseases: The interconnectedness among human, animal and environmental health due to emerging and re-emerging pest and diseases are increasing (brucellosis, rift valley fever and rabies) affecting annual budgeting.
- ii Drastic rise in the cost of construction materials and fuel. There has been a steady steep rise in costs of materials driven by the global market conditions following

the surge in fuel prices amongst other circumstances. This has greatly impacted the viability of projects as the scope drastically reduces with the limited financial resources.

- iii Rapid changes in technology renders equipment and systems obsolete thus becoming expensive in the long run.
- iv Introduction of Competency Based Curriculum (CBC) which needed more budgetary allocation for procurement of Learning materials and capacity building for CBC instructors

2.6 Lessons Learnt from the implementation of the 2nd generation CIDP

During the implementation period the following lessons were learnt critical for plan implementation;

- i. To ensure sustainable transformative outcomes, the county should strive to implement high impact flagship projects
- ii. The need to broaden the capital Base through Resource mobilization both from local revenue and external sources
- iii. Need to adequately budget for projects supervision, monitoring and evaluation
- iv. Community involvement is critical during identification, implementation and supervision of projects
- v. Planning for unforeseen emerging issues is necessary, for instance the Covid-19 pandemic
- vi. Strengthening of Project Management Committees is important in ensuring sustainability of projects benefits

2.7 Natural Resource Assessment

This section discusses the major natural resources found within Baringo County. Table 20 below gives a summary of available natural resources and the sustainable management strategies to be employed by the county in addressing the issues faced in utilization of the natural resources.

Table 20: Natural Resource Assessment

Name of Natural Resource	Dependent Sectors	Status, Level of Utilization & Scenarios for future	Opportunities for optimal utilization	Constraints to optimal utilization	Sustainable Management Strategies
Lake Baringo,	Fisheries Tourism Irrigation Agriculture Water Geothermal Culture	Fluctuation of water levels is expected to worsen with expansion of agricultural sector and climate change Excessive use by the geothermal activities around the lake. Water quality expected to decline due to increased farming activities and expansion of settlements and markets centres	Best practices in waste water management and protection of rivers. Development of appropriate domestic water treatment. Recycling GDC used wa- ter for irrigation Catchment conservation upstream	Water level fluctuations. Water quality The sediment transport of the Perkerra is very high because of the steep relief that it drains,	Monitoring of water levels and quality Regulate pollutant sources. Provision of waste water treatment plants from Marigat town. Kampi Samaki and the surrounding centres Regulate water abstraction from rivers flowing to the lake.
Lake Bogoria National Game Reserve	Tourism Culture Wildlife Health Energy Environment and Natural Resources	Surface area of the lake has been diminishing over the years of account of the Delta of the river Molo, Perkerra and Mukutani.	Eco-tourism. Venom extraction from Snakes for medicinal value e.g. cobra.	High evaporation rates causing an increase in the concentration of salts	Monitoring of water levels and quality Regulate pollutant sources Extraction of Geothermal power. Development of ecotourism facilities. Development of snake farms.
Lake Kamnarok National reserve	Water Fisheries Tourism Wildlife Energy Environment and Natural Resources	Compromised quality of water. Diminishing water levels due to excessive extraction of water for domestic and agriculture activities Overgrazing around the lake	Catchment conservation programs and practices.	Poaching Over fishing Siltation and sedimentation	Monitoring of water levels and quality of discharged in the Lake. Regulate pollutant sources.
Lake 94	Fisheries Tourism wildlife Agriculture Water	Shrinking water levels Compromised quality of water.	Potential bird watching haven due to a high population of different species of birds migrating from Lake Nakuru and		Establishment of conservancy. Regulation pollutant sources.

			Elementaita		
River	Irrigation	Over utilized up stream	Availability of potential water	Upstream dam-	Legal and policy
Molo	Water	Reduced river volume	reservoir sites that can be	ming; Pollution,	enforcement
	Livestock	Increased pollution	developed	deforestation	River rehabilitation
				along the river	programme
				banks	

2.8 Development Issues

Table 3: Sector Development issues

Sector	Sub sector	Development Issue	Cause(s)	Constraint(s)	Opportunities
Energy, Infrastructure & ICT	Road & Infrastructure	Road Network.	Poorly developed road network.	Lack of adequate resources	Use the newly acquired sub counties machineries to open new roads and maintenance of existing roads
		Rapid deterioration of road network.	Lack of regular road maintenance.	Lack of adequate resources Poor framework for prioritization of funding	Need to allocate adequate resource for construction of roads to standard quality. Use county and sub county machineries for regular maintenance of earth roads
		Unsafe crossings over water bodies	Lack of crossing structures	Lack of adequate resources	Lobby for allocation of more resources for construction of new crossings and rehabilitation of existing ones
		Lack of conducive road network in urban center	Sparse bitumen road network	Lack of adequate resources Poor framework for prioritization of funding	Collaboration with national government for development of urban loop roads
		Flooding in urban centers during the rainy season	Lack of proper drainage systems	Lack of adequate resources Poor framework for prioritization of funding	Lobby for more resources for drainages construction in urban areas
		Lack of access to parking infrastructure	Inadequate provision of parking bays and structures	Lack of adequate resources	County Local Revenue
		Poor mobilization of transport resources with regards to Disaster Risk	Lack of fleet management system Delayed implementation of transport policy	Lack of adequate resources	County Local Revenue
			-		

			of machines throughout the county		
		Expensive and time-consuming maintenance and repair of County machines and vehicles	Lack of county workshops	Lack of adequate resources	County Local Revenue
		Insecurity within urban centres	Lack of lighting infrastructure	Lack of adequate resources	County Local Revenue
		Households lacking access to electricity	Poor distribution of electrical power lines and infrastructure	The energy sub sector is yet to be fully devolved Lack of adequate resources	County Local Revenue Conditional grants Collaboration with other agencies and stakeholders
	ICT	Connectivity	Poor network coverage	Low network signal due to undulating terrains Absence of power connectivity Limited Broadband connectivity	Improve on network by installing network coverage booster Extension of broadband network under USF program by CA Government interoperability framework
		Cyber security, data privacy	Unethical cyber activities Global access of the world wide web	Information disclosure without consent, personal abuse through cyber stalking	Cyber security trainings Installation of data security infrastructure Data protection act of 2019
		Digital Economy	Digital Divide Data security Capacity gaps	Complex Software & Technology. Lack of a Digital Transformation Strategy	Ajira Digital, Business process outsourcing, e-commerce, Computer aided manufacturing, digital convergence (IoT, AI, cloud Computing). Innovation Hubs
		Digital literacy	Digital divide	Access to computing resources Inexperienced computer users Lack of trained technical support	Digital literacy trainings, Professional certifications, DLP, government Internships and mentorship
Environment Protection, Water & Natural Resources	Environment, Natural Resource, mining,	Climate change effects	Green House Gases, Deforestation, overstocking	Delayed project implementation, Destruction of already established project e.g Soil and water conservation.	Climate change funding, partnerships/Collaborations

	Wildlife				
		Logistical challenges	Inadequate staffing, Transport services	Few technical experts to fast- track data collection, analysis and development of bills. Few field operation vehicles	Availability of experts in other sectors.
		Land issues	Most of lands in the county has not been demarcated, other affected areas are under private ownership	Delayed project implementation	Multi sectoral approach.
Agriculture, Rural and Urban	Agriculture, Livestock &	Low production and productivity	Inadequate water for crop and livestock	-limited irrigation facilities	-availability of water sources/well adapted breeds
Development	Fisheries	in the agricultural sector	Low adoption of CSA technologies, innovations & best practices	-limited extension service providers -high cost of technologies	-availability of trained service providers -support of development partners/county government
			low utilization of quality inputs	high cost of inputs, adulteration, inaccessibility to quality inputs	-availability of land for bulking seed/institutions, availability of standards on inputs
			land degradation	inadequate soil testing,	Availability of CSA technologies
	acces addit	Inadequate market access and value addition	High prevalence pest and diseases	Emergence of new strains of pests & diseases, resistance to pesticides,	Presence of research and regulatory institutions, agrochemicals,
			Low adoption of mechanization services	High cost of equipment's, farm machineries and services	Availability of development partners
			Inadequate access to market information,	high cost of digital platforms, inadequate knowledge	availability of online marketing platforms
			limited market infrastructure,	inadequate budgetary allocations	Existence of development partners
			inadequate aggregation /marketing organization	-low produce volumes -weak marketing institutions -inadequate market instruments e.g contracts	Existence of cooperatives/farmer groups, technical capacity
		Limited institutional structures for	-non adherenceof policies-inadequate policies	-long and costly process in policy development -inadequate enforcement	existence of policies at national level -existence of policy development institutions -availability of partners to support

	policy and coordination mechanism	and legal frameworks	personnel	
	Inadequate service delivery within the agricultural sector	-low staffing levels -inadequate mean of transport/ICT facilities -unfavorable working environment -inadequate training infrastructure (AMS/ATC)	-low budgetary allocation	-existence of partners - political good will
	Declining natural resource base	Unsustainable land use in Communal land Land fragmentation Climate change Overexploitation Land use change	-weak enforcement of regulations/laws -high cost of technologies	-existing policies and regulations
Lands, Housing & Urban Development	Poor revenue generation from land related processes	-Scattered plots records in different offices -Unclear handing over from Local Authority to County Government in 2013 - Outdated /lack of County plots/land records -Outdated /Lack of valuation rolls for rating in urban areas - Lack of clear structures for county plot transfers and issuance of county allotment letters	-Lack of budgetary provision - High cost of preparation of valuation rolls -Lack of prioritization of valuation roll preparation -Political good will	-Availability of Development Partners to support land governance programmes -National Government support on preparation valuation rolls -Existence of relevant policies
	Proliferation of	-Inadequate/Poor	-Poor implementation of	-Support from development partners

	Informal settlements	urban planning initiatives - Poor development control and enforcement of existing plans -Poor land tenure regularization (Land of title deeds for Towns and other urban areas)	existing land use plans	-Urban Planning Initiatives -Slum upgrading initiatives for existing informal settlements
t t	Slow growth of urban areas and towns within the county	-Inadequate land use planning - Outdated land use plans or lack of land use plans for most of towns/trading centres -Slow Implementation of County spatial plan - Unsurvey urban areas /towns thus low access to titles by residents - Poor implementation and enforcement of existing policiesUnclassified and gazettement of towns and urban areas to municipalities.	-Inadequate budgetary allocation - few technical staff -Inadequate use of modern technology and equipment	-Existence of support from development partners -Existing policies on urban areas management
i N	County land information Management system	-lack of county land information management system - Lack of full operationalization of existing GIS Lab -Lack /of GIS software and maintenance of existing software -lnadequate planning	-Inadequate technical staff - Inadequate budgetary allocation to support establishment of land information system	-Existence of support from development partners -Clear Policy guidelines from the National Government (Ardhi sasa) -Rise in use of technology in land management

Development control	and survey equipment and tools-RTK, Total stations -Slow implementation of existing development control policies -Lack of physical planning inspectorate	-Inadequate technical staff -lack of mobility/vehicle for carrying out inspections and enforcement -Lack of budgetary allocation	-Available development control guidelines from the National Government - Existence of support from development partners
Rise in plot/land related disputes	and inspection team - Lack of County Physical and land use planning Liaison committee - Lack of physical planning and land survey offices at the sub-county levels	-Lack of budgetary allocation - Inadequate technical staff -	-Availability of development partners to support Alternative Justice System (AJS)
Insecure land tenure	-Unregistered community land (approximately 60% of the county is made up of unregistered community land)	-Lack of community sensitization on the process -Low budgetary allocation	-availability of support from development partners
Land Banking	-Lack of adequate government land for major investments	-Low budgetary allocations	Availability of land for purchasing
Poor access to Housing facilities	-Inadequate housing provision	-Lack of budgetary allocation for housing development	-Affordable Housing program by the National Government -Availability of land for construction of housing units
Illegal acquisition of public land within the county. /Encroachment of public land	-lack of ownership documents for public land - Poor records management	-Inadequate budgetary allocation -	- National land commission - Existence of support from development partners

Kabarnet Municipality	Sanitation and	look of commob and:	Inadaquata budaatam	lavarage on strategie neutroughing to grant and
	waste management	-lack of comprehensive sewerage system and waste management	-Inadequate budgetary allocation -Lack of suitable land for waste management -Limited support staff/ technical capacity on waste	-leverage on strategic partnerships to support -Tapping of new waste management technologies i.e., Bio-digesters - Availability of suitable private land for purchase -outsourcing on waste management
	Disaster risk management	-Fire outbreaks -Disease outbreaks -Collapse of buildings -Floods and flash floods -Water shortage	management -Policy frameworks -Inadequate budgetary allocation -Poor planning i.e., town planning, access roads -Inadequacy of disaster preparedness i.e., tools and equipment's	-Foster strategic partnership with disaster management experts, agencies and friends of the urban areas -Formulation and enforcement of disaster risk management policies and regulations
	Inadequate Infrastructural development	-Inadequate CCTV cameras -Underdeveloped market infrastructure -Inadequate street lighting and flood lights -Inadequate bitumen roads for accessibility -Inadequate bus termini to ease mobility	-Policy frameworks -Inadequate budgetary allocation -lack of political will -lack of land/space for infrastructure development -grabbing/encroachment of land for public utilities	-Foster public and private partnership -Formulation of laws and enforcement through county courts -awareness creation through stakeholders' engagements
	Environment and Beautification	-Inadequate Urban Tree Planting & Beautification -Poor planning and zoning -Unprotected riparian lands -Rampant stray livestock in urban	- Policy frameworks -Inadequate budgetary allocation -Informal settlements and encroachment	-Enactment and enforcement of urban laws -Foster public and private partnership on beautification -awareness creation through stakeholders' engagements on environment -Allocation of funds through public participation

		areas		
Eldama Ravine Town				
	Sanitation and waste management	-lack of comprehensive sewerage system and waste management	-Inadequate budgetary allocation -Lack of suitable land for waste management -Limited support staff/ technical capacity on waste management	-leverage on strategic partnerships to support -Tapping of new waste management technologies i.e. Bio-digesters - Availability of suitable private land for purchase -outsourcing on waste management
	Disaster risk management	-Fire outbreaks -Disease outbreaks -Collapse of buildings -Floods and flash floods -Water shortage	-Policy frameworks -Inadequate budgetary allocation -Poor planning i.e., town planning, access roads -Inadequacy of disaster preparedness i.e., tools and equipment's	-Foster strategic partnership with disaster management experts, agencies and friends of the urban areas -Formulation and enforcement of disaster risk management policies and regulations
	Inadequate Infrastructural development	-Inadequate CCTV cameras -Underdeveloped market infrastructure -Inadequate street lighting and flood lights -Inadequate bitumen roads for accessibility -Inadequate bus termini to ease mobility	-Policy frameworks -Inadequate budgetary allocation -lack of political will -lack of land/space for infrastructure development -grabbing/encroachment of land for public utilities	-Foster public and private partnership -Formulation of laws and enforcement through county court -awareness creation through stakeholder's engagements
	Environment and Beautification	Inadequate Urban Tree Planting & Beautification Poor planning and zoning Unprotected riparian lands Rampant stray	Policy frameworks Inadequate budgetary allocation Informal settlements and encroachment	Enactment and enforcement of urban laws Foster public and private partnership on beautification Awareness creation through stakeholders' engagements on environment -Allocation of funds through public participation

			livestock in urban areas		
General Economics & Commercial Affairs	Trade	low prices of products	Limited market information. Lack of storage facilities	Low quality of products Erratic production	Value addition Maximizing on new markets eg regional markets Adoption of marketing technology eg E- commerce
		Low Business investment	Restrictive government taxation regime	High cost of doing business	Harmonization of taxes and levies. Development of flexible loan products. Leveraging on national County/ government MSME friendly policies
		Limited entrepreneurial skills	inadequate business training	Low education levels Low technology uptake	Maximizing on digital platforms. Business training
		Business financing	Low uptake of credit finance	Stringent collaterals Lack of awareness	Development of flexible loan products. Awareness creation
Health Services	Health Services	High maternal rate	Parity Previous obstetrics history Malnutrition Social cultural influence Access to quality health services Illiteracy levels and ignorance Types of seeking behaviors during pregnancy Birth defects	Inadequate funding for maternal health services Topography/infrastructure accessibility Weak referral systems Household community factors	Availability of specialist Staff Availability of referral facilities
		Infant mortality rate	Preterm birth low birth weight Sudden infant syndrome Injuries Maternal pregnancy complications	Inadequate knowledge on identification of danger signs at home Employment Social economic status	Availability of specialist Staff Availability of referral facilities

		Malnutrition	Inadequate food security Low socioeconomic status Insecurity Climate change	Inadequate funding for nutritional support	Availability of nutrition supplements
		Poor sanitation	Low investment in sanitation Low socioeconomic status Cultural beliefs Low level awareness Low latrine coverage High rate of opened defecation	Inadequate funding	Availability of IEC material on Behavior changes and communication
		low life expectancy	Malnutrition Poor Health seeking behavior		
Education	ECDE	Low enrolment & retention levels	Resource based conflict Insecurity causing displacement Child labor-Herding	Challenges in combating insecurity issues Weak community conflict resolution mechanism Cultural behaviors	Partnerships with NGO's and development partners in building
		Food & nutrition insecurity amongst ECDE learners	Low production & productivity Effects of climate change	Budgetary allocation	Foster strategic partnerships to support school feeding programmes
Youth, Gender, Culture & Social Protection		High unemployment rate	Limited knowledge and skills amongst the youth	Budgetary constraints to	Enhance enrolment in the VTC's to create employment in the informal sector.

