

## **COUNTY VISION AND MISSION**

#### **Vision Statement**

To be a globally competitive investment hub that ensures optimal utilization of resources, social and economic sustainability for the prosperity of all and wealth creation.

#### **Mission Statement**

To provide effective leadership and a conducive environment for social, economic, cultural and political development of the County through policy formulation and tracking results.

## **FOREWORD**

On 27<sup>th</sup> August 2010, Kenya promulgated a new constitution which ushered in a new system of national governance framework. This system introduced a devolved system of government through the creation of 47 County governments. In view of the creation of the counties, certain functions where devolved from the central government to the County government. The Fourth Schedule of the Constitution clearly sets out the distribution of functions between the national government and the County governments. In particular Part 2 of the Schedule sets out fourteen functions of the County governments. These functions include, agriculture, County health services, control of air pollution, noise pollution, other public nuisances, outdoor advertising, cultural activities, public entertainment, public amenities, County transport, animal control and welfare; trade development and regulation; County planning and development, preprimary education, village polytechnics home craft centers, childcare facilities, implementation of specific national government policies on natural resources and environmental conservation, County public works and services, firefighting services and disaster management; control of drugs and pornography and lastly ensuring and coordinating the participation of communities and locations in governance at the local level and assisting communities and locations to develop the administrative capacities for the effective exercise of the functions and powers and participation in governance at the local level. Under the Constitution of Kenya 2010, National and County Governments are distinct but interdependent.

It is upon the basis of the devolved function on county planning and development as envisage in Constitution that this County Integrated Development Plan (CIDP) has been developed. This County Integrated Development Plan has taken into account the provisions of the Constitution of Kenya 2010, Vision 2030 which is Kenya's development blue print read together with its Medium Term Plans, the Machakos County Development Profile (MCDP) and the Machakos Governor's manifesto. This County Integrated Development Plan gives priority to the local socio-economic development issues and sets out a targeted development plan. The development plans aims at tackling the basics of life within the County and actualizing the "Mandeleo Chap Chap" ideology.

The County Government structure comprises of the Governor, County Executive Committee and County Assembly. The County Executive Committee has two key responsibilities which are supervising the administration and delivery of services to citizens and the conceptualization and implementation of policies and County legislation. The County Assembly being the legislative organ plays an oversight role on all County public institutions including the urban areas and cities.

To give effect to devolution, the national government has since enacted several laws. Some of the laws include the Basic Education Act No. 14 of 2013, Constituencies Development Fund Act No. 30 of 2013, The County Allocation of Revenue Act 2013, County

Governments Public Finance Management Transition Act, Division of Revenue Act No. 31 of 2013, Intergovernmental Relations Act No. 2 of 2013, National Government Coordination Act No 1 of 2013, Transition County Allocation of Revenue Act No. 6 of 2913, Transition to Devolved Government Act No. 1 of 2012 and Urban Areas and Cities Act No. 13 of 2011. All these laws support the actualization and implementation of the different aspects of devolution.

The development projects and programmes identified in this CIDP were identified through various consultative forums at sub county and ward level. A variety of stakeholders where consulted through development committees, County Consultative Forum and public consultations during the County budget making process. During the stakeholders consultations, the there was a wide participation of people involved in the identification, planning, implementation and monitoring and evaluation of projects and programmes. The wide participation will significantly influence the public participation in the actual implementation of the projects and programmes. This in retrospect has definitely empowered the citizens of Machakos County to exercise their democratic rights so as to realize social, political and economic development.

Hon. Dr. Sunil Kumar Dhall Executive Committee Member Department of Trade, Economic Planning and Industrialization

#### ACKNOWLEDGEMENTS

This County Integrated Development Plan was prepared with the support and significant contribution of honorable members of the County assembly, members of the public who participated during the stakeholders' consultative forums, county planning unit comprised of the county economists and statisticians, Bridget Wambua the County Transition Authority Coordinator.

In particular we wish to express gratitude to H.E Dr. Alfred N. Mutua, Governor – Machakos County Government, Hon Benard Kiala, Deputy Governor - Machakos County Government, Hon Dr. Sunil Dhall, Executive Committee Member - Department of Trade, Economic Planning, Investment and Industrialization, Hon Ms. Elizabeth Nzioka, Executive Committee Member - Department of Finance and Revenue Management, Hon Naomi Mutie , Executive Committee Member - Department of Health, Environment and Emergency Services, Hon. Helen Kiilu, Executive Committee Member - Department of Education, Youth and Social Welfare, Hon. Faith Kithu Executive Committee Member in charge -Department of Tourism, Sports and Culture, Hon. Francis W. Maliti Executive Committee Member - Department of water and Irrigation, Hon George Kioko Luka Executive Committee Member – Department of Decentralized Units and County Administration, Hon Larry Wambua Executive Committee Member – Department of Public Service, Labour, ICT, Marketing and Cooperative Development, Hon Ruth Mutua Executive Committee Member – Department of Agriculture, Livestock, Fisheries, Land and Urban Development, Hon Joshua Musili Executive Committee Member – Department of Transport, Roads, Public Works and Housing, Mwengi Mutuse - Chief of Staff, Francis Mwaka – County Secretary, Sheila Mukunya - Chief Officer, Trade, Economic Planning, Investment and Industrialization, Mwikali Muthoka – Chief Officer, Lands and Urban Development, Jacinta Masila - Chief Officer, County Treasury, David Musembi - Financial Secretary, Pauline Mbondo - Chief Officer, Decentralized Units and County Administration, Catherine Nzila – Chief Officer, Marketing and Copertaive Development, Morris Aluanga – Chief Officer, Transport and Roads, Musyoka Kalla – Chief Officer, Education, Youth and Social Welfare, Urbanus Musyoka - Chief Officer, Energy and Natural Resources, Grace Munguti - Chief Officer, Public Service, Labour and ICT, Sarah Mbithe - Chief Officer, Public Works and Housing, John Kilonzo - Chief Officer, Water, Nicholas Makau - Chief Officer, Irrigation, Nimrod Mbai - Chief Officer, Agriculture, Livestock and Fisheries, Kennedy Auma – Chief Offier, Tourism, Sports and Culture, Collins Sila – Chief Officer, Health, Environment and Emergency Services, Jeremiah Lemmi - Chief Officer - Special Programmes.

To each and every person who was involved, we bless God for you and we look forward to actualizing all the development plans set out in this CIDP.

#### **EXECUTIVE SUMMARY**

Machakos County is one of the forty seven counties in Kenya and one of the eight counties in the Eastern region. To the North the county borders Embu, Murang'a and Kiambu counties, to the west Nairobi and Kajiado counties; to the south Makueni county; and to the East Kitui county. The county has area of 6208.2 Km² most of which is semi-arid. The county is divided into eight sub counties/constituencies namely; Masinga, Yatta, Kangundo, Matungulu, Kathiani, Mavoko, Machakos Town and Mwala. The County has a total of 40 wards and 75 Locations. It lies between latitudes 0°45′South and 1°31′South and longitudes 36°45′East and 37°45′East.

According to the to the 2009 Kenya Population and Housing census, the county has a population of 1,098,584. The Kenya National Bureau of Statics has projected a total population growth of 1,238,650 in 2015 and 1,289,200 in 2017. The projected population growth is at approximately 1% over the years while the projected population growth of men is 1% more than women. The county has an average population of 188 per square kilometre. The average household size is 4 with a life expectancy of 65.5%. Absolute poverty is at a rate of 60.7% with a contribution of 4.7% to national poverty. The poverty line is a threshold below which people are deemed poor. The last official statistics summarizing the bottom of the consumption distribution (i.e. those that fall below the poverty line) were provided in 2005/06. The poverty line was estimated at KES 1,562 and KES 2,913 per adult equivalent per month for rural and urban households respectively. Nationally, 45.2 percent of the population lives below the poverty line (2009 estimates) down from 46 percent in 2005/06. (KNBS, 2009) Masinga Sub County had the highest rate of individuals below the poverty line at 61.3%, which was 15.3% above the national average. Mavoko had the lowest rate at 22.8%, 23.2% below the national average.

The County receives a bimodal rainfall with short rains coming in October to December and long rains in March to May. The annual average rainfall ranges between 500 mm and 1300 mm, and is unevenly distributed and unreliable. Total annual rainfall ranges from 1000mm in highland areas to 500mm in the low lying areas. Temperature varies between 18°C and 29°C throughout the year. The coldest month is July and the warmest months are October and March prior to the onset of the rains. Dry periods are experienced in February to March

and August to September. Agriculture contributes 70% of household income, rural self-employment contributes 10%, and wage employment contributes 11 % while urban self-employment contributes 5%.

This County Integrated Development Plan (CIDP) is divided into eight chapters. Chapter one deals with the County General Information and provides the County's background description. The Chapter has been adapted from Chapter One of the Machakos County Development Profile prepared by the Ministry of Devolution and Planning. This Chapter also includes position and size of the County, administrative and political units, physiological and natural conditions and settlement patterns. This chapter also covers n infrastructure, community organizations, forestry and agro forestry, tourism, wildlife, industry and population profiles and projections.

Chapter Two describes the spatial planning of the County. The planning sets out the way in which different activities, land uses and buildings are located in relation to each other, in terms of distance between them, proximity to each other and the way in which spatial considerations influence and are influenced by economic social, political, infrastructural and environmental considerations in relation to the County.

Chapter Three explains the linkage of the County Integrated Development Plan with the Machakos County Development Profile, Kenya Vision 2030, the Constitution of Kenya, 2010 and the Millennium Development Goals (MDGs). It illustrates how they are all interrelated and how they can leverage on each other.

Chapter Four has outlined the organizational chart of the Machakos County Government. It further explains the role each officer in the top management of the County and how their role is fundamental for the implementation of this CIDP.

Chapter Five indicates the resources available for each capital projects development and the strategies for raising revenue to fund various projects.

Chapter Six provides a summary of the MTEF sector analysis in the County. It provides vision and mission of each MTEF sectors as well as the projects and programmes being implemented under each sector. It also outlines the roles of each key stakeholder in each

sector. It enumerates the County response to the Sector vision and mission, the ongoing projects and programmes and the strategies to mainstream the crosscutting issues.

Chapter Seven presents the monitoring and evaluation framework that will be used at the National and County level to track progress on implementation of projects and programmes. An indices of key socio-economic statistics on the County and the major milestones for tracking development in the County is also provided.

# CHAPTER ONE COUNTY BACKGROUND INFORMATION

#### 1.0 Introduction

The background information on Machakos County is the basis upon which this County Integrated Development Plan has been grounded on. In view of this it is important to have an understanding of the background information of Machakos County.

The background information covered in this Chapter includes the following;

- i) The priorities identified under the manifesto of H. E. the Governor
- ii) Location and size
- iii) Physiographic and natural conditions
- iv) Demographic profiles
- v) Administrative.
- vi) Demographics features
- vii) Human development approach
- viii) Political units
- ix) Infrastructure and access;
- x) Land and land use;
- xi) Community organizations/non-state actors;
- xii) Crop, livestock and fish production;
- xiii) Forestry and Agro forestry;
- xiv) Environment and climate change;
- xv) Mining;
- xvi) Tourism;
- xvii) Employment and other sources of income;
- xviii) Water and sanitation;
- xix) Health access and nutrition,
- xx) Education and literacy,
- xxi) Trade,
- xxii) Energy,
- xxiii) Housing,
- xxiv) Transport and communication,
- xxv) Community development and Social Welfare.

#### 1.1 Priorities identified under the Manifesto

The manifesto was aimed at tackling the basics of life to eliminate abject poverty and they included:

- Provision of water to all the households in the county.
- Improve health services within the county.
- Improve security.
- Enhance food security.
- Improve education and social welfare.
- Enable wealth creation.
- Job creation.
- Set up tourism and cultural centres.
- Control sand harvesting.
- Creation of modern, clean and efficient markets.
- Proper land use and issuance of title deeds.

The development projects included in the Manifesto included the following:

- Enhance mobility-road and transport system.
- Create airport and railway link to take advantage of the upcoming Konza City project.
- Hold investor forums to bring funds.

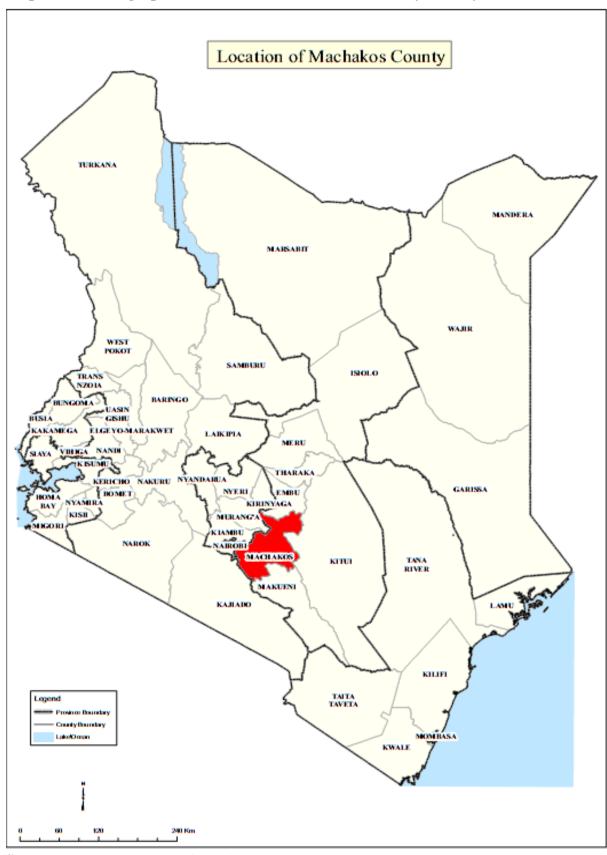

#### 1.2 Location and Size

Machakos County is strategically located as it borders seven counties. To the north it is bordered by Embu, Muranga and Kiambu Counties, to the west Nairobi and Kajiado counties, to the south Makueni County and to the East Kitui County. **See Map 1 below**. In terms of latitude and longitude it lies between latitudes 0°45′South and 1°31′South and longitudes 36°45′East and 37°45′East.

The County covers an area of 6208.2 Km² with Machakos covering 925.2 Km², Kangundo covers 177.2 Km², Kathiani covering 207.1 Km², Athi River covers 843.2 Km², Yatta covering 1,057.3 Km², Masinga covering 1,402.8 Km², Matungulu covering 577.5 Km² and Mwala covering 1,017.9 Km².

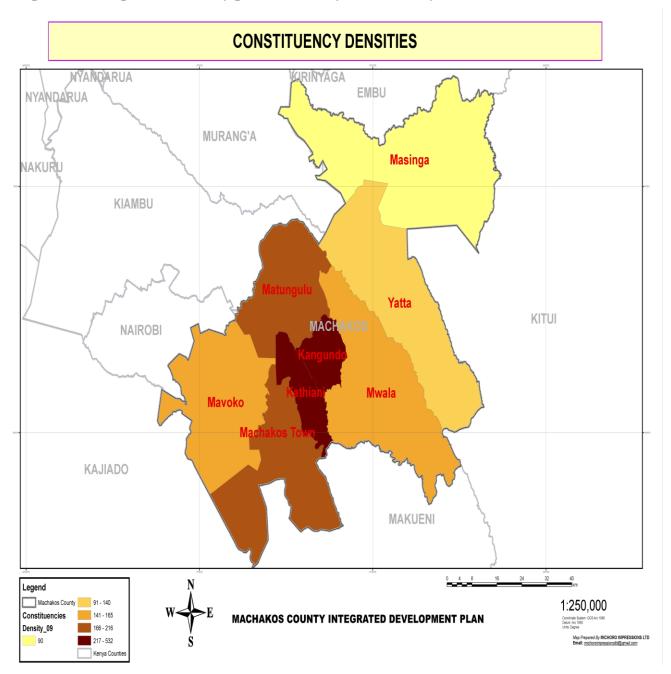

Given the foregoing coverage it is apparent that Masinga, Yatta, Mwala and Machakos have the biggest area coverage respectively while Kangundo, Kathiani and Matungulu have the lowest coverage respectively. However to take note is the fact that the area coverage of the sub county does not necessarily determine the population density. For instance Kangundo, Kathiani and Matungulu have lowest area coverage while they are the highest population density. Mwala, Yatta, Masinga have a big area coverage yet they are not as densely populated as compared to Kangundo, Kathiani and Matungulu. See Map 2 below

Map 1: Geographical location of the Machakos County in Kenya

**Source:** Kenya National Bureau of Statistics, 2013

Map 2: Population density per Sub County/ constituency

# 1.3 Physiographic and Natural Conditions

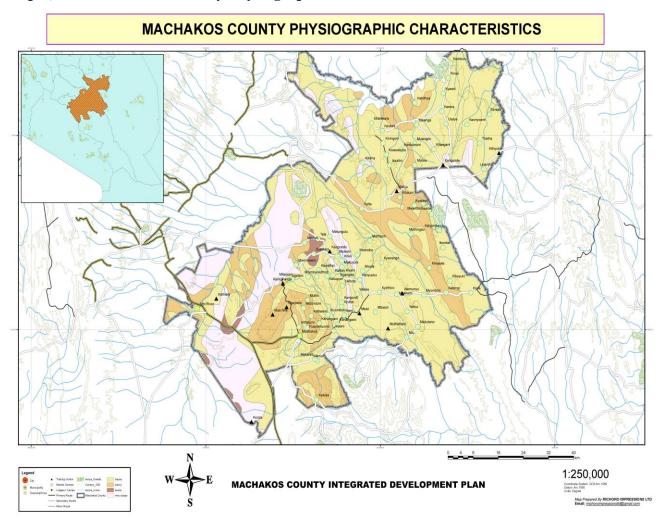

#### 1.3.1 Physical & Topographic Features

Machakos County has very unique physical and topographical features. Hills and a small plateau rising to 1800-2100m above sea level constitute the Central part of the County. To the West, the County has a large plateau elevated to about 1700m which is Southeast

sloping. The County rises from 790 to 1594 m above sea level. In the North West the County has stand-alone hills.