2.8 CONCEPTUAL FRAMEWORK

Vision A Peaceful and Prosperous County with the Highest Quality of Life

Theme:

Delivering as One to transform the lives of the people of Baringo to the highest standard of living

Development Issues Sectoral Analysis, Public Participation Prioritizations, Stakeholder Consultations, Baringo Charter

The Plan Foundation

The Governor's Manifesto, Kenya Kwanza Manifesto, MTP IV, SDGs, SFDRR,

CHAPTER THREE: SPATIAL DEVELOPMENT FRAMEWORK

3.0 Overview

This chapter presents the Baringo County spatial framework within which development projects and programme will be implemented. The chapter also elaborates on the county plans to utilize its natural resource.

3.1 SPATIAL DEVELOPMENT FRAMEWORK

Spatial planning brings together and integrates policies for the development and use of land with other policies and programme that influence the nature of places and how they function. The County Spatial planning is about anticipating long-term change (and the pressures and opportunities that emerge from it) and articulating a logical and flexible development path for a more sustainable and equitable future. The spatial development framework and associated urban plans achieve this by establishing guidelines about how Baringo should grow. These spatial plan guide new investment, give effect to the principles and priorities of the Urban development strategies, and identify priority areas for strategic intervention.

This CIDP takes cognizance of the National Spatial Plan, the Baringo County Spatial Plan and Urban integrated plan as frameworks for: functional human settlements; enhancement of agricultural productivity; planning and management of natural resources and the environment; infrastructure provision; industrial and commercial development and enhancement of good governance.

3.2 Baringo Resource Potential Growth Areas

Baringo county relief maps indicate that the county has complex geographical features ranging from hills, valleys and lakes, the County spatial plan provides land use zones that are pertinent to achieving sustainable development. This are elaborated in the following sections;

3.1.2 Land Use and Suitability Analysis

The main land use activities within the County include pastoralism, intensive crops and livestock agriculture, wildlife conservation areas, forestry and water bodies. However, there is a changing trend on land use, Forest have rapidly been degraded leaving only 25.12% of the county under forest cover (Kenya Open Data). On the other hand, urban land use has rapidly increased in the main towns. The following sub-sections illustrates key spatial land use types in Baringo County.

3.1.2.1 Relief features

The county is located within the Eastern Rift valley. It has a several hills with highland stretch from Tiaty through Kabarnet and the highest point located a few kilometers south of Eldama Ravine town. The lowest point is located about 80 kilometers north east of Chemolingot town. This is illustrated in figure 4 below.

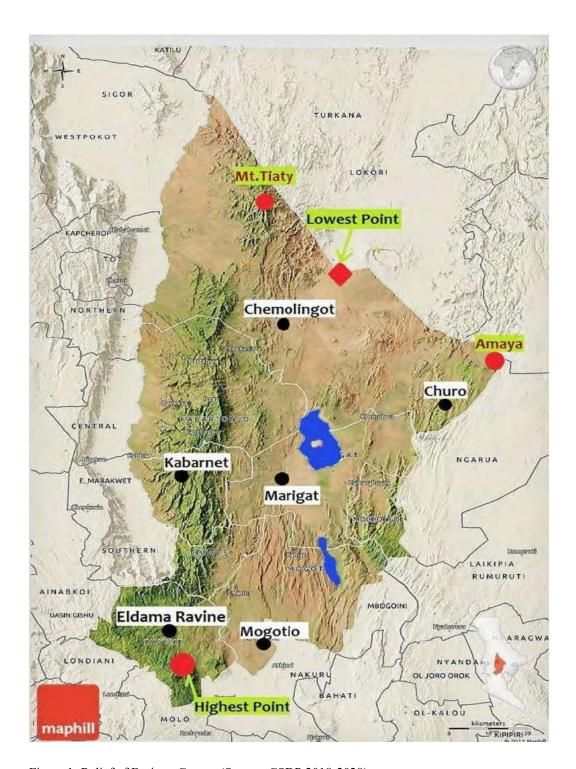

Figure 1: Relief of Baringo County (Source: CSDP 2018-2028)

3.1.2.2 Transportation network

The road transport network coverage in Baringo County is not well developed for effective transformation of the county's economy. The poor and sub-standard road transport systems are associated with high transportation costs which impede economic growth. The realization of a transport spatial network permits movement of persons, goods and delivery of pertinent services like security. Figure 5 illustrate the County's spatial strategic road network. The un even topography has made road and transport network construction and maintenance in the county very expensive.

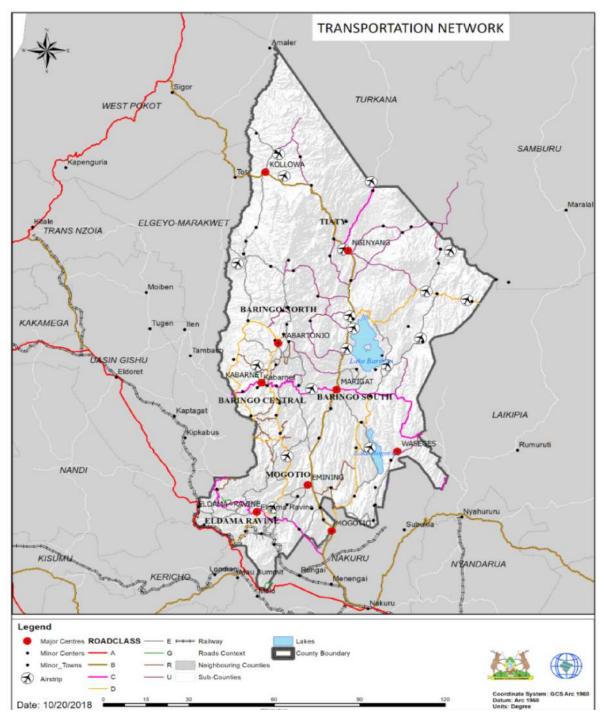

Figure 2: Baringo County strategic road network (CSDP 2018 – 2028)

3.1.2.3 Natural Environment

Baringo County has rich flora and fauna, forests, mountains, Lakes, woods, extensive county parks, and river networks. These ecological environments should be connected for animal friendly network and biodiversity. conservation is of importance for it enables protection of the ozone layer; enhances efficiency in agricultural sector enabling farming; marine conservation protects human food supplies as well as marine animals; enables protection of the ecosystem; enables good climatic conditions; and minimizes damage or destruction of properties mainly caused by weather vagaries like floods and droughts. Figure 6 provides The spatial distribution of the forest cover in the County

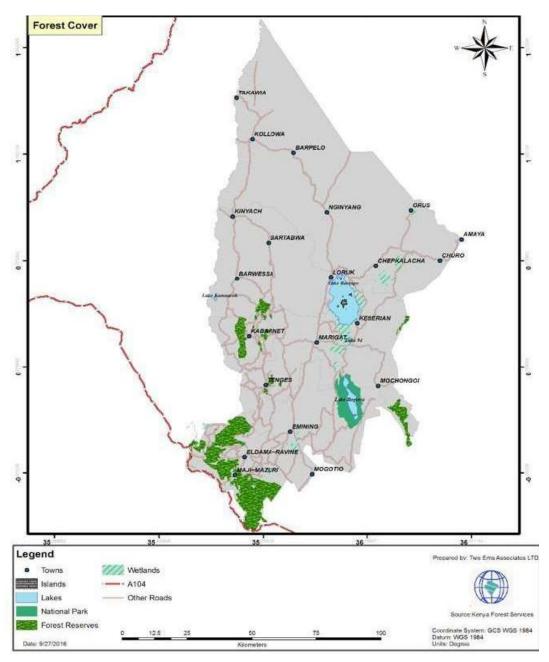

Figure 3: Spatial Distribution of Forests in Baringo County (CSDP 2018 – 2028)

3.1.2.4 Mineral Distribution in the County

Baringo has large deposits of Carbon-dioxide gas around Emining, Eldama Ravine and Maji Mazuri. Copper deposits are found South of Tenges; Ruby deposits exist in the North East of Emining; Opal deposits exist around Lake Bogoria while Garnet is found on the west of Karbarnet town. Graphite is found on the south of Kabarnet while Diatomite Fluorite deposits are found around Tarakwa area which is on the north west of the County. Vermiculate exist around Tenges area and deposits of Manganese are around Kinyach area. Cyanide deposits exist around Marigat area. Fig. 7 shows spatial distribution of minerals resources in Baringo County.

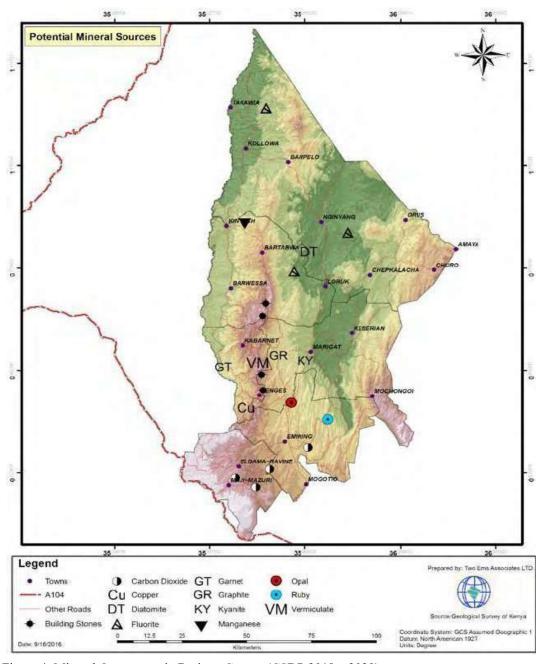

Figure 4: Mineral Occurrence in Baringo County (CSDP 2018 – 2028)

3.1.2.5 Tourism Attraction Sites

Tourism plays a central role in the county economy and is a major source potential growth and employment generation. As such the county government is committed to working with the private sector in removing the hindrance to its growth, and strengthening the linkages between tourism and the rest of the economy. The tourism attractions sites in the County include the Scenic features of the rift valley such as the Mt. Tiaty in Baringo North, Hot Springs at Lake Bogoria and Wildlife attractions in Lake Baringo and Bogoria. The County also boasts of numerous bird Species around Lake Baringo, Bogoria and Ninety-four (Kichirtit). This CIDP take cognizance of these resource and the plan provides mechanism to tap on the resource potential. Figure 8 highlights major tourism sites in the county.

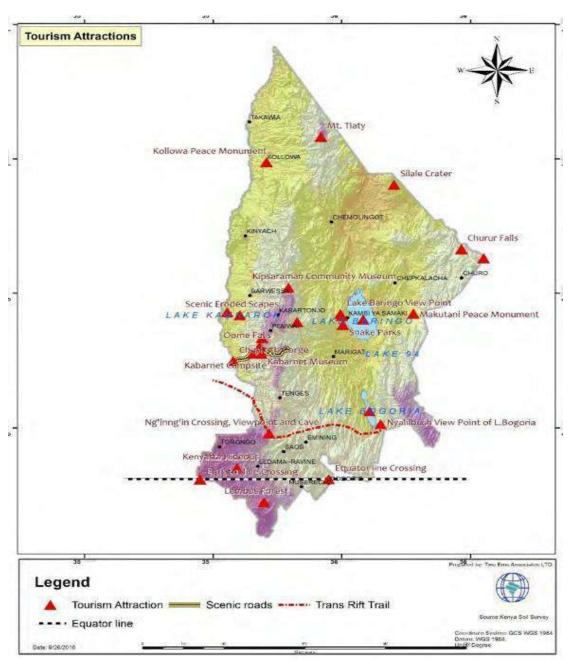

Figure 5: Tourism attraction sites in Baringo County (CSDP 2018 – 2028)

3.1.2.6 Tourism Conservation areas

The community conservancies include: the Morop Tarambas Community conservancy with fossil sites; Ruko wildlife conservancy with various species of animals, Bird watching and has the Baringo Giraffe; Ngenyin Community conservancy has Bird watching sites and Baringo Giraffe; Kaptuya community conservancy is Bird Watching and dispersal area for wildlife; Emsos community conservancies has Nature trails; Kipngochoch Community conservancy has Kiplambe forest reserve; Chuine Community conservancy is a dispersal area for wildlife; Irong Community conservancy is a dispersal area for wildlife in Lake Bogoria; Chepkirong Community conservancy is an Elephant corridor with rapid terrain along the river. Other community conservancies include Lokis (Kolowa) Community conservancy and Arabal Community conservancy. The other proposed conservancies include; Kiborgoch conservancy, Tomolokwo conservancy, Mt Tiaty Conservancy and Silale Transboundary Conservancy. Figure 9 presents a spatial map of conservancies in Baringo County.

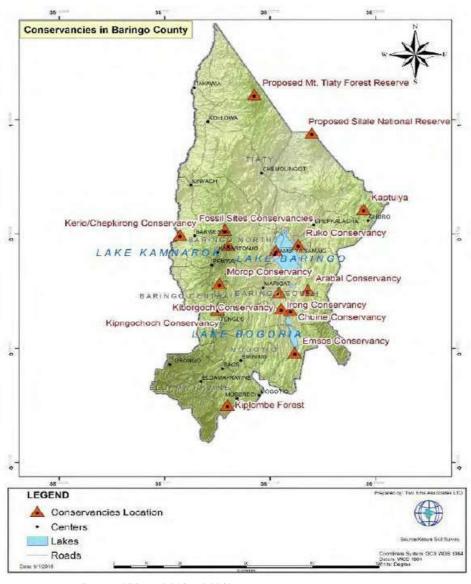

Figure 6: Conservancies in Baringo County (CSDP 2018 – 2028)

3.1.2.7 Urbanization

Urban settlements are characterized by linear settlements configured majorly by road transport network, administrative functions and commercial. Settlements patterns in the urban areas are either linear or clustered and can be categorized as principle towns, rural towns and market/local centers. The principal urban centers and growth centers in the county are Kabarnet, Eldama ravine, Marigat Mogotio, Chemolingot and Kabartonjo. The current Drivers of urbanization in the County include natural resource potential, administrative function, tourism and culture, transport connectivity, Growth Centre potential, security, agricultural, education hub and growth Centre potential. Urbanization follows transport corridors in the county. Figure 10 presents Baringo hierarchy of Urban Areas

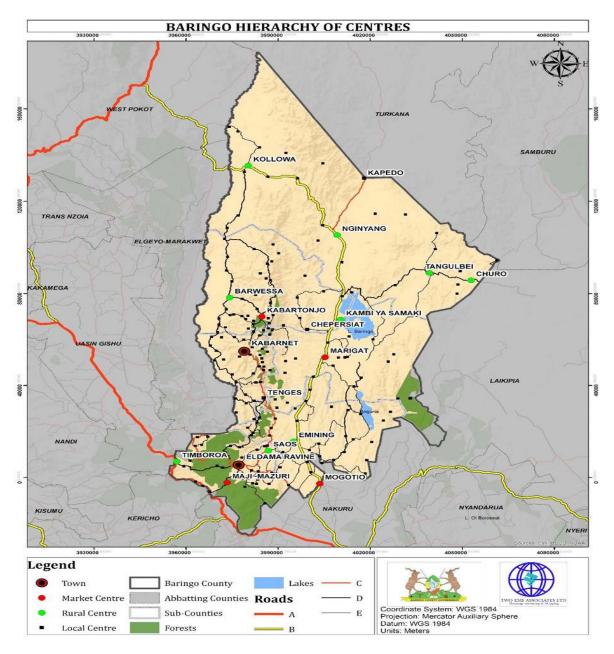

Figure 7: Hierarchy of Baringo County Urban Areas (CSDP 2018 - 2028)

3.1.2.8 Trade and Industry

Trade and Industrialization are important economic activities in Baringo County. These two thematic areas have so many informal entities that contribute to the County revenue base. The three formal industries in the County which include: Salawa Cotton Ginnery in Salawa. ,Goldox slaughter house in Mogotio, and Abattoirs in Mogotio. There are also two existing industrial zones in Kabarnet and Eldama Ravine, a planned industrial zone in Marigat and Mogotio. There are three operating coffee processing factories at Katimok, Kituro and Kapkawa. Honey processing on a small scale happens at Koriema, Radat (KBS approved) and Kapimoi. Several slaughter houses are being constructed in Barwessa, Maoi and Loruk. Mineral extraction also takes place in Tenges and Tiaty, Mogotio and Eldama Ravine. Figure 11 presents the spatial distribution of industries in Baringo County.

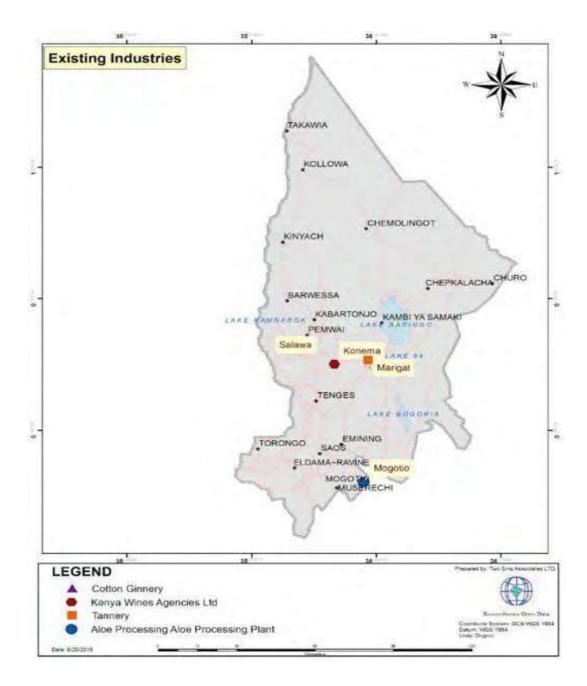

Figure 8: Spatial distribution of existing industries in Baringo County (CSDP 2018 – 2028

Table 4: County Spatial Development Strategies by Thematic Areas

Thematic Area	Overview/Current Situation	Potential Geographical Area	Strength/ Opportunities
Industrialization	Zoned land for industrial parks around urban areas, information on potential crops and minerals for value addition is available, inadequate capital, undeveloped market, and inadequate skilled labor, Weak investment frameworks. Strong political goodwill Robust county economic and business environment policy and laws Vibrant branding and marketing campaigns by county Anchoring Summit on a Plan Showcasing their products through exhibition stands and identified possible avenues for donor support. Fostered partnership with strategic partners on investments i.e. solar energy development, industrial parks and commercialization of aloe Vera. Upscaling of Mogotio tannery to achieve processing and manufacturing of leather products.	Marigat, Eldama Ravine, Mogotio	Sector Policy preparation, Incentives to attract investors, Training on personnel, Programme support, and Identify the industrial zones. Insist on value addition on agro-products Establish automated Business Information Centre Exposure to Exhibition & Trade fairs Tours & exchange programme Development of training toolkits
Natural Resources	Availability of communal land, availability of minerals, availability of solar and geothermal energies, availability of tourist sites, availability of lakes and rivers, availability of wildlife, availability of flora and fauna, availability of building materials.	Countywide	Availability of the county spatial plan, Availability of tourist sites, Availability of solar and geothermal energy, Political goodwill, strategic position of the county i.e. nearness to the northern corridor. Unexploited mineral deposits
Environment and Climate	Encroachment of fragile ecosystems- This includes wetlands, rivers/streams, springs and vegetation. Climate change- The County has been experiencing extreme variations in weather patterns. This has resulted to drying up of water sources/reducing water levels, occurrence of landslides and frequent flooding resulting to land degradation and massive soil erosion. Deforestation- Human activities have threatened the forest and vegetation cover in the county. There is high rate of deforestation due to increase in population, change in land uses, charcoal burning and timber production. Soil erosion- The steep terrain of the county has influenced increased soil erosion taking place in the region, this has in turn led to pollution in major water bodies and water storage facilities.	Countywide	Laws and policies on environment are available, EDE, DRM Policies are available, KFS. NEMA KWS. NGOs CBOs. Local Communities are available to protect environment.

Population and demography	High population growth rate. The increase in population has led to: Deforestation, Pollution and land degradation and inadequate access to basic needs. High illiteracy levels- This is because of the cultural practices and beliefs that education is not important. Community conflicts- There are inter-communities conflicts on diminishing resources use and boundary disputes.	Countywide	Establishment of service Centres Establishment of Growth Centres Establishment of an integrated transport and communications network Rural development Appropriate standards for urban infrastructure
Land	Land degradation- Land degradation is greatly attributed to soil erosion in the county. This is because of poor land management practices such as overgrazing, unconventional farming practices and deforestation which have accelerated soil erosion. Poor Land Tenure- A majority of the residents lack security of tenure on private land. Land conflicts- There are land ownership conflicts in some parts of the county. This is attributed to the lack of title deeds due to the lengthy acquisition of title deed process and presence of un surveyed land. Encroachment of all public land reserves- The communities have encroached and grabbed public land and the situation has been met with refusal of the communities to give up public land. This has hindered provision of infrastructural and recreational facilities in the county. Limitations of communal ownership of land- Communal ownership of land has limited individuals from being able to use land as collateral to acquire loans for personal development.	Countywide	Available land for irrigation and livestock rearing. Establishment of land bank to facilitate access to land for investment Land for investment shall be acquired, planned, surveyed and serviced as a way of making the country attractive for investment Exploit the county's competitive advantages in energy, agriculture, tourism, and land to create a competitive edge. Create a functional urban hierarchy with role specialization Reviewed business operating environment to make it efficient and responsive to investor demands Provision of title deeds to land owners Capacity building for people who live in sloppy areas Building of gabions Community initiatives on environmental conservation Implement the spatial plan.
Economy	Poor developed economic value chains in crop production, livestock, tourism, agro-industrialization, lumber, mining and trade. Low technological outputs in economic activities Inadequate marketing strategies for agricultural products Limited value addition for agricultural products Lack of farmer friendly lending institutions Limited product diversification	Countywide	Opportunity to Optimally utilize the identified land and natural resource potentials. Foster a diversified, modernized agriculture and value addition agricultural system. Develop and improve market infrastructure for livestock and farm produce in high potential areas. Promote adoption of appropriate crops in different regions based of soil suitability mapping Prevention of fragmentation/subdivision of agricultural land into small uneconomic

			units Identify and map all mineral deposits and exploit minerals sustainably Encourage farm forestry as way of increasing the national forest cover Identify and exploit tourist resources in all parts of the country to promote the whole country as tourist destination Promote and plan for urban containment and sustainable urban growth management Promote sustainable use and management of water and fisheries resources.
Infrastructure	Water & sanitation	Countywide	
Physical	Poor water quality i.e. untreated and soil water Lack of sewerage systems in urban centers		
	ICT		
	Mobile network challenges in some sub counties		
	Poor mobile network reception in some rural areas		
	Energy- Poor distribution of electricity network		
Social	Declining health standards and increased incidence and re-	Countywide	Achieve a more even distribution of the
	emergence of diseases.		population between regions through spatial
	Inadequate funding. High cost of health care.		planning. Ensures that ethnic/rural/urban issues are
	Poor nutrition		systematically integrated in all aspects of
	HIV/AIDS pandemics.		development planning and activity at all
	Inadequate laboratory services.		levels of the administrative structure
	Inadequate health facilities.		Plan to enhanced integrated rural and urban

	vulnerable groups such as girls and people with disabilities		valorization of natural resources, human
	Improve attendance and retention		resources and economic specifics of the
	Promote vocational and technical institutions to provide		different regions;
	necessary skills at post-secondary school level		Construction of ECDE centers

	Construction of recreational facilities Construction of playgrounds Nurturing sports and arts talent Employment of qualified special needs teachers Inadequate ambulance Services. Inadequate cemetery services/space. Dilapidated health facilities. Unsecure health facilities.		Recruitment of qualified ECDE teachers Provision of adequate instructional/ learning materials in ECDE centres Construction of special needs facilities in ECDE centres Collaborate with the private sector, NGOs and development partners to provide additional educational facilities Improve management and supervision of ECDE centres Collaborate with the national government, private sector, NGOs and development
Human Settlements	The urban areas are experiencing uncontrolled urban sprawl. Excessive land subdivision in the agricultural rural areas affect production Encroachment into forests and road reserves Poor waste management in the urban areas Insecurity has resulted to involuntary displacement of people Inadequate infrastructure	Countywide	Opportunity to Prevent the emergence of new areas with major development problems and promote the development of environment-friendly production, and to protect natural resources, natural and cultural heritage and other common good. Opportunity to Enhances accessibility to, and affordability of government and sectoral services by the poor/rural people Opportunity to revitalization of villages and development of the areas with specific development needs as well as Preservation and development of the specific identity of the individual planning regions, including their affirmation and development
Institutions	Inefficiencies within institutions Political interference in finance allocation and infrastructure Mismatch between development planning and budgetary allocation	Countywide	Opportunity to Strengthen existing development management institutions and establish specialized institutions to coordinate sectoral development efforts in the county Availability of Legal frameworks governing the county institutions
Transportation	Low road network Low Quality of Transport Services Unexploited Regional Role of the Transport System Lack of integration of the transport system Urban Environmental Pollution Lack of an Urban/rural Transport Pol-	Countywide	Opportunity to Promote optimal utilization of land and land based resources throughout the county based on potential while ensuring conservation of environment Opportunity to ensure provision of appropriate and adequate infrastructure and services as well as linkages for optimal utilization of resources, processing and

		transfer of goods and services throughout the county. Identify the niche of different regions in the country in terms of resource endowment, location or installations hence positioning such regions in the county and national competitiveness.
Tourism and Physiographic	Improvement and opening up of new tourist sites	High end tourist attraction sites in the county. High potential investment opportunities in the sector. Identify the niche tourist products from different regions in the county.

CHAPTER FOUR: DEVELOPMENT PRIORITIES, STRATEGIES AND PROGRAMMES

4.0 Overview

This Chapter provides sector development priorities, strategies, programme, flagship projects, and cross-sectoral linkages.

4.1 Development Priorities and Strategies

The section includes the following: Sector Name, Sector Composition, Vision and Mission, Sector Goal(s) and Sector Priorities and Strategies.

4.1.1 ENERGY, INFRASTRUCTURE AND INFORMATION COMMUNICATIONS AND TECHNOLOGY SECTOR

This sector consists of four sub-sectors, namely: Energy; Transport and Infrastructure; Information and Communications Technology. The sector is one of the key foundation sectors in county development priorities.

Energy sub-sector

The energy sub sector is geared towards providing renewable and sustainable energy required to accelerate economic growth and development by the year 2030 through implementation of flagship and other development Programmes.

The Sub-sector strategic objective is to develop and improve access to quality, reliable and affordable energy. The main sources of energy in Baringo County are electricity, solar energy, LPG, biogas, paraffin, charcoal and firewood. Lack of access to clean sources of energy is a major impediment to development.

The sub-sector is responsible for renewable energy promotion and development; thermal power development; oil and gas exploration; oil/gas and minerals capacity development; rural electrification programme and street lighting; energy regulation, security and conservation; and fossil fuels exploration and development as well as to mobilize resources for research and development of alternative energy sources.

Transport and Public Works Sub-Sector

The sub-sector is Comprised of County Mechanization and Machineries Management, Rural and Urban Roads Development and County Public Works. The sub-sector is responsible for: County roads development, County infrastructure management and supervision, policy development and management; marine & rail management; standardization and maintenance of roads; mechanical and transport services; enforcement of axle load control and inspection; materials testing and advice on usage; standardization of vehicles, plant and equipment; protection of road reserves and maintenance of air strips and car parks.

The Sub-sector strategic objective is to build and maintain climate proofed transport infrastructure while ensuring effective public transport and traffic management in all parts of the county. It also provides technical assistance including monitoring and evaluation of all infrastructural projects in the County.

Information Communications and Technology Sub-sector

The specific objective of the sub-sector is to develop ICT infrastructure, promote digital literacy and capacity, compliance and software applications for sustainable development.

The sub-sector is responsible for: provide information communications and technology infrastructure (ICT); Development of County Communications Capacity and Infrastructure; Promotion of Software and hardware Development Industry, Provide Enterprise Re-engineering Process (ERP) solutions to county government departments; county ICT infrastructure maintenance and management, Provision of ICT technical support to other Government departments; Provision of digital literacy training, Provision of advisory services on acquisition of ICT and telecommunication services and equipment to departments; Telecommunication services, development of ICT centers and innovation hubs, data management and information development.

Vision

To be the leader in the production of renewal energy and delivery of sustainable infrastructural facilities in Energy, Transport and ICT.

Mission

To build an efficient and reliable transport, communication and other public infrastructure while promoting innovations in energy and information communication technologies.

Sector Goal(s)

To provide efficient, affordable and reliable infrastructure and ICT services for socio-economic transformation.

4.1.1.1 Sector priorities and strategies

Table 5 sector priorities and strategies

Sector priorities	Strategies				
Enhance accessibility in Rural areas	Identify crucial areas isolated from the existing road network and ensure that roads opened are geared towards linking to key socio- economic hubs.				
Maintain good and climate proof rural road	Carry out intensive programmes to improve earth roads to gravel				
Network	roads.				
	Plan for periodic maintenance of roads as soon as they are opened.				
Provide safe and reliable passage across	Integrating crossing structures into all road construction projects				
water bodies and irregular land surface					
Decongest and expand the County Urban	Inclusion of upgrading and maintenance of bitumen roads in each				
Centers and spur economic development.	financial year				
Improve drainage and urban roads	Integrate provision of drainage systems into all road construction				
sustainability	projects				
Reduce traffic congestion and ensure order	Construct modern parking lots				
in urban centers	Set up parking system and guidelines to maximize utility of parking				
	areas				
Increase the County Machineries fleet and	Acquire additional number of plant machineries and vehicles				
its management	Establish an automated fleet management system				
A centralized cost effective and efficient	Establish a county vehicle and machinery maintenance workshop				

maintenance system for county machineries	
and vehicles	
Organized and effective public transport	Formulate policies and bills that will put in place a framework for
system in the county by 2022	the organization and streamlining of operation of public service
	vehicles
Improve Telecommunications and network	Extension of fibre optic networks.
infrastructure	Installation of structured cabling and unified communication
	networks.
	Interlinking government entities to a central network.
	Establishing a well equipped data center and server rooms.
Availing of Government services online	Disseminate data and ICT policies and standards.
	Develop portals, websites and systems.
	Digitise government records.
Promote ICT use and digital literacy	Train civil servants and members of the public.
	Carry out ICT clinics and innovation expos.
	Establish ICT and innovation centres.
	Provide ICT maintenance and support services.