The soils are well drained shallow, dark red clay soils particularly in the plains. However the vegetation across the entire County depends on the altitude of any given area/location. The rainfall distribution in the County depends on the topography of the areas. Since some areas of the County are arid while others have hills and volcanic soils and other areas are plains, the rainfall is widely distributed. For instance the plains receives less amounts of rainfall as such the dominate vegetation is grasslands and some sparse acacia trees. The areas within the County are predominately plains include Mutituni, Mwala, Mua, Iveti Hills and Kathiani.

Map 3; Machakos County Physiographic Characteristics

Lukenya Hills

### 1.3.2 Ecological Conditions

Machakos County is the home for Yatta plateau which is situated within the Yatta Sub County which Sub County has a land mass of 1,057 Km² thus the second biggest Sub County. This County has numerous hills which include Iveti, Lukenya, Komarock, Kavila Koli, Ithanga, Mavoloni, Kangonde, Kamuthamba, Nzii, and Ekalakala.. Tana River and Athi River are the two permanent rivers within Machakos County. They are also the main sources of water, however we also have the Masinga dam within Masinga Sun County which is the largest Sub County with a land mass of 1,402.8 Km².

**Masinga Dam** 

**Komarock Hills** 

#### 1.3.3 Climatic Conditions

Generally the annual rainfall of the County is unevenly distributed and unreliable. The average rainfall is between 500 mm and 1300 mm. The short rains are expected in October and December while the long rains are expected in March to May. The highland areas within the County such as Mua, Iveti and Kangundo receive an average of 1000mm while the lowland areas receive about 500mm; ideally the rainfall within the County is influence by the latitude. In terms of temperature, July is the coldest month while October and March are the warmest. Temperature varies between 180C and 29°C throughout the year. Since the County does not experience rain throughout the year it then means that there are moths that experience dry spells. These months are mainly February to March and August to September.

#### 1.4 Administrative Units

The total land mass of Machakos County is divided into eight sub-counties/ constituencies, namely; Mavoko, Kathiani, Machakos, Matungulu, Yatta, Masinga, Mwala, and Kangundo.

These eight sub-counties/ constituencies are further subdivided into twenty two divisions, seventy five locations and two hundred and thirty nine sub locations respectively as shown in the in Table 1 and Map 3 below.

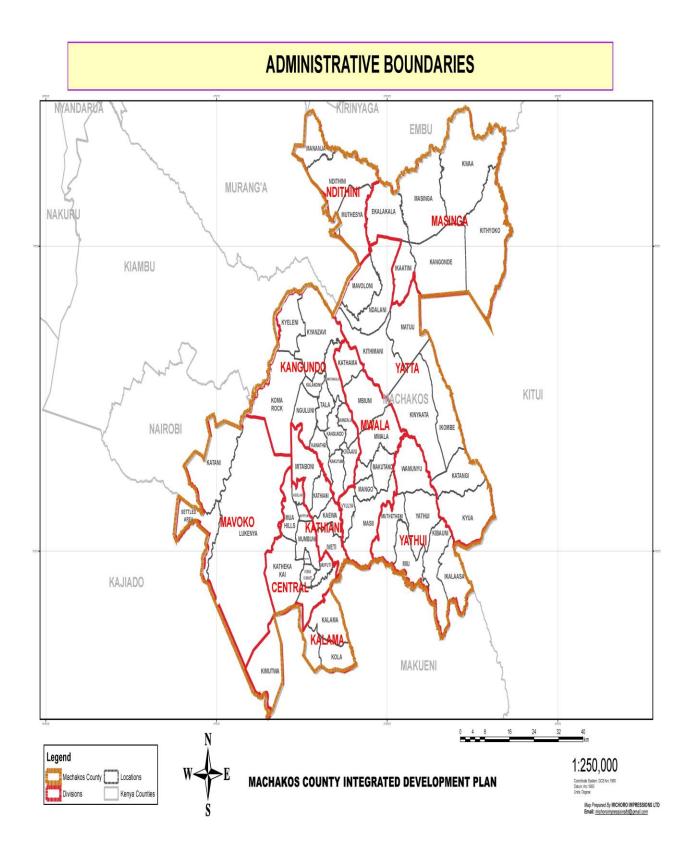

Table 1: Area and Administrative Units by Sub-County

Sub-County/ Constituency	Area (Km²)	Divisions	No. of Locations	No. Of Sub-	2009 (0	Census)
				Locations	Population	Density (Km²)
Machakos	925.2	2	13	39	125,940	90
Kangundo	177.2	3	9	25	147,579	140
Kathiani	207.1	1	4	21	94,367	532
Athi River	843.2	4	7	14	124,736	216
Yatta	1,057.3	3	8	23	104,217	503
Masinga	1,402.8	2	9	29	139,502	165
Matungulu	577.5	3	10	30	199,211	215
Mwala	1,017.9	4	15	58	163,032	160
TOTAL	6,208.2	22	75	239	1,098,584	177

Source: County Commissioner's Office, Machakos, 2013

A comparison of the data in the above table, tells a story about Machakos County. It is apparent that Masinga is the Sub County with the largest area coverage. However it is not the Sub County with the highest number of divisions, locations and sub locations. To note also is the fact that it does not have the highest population. Mwala Sub County is the third largest Sub County however it is the Sub County with the largest number of divisions, locations, sub locations, though it is the second in terms of population. Though Matungulu is the 6<sup>th</sup> in terms of area coverage, it has three divisions, ten locations, thirty sub locations but it is the Sub County with the largest population. An interpretation of the foregoing data means that the equitable distribution of resources shall be guided by the area coverage and population.

**Map 4:** Administrative Boundaries

# 1.5 Demographic Features

#### 1.5.1 Population Size

According to the 2009 Kenya Population and Housing census the total population of the County is 1,098,584. It is projected to increase to 1,166,516 in 2012, 1,238,649 in 2015 and 1,315,244 in 2017. This increase suggests that population will be increasing by 2%.

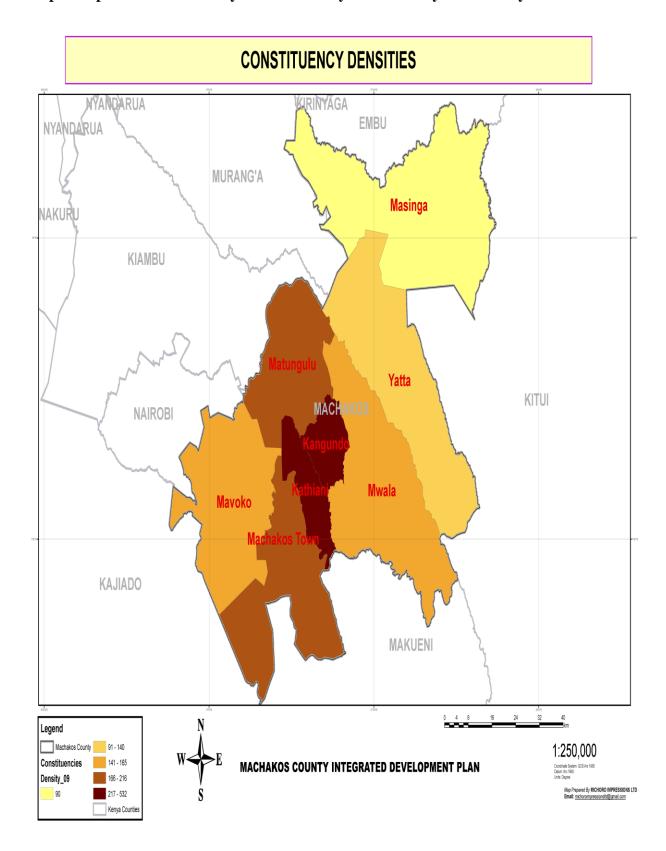

The population as reflected below is an indication of the social and public amenities that are necessary in each Sub County to provide sufficiently for the needs of the entire populations. Sub Counties like Machakos that have the highest population requires more social and public amenities than Kangundo Sub County would require. Considering the population growth projections, It is pertinent to note that the social and public amenities must increase concurrently with the population growth. See Table 2 and Map 4 below