Table 6: Sector Linkage with Kenya Vision 2030, other plans and international obligations

National	Aspirations/Goals	J, other plans and international obligations County Government contributions/Interventions*
Development Agenda/Regional/ International Obligations	Aspir attoris/ Gvais	County Government contributions/Interventions
Kenya Vision 2030/ Medium Term Plan	Foundations for the Pillars	The county will promote development of renewable energy as an alternative source of energy (develop Energy plan & Energy investment plan, development of renewable energy sources to increase energy supply & reduce energy cost, Potential renewable sources include: Solar, Geothermal energy & wind. To improve on road infrastracture network the county will, upgrade, maintain bitumen road, Bridges and Structures Development, Bus parks and parking bays and Drainages Systems On ICT the interventions will include; development of a well-equipped data Centre and server rooms, Enhanced Extension of fibre optic networks, Installation of structured cabling and unified communication networks and to Interlink government entities to a central network.
Sustainable Development Goals	Goal 7. Ensure access to affordable, reliable, sustainable and modern energy for all	To ensure universal access to affordable, reliable and modern energy services the county plans to; Rural Electrification and Street Lighting
	Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization & foster innovation	The county will develop quality, reliable, sustainable and resilient road infrastructure and maintain existing ones, to support economic development and human well-being, with a focus on affordable & equitable access for all.
Africa's Agenda 2063;	An integrated continent, politically united, based on the ideals of Pan Africanism and the vision of Africa's Renaissance (Goal; World class infrastructure criss- crosses	The county endeavors to ensure communications and infrastructure connectivity through construction and maintenance of roads, development of a well-equipped data Centre and server rooms, enhanced Extension of fibre optic networks, Installation of structured cabling and unified communication networks and to Interlink government entities to a central network

	Africa)	
EAC Vision 2050	Infrastructure Development (GOAL: Improved access to affordable and efficient Regional transport, energy and communication network for increased competitiveness)	The county will implement infrastructure interventions aimed at improving access to affordable and efficient transport, energy and communication network for increased competitiveness. This will include; Urban roads development and maintenance, Bridges and Structures Development, development of a well-equipped data Centre and server rooms, enhanced Extension of fibre optic networks, Installation of structured cabling and unified communication networks
The Bottom Up Economic Transformation Agenda 2022-2027	Infrastructure	To pursue an ambitious road building programme for the agenda the county will; Identify crucial areas isolated from the existing road network and ensure that roads opened are geared towards linking to key socio-economic hubs, Carry out intensive programmes to improve earth roads to gravel roads, Plan for periodic maintenance of roads as soon as they are opened, Integrating crossing structures into all road construction projects, Inclusion of upgrading and maintenance of bitumen roads in each financial year and Integrate provision of drainage systems into all road construction project
Governors	Pillar 3: Improving the	The county commits to development of tarmac roads (In
Manifesto	Quality of Life	partnership with KeRRA) and construction of all-weather roads

4.1.1.2 Sector Cross-Sectoral Linkages

4.1.1.2 Sector Cross-Sectoral Linkages									
Programme	Linked	Cross-sector Impact		Measures to Harness or					
Name	Sector(s)	Synergies*	Adverse impact	Mitigate the Impact repeat header					
Road Infrastructure Development	All Sectors	All Sectors Roads Infrastructure Development is the basic requirement that supports All Sectors in Service Delivery		Adequate Funding; Capacity development Infrastructure integration Software Integration and Maintenance Use of genuine Software's					
	Trade	Connection to market centres	Pulling down of structures on road reserve	Establishment of market Centre's and parking bays along the roads					
	County Assembly	Allocate adequate resources for Road Infrastructure Development.	Under-resourced Road Infrastructure Development.	Adequate allocation of resources; Establishment of climate proof infrastructure					
Public works development	All Sectors Public works Development is the basic requirement that supports All Sectors in Service Delivery		Understaffing Lack of equipment	Adequate funding Staff recruitment					
	County Assembly	Allocate adequate resources for Road Infrastructure Development.	Under-resourced public works development.	Adequate allocation of resources; Establishment of climate proof infrastructure					
Energy Access Infrastructure Development	Urban and Town Planning Town Management National Transport Safety	Street, flood lights and electric connectivity to people	Vandalism and pulling down of energy access infrastructure	Climate proof infrastructure					

	Authority			
ICT Development	ALL	ICT Infrastructure Development is the basic requirement that supports All Sectors in Service Delivery	Designs omitting Communication Channels	-Adequate Funding -Capacity development -Infrastructure integration
Software Development, Licensing and Support	All Sectors	-Forms the basis of Government operational efficiencies -Legal and Copyright protection.		-Adequate Funding -Capacity development -Software Integration and Maintenance -Use of genuine Software's
Data Content Development and Management	All Sectors	-Secured and Unified storage of Government records -Enhanced Information access and Sharing -Saves on Office space		-Adequate Funding -Capacity development -Ensure Adequate Infrastructure & Security in Place
ICT training and Capacity building	All Sectors	-Trained User staff for production -Trained Technical staff for systems support		-Adequate Funding -Effective ICT Infrastructure

4.1.1.3Sector programme

The section provides sector programme to be implemented within the planned period as presented in Table 26 below

Table 7: Energy, Infrastructure and Information Communications and Technology Sector Programmes

4.1.2 ENVIRONMENTAL PROTECTION, WATER AND NATURAL RESOURCES SECTOR

Environmental protection, water and natural resources sector consists of two sub sectors; namely Environment and Natural Resources and Water and irrigation.

Environment and natural resources sub sector

Environment and Natural Resources Sub-Sector contributes to the development and implementation of Environmental management, forest management, conservation and protection of national wildlife, meteorological management, climate change and water catchment area conservation, control and protection of minerals. It is also mandated with management of health conditions and safety in mines, resources surveys and remote sensing and policy on extractive industry. Mining contributes to the development and implementation of Mineral exploration, mining policy and management, inventory and mapping of mineral resources, mining and minerals development, development of policies on the management of quarrying and mining of rocks and industrial minerals

Water and irrigation sub sector

This sub sector comprises of two units: Water and irrigation. The core mandate of the sector is to increase access to water, ensure accessibility to clean and safe drinking water, provide quality services to the people and to promote water resources management and sewerage services.

Vision

Water for all in a clean, safe and sustainable environment.

Mission

To enhance access to clean and safe water, high quality sewerage services and conserving environment while promoting sustainable utilization of natural resources in Baringo County.

Sector Goal(s)

To ensure ease of access to clean water and sewerage services, protecting and conserving the environment while ensuring sustainable utilization of natural resources.

4.1.2.1 Sector priorities and strategies

Table 8: Sector Priorities and Strategies

Sector Priorities	Strategies
Increase access to water for domestic,	Construct/Extend pipelines/ Rehabilitate Water supply and waste
livestock and Industrial use through	water facilities.
sustainable water supplies.	Develop County sector policies and regulations on environment, water
	and natural resources.
	Stakeholder involvement and Resource mobilization.
Construct, Maintain and Sustain	Rehabilitation of existing infrastructure.
Irrigation Infrastructures	Design and Construction of dams.
	Development of Irrigation policy, master plan and regulations.
	Enhanced Resource mobilization.
Rehabilitation of degraded land and	Construction of soil erosion control structures.
Wetlands; management of invasive	Adoption and application of PRM both as Concept and approach in
species	restoration of rangeland management
	Develop land degradation policy and protection frameworks

Mainstreaming of climate change	Establishment of tree nurseries. Enhancement of afforestation programs. Forest conservation and management. Develop climate change policies, legislations, guidelines and plans Establish climate action program fund (FLLOCA) Explore alternative products and promote investment opportunities.							
Sustainable waste environment	Develop collateral materials and participate in local and international sector fairs and exhibitions.							
Wildlife and landscape conservation	Mapping/surveying and fencing.							
Establishment of county Geo parks (Paleo/archeological sites(culture, ICT)	Management plans formulation and implementation.							
Protection of plant and animal species	Wildlife protection areas/rangelands and conservancies, Adoption and application of PRM as an integrated approach in rangelands restoration of ecosystems in natural resource and protection of endangered wildlife and plant species based on functional ecosystems and healthy rangelands.							
Mining, quarrying and sand harvesting	Quarrying and sand harvesting policies, plans, laws, regulations developed and implemented Restoration and management of abandoned quarry sites							

Table 9: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National Development	Aspirations/Goals	da, Regional and International Development Frameworks County Government contributions/Interventions*
Agenda/Regional/ International Obligations	Aspirations/Guais	County Government contributions/Interventions
Kenya Vision 2030/ Medium Term Plan	Social Pillar: Investing in the People with the aims to improve the quality of life for all Kenyans through management of environment water and Sanitation	To achieve this pillar, the county is putting up the following interventions: - Conservation and protection of environment - Increase access to clean and safe water - Development of water structures - Increase water coverage Development of Irrigation policy, master plan and regulations - Creation of clean, secure and sustainable environment - Conserve water sources and start new ways of harvesting and using rain and underground water
Sustainable development Goals	Goal 6. Ensure availability and sustainable management of water and sanitation for all	 Implementation of water infrastructural development such as dams, boreholes and other water schemes Construct/Extend pipelines/ Rehabilitate Water supply and waste water facilities Develop County sector policies and regulations on environment, water and natural resources Rehabilitation degraded land and Wetlands and management of invasive species
	GOAL 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss	 Mainstreaming of climate change Rehabilitation degraded land and Wetlands and management of invasive species Construction of soil erosion control structures. Establishment of tree nurseries Enhancement of afforestation programs Quarrying and sand harvesting policies, plans, laws, regulations developed and implemented Restoration and management of abandoned quarry sites

National Development Agenda/Regional/ International Obligations	Aspirations/Goals	County Government contributions/Interventions*
Agenda 2063	Aspiration1: A prosperous Africa based on inclusive growth and sustainable development Goal: Environmentally sustainable climate and resilient economies and communities	The county has proposed the following interventions towards addressing Agenda 2063; - Mainstreaming of climate change - Develop County sector policies and regulations on environment, water and natural resources - Capacity Development on Climate change
EAC Vision 2050	Goal No. 4: Effective and sustainable use of natural resources with enhanced value addition and management	 Management plans formulation and implementation Wildlife protection areas/rangelands and conservancies. Enhancement of afforestation programs Quarrying and sand harvesting policies, plans, laws, regulations developed and implemented Develop County sector policies and regulations on environment, water and natural resources Enhanced environmental education & awareness (EE&A) by the public
Paris Agreement on Climate Change, 2015;	Article 2. Strengthen the global response to the threat of climate change.	 Capacity Development on Climate change Enhancement of afforestation programs Quarrying and sand harvesting policies, plans, laws, regulations developed and implemented Develop County sector policies and regulations on environment, water and natural resources Enhanced environmental education & awareness (EE&A) by the public

Table 10: Sector Cross-Sectoral Linkages

Programme Name	Linked Sector(s)	Cross-sector Impact Synergies*	Adverse impact	Measures to Harness or Mitigate the Impact
Environmental Conservation and Management	Environment	Provide Environmental, social impact assessments reports for irrigation projects	Environment pollution	Comply and enforce NEMA guidelines
	Environment Water and Agriculture	Soil erosion control measures	Soil erosion causing environmental degradation and soil infertility; Siltation of water bodies; Insufficient water supply.	Agriculture/environment/water- embankment of gabions, water pans and terraces. Environment-planting of trees along river banks and riparian reserves. Water/agriculture-designs and supervision.
	Water	Provide availability and conveyance of sufficient water for sustainable	Insufficient water for tree planting and other environmental	Synergy

Programme	Linked	Cross-sector Impact		Measures to Harness or Mitigate
Name	Sector(s)	Synergies*	Adverse impact	the Impact
		Environmental Conservation and Management	conservation measures	
	Land use planning	Spatial development framework for Environmental Conservation and Management.	Land ownership conflicts	Multi stakeholder involvement in development of the county spatial plan and subsequent use.
	County Assembly	Allocate adequate resources for Environmental Conservation and Management	Under-resourced Environmental Conservation and Management	Policy development and sensitization
Natural Resources Conservation, Exploitation and Management	Environment	Provide Environmental, social impact assessments reports for irrigation projects	Environment pollution	Comply and enforce NEMA guidelines
	Land use planning	Spatial development framework for Natural Resources Conservation, Exploitation and Management.	Land ownership conflicts	Multi stakeholder involvement in development of the county spatial plan and subsequent use.
	County Assembly	Allocate adequate resources for Natural Resources Conservation, Exploitation and Management	Under-resourced Natural Resources Conservation, Exploitation and Management	Policy development and sensitization
Water resource development and supplies management	Land use planning	Spatial development framework for Water resource development and supplies management.	Land ownership conflicts	Multi stakeholder involvement in development of the county spatial plan and subsequent use.
	Environment	Catchment destruction, diminishing water from the spring for supply; Rising water tables/ salination.	Environmental degradation; Inadequate supply of water.	Water-construction of water points, troughs and distribution of water. Environment-conservation works like; tree planting and catchment protection by fencing Water/environment-awareness creation
	Public Administration	Adequate water resource utilization	Water use conflict	Integrated planning and coordination; Peace promotion
	County Assembly	Allocate adequate resources for Water resource development and supplies	Under-resourced Water resource development and supplies management	Policy development and sensitization

Programme Name	Linked Sector(s)	Cross-sector Impact Synergies*	Adverse impact	Measures to Harness or Mitigate the Impact
Irrigation	Agriculture	management Provide farmer	Lack of proper	Provide agricultural extension
infrastructure development		capacity building and extension services Provide farm inputs to IWUAs and individual irrigation farmers	crop husbandry practices	services to IWUAS and individual irrigation farmers
	Roads	Provide in-farm road networks to improve access to farms Provide access roads to markets and for inputs shipping to and from the farms	Inputs don't reach the farms, and produce don't reach markets	Provide a smooth working environment and build coordination synergies between the departments.
	Environment	Provide Environmental, social impact assessments reports for irrigation projects	Environment effect non compliance	Comply and enforce NEMA guidelines
	Water	Provide availability and conveyance of sufficient water for sustainable irrigation at irrigable head.	Insufficient water for irrigation Insufficient head	Synergy
	ICT	Development and maintenance of irrigation database	Lack of Irrigation management information system	Uncoordinated irrigation interventions
	County Assembly	Allocate adequate resources for irrigation purposes	Under-resourced irrigation development and its headwork's infrastructure	Underperforming irrigation systems

4.1.2.2 Sector Programmes

Table 11: Environmental protection, Water and Natural resources sector programmes

Programme 1 : General Administration, planning and support services

Objective: To ensure an efficient and effective environmental protection, water and natural resources services

Outcome: Impr	oved Service delive	ry

4.1.3 AGRICULTURE, RURAL AND URBAN DEVELOPMENT (ARUD) SECTOR

Agriculture Rural and Urban Development (ARUD) sector is composed of 2 sub sectors namely: Lands, Housing & Urban Development, Physical Planning; Livestock; Fisheries and Agriculture. This plan outlines the strategies that the various sub-sectors will implement in the next five years with a view to achieve the sector goals and objectives.

Lands and Urban Development Sub Sector

The mandate of this sub-sector is to provide policy direction on matters related to land, notably: lands policy, housing & urban development management; physical planning; land transactions; survey and mapping; land adjudication; settlement matters; rural settlement planning land reclamation; land registration; county spatial infrastructure; land and property valuation services, administration and land information systems.

Livestock Development Sub Sector

The mandate of the subsector is livestock policy management; development of standards and guidelines for livestock production and extension; development of livestock industry; livestock marketing; range development and management; veterinary services and disease control; livestock branding; promotion of beekeeping; livestock insurance policy; promotion of tannery and dairy industry.

Fisheries, Aquaculture and the Blue Economy Sub Sector

The mandate of the Fisheries and the Blue Economy sub sector is fisheries policy; fisheries licensing; development of fisheries; fisheries marketing; fish quality assurance; development of policy framework; development of Legal, regulatory and institutional framework for the blue economy; enhancement of protection and regulation of marine ecosystems; overall policy for exploitation of agro-based marine resources; development of fishing landing beaches and associated infrastructure; capacity building for sustainable exploitation of agro-based marine resources; promotion of sustainable use of food based aquatic resources; and protection of aquatic ecosystem.

Agriculture (Crop) Development Sub Sector

The mandate of the sub-sector is to ensure sustainable development of agriculture for food security and economic development. This mandate includes the county agricultural policy and management; county food security policy; agricultural crops development; regulation and promotion; agricultural land resources, inventory and management; crop research and development; agricultural mechanization policy management; agricultural farmer training; agricultural training colleges; policy on land consolidation for agricultural benefit; agricultural insurance policy; strategic grain reserve and bio-safety management; agricultural extension services standards and capacity building for agricultural staff

Vision

A food secure, healthy and wealthy county for sustainable socio-economic development

Mission

To improve the livelihoods of Baringo citizens through sustainable management of crop and livestock resources and utilization of the blue economy and sustainable lands, housing and urban management.

Overall Goal

The overall goal of the sector is to attain food and nutrition security, sustainable fisheries and lands, housing and urban management.

4.1.3.1 Sector Priorities and Strategies Table 12: Sector Priorities

Sector Priorities (To be stated at	Strategies
the objective level of the	Strategies
development issues)	
Enhance institutional efficiency and effectiveness in service delivery	Strengthen extension services through recruitment, capacity building, and procurement of vehicles motorcycles and ICT equipment. Improvement of working conditions (renovation of offices, toilets, furniture). Strengthen capacity for monitoring and evaluation Investing in ATC and AMS. Mainstreaming of cross cutting issues.
Increase agricultural productivity	Undertaking agricultural extension services. Improve access to quality farm inputs. Improve animal and crop pest and disease control. Expand irrigated agricultural land. Promote integrated agriculture systems. Improve animal breeding services. Build resilience to vulnerabilities Promote drought tolerant crops Promote sustainable land management practices and CSA technologies.
Promote locally led food systems for improved nutrition and food security	Mapping of locally led food systems practices in the county on nutrition and food security Establish community level food system framework to promote household dietary diversity (HDD) and restoration of indigenous traditional food knowledge Promote community level engagement on locally led food systems Undertake strategic environmental assessment (SEA) Inclusion of women, youth and children in food system conversation for technical diversity
Increase market access for agricultural produce and value addition	Improve market infrastructure. Improve management and dissemination of market information. Enhance the capacity of agricultural marketing groups. Enhance livestock disease surveillance and control. Promote structured marketing (contract farming). Development of total value chain initiatives Foster strategic partnerships.
Strengthen institutional structures for policy and coordination mechanism	Formulate and review relevant policies, regulations and frameworks. Formulate a clear policy implementation framework. Promote good and sustainable linkages between producers and consumers to increase food production and supply
Enhance investment in agriculture sector	Develop investment concepts and disseminate to potential investors.
Increase natural resource base	Strengthen extension services. Enforcement of policies and regulations. Integrated use of natural resources.

LANDS	
Provide efficient and effective	Recruitment of new technical staff To improve service delivery.
policy guidance and support	Formulation of land use policies and urban regulations.
services	Trainings of staff and research.
	Establishment of sub- county physical planning and Land survey offices.
	Purchase of field operation Vehicle (Land Cruiser).
	Formulation and operationalization of town committees.
	Delineation, classification and Gazettement of towns and market centres to
	municipalities and towns respectively.
Provide Proper Land Use Planning	Land use planning of new towns /centres.
and Regulation Throughout The	Implementation of County spatial plan (CSP).
County	Revision of outdated land use plans.
	Preparation of Integrated Urban Development Plans (IUDP) for Urban
	Areas.
	Documentation of public utilities. Mapping and fencing of public utilities.
	Zoning plans /Action area plans and development control.
	Establish and operationalize County plot transfer committees to deal with
	many pending plot transfer applications (plot succession).
	Support preparation of valuation rolls for rating in urban areas.
	Regularization of tenure and Infrastructure development in informal
	settlements.
	Establishment and operationalize of County Physical and land use planning
	Liaison committee.
	Valuation framework for pastoral lands
	Acquire land for industrial parks, recreational parks. Affordable housing
	and any other developments.
Establish GIS based County Land	Digitization and updating of land records.
information system	Establishment and equipment of GIS Lab.
	Establishment of county land information management System.
	Establishment of County Land Records Registry. Development of County digital cadaster.
	Purchase of Software and equipment-RTK, Total stations, large format
	plotter and scanner, GPS, UAVs (Drones).
Provide efficient land survey services	Cadastral survey of town /urban areas.
to improve land tenure for residents	Survey, Realignment and beaconing of planned urban /towns.
1	Carrying out of land clinics across the county to sensitize the residents and
	verification.
	Survey and beaconing of public utilities.
	Regularization and formalization of allotment letters for purpose leases.
	Opening of urban and rural roads.
	Resolution of land related disputes.
	Support land adjudication across the county.
	Support Community land inventory and mapping of community resources.
	Support Registration of community land and operationalize Community Land Act,2016.
Develop low cost housing units in	Adoption of appropriate building materials & technology.
Baringo county	Construction of Ardhi house in Kabarnet.
,	Relocation of Housing Phase III to pave way for construction of
	County Offices.
	Repair and renovation of existing housing units.
	Construction of news housing units in the sub-county headquarters
	(AHP).
	Development of mortgage policy for county staff.
	Purchase of hydra-foams.
LADADNIET MUNICIPALITY	Slum Upgrading In Urban Areas.
KABARNET MUNICIPALITY

Table 13: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National Development Agenda/Regional/ International Obligations	Aspirations/Goals	County Government contributions/Interventions*
Kenya Vision 2030/ Medium Term Plan	Pillar - Economic Pillar - To maintain a sustained economic growth of 10% p.a. over the next 25 years.	The county Government of Baringo commit to implement programmes that contribute to achievement of the vision 2030 Economic pillar that include; Improving market access by smallholder farmers, upscale crop & animal disease surveillance and control, rehabilitate irrigation schemes-Perkera, increasing crop & livestock productivity, encourage farming

	Moving the Economy Up the Value Chain	through better prices and extension services, Input subsidy programme, Value addition to livestock & livestock products & coffee, Adoption of CSA technologies into agricultural practices, Formation of producer groups, Control of crop/livestock pests and diseases.
	Social Pillar; Investing in the People of Kenya	Under the social pillar the county will contribute through implementation of the following interventions; Delineation, classification and Gazettment of towns and market centres to municipalities and towns respectively, formulation of land use policies and urban regulations-development control, animal control, urban beautification, safety and security, disaster management, housing developments & management, Revision of land use plans, Planning of new /upcoming centre, Implementation of County spatial plan(CSP), Integrated Urban Development Plans(IUDP) for Urban Areas, Land use information system/GIS mapping, Land Survey, Land adjudication and demarcation and Housing/Estate Management
	Enablers Pillar- Ending drought Emergencies (Sustainable livelihoods pillar)	The realization of the objectives and targets of the vision 2030 will be hinged on successful implementation of the enablers or foundations. To this effect Baringo County will implement sustainable livelihoods initiatives that is meant to increase food security and increase resilience to drought. The county will tap on National Drought Emergency Fund to support projects/programmes in supporting vulnerable households achieve food security through sustainable livelihoods
Sustainable Development Goals	Goal 1. End poverty in all its forms everywhere	Through implementation of agricultural initiatives such as Livestock upgrading, Promotion of aquaculture, and Fruit establishment up scaling of coffee productivity) communities will be able to earn income and ensure food security.
	Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture	Measures to address this goal shall include; Sustainable production systems with nutrition sensitive livelihood, Agribusiness development (value addition, aggregation, collective marketing etc.), supporting small scale irrigation and input subsidy .The Agriculture, Livestock production, Veterinary, Fisheries are expected to ensure that farmers, producers, processors and marketers of agricultural produce employ the most appropriate methods and technologies for sustainable development
	Goal 3. Ensure healthy lives and promote well-being for all at all ages	Nutrition sensitive programming such as Promotion of establishment of kitchen garden at household level and Promotion of aquaculture will ensure that the households get nutritive foods.
	Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable	Lands and Urban Development through its programmes shall digitize its registry and computerize its services, carry out land surveys in rural and urban areas and issue title deeds. The county will carry out land adjudication for land administration, carry out spatial planning to guide land use patterns and through county assembly carry out legal frameworks for faster resolution of land disputes.
African Agenda 2063	Aspiration 1 A prosperous Africa based on inclusive growth and sustainable development	The sector will implement interventions that will ensure poverty is eradicated, transforming agriculture to enable the continent to feed itself and be a major player as a net food exporter; exploiting the vast potential of Africa's blue/ocean economy; and rapid urbanization; this will be achieved through; Input subsidy programme, Value addition to livestock & livestock products & coffee, Adoption of CSA technologies into agricultural practices, Formation of producer groups, Control of crop/livestock pests and diseases, drainage systems in urban areas, non motorable pathways, solid waste management, Urban Development plans to manage land use, establish GIS Laboratory for land use management

C 1 ' F 1	In: ', 2 I , .'	
Sendai Framework	Priority 3: Investing	The County will ensure that it promote the mainstreaming of disaster
for Disaster Risk	in disaster risk	risk assessments into land-use policy development and implementation,
Reduction 2015 –	reduction for	land degradation assessments and informal and non-permanent housing,
2030.	resilience	and the use of guidelines, Encourage the revision of existing or the
		development of new building codes and standards and rehabilitation and
		reconstruction practices at the county level, as appropriate, with the aim
		of making them more applicable within the local context, particularly in
		informal and marginal human settlements and reinforce the capacity to
		implement, survey and enforce such codes through an appropriate
		approach, with a view to fostering disaster resistant structure, Pasture
		establishment and conservation, Commercial livestock off
		take/improving market infrastructure, promotion of CSA
		technologies/innovations
The Bottom Up	Agricultural	To achieve agricultural transformation and inclu8sive growth the
Economic	Transformation and	county will; undertake agricultural extension services, improve
Transformation	Inclusive Growth	access to quality farm inputs, animal and crop pest and disease
Agenda 2022-2027		control, expand irrigated agricultural land, Promote integrated
		agriculture systems, animal breeding services and sustainable land
		management practices and CSA technologies
	Housing	The county is committed to delivering the housing priority of the
		Bottom Up Economic Transformation Agenda 2022-2027 through
		Construction of Ardhi house in Kabarnet, Repair and renovation of
		existing housing unit, construction of news housing units in the sub-
		county headquarters (AHP) and Slum Upgrading In Urban Areas
Governors	Pillar 1: Creating	Agribusiness will be promoted through; agricultural extensions and
manifesto	Wealthy and	inputs subsidy, management and dissemination of market information,
	Productive County	enhance the capacity of agricultural marketing groups, enhance
		livestock disease surveillance and control
	Pillar 3: Improving	The county will Promote Controlled Urbanization, Invest in Urban
	the Quality of Life	Service, and Classification of Towns. This will be achieved through
		development infrastructure, roads, energy, sewerage, water & housing.

4.1.4 GENERAL ECONOMICS & COMMERCIAL AFFAIRS SECTOR

The General Economic and Commercial Affairs Sector is the commercial wing of the County Government. The sector is comprised of the following sub sectors: Industry, Commerce, Tourism and Wildlife, Enterprise and Co-Operative Development

The focus of the sector is to alleviate poverty by positively transforming the socio-economic status of the people of Baringo through employment and wealth creation. The Sector as a key contributor to the economic growth of the county, plays a pivotal role in accelerating economic growth, employment creation, poverty reduction, industrial development and achieving equitable distribution of resources to attain Sustainable Development Goals.

Vision

A County of choice for business, Tourist destination and investment opportunities

Mission

To create wealth for the people of Baringo County through a competitive business enterprise, Tourism promotion, value addition and cooperatives development by providing an enabling environment for their establishment and growth.

Sector Goals

To build a competitive business enterprise environment, industries and cooperatives for income and wealth generation for the people of Baringo County

4.1.4.1 General Economics Sector Priorities and Strategies

Table 15. General Economics Sector Priorities and strategies

Sector Priorities	Strategies
Provide support to informal businesses to accelerate economic growth	Training & capacity building Automation of business processes Exposure to Exhibition & Trade fairs Scale up budgetary allocation for MSME Fund Strengthen linkages with financial service providers Provide an enabling business environment and 24 hour economy Establish a fully-fledged MSME fund Administration unit Promote cottage industries across all sectors
To promote Fair trade practices for consumer protection and revenue generation	Ensure requisite resources Consumer training and awareness creation on fair trade practices
Promote investment growth	Profile the County as an investment destination Develop institutional, legal and policy framework to support investment growth. Resource mapping for investment opportunities in various sectors Develop funding proposals for flagship investment projects Foster strategic partnership and linkages with public and private partners
Strengthen the cooperative movement for wealth and employment creation	Develop institutional, legal and policy framework to support growth of cooperatives. Invest in cooperative movements
To develop, promote and market sustainable tourism through policy development, coordination and investment. To increase revenue generations through tourism products.	Develop institutional, legal and policy framework to support growth of tourism Subsector Development of Geo- park in all potential geological sites in the County. Undertake tourism promotion and marketing locally and internationally. Develop and enforce tourism standards Tourism promotion and marketing Undertake continuous tourist's satisfaction surveys Invest tourism infrastructure

Table 16: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National Development Agenda/Regional/ International/Oblig ations	Aspirations/Goals	County Government contributions/Interventions
Kenya Vision 2030/ Medium Term Plan	Economic Pillar: To achieve an average Gross Domestic Product (GDP) growth rate of 10% per annum	Provide support to the informal sector to accelerate economic growth through: Provision of MSME Loans to traders and Jua Kali operators Creation of an enabling business environment through infrastructural Development-Markets, business stalls Kali sheds and industrial park Training & Capacity building of informal sector traders Provision of value addition and market linkage support to farmer groups and co-operatives Strengthening of Co-operative Movement for wealth & employment creation. Spur investment growth across all sectors Promote development of cottage industries
The UN Agenda and the Sustainable Development Goals	Goal 1: End poverty in all its forms everywhere.	Promotion of Industrial development & investment for wealth & employment creation Business growth promotion through innovation, value addition, market linkage and access to microfinance services for socio-economic empowerment
	Goal 8. Promote sustained, inclusive and sustainable economic growth, full and Productive employment and decent work for all. Goal 9. Build resilient infrastructure, promote	Promote commercialization and processing of Aloe for wealth and employment creation Development of an industrial park Construction of new fresh produce markets and
	inclusive and sustainable industrialization and foster innovation.	rehabilitation of existing ones Construction of Jua Kali Sheds and business stalls
Africa's Agenda 2063	A prosperous Africa, based on inclusive growth and sustainable development A high standard of living, quality of life and wellbeing for all citizens	Promotion of Industrial development & investment for wealth & employment creation
Paris Agreement on Climate Change, 2015;	strengthening the global response to climate change	The County will mainstream issues of climate change in prioritized programmes, projects and policies
EAC Vision 2050	Attainment of sustainable growth and consolidation of cooperation in agreed fields- Trade	Strengthening value addition and regional market linkages for wealth and employment creation
ICPD25 Kenya Commitments	Harness the demographic dividend through investments in skills training; employment creation and entrepreneurship;	provision of knowledge and skills through financial literacy and entrepreneurship training to traders and cooperative societies
Sendai Framework for Disaster Risk Reduction 2015 – 2030.	Strengthening disaster risk governance to manage disaster risk	promote insurance uptake for MSME loans and business premises against disaster risks such as fire, drought, floods, climate change impacts

	To achieve inclusive	Promotion of Investment and Industrial growth
The Kenya Kwanza	growth, through	Trade development through creating an enabling
UDA Manifesto	intervention that will have	environment for businesses to thrive
2022	the biggest impact at the	Provision of MSME loans
	bottom of the income	Straightening co-operative movement
	pyramid.	Broadening Tourism for wealth and employment creation
The Governor's	Creating Wealthy and	Development of Baringo as a Geosite
Manifesto	Productive County	enhance investment in productive skills through training
		of traders, cooperative societies, Jua kali operators
		Provide MSME Loans to traders to start, grow and sustain
		profitable enterprises
		Promotion of industrial and Investment growth
		Strengthen the cooperative movement through CDF,
		training on good governance practices

4.1.4.2 Sector Cross-Sectoral Linkages

Programme	Linked	Cross-sector Impact		Measures to Harness or
Name	Sector(s)	Synergies	Adverse impact	Mitigate the
	(0)	~, nor gros	114 Or So Impact	Impact
Trade Development and Marketing Services	Agriculture Rural & Urban Development	Provision of MSME loans to small holder farmers and traders in agricultural value chain	MSME Loan is inadequate to benefit all applicants	Increase MSME budgetary allocation
	Public Administration	Single business permits and other levies	High levies force businesses to close and slow economic growth	Review rates and eliminate double charges
	Infrastructure, Energy & ICT	Infrastructural development-markets, business stalls, industrial parks, Jua kali sheds	Low internet connectivity slows the E-Commerce Uptake Poor lighting system Underutilized fresh produce markets	Invest in internet connectivity in major towns and trading centres Erect street lighting to prolong business hours
	Youth, Gender & Social Protection	Women, Youth and PLWD groups	Cannot access MSME loans due to lack of collateral	Develop loan products tailored for Women, Youth & PLWD groups
	Environment, Water & Sanitation	Water supply to markets & Business premises Sewerage system	Most Markets lack water supply and sanitation facilities	Prioritize on water connectivity and sewerage systems to serve markets and other business premises
Legal Metrology	All	Consumer protection and fair trade	Limited requisite resources in Weights and measures department	Recruit additional Weight and Measures Officers Allocate a vehicle to the department to ensure all round calibration of weighing machines Increase budgetary allocation to support co- operative interventions
Cooperative Development and Management	Agriculture Rural & Urban Development	Registration of Farmer co-operative Societies Training & Capacity building of	Limited requisite resources to implement programmes, projects and	Recruit additional Weight and Measures Officers Allocate a vehicle to the department to ensure all round calibration of

Industrial Development & Investment	Agriculture Rural & Urban Development	Cooperative societies Agricultural Value addition and Market linkage support Promotion of cottage industries Commercialization and upscaling of agricultural value chains	Land tenure system	weighing machines Increase budgetary allocation to support co- operative interventions
Tourism	KTB, NRT,	Development of Industrial Parks and industries -linkages with	-inadequate	-Tourism Marketing Policy
Promotion and marketing	Ministry of tourism, AWF, KATO, Department of Sports, Culture &Social Services	international clients, -Booking of clients -Funding	funding -insecurity, terrorism	-recruitment o f a d d i t i o n a l rangers -training of specialized ranger units
Training and capacity building	NRT, KWS, AWF, KSG	-specialized trainings -Funding	-inadequate funding	-Looking for funding from other partners
Tourism Infrastructure development	County Public works, KWS, County Treasury, NEMA, KFS	-mapping and opening of roads-quantity surveying -advisory services -funding	-encroach wildlife habitats	-carrying out EIA/EA of the projects before implementation
Support of community conservancies	KWS, NPS, Communities, NRT, AWF, Special Programs department, Lands &Physical planning	-Training of scouts -Provision of security equipment and police reservists -provide land for conservation -Training of committees and communities on conservation -Funding -providing food supplements	-insecurity -low conservation awareness levels -vastness of the areas -Human- Wildlife conflicts.	-Creating m o r e a w a r e n e s s on conservation and sustainability -Enacting legislation for community conservation
Support of programs within Baringo National reserve	County Treasury, AWF, KWS, County Public works and Transport, Save the Elephants, NRT,	-Funding -Advisory -Trainings on specialized wildlife programs -mapping and opening of roads -quantity surveying -research	-invasion by livestock herders - encroachment by local communities -banditry -droughts -terrorism	-peace building meetings -enhancing security

4.1.6 HEALTH SERVICES

In this plan period, the sector will prioritize on programmes and sub programmes that aim at achieving universal health care. The sector will also lay emphasis on Sustainable Development Goals (SDGs) 2 and 3, the achievement of AU Agenda 2063 with a view of achieving Kenya Vision 2030 social pillar on health.