Table 2: Population and Density Distribution by Constituency/Sub County

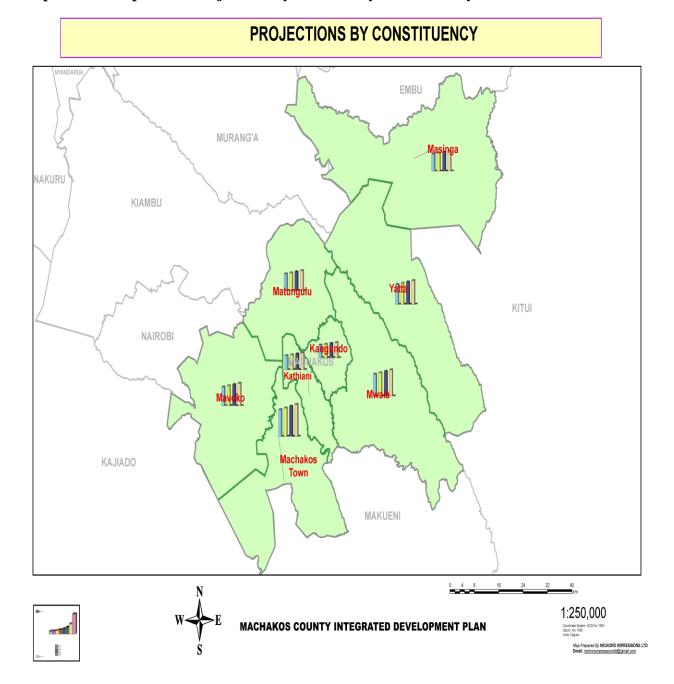

Constituency/Sub	2009 (Ce	ensus)	2012 (Proj	ections)	2015 (Proj	ections)	2017 (Projections)

Map 5: Population and Density Distribution by Constituency/Sub County

Map 6: Population Projections by Sub County/ Constituency

## 1.5.2 Population Composition

From Table 3 below, it is apparent that the gender population almost equally distributed across the different age cohorts. The male population stands at 543,139 while the female population stands at 555,445. This translates into a sex ratio of 1:1.02. Table 3 below shows the projected County gender population for the period 2009-2017 by age cohorts.

Table 3: Population Projections by Gender and Age Cohort

Age Cohort	2	2009 Cens	sus	20	12 Projec	tions	2015 Projections			2017 Projections		
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total
0-4	73,901	72,282	146,183	78,471	76,752	155,222	83,323	81,498	164,821	86,724	84,824	171,547

Source: Kenya National Bureau of Statistics, 2013

From the table above it is apparent that 54% of the population ranges from the age of 15 to 59. This then means that the higher percentage of the County falls in the age bracket that can effectively work.

Table 4 below shows the County population projections for selected age groups. This population projections seek to give an indication as to the public infrastructure and related facilities that must be constructed or put in place to cater for all the needs of the growing population as per age growth as projected.

**Table 4**: Population Projections for Selected Age Groups

	20	09 (Censu	1s)	2012 (Projections)			2015 (Projections)			2017 (Projections)		
Age Group	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total
Under 1	14,723	14,684	29,407	15,633	15,592	31,225	16,600	16,556	33,156	17,278	17,232	34,509

Source: Kenya National Bureau of Statistics, 2013

**Under 1 year:** As indicated in Table 4 this population represents 2.68 per cent of the total population. This population has been projected to increase to 31,225 in 2012. By 2015, the population is projected to increase to 33,156 and to increase to 34,509 in 2017. This population growth implies that there must be an increase in prenatal and post natal maternity services so as to reduce child mortality that is very prevalent in this age bracket. In addition health care is one of the functions that have been devolved. It then means that it is the role of the County to make budgetary provisions for this.

**Pre** – **primary School Age** (3 – 5 years): This age group represents 13.31 per cent of the total County population. This population is projected to increase to 155,222 by 2012, to 164,821 people by 2012 and to 171,547 by 2017. This population will need an increase in number of teachers, teaching and learning facilities for Early Childhood and Development

(ECD) centres. The implication of this to the County is that we will need to train more pre – primary school teachers. This is particularly so because this is one of the devolved functions.

**Primary School Age (6–13 years):** In 2009 this age group had a population of 226,513, and it represents 20.62 per cent of the total County population. In 2012 the population is projected to increase to 240,520. In 2015 and 2017 it is projected to increase to 255,393 and 265,815 respectively. It is apparent that such an increase will have implications on the already existing primary education facilities. As a result there will be a need to construct more primary schools. However it is important to note that primary education has not been devolved to the County as such the County will work in corporation with the National Government to ensure that the number of primary schools is increased.

Secondary School Age (14–17 years): In 2009 the population of the secondary school going age was 101,497 pupils. This age group forms 9.2 per cent of the total population. In 2012, 2015 and 2017 the population of this age group is projected to increase to 107773, 114438 and 119,108 respectively. The implication of this increase is that the number of secondary schools must increase. Though this function of secondary schools has not been devolved to the County, the County will work in cooperation with the National government to ensure that the number of secondary schools is increase so as to cater for the increase in the population. An increase in the schools as well as the population in this age group means that there is a need to increase the number of village polytechniques so as to absorb those students who don't get absorbed in the universities. This also means that the County government will work in cooperation with the National government to increase the number of universities in the County. Since village polytechniques are devolved the County will engage in improving the already existing polytechniques as well as reviewing the curriculums offered. The County will also consider constructing village polytechniques were none exist.

This secondary school age population being in its teenage and adolescent ages, is faced with multiple challenges which include but are not limited to HIV AIDS, drugs and substance abuse, school drop out and unwanted pregnancies. The County will give its undivided support to initiatives rolled out by the Government ,NGOs, and CBOs amongst any other

institutions aimed at mitigating these challenges. Some of these initiatives include provision of bursaries, education and campaigns, counselling and sensitization.

Youth Age Group (15–29 years): In 2009, the population of the youth was 312,378. It is expected to grow to 331,694 in 2012, 352,205 in 2015 and 366,579 in 2017. The youth forms 28.43 per cent of the total population in the County. For purposes building and harnessing the potential of this age group, the County will prioritize projects and programmes skewed to vocational trainings, youth empowerment centres and tertiary institutions to cater for this population. These projects and programmes will equip the youths with necessary skills and knowledge for gainful employment and job creation. The County will also put in place strategies aimed at ensuring that that youth get funds to establish income generating activities thus addressing the issue of substance abuse and crime which are a result of idleness and lack of income.

Reproductive Age Group (15–49 years): In 2009, this population was 272,423. This is approximately 24.8 per cent of the total population. It is expected to increase to 289,269 in 2012, 307,156 in 2015 and 319,961 in 2017. An increase in this age group means that the County must increase the available social and public amenities particular the medical services. For instance the County will have to put in place programs and schemes skewed to pre natal and post metal care, general maternal care and family planning. This also means that the County will have to come up with means of ensuring that the services are affordable and easily accessible.

**Labour Force** (15–64 years): The County labour force forms 56.15 per cent of the total population. In 2009 the population labour force stood at 616,825. It is expected to increase to 654,967 in 2012, to 695,468 in 2015 and to 723,385 in 2017. This is an increase of 2%. This increase in labour force translates to the need to put strategies in place to ensure there is significant economic activity which will ensure that there is significant employment creation to absorb the growing labour force. One of the strategies that the County is looking at is establishment of industries aimed at value addition particularly for agricultural products.

**Aged Population** (**65 and above**): In 2009 the population those aged 65 and above was 54,402 which is 5 per cent of the County's total population. This population was projected to be at 57,766 by the 2012, and is projected to be at 61,338 by 2015 and 63,841 by 2017. This

increase will call for enhancement of programmes providing social safety nets such as Cash Transfer Programme for the elderly and those aimed at improving health care.

**Table 5: Population Projections by Urban Centre** 

Urban	2009 (Census)			2012 (Projections)			2015 (Projections)			2017 (Projections)		
Centre	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total
Machakos	74,294	75,747	150,041	78,888	80,431	159,319	83,766	85,405	169,171	87,185	88,890	176,075
Mavoko	74,856	62,355	137,211	79,485	66,211	145,696	84,400	70,305	154,705	87,844	73,174	161,019
Kathiani	1,598	1,767	3,365	1,697	1,876	3,573	1,802	1,992	3,794	1,875	2,074	3,949
Masii	1,188	1,313	2,501	1,261	1,394	2,656	1,339	1,480	2,820	1,394	1,541	2,935
Kangundo- Tala	107,978	110,579	218,557	114,655	117,417	232,072	121,745	124,677	246,422	126,713	129,766	256,479
Matuu	24,983	25,767	50,750	26,528	27,360	53,888	28,168	29,052	57,220	29,318	30,238	59,556
Total	284,897	277,528	562,425	302,514	294,689	597,203	321,220	312,912	634,132	334,330	325,682	660,012

Source: Kenya National Bureau of Statistics, 2013

The County has six main urban centres. Though the total population as at 2009 was 562,425, the same was projected to grow to 597,203 in 2012. The projections of 2015 and 2017 were projected at 634,132 and 660,012 respectively. This represents 51.2 per cent of the total population. The population of Machakos and Mavoko are similar. This can be attributed to the concentration of industries in the two areas as such the attraction of a huge labour force. Though Kangundo –Tala has the highest population the number of industries in the area are not as many as the number of industries in Machakos and Mavoko areas. This can be attributed to the proximity of Machakos and Mavoko to Nairobi and the Mombasa highway. There is need to expand the social amenities in this areas to cater for the increasing population.

#### 1.5.3 Population Density and Distribution

The population density and distribution in the County is driven by the economic activity carried out in the specific sub county. As at 2009 the County had a population density of 177 per Km<sup>2</sup>, it was projected at 188 per Km<sup>2</sup> as at 2012, 200 per Km<sup>2</sup> as at 2015 and 212 per Km<sup>2</sup> as at 2017. See table 5 below.

Table 6: Population and Density Distribution by Constituency/Sub County

Constituency/Sub	2009 (Ce	ensus)	2012 (Proj	ections)	2015 (Proj	ections)	2017 (Projections)		
County	Population	Density (Km²)	Population	Density (Km²)	Population	Density (Km²)	Population	Density (Km²)	
Masinga	125,940	90	133,728	95	141,997	101	150,778	107	
Yatta	147,579	140	156,705	148	166,395	157	176,684	167	
Kangundo	94,367	532	100,202	565	106,398	600	112,978	637	
Matungulu	124,736	216	132,449	229	140,639	244	149,336	259	
Kathiani	104,217	503	110,661	535	117,504	568	124,770	603	
Mavoko	139,502	165	148,128	176	157,288	187	167,014	198	
Machakos town	199,211	215	211,530	229	224,610	243	238,499	258	
Mwala	163,032	160	173,113	170	183,818	181	195,185	192	
Total	1,098,584	177	1,166,516	188	1,238,649	200	1,315,244	212	

Source: Kenya National Bureau of Statistics, 2013

Based on the above table, it is apparent that Kangundo has the highest population density per Km<sup>2</sup>, followed by Kathiani Constituency/Sub County. The difference between Kangundo' which has the highest population density per Km<sup>2</sup> and Masinga which has the lowest is 442. This can be attributed to the fact that Kangundo has good agricultural and fertile soil as well as fertile soil which then acts as an attraction of populace while Masinga does not have favourable climate conditions conducive for agricultural activities.

Table 7: Population Projections by Gender across Constituency/Sub County

Constituency/Sub County	2009 (Census)			2012 (Projections)			2015 (Projections)			2017 (Projections)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total

Total	543,139		1,098,584	76,725	589,792	1,166,517	612,388	626,262	1,238,650	637,380	651,821	1,289,200

Source: Kenya National Bureau of Statistics, 2013

Machakos Town Constituency/Sub County has the highest population of 211,530 which can be attributed to urban settlement and proximity to Nairobi. Kangundo Constituency/Sub County has the lowest population of 110,661 due to its small size relative to the other constituencies and the land tenure system with large areas under coffee plantations.

## 1.6 Human Development Approach

According to the United Nations Development Programme, one of the measures of human development would be the Human Development Index. This index encompasses statistics such as life expectancy at birth, an education index (calculated using mean years of schooling and expected years of schooling), and gross national income per capita. Though this index does not capture every aspect that contributes to human capability, it is a standardized way of quantifying human capability across nations and communities. Aspects that could be left out of the calculations include incomes that are unable to be quantified, such as staying at home to raise children or bartering goods/services, as well as individuals' perceptions of their own wellbeing. Other measures of human development include the Human Poverty Index (HPI), Gender Related Development Index and the Global Empowerment Measure. To note also are the six basic pillars of human development which include; equity, sustainability, productivity, empowerment, cooperation and security.

In view of the foregoing, the human development approach as a measure of economic development has its advantages and disadvantages. However it still gives statistics that can be used in understanding the background of a County. Development is ultimately best measured by its impact on individual lives. To promote human development, the County shall put in place policies which cut across the six pillars of human development referred to above. Since human development as defined by the United Nations Development Programme is a process of enlarging people's choices, the County will take cognizance of the three essential choices that people make. These three choices include; to live a long and healthy life, to acquire better knowledge and to have access to the resources needed for a decent standard of living.

#### 1.7 **Political Units**

Machakos County is divided into eight Sub Counties/ Constituencies which are further broken down into Forty (40) County Assembly Wards as illustrated in Table 6.

Table 8: County's Electoral Wards and Areas by Constituency/Sub County

Constituency/Sub County	County Assembly Wards	Area (Km²)
Machakos town	7	925.2
Kangundo	4	177.2
Kathiani	4	207.1
Mavoko	4	843.2
Yatta	5	1,057.30
Masinga	5	1,402.80
Matungulu	5	577.5
Mwala	6	1,017.90
Total	40	6,208.20

Source: Independent Electoral and Boundaries Commission, 2013

From the above table it is apparent that Machakos Constituency/Sub County has the highest number of County assembly wards however Masinga Sub County/ Constituency covers the largest area. This can be attributed to the fact that the population per km² is higher in Machakos than it is in Masinga. It can also be attributed to the fact that Machakos is a commercial hub and headquarter of the County.

## 1.7.1 Eligible and Registered Voters Constituency/Sub County

According to the statistics from the Independent Electoral and Boundaries Commission as illustrated in table 7 below, the County has 445,866 registered voters against an eligible population of 543,829. This represents 81.99 per cent of the eligible voters.

**Table 9 : Eligible Vs Registered Voters by Constituencies** 

Constituency/Sub County	Eligible Voters	No. of Registered Voters	Percentage
		(2012)	
Masinga	62,344	44,590	71.52
Yatta	73,055	55,847	76.45
Kangundo	46,714	38,947	83.37
Matungulu	61,748	48,266	78.17
Kathiani	51,590	38,413	74.46
Mavoko	69,058	80,174	116.10
Machakos town	98,615	80,164	81.29
Mwala	80,705	59,465	73.68
Total	543,829	445,866	81.99

Source: Independent Electoral and Boundaries Commission, 2013

From the above table, it is apparent that Mavoko Constituency/Sub County had the highest number of registered voters totalling 80,164 which is 16% more than the eligible voters. This can be attributed to the fact that there is an influx of people into Mavoko because of the fact that it is a commercial hub that is the home to very many industries ranging from cement companies to those within the export promotion zone.

## 1.8 Infrastructure and Access

## 1.8.1 Road, Rail Network, Ports and Airports, Airstrips and Jetties

The County has a total road network of 12152.5 Km of which 375 Km is bitumen surface, 10,628Km is gravel surface, and 1149.5 Km is earth surface. Some are good roads including the Nairobi - Mombasa road, Machakos - Kitui road, Machakos - Wote road and Nairobi-Kangundo road. Since majority of the roads within the County are earth and inaccessible during the rainy season; the County has prioritized the upgrading of the roads within the county. The county has already started the upgrading and construction of roads as illustrated in the pictures below.

Constructruction of the road leading to the proposed site for the New Machakos City and Machakos Peoples Park

Constructruction of the road leading to the proposed site for the New Machakos City and Machakos Peoples Park

#### 1.8.2 Posts and Telecommunications

The mobile network coverage within the County is of 85 per cent of the total area. However, areas such as Kibauni and Yathui in Mwala, and Kalama in Machakos have a poor network coverage. The number of land line connection is 327 and its use is on the decline particularly because the use of internet as the main source of communication is on the rise and with the availability of fibre optic then the reliance on the landlines is on the decrease. There are 14 post offices and 20 sub-post offices which are fairly distributed within the County. Radio ownership is 96 per cent which is attributed to low cost of purchase and maintenance while Television coverage is 58 per cent.

#### 1.8.3 Financial Institutions

Because of the fact that Machakos County has very many commercial activities, numerous banks and microfinance institutions have been attracted. Currently there are about ten (10) commercial banks and fourteen (14) microfinance institutions with branches well distributed across the County. These banks and microfinance institutions include, Kenya Commercial Bank, Equity Bank, Cooperative Bank, Barclays Bank, Standard Chartered Bank, KREP Bank, National Bank of Kenya, Faulu Kenya, Kenya Women Finance Trust Kenya, Post

Bank, Family Bank, Small and micro enterprise programme (SMEP), three village banks and several SACCOS which include; Harambee Sacco, Hazina Sacco and Universal Traders Sacco.

#### 1.8.4 Education Institutions

The County has 1,736 Early Childhood Development (ECD) centres, 688 primary schools and 190 secondary schools. The introduction of the free primary education increase the enrolment of children into primary school. This has led to a strain on the infrastructure of the primary schools particularly the classrooms, toilets and laboratories. Though primary education, secondary education and universities has not been devolved to the County government, the County is keen on cooperation with the National government to ensure that the infrastructure mentioned above takes into account the growing enrolment rates. Since the ECD and the village polytechnics have been devolved, the County government has set aside a budget to ensure that the number and quality of ECD centres increases.

The County has one medical training institution (MTC) located in Machakos town and two private universities Daystar University and Scotts Christian University which are situated in Mavoko and Machakos Town constituencies respectively. Other universities such as Nairobi University, Kenyatta University, Nazarene University St. Pauls University and Jomo Kenyatta University of Agriculture and Technology have also opened various campuses in the County. Most of the campuses are situated in Machakos town. The institutions have created opportunities for the youth to acquire skills and knowledge.