The health sector comprises of 4 sections which include; Promotive, Preventive, Curative, Planning and administration

Vision:

An attractive, competitive and resilient county health system

Mission:

To improve the health status of the citizen through provision of high quality, affordable and accessible health care in an equitable and professional approach

Sector Goal(s):

To improve the quality of life of the citizens and reduce disability from disease and early deaths

Table 18: Sector Priorities and Strategies

	0
Sector Priorities	Strategies
Availing Specialist staff in curative	Specialist outreaches to other high-volume facilities without
services	specialist consultants
Curative: Improved outcomes	Screening and early detection of communicable diseases
Preventive and promotive	Availability of referral facilities (level IV and III)
Health education at all Health care	Improve health seeking behavior
facilities	Functional Tier one
Tier I:	
Social Protection	Improve number of NHIF claims by all health care facilities accredited
Evidence based quality data	Data quality improvement
generation and utilization for	Timely evidence generation
decision making	Documentation and reporting
	Capacity building of health care workers
Reduce HIV prevalence in the	Improve access to HIV testing services.
county	Provide quality HIV/AIDS care and treatment
-	Create awareness
Reduce prevalence of acute	Treatment and management of acute malnutrition
malnutrition(wasting)	Nutrition supply chain management
	Nutrition response and preparedness
	Promotion of innovative approaches to treatment and management of
	acute malnutrition (Family MUAC, Compass)

Table 19: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National Development Agenda/Regional/Inte rnational Obligations	Aspirations/Goals	County Government contributions/Interventions*
Kenya Vision 2030/ Medium Term Plan	Social Pillar: Investing in the People with the aims to improve the quality of life for all Kenyans through Healthcare	The county government will link to Vision 2030 through; Establishment of healthcare units, operationalization and existing units, Coordination, Monitoring and evaluation of Health care service Quality Capacity and policy development Increasing the variety of services being offered at health facilities
	Enablers Pillar-Ending drought Emergencies (Human Capital pillar)	A child in an arid county is more than twice as likely as the average Kenyan child to live in a household that has insufficient income to cover their basic nutritional requirements. To this effect the county will prioritize development of health infrastructure, staffing levels, provision of nutrition supplements and provision of

		safe portable water –health linking with water.
SDGs	Goal 3. Ensure healthy lives and promote well-being for all at all ages	The county Government intends to contribute to SDGs Goal 3- Ensure healthy lives and promote well-being for all at all ages in the through; Fully operationalized health facilities Increasing patient to health personnel ratio Recruitment, promotion and training health human resources. Improvement in monitoring and evaluation of health projects and programs Automation of health services
	Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture	The county will introduce the following interventions to address SDG goal 2 (End hunger, achieve food security and improved nutrition and promote sustainable agriculture); Improve access to quality health and nutrition services Establish and sustain functional community units through capacity building, advocacy and policy intervention Creation of Outreaches and awareness on nutrition Procuring nutritional commodities Introduce School and ECD feeding programme with highly nutritious food and supplements Improved Nutritional status of the Vulnerable Children
Africa Agenda 2063	1.3 Healthy and well- nourished citizens	The county has plans to implement interventions aimed at addressing Healthy and well-nourished citizens through; Reduced lifestyle diseases related mortality Improved maternal and neonatal health Reduced child Mortality
The Bottom Up Economic Transformation Agenda 2022-2027	Priority No 4. Healthcare	The county will contribute to the Kenya Kwanza Manifesto through: Increased variety of services being offered at health facilities Provision of essential heath products and technologies (HPTs) Setting of Cancer heath care workers self- care at the work place Upgrading health facilities through new construction, renovation and equipping Automation of health services
Governors Manifesto	Pillar No 3. Health	To address the aspirations in the Governor's manifesto, the following interventions will be implemented; Upgrade health facilities through new construction, renovation and equipping Capacity Development for health staff Increase the variety of services being offered at health facilities Improve monitoring and evaluation of health projects and programs Develop policies that aims at improvement of service deliver
EAC Vision 2050	Goal 6. Well educated and healthy human resources	The county government will link to the EAC Vision 2050 through; Capacity Development for health staff Improvement of monitoring and evaluation structures of health projects and programs International Health Regulations (IHR) implemented in all Points of Entry (POE) Automation of health services

Sendai Framework for Disaster Risk Reduction 2015 – 2030.	Priority 4: Enhancing disaster preparedness for effective response and to "Build Back Better" in recovery, rehabilitation and reconstruction.	As an intervention towards the Sendai framework, the county will; Establish and sustain functional community units through capacity building, advocacy and policy intervention Improvement of monitoring and evaluation structures of health projects and programs Improve standby infrastructure and emergency equipment
ICPD25 Kenya Commitments;	Theme 5: Upholding the right to sexual and Reproductive Healthcare	The County shall uphold sexual and reproductive health and rights in conflict situation and apply a gender lens to all programmes.

Table 20:Sector Cross-Sectoral Linkages

Programme	Linked	Cross-sector Impact		Measures to Harness or Mitigate
Name	Sector(s)	Synergies*	Adverse impact	the Impact
Curative and Rehabilitativ e	Public Works	Development of Health infrastructure	Low staffing Equipment and consumables	
	Public Administrati on	Access to justice for survivors of violence	Stigma and lack of reporting of cases of violence	Handling of cases of gender-based violence
	Roads	Improved access to facilities	-Poor access to the facilities	Access to health facilities HIV prevention messages to the local community and the employees of construction companies
Preventive and Promotive	Water	Prevention Of Waterborne Diseases	Increase number of preventable diseases like amoeba, typhoid	Programme on provision and utilization of portable clean water
	Environment	Prevention of environmental related disease.	Increase in number of environmental related diseases like malaria	Implementation of EIA, Policy intervention to protect environment and for proper waste disposal.
	Education	Implementation of school health program	Intestinal worms, diarrhea	Deworming for children, Water and sanitation, school health clubs Capacity building of education stakeholders
	Agriculture	Provision of food security and adequate nutrition	Increase number of preventable diseases	Programs on food production and utilization of food
	Livestock	Community empowerment about zoonosis	Spread of zoonotic diseases	Zoonotic diseases like rift valley fever, rabies
	Youth, gender and social services	Reduced stigma and reduced spread of diseases	-Sex and Gender based violence -Sexually transmitted diseases	Youth friendly health care services Reproductive health for youth including contraceptives Mitigation of sex and gender-based violence
	Trade	Safer food premises	Transmission of foodborne diseases	Permit for food handlers in food premises condom distribution in business premises
	Tourism	Ease of international travel	inconveniencies in travel arrangements	Yellow fever vaccine certificate for international travel

4.1.7 SOCIAL PROTECTION CULTURE AND RECREATION

This Sector comprises of six Sub-Sectors namely: Sports Development, Arts and Culture, Labour, Social Protection, Special Programmes, Gender and youth Affairs. The sector is mandated to promote and exploit Baringo's diverse culture and arts; enhancing a reading culture; regulation, development and promotion of sports, film industry and music; and the preservation of Baringo's heritage.

Vision

A county with an inclusive, empowered and resilient community for sustainable and equitable social and economic development

Mission

To transform the wellbeing and livelihoods of people of Baringo by creating a conducive environment for social protection, where every individual enjoys the right to a life of dignity, development and prosperity

Sector Goal(s)

To ensure the people of Baringo live dignified and healthy lives; and are able to exploit their human capabilities and available opportunities to further their social and economic development.

Table 21: Sector Priorities and Strategies

Culture Priorities (To be stated at the objective level of the development issues)	Strategies
To promote, conserve and protect talent and cultural heritage	Development and completion of cultural centers /theatres Documentation of indigenous cultural heritage / knowledge and cultural sites. Enhance training and capacity building
To promote resilient livelihood programmes To provide a legal guidance on cultural activities and Programmes	Enhance funding for creative works, innovation, training and marketing. Development of policy and legal frameworks.
To create a conducive environment for sporting activities.	Develop, rehabilitate and equip sporting facilities Capacity building of sports officials and stakeholders
Enhance teams' performance	Talent Scouting, incubation and nurturing. Promotion of Sports Tourism Equip teams with relevant sports equipment
To provide a legal framework for sustainable sporting activities and Programmes	Sports Policy Approval and Regulations development
To promote youth, women and PLWDs economic empowerment	Enhance youth, women and PLWDs grants and entrepreneurial start up funds Trainings and capacity building on access to government business opportunities
Provide policy and legal framework for youth programs and activities	Legislation of County youth policy and regulation
Promote Gender sensitive programming	Gender mainstreaming in all policies and programmes
Cushioning of the vulnerable	Protection and advocacy of vulnerable groups Social Assistance to Vulnerable Groups Rehabilitation and Psycho-social support center

Table 22: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National	Aspirations/Goals	County Government contributions/Interventions*
Development		
Agenda/Regional/I		

nternational Obligations		
Kenya Vision 2030/ Medium Term Plan	Social Pillar; Investing in the People of Kenya	Scholarship program, Training of Artisans (polytechnics/vocational colleges) TVET infrastructure and equipment, Gender Mainstreaming, Women's Empowerment, Construction of GBV recovery Centre and safe space, Gender affairs legislation, Development of Sports stadia facilities and Playgrounds, The Construction of Arts and Culture Centre, Social Assistance to Vulnerable Groups, Rehabilitation and Psycho-social support center, Social protection policy sensitization Support for Social protection technical working group forums, Protection and advocacy of PWDs, Construction of Sub County social Halls, International Celebration days (PWD's and Older Persons), Child support service, child rescue centers, protection units, county child protection policy and regulation, Gender mainstreaming,
Sustainable development goals	Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all	The ensure the contributions of the county to achievement of the goal the county will; develop Youth Policy and Regulation, Equipping of five youth empowerment Centres, Construction of two youth empowerment Centres, Youth trained on AGPO and other youth related programmes, Entrepreneurial start- up KIT provided
	Goal 10. Reduce inequality within and among countries	Supportive interventions for special groups (Orphans, persons with disability, elderly and Venerable, Children, women and youth), Enhancing access to funds for the special groups and awareness creation through celebration of International day events for the special groups
African Agenda 2063	A prosperous Africa, based on inclusive growth and sustainable development	The county plans to implement interventions that supports Poverty eradication, inequality and hunger reduction, Social security and protection, including persons with disabilities. Such interventions include; Social Assistance to Vulnerable Groups, supporting vulnerable groups to access funds, Protection and advocacy of PWDs, Social protection policy sensitization,
ICPD25 Kenya Commitments	Theme 4: Ending gender-based violence and harmful practices	The will implement interventions to end gender based violence through Gender affairs legislation, Capacity building and sensitization on gender affairs, Construction of GBV recovery Centre and safe space, awareness creation through Gender related international celebration days
Sendai Framework for Disaster Risk Reduction 2015 – 2030.	Priority 3: Investing in disaster risk reduction for resilience	The county shall allocate the necessary resources, including finance and logistics, as appropriate, at all levels of administration for the development and the implementation of disaster risk reduction strategies, policies, plans, laws and regulations in all relevant sectors; including Social Assistance to Vulnerable Groups, Rehabilitation and Psycho-social support center, Social protection policy sensitization, Support for Social protection technical working group forums. Protection and advocacy of PWDs
The Bottom Up Economic Transformation Agenda 2022-2027	Sports, women Agenda	Training and Sensitization on affirmative action fund (Hustler Fund), Gender Mainstreaming, Women's Empowerment, Construction of GBV recovery Centre and safe space, Gender affairs legislation, Development of Sports stadia facilities and Playgrounds
Governors manifesto	Pillar 6: Youth Agenda; Innovation and Talent Development	Development of Sports stadia facilities and Playgrounds, Capacity building of sports officials (Football, Volleyball, athletics, and Judo officials), Equipping teams with assorted sports equipment and Raw Sports Talents identification and development.

Table 23:Sector Cross-Sectoral Linkages

Programme	Linked	Cross-sector Impact		Measures to Harness or
Name	Sector(s)	Synergies*	Adverse impact	Mitigate the Impact
Sports Development and Management	Environment, Health Education	Environmental conservation for conducive climatic conditions favorable for sporting activities. Promotion of sports as a lifestyle for healthy living	Deforestation and encroachment. Lack of sensitization on sports as a career and a means to healthy living.	Enforcement of environmental protection laws Awareness creation on sports as a multi-billion industry and an avenue to health living
Cultural and Creative Arts Development	Culture Health Environment.	Promotion of hygienic and alternative source of medicine	Lack of proper guidelines and procedures from the government to guide use of alternative medicine. Negative attitude towards alternative medicine Destruction of indigenous trees and herbs.	Formulation of laws and policies. Enforcement of deforestation laws Sensitization of the public on importance of traditional medicine. Promotion of botanical gardening
Youth Development and Management	ALL	Construction and equipping youth empowerment centers with modern technology Youth internship programs	Lack of proper coordination Insufficient budgets to facilitate youth internships across all the departments.	Allocate more resources Establish clear cross sectoral coordination guidelines Collaborate with Ministry of youth to implement youth programs
Gender development	All Sectors	Engendering county programs, policies and legislations to be responsive to the needs of women, men, boys and girls	Mind sets and negative attitude that gender is about women and girls	Implement gender equality and women empowerment policies and framework. Sensitize county leadership, staff and citizens on gender mainstreaming
County Social Safety Nets	Social protection ARUD Education Health Public Administration	Existing social protection programs in national and county government	Lack of proper framework for coordination. Insufficient Resources.	Establish MIS management system for social protection programs. Allocate adequate resources.

4.1.5 EDUCATION SECTOR

Development priority in this sector is keen towards the realization of the Kenya vision 2030 objectives on education. Education facilitates the acquisition of relevant knowledge, skills, and attitudes that enable individuals to be empowered and engaged in national development. Significant investment in education, training and research will enrich people's understanding of themselves and the world, raise productivity and creativity levels, promote entrepreneurship and technological advancement. Baringo County in line with the Governor's clarion call in his manifesto to quality education to all learners, the department is geared towards investing in completion of all education infrastructures and equipping to ensure that there is value for money. Operationalization of ECD through equipping with learning materials, desks and other instructional materials will form the priority for the sector. The sector will also continue to ensure high standards of trained and skilled labourers through the revamping VTC in Baringo.

The Sector comprises of: Early Childhood Development, Vocational Training and Primary and Secondary education, Tertiary and University education and Special programme sub sectors.

Vision

Towards a literate and skilled population

Mission

To provide quality, accessible and relevant education and training for socio-economic development

Sector Goal

To ensure universal access to quality, affordable and relevant education and training

Table 24:Sector Priorities and Strategies

Sector Priorities	Strategies
To facilitate quality, affordable and accessible	Construction of ECDE classrooms.
basic education	Equipping of ECDE classrooms.
	Procurement of teaching & learning materials.
	Staffing and capacity building.
	Mainstream special needs education.
	Integrate digital learning.
To promote development of skills through	Construction of workshops, classrooms, libraries and other
vocational training	infrastructure.
	Equipping of workshops with modern tools and equipment.
	Roll out of industry targeted short vocational trainings.
	Collaboration with industries to roll out industry targeted
	short courses on emerging technologies.
To improve enrolment, retention and transition	Enhancement of tuition subsidy/scholarship to VTC trainees.
of learners	Upscaling of secondary school bursary.
	Enhancing the school feeding programme
Promote extra-curricular activities	Improvement of playing fields.
	Provision of sporting equipment.
	Holding of sports championships.

4.1.8 PUBLIC ADMINISTRATION, GOVERNANCE AND INTERGOVERNMENTAL RELATIONS

The sector comprises of 5 Sub-sectors, namely: County Assembly, County Executive Service, County Treasury, Judiciary and National Government. The mandate of the sector is centered on the political pillar in the vision 2030 that is "issue-based, people-oriented, result-oriented and accountability."

County Assembly

The sub sector is charged with three key mandates: Representation, Legislation and oversight. The County Assembly is also mainly responsible for performing the roles as set out in Article 185 of the constitution of Kenya.