#### 1.8.5 Energy Access

Masinga dam is one of the seven forks dams which produces hydroelectricity for the National Electricity Grid and it is located within the County. The connection to the national grid across the County is commendable since, 77 per cent of all trading centres have power. Though connection to individual homes is low and there is need for up scaling the rural electrification programme, the County is keen on cooperating with the Rural Electrifications Authority to ensure that there is energy access across the County. The department responsible for energy has also set aside a budget with respect to the distribution of power across the County. To note also is the fact that following the investment conference held on 15<sup>th</sup> and 16<sup>th</sup> of May 2013, many investors have shown an interest in the energy sector. In

particular investors have shown an interest in the generation of wind energy, solar energy and mini hydros. Following the interests expressed by the investors the County is keen on partnering with the investors so as to see an increase in the availability of energy across the County. The County takes cognizance of the fact that energy plays a very fundamental role in the cost of production of any product which is a key determinant as to whether an investor will set up an industry within the County or not.

Wood, paraffin, charcoal, solar, gas and electricity are the main sources of energy across the County. Though wood is the main source of cooking energy accounting for 81.6 per cent, while the main source of lighting energy is paraffin accounting for 88.1 per cent. From the foregoing it is apparent that diminishing forest coverage within the County can be attributed to the high use of wood as the main source of fuel. The photo below is a cross section of Masinga Dam Hydro-electricity power station.

Masinga Dam Hydro-electricity power station.

#### 1.8.6 Markets and Urban Centres

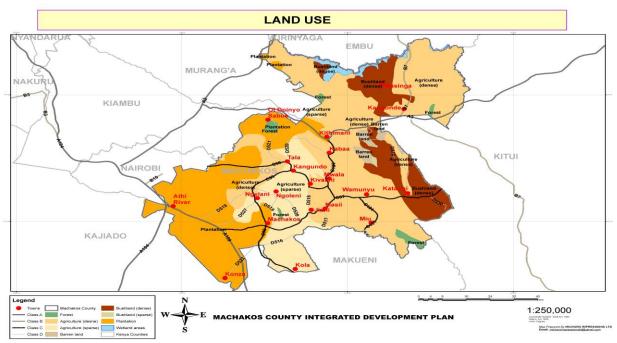

The main urban centres in the County are Machakos, Kangundo-Tala, Athi River, Kathiani Masii and Matuu, however the major urban centres are Machakos and Athi River. Other trading centres include Mlolongo, Kyumbi, Mwala, Mbiuni, Kaewa, Mitaboni and Kithimani among others. For purposes of categorizing markets, the County Finance Act has identified seven (7) urban centres and twenty three (23) peri urban centres.

## **1.8.7 Housing**

Houses in the County are both permanent and semi-permanent. 59.2 per cent of all the homes have brick/block walls, 23.9 per cent stone walled and 12.3 per cent mud / wood walls. Other houses have 1.5 per cent, 2.7 per cent wood wall and corrugated walls respectively. The highest number of houses has earth floor which accounts for 62.4 per cent, others have cement floors accounting for 46.6 per cent. Only 0.4 per cent of the housing have floor tiles. The main roofing materials in the County is corrugated iron sheets which represents 82 per cent of the total houses. Other houses are roofed using grass, tiles, concrete and asbestos sheets which accounts for 14.5 per cent, 1 per cent, 1.2 per cent and 0.5 per cent respectively.

## 1.9 Land and Land use

Land has aesthetic, cultural and traditional values and is a vital factor of production in the economy. Land in the County is broadly used for Forest, Government Reserve, Townships, Game Reserves, Agriculture, Ranches, Industrialization, mining and livestock keeping. The absence of the national land use policy has led to the proliferation of informal settlement, inadequate infrastructure services, congestion environmental degradation, unplanned urban centres, pressure on agricultural land and conflicts. Below is a map showing the land use

**Map 7: Land use within the County** 

## 1.9.1 Mean Holding Size

Out of the 6,028 Km<sup>2</sup> covered by the County, approximately 3,720.2 Km<sup>2</sup> is arable land while approximately 2,436 Km<sup>2</sup> is non arable land and approximately 124 Km<sup>2</sup> is under water mass. Masinga Sub County has the highest water mass since it is the home of Masinga dam and the Seven Folks dam.

#### 1.9.2 Percentage of Land with Title Deeds

According to the available data, the proportion of land with title deeds stands at 28.5per cent with the most affected area without title deeds issued being Athi River, Machakos and Kathiani. The impact of the lack of title deeds in these areas has resulted in the reduced investments despite the investment potentials vested in these areas.

#### 1.9.3 Incidence of Landlessness

The incidence of landlessness has resulted from the influx of people into the County in search of job opportunities. This is prevalence in the urban areas like Machakos Town, Mavoko, Mlolongo and Athiriver. The County is keen to ensure that this issue is dealt with.

## 1.10 Community Organizations/Non –State Actors

## 1.10.1 Co-operative Societies

There are 199 registered cooperative societies engaging in various activities such as agricultural, retail, urban, rural and multipurpose societies. However 62 of these societies are dormant and 17 have collapsed due to poor management and lack of funds. Coffee cooperative societies that had once failed have been revived after the Government waived the farmers' debts.

#### **1.10.2** Non – Governmental Organizations

Non-governmental Organizations are very vital in the development of the County. There are about 150 registered NGOs with only 42 active focused mainly in fight against HIV and Aids education, youth empowerment, provision of water and poverty eradication.

#### 1.10.3 Self Help, Women & Youth Groups

The County has various registered community based organisations. They are estimated to be 1,777 self-help groups, 965 active women groups and 1310 youth groups. Through these groups, women and youths are able to access loans through the Women Enterprise Fund and Youth Enterprise Fund that assist them engage in income generating activities.

## 1.11 Crop, Livestock and Fish Production

## 1.11.1 Main Crops Produced

From Map 6 above, the County has quite a sizeable arable land. In view of this, agriculture is the main activities carried out in a number of sub counties. Agriculture is a main source of job creation. From available statistics, the main cash crops are coffee, French Beans, pineapples and Sorghum which are mainly grown in Kangundo Matungulu, Kathiani, Yatta and Mwala. The County through the department responsible for agriculture seeks to increase the crops grown within the County as well as increasing the productivity of the arable land. The photo below shows a pineapple crop in Matungulu.

Pineapple plantation in Muka Mukuu Matungulu.

The main food crops are maize, beans, Pigeon peas and cassava which are normally grown in small scale. Most of the crops are rain fed and due to the unreliability of the rain there is low production leading to food insecurity. To address the issue of unreliable rainfall, the County has set aside funds for the purchase of drilling rigs which will see to it that there are sufficient boreholes across the County. In addition the department responsible for water has prioritized the de-silting of dams and the construction of sand dams.

The total arable land in the County is 372,020 Ha but only 248,333 Ha has been put under crop production. Total acreage of land under food crops in the County is 161,695 Ha while the total acreage under cash crops 86,638 Ha.

#### 1.11.2 Average Farm Sizes

Because the propensity to engage in commercial activities as opposed to farming, the County has seen a consistent decline in arable land as farmers opt to engage in other commercial activities while abandoning agriculture. The average farm size under small scale farming is 0.756 Ha while that under large scale farm is 10 Ha.

## 1.11.3 Main Storage Facilities

The main storage facilities of food crops are National Cereals and Produce Board silos, found in Machakos, Yatta and Matungulu with a combined capacity of 22500 tonnes. Other storage facilities include on-farm storage, granaries and in-house storage. The County has set aside funds to increase the storage facilities within the County. The department responsible for agriculture has set this as a priority.

#### 1.11.4 Main Livestock Bred

According to the 2009 Kenya Population and Housing Census, the number of animals bred in the County was 230,891. These include: 126,608 Sheep, and 629,974 Goats. In addition, there are 862,592 indigenous Poultry, 4,026 Pigs, 21,336 Donkeys, 46,370 beehives and 20 Camels. There is growth in this sub-sector because of various government programmes to develop this sector and the ready market by the Kenya Meat Commission in Athi River. In addition there are two livestock markets found in Masii and Masinga where farmers can sell

their livestock. The County has made provisions within the budget to avail day old chicks to farmers. The department responsible for agriculture has given this priority.

#### 1.11.5 Number of Ranches

There are thirty (30) ranches in the County categorized on basis of ownership of which two are company owned, three are group ranches while twenty five are individual ranches. Most of the ranches are in Machakos and Mavoko constituencies. The wildlife found here include; giraffe, lions, zebras, hyenas, buffaloes and antelopes.

#### 1.11.6 Main Fishing Activities, Types of Fish Produced, Landing Sites

Though there are not large water bodies available within the County save for Masinga dam, fish farming was introduced t selected farmers within the County and the project has picked up well. However one of the main challenges has been the availability of market for the fish. These projects where under the economic stimulus program where 200 fish ponds where constructed in each Constituency/Sub County. The fish types reared in the fish ponds include mainly tilapia and mud fish although the catfish has been introduced to help in reduction of frogs' invasion in the fish ponds. Below is a fish pond constructed under the economic stimulus programme.

A fish pond in Mwala Constituency

## 1.12 Forestry and Agro Forestry

## 1.12.1 Main Forest Types and Size of Forests

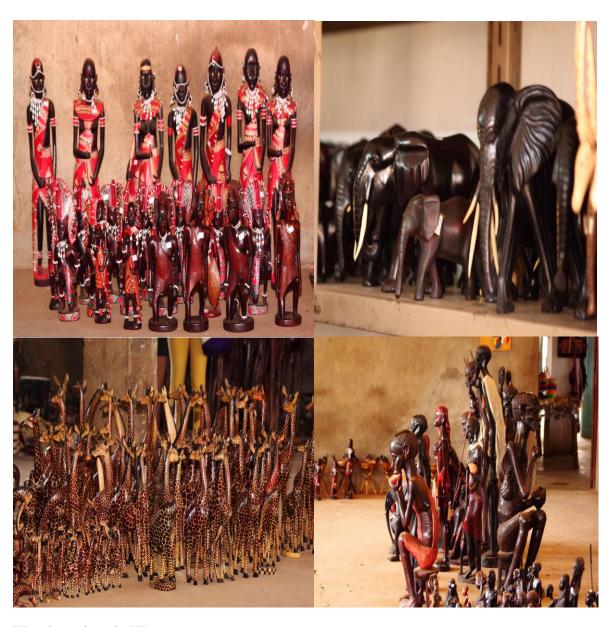

The forests cover an area of 477.617Km<sup>2</sup> which is 7.6 per cent of the County's total land. The forests are categorized as gazetted and un-gazetted. The gazetted forest covers 606.97 ha while the un-gazetted cover 1774 ha. These forests are distributed in various parts of the County.

Iveti hills forest.

## 1.12.2 Main Forest Products

The main forest products are firewood, charcoal, timber for building and construction, poles and posts. Other forest products include production of honey both for domestic and commercial purposes and wood carving in Wamunyu as shown in the Photo of below.

Wood carvings in Wamunyu

## 1.12.3 Promotion of Agro-forestry and Green Economy for:

## a) Income Generating Activities including farm forestry

Income generating activities in the County in this sector include planting of trees such as, eucalyptus, cypress, gravellie and pine for commercial purposes. Other activities include establishment of tree nurseries for seedlings. Fruit trees are also grown and include mangoes, papaws, avocadoes, Guavas and oranges for both income generation and

consumption. This is particularly common in the agricultural areas such as Mwala, Masii, Yatta and Kathiani

#### b) Protection of water catchments areas

The main water catchment areas in the County are Iveti hills, Muumandu, Kalimanzalu and Kiima Kimwe. To protect these areas, planting of indigenous trees has been undertaken in the identified water catchment sites. The County has also set aside funds to promote the planting of trees as such a tree planting campaign will be launched in the course of the 1<sup>st</sup> financial year.

#### c) Prevention of soil erosions

The hilly areas of the County such as Iveti, Kathiani and Muumandu are prone to soil erosion due to the nature of the landscape. Prior to the coming into force of the County government, the national government through the ministry of Agriculture trained farmers on contour farming and terracing of farm lands to cub soil erosion. Sensitization was also carried to encourage farmers to plant 10 per cent tree cover on their land with fruit trees, fodder trees or any other plantation. The County has also seen the need for the prevention of soil erosion as such the department responsible for agriculture will spear head the prevention of soil erosion under the budgetary provisions.

## d) Provision of wood fuel and generation of energy for industries

According to the Kenya Integrated Household Budget Survey Population 81.6per cent of households use fuel wood for cooking while 1.2 per cent use the same for lighting. The demand for wood fuel is therefore increasing especially with the frequent increase in fuel and gas prices. To meet this demand, trees have been planted in small portions for provision of wood for home consumption and charcoal burning. The County department in charge of energy and natural resources has prioritized the search for alternative sources of fuel so as to reduce the reliance on wood fuel across the county.

#### e) Growing of fruit trees for improved nutrition

The proximity of the County to Nairobi and JKIA has stimulated the growing of fruit trees in the County. Grafted fruit trees that produce grapes, straw berry, mangoes, and oranges

have been planted. The County produces enough fruits for domestic use and surplus for export to Nairobi. Fruit farming is practiced in all the constituencies in the County expect Mavoko Constituency/Sub County. The photo below shows a grape vine crop in Yatta.

Grape farming in Yatta

#### f) Beautification activities

The image of the County is very important and on the basis of this the County is keen on ensuring that numerous beautification activities are carried out. For instance the County plans to have flower beds along the entire Machakos highway as well as street lights. The Count through the County department responsible for environment will be launching tree planting exercises. The County will partner and cooperate with other institutions such as schools, local authorities, other organizations and volunteers such as NGOs, FBOs, CBOs, Self-help groups, women and youth groups. All major roundabouts in Machakos town are landscaped and maintained through a partnership between the Municipal council and local entrepreneurs.

#### g) Animal feeds production ventures

The County has prioritized the production of animal feeds through the entire County. The department responsible for livestock has made provisions with respect to increasing the animal feeds production while at the same time increasing the productivity of livestock farming. The fact that the increase of livestock in the county highly depends on the availability of animal feed is an indication of the priority given to the production of the

same. Some of the plant fodder trees which various National Government agencies had already recommended to the farmers to grow includes *Calleindra ,Sesbania sesban, Leucaena leucacephella*. The County government will continue to increase the production of these plant fodders through encouraging the farmers to plant them.

## h) Growing and processing for medicinal purposes/value plants and products

Since time immemorial, the communities' resident within the County have always relied on different medicinal plant to treat different diseases. Some of these medicinal plants *neem* tree, (*Azadirachta indica*,) and *Moringa oleifera*. These communities would use; the leaves, or the stem or the bark of the medicinal tree to get the intended results. The County is keen to identify from these different parts of the medicinal trees the specific active ingredient in them that makes them medicinal. In view of this the County will promote cooperation with other institutions and agencies to conduct research so as to promote the growth and processing of these parts so as to promote their use. This will lead to the development of research centres in the County.

## 1.13 Environment and Climate Change

## 1.13.1 Major Contributors to Environmental Degradation

Environmental degradation across the entire world is a major concern. The County is not exempted from this degradation. This is particularly so because the County is the main supplier of sand. It is also the home of most of the cement factories that supply cement across the entire county, East African region and COMESA. This obviously has a negative impact on the environment particularly the quality of water because of the emissions and discharges from these industries.

In addition to the foregoing, most of the locals use firewood and charcoal as the source of fuel. This has led to deforestation in various areas thus leading to expansive soil erosion. The most affected areas are Kibauni forest, Yathui, and Muumandu hills.

The photo below shows men harvesting sand.

Sand harvesting at Thwake River in Kathiani/Kangundo

## 1.13.2 Effects of Environmental Degradation

The effects of environmental degradation are felt across the globe. As mentioned above, Machakos County has had its share of degradation. For example, sand harvesting has resulted in the drying up of some of the rivers. This has caused the surrounding communities to encounter water supply scarcity because of the substantial reduction of the water. An example of such a river is Thwake. Most of the factories and industries within the County have a tendency of polluting water bodies within their vicinity. In addition there are treatment ponds at Kariobangi that have polluted Mitheu and Iliyini Rivers. Other environment issues of concern in the County include; the mushrooming of slums and the destruction of forests/catchment's areas particularly due to farming on the slopes.

Gullies due to soil erosion in Kibauni Forest

#### 1.13.3 Climate Change and Its Effects in the County

Climate change threatens to adversely affect economic growth in the County and endangers it from becoming a prosperous County with a high quality of life for all its citizens. The cumulative impacts of climate change have the potential to reverse much of the progress made towards the attainment of the Millennium Development Goals (MDGs) and Vision 2030. The effect of the climate change has been increased periods of drought, erratic rainfalls and increase in temperatures which have led to low agricultural productivity.

#### 1.13.4 Climate Change Mitigation Measures and Adaptation Strategies

The County has taken cognizance of the fact that climate change impacts have to be mitigated as such various strategies to address this issue have to be adapted. In view of this, the County will launch several tree planting programmes. The County will also put in place sand harvesting regulation. The County will also put in place sensitization programs across the entire County to sensitize residents on the measure and strategies' that the County has adapted to mitigate climate change.

## 1.14 Mining

## 1.14.1 Ongoing Activities

The County is well endowed with mineral resources that are a valuable input to the building and construction industries. The large deposits of sand, limestone and granite have attracted all the major cement factories in Kenya including Bamburi, East Africa Portland, Mombasa Cement, Simba Cement and Savanna to Athi River where these minerals are found. The photo below shows the cement manufacturing plant of Bamburi Cement in Athi River.