The County Executive Services

The sub sector is organized into four sections, namely: office of the governor, office of the deputy governor and the county secretary. The sub sector is mandated in providing overall policy and strategic guidance to all sectors within the county government; coordinates internal and external communications and advising the executive on public and international relations

County Treasury

The sub sector is mandated to formulate and coordinate county development programmes and tracking of development results towards accelerated socio economic development through effective economic planning, resource mobilization, allocation and efficient management of public resources.

National Administration

National Administration is mandated to coordinate National Government functions at the county level. This was reinforced by the executive order NO.3/2014 on the strengthening of the National Government coordination function at the county level.

Vision

To be excellent in governance and service delivery

Mission

To promote inclusivity, professionalism, equity and responsive public services through effective and efficient county governance systems while embracing democracy, cohesion, and public engagement

Strategic Goal

To deliver public services and manage all public affairs in a professional and equitable manner using efficient, effective and reliable governance systems.

Table 27: Sector Priorities and Strategies

Sector Priorities (To be stated at the	Strategies
objective level of the development issues)	
To enhance efficiency and effectiveness in	Construct County Head Quarter Administration Block.
service delivery (Infrastructure development)	Completion and operationalization of Sub County & Ward Offices.
	Development of E-Revenue Services.
	Enhancement and maintenance of urban areas parking bays.
To provide leadership and policy direction	Formulation and adoption of policy
for effective service delivery	Enhancement of p
	Development partners collaborations
	Strengthen Performance Management
To represent, legislative and oversight the	Summons and ministerial statements.

Sector Priorities (To be stated at the objective level of the development issues)	Strategies
executive in programmes implementation	Legislation of bills and regulations.
To improve performance, productivity and service delivery in the public service	Institutionalize performance contracting and performance appraise. Establish mechanisms of monitoring and evaluating county departments and individual performance.
	Establish a comprehensive feedback mechanism.
To increase the reliability, stability and soundness of the financial sector To Provide effective and efficient management of Human Resource.	Development of e-revenues and accounting services. To ensure prudent service financial management Automation of Human Resource Management System Develop human Resource plan and succession management strategy for the County Public Service. Develop and implement human resource p olicies, standards, rules and procedures. Establish mechanisms of payroll audit in the county.

Table 44: Sector Linkages with National Development Agenda, Regional and International Development Frameworks

National Development Agenda/Regional/ International Obligations	Aspirations/Goals	County Government contributions/Interventions*
Kenya Vision 2030/ Medium Term Plan	Political pillar: "a democratic political system that is issue based, people-centred, result-oriented and accountable to the public"	The county will establish effective institutional framework for efficient service delivery, public finances in a manner that is transparent, accountable and prudent, formulate policies, laws and regulations which contribute to socio-economic growth and development, deliver devolved functions in a competent, equitable and professional manner, ensure that communities are effectively represented, informed, empowered and involved in their own affairs, effectively plan and implement all programmes and projects for the benefit of the people, achieve cohesion and integration by promoting peaceful co-existence and socio-economic empowerment
	Enablers Pillar-Ending drought Emergencies (peace and security pillar)	Conflict and drought are mutually reinforcing. Intercommunal competition over natural resources increases insecurity within the County and across its borders. Insecurity in turn increases vulnerability to drought, by impeding migration, curtailing access to services and resources, destroying assets, and damaging intercommunal relations. County will link with national government in implementing peace initiatives such as peace dividends projects, peace meetings and development of MOUs for resource sharing.
Sustainable Development Goals	Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels	The County together with national government will promote peace initiatives that will ensure peaceful coexistence of communities in Baringo and Neighboring counties. The interventions will include; Early warning information provision, Peace building and conflict resolution, Response and mitigation, Institutional development and Relief & Rehabilitation.

CHAPTER FIVE: IMPLEMENTATION FRAMEWORK

5.0. Overview

This chapter presents the county's institutional arrangement and their specific roles towards the implementation of the CIDP. In addition, the chapter provide the resource mobilization and management framework, asset management, and risk and mitigation measures.

5.1 Institutional Framework

Schedule four of the Constitution of Kenya 2010 allocates distinct mandate and roles between the national and county government and also the shared function between the levels of government, this two levels of government will form the foundational institutional framework for the implementation of this CIDP with each level of government taking lead role in the implementation of its distinct functions with established mechanism for close linkages, consultation, coordination and complementarity towards archiving a common goal of transformational development. Further at the county level the CK 2010 article 177 and 179 provides for the two arm of county government namely the County Assembly and the County Executive. Further the county government in collaboration with the national government have established mechanism for multistakeholder collaboration and coordination with development partners, namely United Nations Agencies, International and national non-governmental organizations, donor communities, faith based organizations and the private sector for complementarity and synergy building during the implementation to ensure efficient and effective utilization of resources with the sole aim of delivering as one for the people of Baringo County.figure.. provides an organization chart illustrating the institutional framework key for the implementation **CIDP** of the

Figure 9: Institutional Arrangement for the Implementation of the CIDP

5.1.2 The County Executive

Article 179 of the CK 2010 vests the Executive authority of the County on the County Executive Committee which is made up of the County governor, deputy governor and county executive committee members who are appointed by the governor and approved by the County Assembly. The County Executive Committee Member is responsible for the following:

- i Implement county legislation;
- ii Implement, within the county, national legislation to the extent the legislation so requires;
- iii Manage and coordinate the functions of the county administration and its departments; and
- iv Perform any other functions conferred on it by the CK 2010 and national legislation.
- v The county executive committee may also prepare legislation for consideration by the county assembly as well as providing full and regular reports on matters relating to the county.

5.1.2 The county Assembly

Article 177 of the CK 2010 provides the composition of the County Assembly to include members each representing a ward elected by voters registered in that ward, special seat members representing special interests including those required to comply with the constitutional requirement on gender and the Speaker of the County Assembly who shall be an ex-officio member. The County Assembly of Baringo has a total of 45 members - 30 elected members representing each ward and 15 special seat members. The county assembly is headed by the Speaker. The County Assembly is constitutionally mandated to carry out legislation, oversight and representation functions. It is also responsible for making approvals necessary for effective discharge of the county executive functions. These include approval of appointments, policies, budgets, plans and other documents.

5.1.3 National Government

Article 189 of the CK 2010 on relation between the national and county government provides that government at either level shall: -

- a) Perform its functions, and exercise it powers, in a manner that respects the functional and institutional integrity of the government at the other level, and respects constitutional status and institutions of government at the other level and, in the case of county government, within the county level;
- b) Assist, support, and consult and, as appropriate, implement the legislation of the other level of government; and
- c) Liaise with government at the other level for the purpose of exchanging information, coordinating policies and administration and enhancing capacity

The CK 2010 envisages cooperation of governments at the two levels and within county level in the performance of functions and exercise of powers and may set up joint committees or

authorities. Whereas the organization and operational arrangement of the national government is the responsibility of His Excellency the President, the national government ministries, departments and agencies (MDAs) at the county level have a duty to ensure the required consultation and cooperation is achieved in the implementation of the CIDP as well as in normal administration and operation of government functions.table 13 below provides a summary responsibilities of all relevant institutions in the implementation of the CIDP.

Figure 10Institutional Arrangement

S/No.	Institutional Arrangemen	Role in Implementation of the CIDP
1	County Executive Committee	Develop implementation framework
2	County Assembly	The CA has an overall of oversight on all development programme. They also provide legislative and other forms of representation on behalf of the citizenry towards delivery of activities and outputs.
3	County Government Departments	Factor in annual budgets for sector programme Factor in sector budgets for monitoring & implementation for programme. They are responsible for the implementation of the programme.
4	County Planning Unit	Mobilization of Public resources Management of the County Public procurement & disposal. Public investments management policy Public investments oversight. Preparation of budget & Management of the County Government Resources. Economic Policy analysis & Management Promotion of Economic & Finance Governance.
5	Office of the County Commissioner	Provide liaison, collaboration and partnership between the National Government and the County Coordination of National Government functions and delivery of services Coordinate security management Facilitate conflict management and peace building Coordinate disaster management and emergency response Facilitate participation of the people in national Government policy formulation and articulation
6	National Planning Office at the county	Supports the Counties with guidelines on Policy Formulation. Provides strategic long term goals and objectives that acts as development blue print for Counties.
7	Other National Government Departments and Agencies at the county	Provide overarching National policy framework and service delivery standards for devolved functions. Provide technical assistance and support the development of County Government Capacity. Through intergovernmental Sectoral programme, enable effective coordination cooperation & Collaborations by both National & County Government.
8	Development Partners	They offer budgetary support to programme/projects and technical assistance
9	Civil Society Organizations	Provide civic education to the Public, they also monitor government policies and actions and hold government accountable.
10	Private Sector	Creates jobs, provide goods, services and works, which stimulates economic growth.

		They act as a key revenue contributor They complement the Government in resource gaps.
11.	National Senate	Legislates functions of Parliament by considering debating and approving bills concerning counties. It exercises oversight over National revenue allocated to Counties. It determines the basis for allocation of National Revenue among counties taking in the consideration of the CRA recommendations.
12.	National Assembly	Enacts the Legislation for the allocation of National Revenue between the levels of Governments It enacts attendant laws at Policy level for sectors. E.g. PFM Act 2012.

5.3 Resource Mobilization and Management Framework

5.3.1 Resource Requirements by Sector

The projected resource requirement for the implementation of the CIDP based on the proposed programmes and flagship projects is Ksh175.518 Billion. Table 52 below present the projected financial resource requirement by each sector over the next five years. The section also includes the percentage of the total financial requirement for each sector.

Table 34: Summary of Sector Financial Resource Requirements

S/N o.	Sector/Departm ent Name	Resource R	equirement (K	Total	% of total budget requirem ents			
		2023/24	2024/25	2025/26	2026/27	2027/28		
1	Energy, Infrastructure and Information Communications and Technology	2,181.500	2,448.500	2,497.000	2,534.50	2,545.50	12,207. 000	8%

n) Other sources - Climate change mitigation partnership fund		200	200	200	200	200	1,000
Total	9,469	22,203	22,445	23,038	23,697	24,399	115,782

5.3.2 Estimated Resource Gap

This section provides estimated resource gap during the implementation of the CIDP.

Table 36: Resource Gaps

FY	Requirement (Ksh. bln)	Estimated Revenue (Ksh.	Variance (Ksh. bln)
		bln)	
2023/24	31.1565895	22.203	(8.95)
2024/25	32.1287262	22.445	(9.68)
2025/26	31.7536128	23.038	(8.72)
2026/27	30.9022968	23.697	(7.21)
2027/28	33.1718988	24.399	(8.77)
Total	159.113	115.782	(43.33)

5.3.3 Resource Mobilization and Management Strategies

This section identifies the feasible resource mobilization and management strategies to address the resource gap. The section also includes capital financing strategies, operational financing strategies and other strategies that will enhance cost effectiveness.

5.3.3.1 Addressing the Resource Gaps

The resource requirement for implementation of this plan is Kshs 159,113Billion against projected budget estimates of Kshs 115.782 Billion, creating a resource gap of Kshs 43.33Billion. The below section provides internal and external measures that the county will undertake to address the resource gaps.

5.3.3.1.1 Internal Resource Mobilization

The internal resource mobilization strategy will focus on enhancing the county's own source revenue and also strengthening efficient utilization of the available resources as elaborated below;

- *i Policy and legal framework for revenue collection:* The county government will review its policies to significantly reduce the time and cost of doing business, create an enabling environment, thus improving the overall business operations. It intends also to employ sound financial management and reporting. Key interventions will entail: Training staff on financial management regulations/policies & Debt Management Policy.
- *ii* Map all revenue potential areas: Carry out a revenue potency study to help profile all sources of revenue, their potential, collection mechanism as well as the recommendation of new sources of Revenue that have not been tapped.
- *iii* Grow and diversify County Revenues Key interventions: Through strengthening revenue collection especially on major contributors such as property rates, single business permits, parking and Agriculture cess within the County.
- *iv* Strengthen automation in all point of revenue collection; this includes going cashless at all collection points.
- v Revenue Clinics; to sensitize tax payers on the importance of self-compliance.

5.3.3.1.2 External Resource Mobilization

The County will develop Programme that seeks to identify alternative sources of funding for project implementation. Some of these include government grant funding, partnerships with international agencies and entering into partnerships with the private sector on key projects and programme.

To ensure that this is achieved in a well-coordinated manner the County has set up a directorate that will handle all matters of Resource Mobilization and Partnership & Linkages, this directorate will support the overall County external resource acquisition, partnership and Linkages management strategy and lead the development and realization of the resource mobilization strategy in the County in close collaboration with the County leadership.

5.3.4 Asset Management

Over the past the county has in compliance with section 149(1) of the PFMA 2012, maintained and regularly update a fixed asset register and asset inventory. The county has also developed an asset register of all nationally devolved unit's assets. Over the next five years that county will continue to strengthen regular update of both fixed asset and the asset inventory by automating the process through investing in an asset management software. The county will also embark on valuation of national devolved unit's assets and transfer of ownership to county government. The county department shall also formulate asset disposal policy and procedure that in in line with Public Procurement and Disposal Act, 2015 to facilitate the disposal of redundant assets like vehicles, electronic gadgets and other equipment's.

5.3.5 Risk Management

This section provides the key anticipated risks that may hinder the implementation of the CIDP, potential risk implications and proposed mitigation measures to enhance sustainable development. The risk mitigation measures for the 3rd generation CIDP is provided in table 55 below.

Table 37: Risk, Implication, Level and Mitigation Measures

Risk Category	Risk	Risk implication	Risk level (low, medium, high)	Mitigation measures
Financial	Local revenue collection pilferages	Low revenue collection	Medium	Enhancement of local revenue generation. Enhance Performance management Compliance with the legal frame works. Automation of county revenue collection
	Payroll frauds	Increase in compensation costs	Medium	Conduct regular payroll cleansing. Strengthen payroll administration and control measures. Ensure password management
Technological	Cyber security Risk	Breach of valuable information	High	Investment in cyber security risk management Investment in internal private network Provision of reputable anti-virus
Climate	and reduced crop productivity due to poor precipitation		Climate smart agriculture practices Investment in irrigation infrastructure	
	Floods	Displacement of population from ancestral home, destruction of infrastructure, destruction of land under cropping and pastures	High	Investment in mega dams to store large volumes of water coming from upstream. Enhancing awareness creation and early warning system for floods, Ensuring our infrastructural projects are climate proofed
	Resource based conflict	Displacement of population from ancestral home		Continuous peace meetings. Conflict resolution mechanisms in place
Organizational	Missing Technical Capacities	Construction Poor quality projects, time lost due to design and site changes.	High	Recruitments of critical positions (technical officers) required per programme and Succession Management strategies i.e. mentorship programmes to be put in place at all times, (KPIs for all senior officers). Consider In-built budgeting to gather for costs related to the technical capacities requirements i.e. costs of Supervision and M & E. to the development cost

CHAPTER SIX: MONITORING, EVALUATION AND LEARNING

6.0 Overview

This chapter presents the outline on how the plan will be monitored and evaluated during and after its implementation. The M&E processes, methods, and tools will be guided by Section 232 of the Constitution and all the legal provisions that provide for M&E, County M&E Policy in line with the National M&E Policy, CIMES Guidelines, Kenya Norms, and Standards for M&E and Kenya Evaluation Guidelines. The chapter highlights the M&E structure; data collection, analysis, reporting, and learning; M&E outcome indicators tracking; and dissemination and feedback mechanism.

6.1 County Monitoring and Evaluation Structure

The County Government of Baringo has established the necessary structures to support the M&E process for implementing the plan. The County M&E structure consists of the County Assembly Committee responsible for Finance, Planning, and Economic Affairs, the County M&E Committee (CoMEC), County M&E Directorate, M&E Technical Oversight Committee, Sector M&E Committees, Sub-County M&E Committees, and the Ward M&E Committees.

The M&E Directorate will be headed by the County Director of M&E and supported by two senior M&E officers, departmental/ sector Focal persons and M&E committees. The Directorate is responsible for providing strategic guidance, vision, and management for the successful monitoring and evaluation of all county programs/plans/projects and ensuring the strategic and functional integration of all M&E activities and active collaboration with other stakeholders. The Directorate oversees all M&E activities, provides technical direction, and support, and ensures the accurate reporting of results for County programs/plans/projects activities.

The County Assembly Committee responsible for Finance, Planning and Economic Affairs is responsible for receiving county M&E reports, reviewing, and presenting them to the County Assembly for approval and authorizing the governor to present the report at the summit.

The CoMEC is charged with ensuring that the County has the quality information needed to make decisions and lead and direct county M&E initiatives and oversees overall county compliance and results of projects implementation and service delivery within the CIDP and ADP.

The M&E Technical Oversight Committee is responsible for identifying, commissioning, and managing evaluations, reviewing the M&E reports, presenting M&E reports to CoMEC, capacity building for M&E, setting the strategic direction for CIMES, approving M&E Directorate's work plan and advising M&E Directorate on actions to be taken on various M&E issues, approving indicator reports for use by CoMEC, and endorsing M&E Directorate's reports to be presented to CoMEC.

The Sector M&E Committees (SMEC) is responsible for producing sector M&E reports, developing sector indicators, undertaking sector evaluations, and presenting sector M&E reports to the TOC.

SCoMEC is charged with producing sub-county M&E reports, presenting M&E reports to the TOC, and developing M&E indicators.

6.2 M&E Capacity

The County has existing M&E structure which has the necessary human capacity for M&E, including the two senior M&E Officers, and departmental/sector M&E Focal Persons. The County government has also taken steps to undertake M&E capacity-building for staff and the various M&E committees to ensure that people have a variety of skills and knowledge to run each step of the M&E system.

In addition, the County has allocated resources such as a dedicated vehicle to support monitoring activities and purchased laptops and associated accessories to provide the physical equipment required for M&E. The County endeavors to allocated the appropriate amount of funds to facilitate M&E processes, with the M&E officers providing a costed M&E Work plan to ensure that all M&E interventions are well funded.

To further strengthen the County M&E capacity, the M&E Officers will regularly assess the M&E capacity and devise strategies to address emerging gaps, leveraging on ongoing national government and partner-led M&E capacity building initiatives, existing partnerships, and collaborations for M&E, and mobilizing more resources for the various M&E initiatives.

6.3 M&E Outcome Indicators

This section should present programme outcome indicators by sector as captured in Table 17 on sector programmes in Chapter Four. The information should be presented as in Table 26.

Table 55: Outcome Indicator Reporting

Programme	Outcome	Outcome Indicator (s)	Baseline* Value	Year	Mid Term Target	End Term Target	Reporting Responsibility	Source of baseline
Environment, Water an	d Irrigation Sector				8		· · · · · · · · · · · · · · · · · · ·	
Environmental Conservation and Management	Clean, healthy, protected and sustainable environment	Proportion of Households in a clean, healthy, protected environment	60.7%	2019	70%	75%	Environment and Public Health	KNBS
		Proportion of land that is degraded over total land area	27.2%	2016	25%	23%	Environment and Public Health	KNBS
Natural Resources Conservation, Exploitation and Management	Improved Sustainability of natural resource and ecosystem	Rate of Renewable energy consumption for Cooking	5.0%	2019	7%	10%	Water and irrigation	KNBS

6.5 Data Collection, Analysis and Reporting

County M&E Directorate, in collaboration with the other M&E Committees, will define and develop the main methods and tools that will be used for data collection, archiving, analysis, and reporting arrangements in line with the National M&E Norms and Standards. The County M&E Directorate will coordinate the development of a CIDP Indicator Handbook that will guide the Monitoring & Evaluation of the CIDP III. The handbook will be accompanied by the data management plan to help coordinate the M&E functions and organize the collection, analysis, and dissemination of information needed for effective CIDP implementation. The data management plan will define the data collection tools for the indicators, the data collection methods, and the data processing and analysis methods. The M&E Directorate will prioritize continuous training and adoption of technology in the data management processes to make them simpler, faster, more reliable, and more transparent.

The county will utilize primary and secondary methods to collect quantitative and qualitative data. The data collection tools will be developed by the M&E Directorate in collaboration with development partners and departments tailored to meet the needs of each department/sector. They will include questionnaires, structured, semi-structured, and unstructured interviews, focus group discussions, photography and observation, among others. The M&E Directorate will undertake capacity building on data quality issues to ensure that the data collected meets the required quality standards. The data collected will be analyzed and reports generated to help inform decision-making.

Regarding reporting, the County shall develop the County Annual Progress Report (CAPR) based on the guidelines developed by the Monitoring and Evaluation Directorate. The CAPR will provide the overall status of the CIDP implementation on an annual basis. Subsequently, this will inform the preparation of the consequent Annual Development Plan (ADP) and annual budget preparation process. Further, the County will prepare the Quarterly M&E progress reports that will feed into the CAPR, mid-term reports to be prepared at the third year of CIDP implementation, and End Term Reports to be prepared at the end of CIDP implementation period and other ad hoc reports.

Through the e-CIMES, the county will analyze the progress towards the achievement of the policies, projects, and programmes outlined in the CIDP III. Analysis of CIMES results will demonstrate whether the resources spent on implementing CIDP investment programmes are leading to the intended outcomes, impacts, and benefits for the residents of Baringo.

The County will also produce other reports like the Public Expenditure Report (PER), Projects Implementation Status Reports, and Evaluation Reports.

6.6 Dissemination, Feedback Mechanism, Citizen Engagement and Learning

The County will establish a robust feedback mechanism that entails a plan that will define the target stakeholder or audience, the information needs of the various stakeholders/audiences, the

communication methods, and the timing/frequency of the dissemination. The reports will be disseminated to the public through State of County Address, oral presentations in stakeholder meetings, written reports, fact sheets, press releases, social media platforms, county websites, devolution conferences, peer-to-peer events, and live events.

Regarding learning from the M&E initiatives and reports, the information generated from M&E will be useful for decision-makers, policymakers, and the wider county audience as it will provide facts and evidence, that when accepted and internalized, provide knowledge products for promoting learning. Hence, the County will incorporate learning into the overall programme implementation by using the information disseminated from the M&E processes and making it available for potential users to become applied knowledge. The county will utilize critical reflection sessions, after-action reviews, and peer-to-peer learning, among others, as strategies for learning to improve the overall county performance and quality of esults of ongoing and future programs, strategies, and interventions

6.7 Evaluation Plan.

This section identifies the key policies/programmes/projects for evaluation during or after the plan period. Evaluation will be critical for the county policies/programmes/projects to determine the relevance, development efficiency, effectiveness, impact, and sustainability. The evaluations will include rapid evaluations, impact evaluations, CIDP midterm/end-term Reviews, or any other type of evaluation.

The M&E Directorate will develop comprehensive evaluation plans for each planned evaluation to support the evaluation planning and will cover components like the purpose of the evaluation, evaluation questions, evaluation criteria, timetable, and work plan, collecting data for an evaluation, data collection methods to answer evaluation questions, data collection tools and activities, data analysis, and reporting evaluation findings. Table 27 below provides a summary of the Evaluation plan for the intended evaluations.

Table 27: Evaluation Plan

N o	Policy/ Programm e/ Project	Evaluation Title (specify the type)	Outcome (s)	Use of the Evaluation Findings	Commissioni ng Agency/ Partners	Anticipat ed Evaluation start date	Anticipat ed Evaluatio n end date	Evaluati on Budget (Kshs.)	Source of Funding

OII AND MINERAL RES	OUDCES		

OIL AND MINERAL RESOURCES

Mineral and Oil potential (explain)

A few valuable minerals have been discovered in the county. Opal has been mined at Isanda near Perkerra. Fluorspar deposits have been cited in the basement and volcanic rocks of Tiaty Hills and North Baringo (Kaborion) while carbon dioxide has been extracted from several boreholes in the southern part of the county. In recent times, quarrying has gained prominence in the county, especially in Marigat Ward where building stones, sand and ballast are being exploited. There are also abandoned ruby mines at Sandai location near Lake Bogoria.

The county has a potential of ruby, diatomite, manganese and fluorspar mining though the quantity of deposits is yet to be established. Exploration will need to be carried out so as to establish the quantity of these mineral deposits. Quarrying is generally done for building stones, ballast, sand, laterite (murram) and other building and construction rock material. The proceeds from the sale of minerals in Baringo County have not been quantified, as the small-scale mining activities are not structured.

Tullow Oil Company has set base at the county, Block 12A, to explore oil and if it is exploited, it will be shared between Baringo and Elgeyo-Marakwet counties. Government-owned Geothermal Development Company has also started drilling geothermal energy at Silale area in Tiaty. Baringo County also has carbon dioxide deposits at Esageri, Mogotio Sub-County

Proposal	Location
Radad mega dam	Emining
Kiptengwel dam for irrigation	Rosoga
Noiwet-Muserech-Rongai-Salgaa Road	mogotio/Koibatek
Emining-Sagasagak-Esageri Road	Emining/Mogotio
Timborua-Poror-Sorok-Ochi Road	5 6
Kobober/Kipyakwai/Kapkole Irrigation	
Mogotio National Polytechnic	Mogotio
Mogotio Kenya Medical Training College (KMTC) Campus	Mogotio
Mogotio Level 4 hospital	Mogotio
Mogotio Tannery	Mogotio
Kimose industrial park	Mogotio
Mogotio sewerage	Mogotio
Tarmacking of Emining Technical Institute	Emining
Kipketum water project/Utwo water projects	Mogotio
Sirwa/cheberen gravity water	Mogotio/Emining
Muguyuni-Molosirwe-Chemoinoi-Kaplelwo Road	Kisanana/Emining
Livestock value chain at Lomanira, Kimose and mogotio LIC	Mogotio/Emining
Upper Solai Dam	Kisanana
Last Mile Electricity Connectivity	Mogotio sub county
Chemususu last mile water distribution	Mogotio/Emining/Ravine/Kisanana
Molosirwe and Majimoto Irrigation project	Kisanana/Emining
Solarization of L. Baringo water for domestic use and Irrigation	Tribunana Binining
Feasibility study of L. Baringo fpr irrigation	
Honey processing plant	
Expansion of Irrigation Scheme through construction of mega dams	Mogotio,B/North,Baringo Central &Tiaty
such as Radat, Berekei, Amaya and Oke	East
Perkerra Irrigation scheme	Marigat
Barwessa Irrigation	Barwessa
Orion Irrigation Scheme	Loyamorok
Ngaratuko Irrigation Scheme	Saimo Soi
Cable car development	Summe Ser
Fossil geo-site development - Arrorin Tugenensis research institute	Kapkomon
pasture development	Ngaratuko
Development of Kimalel Air strip and Other Air Strip	Kimale,Kabarnet,Kampi ya Samaki
Security - Establish programmes to promote security in the county	Integrated Boarding schools
Becautey Estatement programmines to promote security in the country	Land Demarcation
Ossen poultry auction	Ossen
Establishment of Solar Firms	Baringo South, Mogotio, Tiaty Sub County
Construction of potato Cooling plant	Equator, Block 4, Torongo, Seguton,
constitution of points occurring plants	Mumberes
pyrethrum value chain	highlands of the county
Completion of Milk Plant	Perkerra
Development of sewerage System	Eldama Ravine
Installation of Fibre Optic Cable Fibre optic cable	Extension to all major towns in the county
Dialysis Machines	All sub county hospitals
Cancer Centre	All sub county hospitals
Construction of check dams	Along Esageri, Narasura, Emining rivers
Improvement of ATC.	<u>-</u> 25 25 25
Special Bursary for Children from Insecurity Areas.	Tiaty, Baringo South & Baringo North.
Honey Processing Plant	Churo
Last Mile Electricity	Ilchamus Ward
Last wife Diocuroty	nonantus waru

Kerra Roads	
Solar farm for Kokwa and neighbouring Island	Ilchamus
Capacity development on stabilised soil block technology for	County
affordable rural housing	
Establishment of one Alternative Building Material Technology	County
centre at each sub-county.	County
Procure hand press Machines for block production for each ward, and	County
Hydraform Machine for each sub-county	
Reopening of 7 Insecurity affected schools	Baringo South
Establish fruit processing plant	Baringo south
Rehabilitation of dams- Kimao, Arabal and Chemorongion	Baringo south
Kimalel Airstrip	Baringo South
Desilting of Dams- Chemorongion, Mukutani and sandai	Baringo south
Solar panels at Kokwo highland	Baringo South
Development of Marigat Sport club	Baringo south
Opening of security roads in Baringo South	Baringo South
Establish Cereal Produce Board in Mochongoi	Baringo South
Enhancing production of Perkerra irrigation scheme	Baringo South
Establish new irrigation schemes in Mukutani,	Baringo Soutkh
Partnering with Kenya Seed company to have a branch in Marigat	Baringo South
Baringo Business hub- Marigat town	Baringo South
Upgrade Marigat Vocational centre to National polytechnic	Baringo South
Expansion and renovation of Perkerra Irrigation scheme	Baringo South
Upgrade Marigat hospital to level 4	Baringo South
Kirandich Phase II	Baringo Central
Kapkiyai Training Camp	Baringo Central
Baringo Technical National Polytechnic	
Tenges health Centre	Baringo Central
Development of County Geo-park	All county Geo-sites
Development of Arrorin Tugenesis	Baringo North
Tourism Marketing	
Construction of Stadias	Kabarnet & Eldama Ravine
Identification and levelling of fields	Across the county
Tree planting-Afforestation and Re-afforestation	
Office complex	Kabarnet
Construction of correctional facilities	
Establishment of Land banks	
Establishment of recreational facilities	
Establishment of millet value chain	
Establishment of Poultry Value chain at ATC	
Establishment of bakeries for cooperatives	
Establishment of Homes for Elderly and children	
Enhancement of mobile clinics in hard to reach areas	
Establishment of County Radio and Tv station	
Development of sporting activities to promote peace e.g Basketball	

Annex 5: recommendations and Priorities by Members of Baringo County Assembly During Validation Forum

S/No.		Comment/Input/Recommendation
1.	Deputy	The document has attracted a lot of viewsthis tell us that we have a lot to do as a
1.	Governor's	county, to ensure that the document is fully implemented.
	remarks	We need the support of the County Assembly to work on the revenues we generated.
	101111111111111111111111111111111111111	We also need the support of the assembly on matters legislation, to ensure the
		document is approved and implemented.
2.	Governor's	Failure to plan is failure to fail.
۷.	remarks	
	remarks	Planning is crucial for every organization. This CIDP is necessary for approvals of
		the exchequer release. This CIDP informs our budgeting process.
		From the CIDP, we draw our ADPs, and our MTPs.
		This CIDP adopted the programme approach, which is the broader agenda of our
		developments.
		This CIDP has clear strategies on how we will address our development issues.
		This document will form the basis of the oversight role of the County Assembly
		CRA around 6.3Bilion, conditional grants, donor support.
		We need to emphasis on revenue collection, the assembly should consider a finance
		bill that considers the own source revenue generation.
		Revenue collection is one measure of performance.
		Plenary
		1.
1.	Marigat MCA	Tourism
		Geo Site development it is a natural resource, in tourism is geo site
		commercialization for revenue collection
		Natural resource & Environment clearly have mining development for revenue
		collection purposes
		Health Sector
		Consider development of a medical research center to consider having extract of
		venoms
2.	MCA Sacho	Energy & Infrastructure
۷.	Ward	Rural roads to be upgraded to bitumen standards
	w aru	Under the urban roards
		KeNHa is not clearly featured
3.	MCA Kisanana	Electricity connectivity to indicate the number of House holds
3.		The CIDP should clearly feature out the ways of enhancing own source revenue, it
	Ward	should be
		Land banks
		Trainers of the VTCs, ECDE Teachers and all the Human resource aspect
		Flagship projects to be evenly distributed to avoid removal during budget process.
		There is also challenge of ownership of project flagships. Don't assign flagship
		funds, assign flagship projects.
		The projects should be financed in the priority of the earlier placed.
		What could be the reasons of having a large number of abandoned projects.
		(Mutation of projects) – There is need for financial discipline.
	Tangulbei	Page 12 of the presentation diocument I
	Korrosi Ward	The County Government should be added as a lead agency and not GDC only.
		Page 29 Proposed Flagship – National Government
		The Road proposed
		Kisanana should end at Naokot
		Chemologot to be added to the list of construction of law courts.
	World Vision	Social Protection – Indicate ways in which the children protection can be strengthen
		through
	MCA Tenges	Health services
	Ward	Consider blank banks
		Under the Health Centers consider solar installations.
		Agriculture
		Provision of coffee seedlings for farms, the MCAs to b
	<u> </u>	1 10 tible of concessedings for family, the Meas to 0

		Roads
		Tenges to reach Ochi
		KeRRa – Classify the roads
		Sports majors only on software
MCA	Bartabwa	ECDE Teachers on PnP
Ward		B/North to put up an MTC at Kabartonjo
		Anti-Venom centers should be considered to address the ever rising snake bites
		challenges
		Medical Research center
		Water Usage regulation on sustainability.
		Kinyanch Airstrip
		Consider building MCA and chief offices in every road.
		Consider capacity building of MCAs
Saimo	Soi	Lake Baringo – blue economy & irrigation
MCA		Kaldich road
		Consider inclusion of Stadiums at all Sub Counties
		Water treatment