Bamburi Cement factory in Athi River

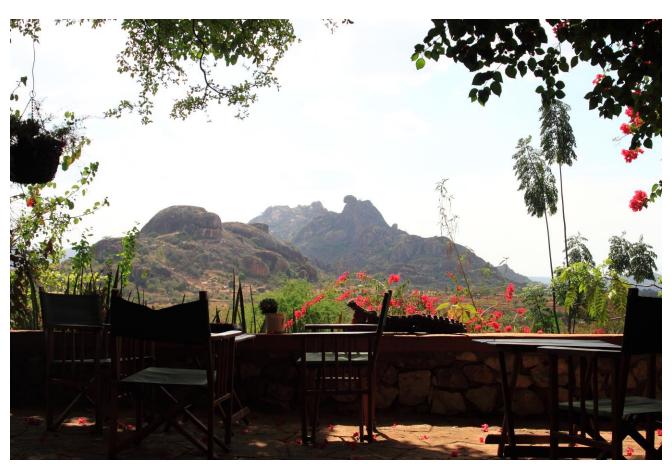

#### 1.15 Tourism

#### 1.15.1 Main Tourist Attractions, National Parks/Reserves

The County has a number of tourist attraction sites which have not been exploited due to poor road networks, and inadequate funding. The major tourist attractions include Ol Donyo Sabuk National Park, Iveti hills scenery, Kyamwilu gravitational defying area and the wood carving in Wamunyu. The photographs below shows some of the tourist attractions;

Machakos Golf Club

Kipwa Eco – Lodge in oldonyo Sabuk

Komarock Shrines

Macmillan Castel

Masinga Dam

Oldonyo Sabuk National Park

Seventeen Falls

Wamunyu Carvings

#### 1.15.2 Main Wildlife

The County is home to various animals which are in and outside the park. The main wildlife include, Zebra, Wildbeast, Eland, Giraffes, Thomson's Gazelle, Grant Gazelle, Elephants, Buffalo, Waterbuck, Lion, Cheetah, Leopard, Warthogs, Ostriches, Impalas, DikDik, Hyena, and Reedbucks.

1.15.3 Tourist Class Hotels/Restaurants, Bed Occupancy

Tourist class hotels found in the County include Gelian Hotel, Kyaka Hotel, Garden hotel, Tea Tot hotel, Maanzoni lodge, Lysak Haven Park hotel, Lukenya Get Way, Dallas Hotel, and Masinga Dam Resort, The bed capacity ranges from 200 to 300. The County also has many boarding and lodgings in the major towns.

Masinga Dam Resort

## 1.16 Industry

The County has 114 manufacturing industries mostly in Mavoko Constituency/Sub County. They include Mabati Rolling Mills, Kenya Meat Commission, Agrichem & Tools Ltd, Athi River Steel plant, EAPCC, Bamburi Cement, Mombasa Cement, Savannah Cement, Simba Cement, Primarosa, Kenya Meat Commission (K.M.C) among others. They provide ready market for the large mineral deposits such as limestone, ballast and sand found in the County. The number of industries is bound to increase drastically because of the New Machakos City which will be set up as well as the Investment Program that will be launched in the course of the year.

Kenya Meat Commission

## 1.17 Employment and Other Sources of Income

## 1.17.1 Wage Earners

From the statistics that are available with respect to employment and other sources of income, it is apparent that the wage earners are few because of the low number of formal employment opportunities within the County. However these employment opportunities will increase upon the construction of the New Machakos City and the commencement of the Investment Program once launched. Currently the wage employment constitutes of only 11 per cent of the total number of people who can be employed. Most of the wage earners are casual labourers working in the construction industry and the farms.

## 1.17.2 Self Employed

Due to the scarcity of formal jobs, most residents living in the rural areas within the County engage in agricultural activities some in terms of small scale farming or large scale farming, while those living in the urban centre engage in small businesses. The national government has to date sought to enhance self-employment and has put in place the Youth Fund, UWEZO fund and Women Funds has given out soft loans to the youth and women groups and other self-help groups to assist them in starting small businesses.

#### 1.17.3 Labour Force

The population of the people willing and able to work stand at 654,967 which is 56.15 per cent of the total County population. With the steady growth of the labour force, there will be a major challenge of creating employment opportunities in the County.

## 1.17.4 Unemployment Levels

The unemployment rate in the County is high at approximately 52 per cent. There is a mismatch between the population growth which is estimated at 2 per cent, and the rate of job creation. This situation is likely to cause discontent in the County as most those unemployed are youth, who are likely to engage in unproductive behaviour. The high rate of unemployment is attributed to low absorption rate in the agriculture and commercial sectors and preference for white colour jobs by the youth.

#### 1.18 Water and Sanitation

#### 1.18.1 Water Resources

Water resources in the County are under pressure from agricultural chemicals and urban and industrial wastes, as well as from use for hydroelectric power. The County has two permanent rivers namely Athi and Tana. Tana River is mainly used for hydroelectricity generation while Athi River is used for domestic and industrial uses. There are also several dams that serve as water resources and springs which are found in the hilly areas. Underground water sources supplement surface water sources.

#### 1.18.2 Water Supply Schemes

There are established water supply schemes in every sub-County of the County. There are three water supply schemes in the County, Kayata in Matungulu, Yatta, and Kabaa in Mwala. There are various community management committees in various water catchments areas in the County. They help in protection of water catchments areas.

#### 1.18.3 Water Sources

The main water sources are rivers, dams and boreholes. The average distance to the nearest water source in the County is 5Km. Fetching of water is mainly done by women especially in the rural areas who end up spending so much of man-hours on this activity.

#### 1.18.4 Sanitation

The County has only two sewer lines; in Athi River and Machakos. Machakos is partially connected to the sewer systems. Parts of Kariobangi and Mjini are not connected and as high as 78.3 per cent of households use pit latrines. Other households use covered pit latrines, uncovered pit latrines, VIP latrine and flush toilets accounting for 47.8 per cent, 30.5 per cent, 6.2 per cent and 5.9 per cent use respectively. Garbage disposal in the County is mainly by farm garden which accounts for 48.4 per cent. Communities use other means such as local authority, private firms, garbage pit and burning and public garbage heaps.

#### 1.19 Health Access and Nutrition

#### 1.19.1 Health Access

Access to health facilities has been improving with time. Many health facilities have been constructed under the Economic Stimulus Programme (ESP) and Constituency/Sub County Development Fund (CDF). The County has one level 5 hospital situated in Machakos, four level 4 hospitals in Kathiani, Mwala, Matuu and Kangundo, 43 public health centres, 83 dispensaries, 9 private nursing homes, and 95 private clinics spread all over the County. The doctor to patient ratio is 1:60,000. The County does not however have enough health facilities especially in the rural areas. 61.5 per cent of the residents cover 5Km and more to the nearest health facility while 35 per cent and one per cent of the residents take 1.1-4.9 Km and 0-1 Km respectively.

#### **1.19.2** Morbidity

The most prevalent disease is malaria which accounts for 40 per cent of the total cases reported. Respiratory complications account for as high as 24 per cent. Other diseases are flu accounting for 15.9 per cent stomach-ache and Diarrhoea accounting for 5.2 per cent and 3.1 per cent respectively.

#### 1.19.3 Nutritional Status

Nutritional status is very low especially in the rural arid and semi-arid areas of the County. The predominant forms of malnutrition in the County are stunting, underweight and acute malnutrition

## 1.19.4 Immunization Coverage

All the health institutions in the County offer immunization services and this have led to high immunization coverage. 89.5 per cent of the children under five have been fully immunized.

#### 1.19.5 Access to Family Planning Services/Contraceptive Prevalence

The contraceptive prevalence rate, especially use of family planning methods stands at 49.7 per cent. This can be attributed to the long distances to a health facility. There is therefore need for more campaigns to ensure the remaining percentage of people accepts and start using various methods of family planning.

## 1.20 Education and Literacy

#### 1.20.1 Pre-School Education

The County has a total population of 155,230 children falling within the age group of 3 to 5 (pre-school). This consists of 78,478 males and 76,752 females. There are 1736 ECD centres and 2287 ECD teachers in the County. The County has an enrolment rate of 43.1 per cent and 41.1 per cent for boys and girls in ECD. The transition rate is 45 per cent. There is need for strategies to ensure that enrolment and transition rates improve to more than 70 per cent.

#### 1.20.2 Primary Education

There are 688 primary schools in the County. The enrolment rate is 85 per cent for both girls and boys in primary schools which can be attributed to the introduction of free primary education. The transition rate from primary school to secondary school is 57 per cent. Infrastructure in schools has also improved through devolved funds e.g. Constituency/Sub County Development Fund (CDF). However, the County still needs to invest in the provision of additional education facilities because of the increasing school going population.

## **1.20.3** Literacy

The literacy level in the County is relatively high with those who are able to read and write representing 82.3 per cent. Other statistics on literacy are as follows: 12.2 per cent of the total population is not able to read; 91.8 per cent of the total population is able to write while 7.6 per cent cannot write. The high literacy rates are as a result of continued investment in the education sector and there is need for more investment to ensure the literacy levels gets to 100 per cent.

## 1.20.4 Secondary Education

There are 190 secondary schools both private and public in the County. The enrolment rate in secondary schools is 76 per cent and the transition rate to tertiary is 54 per cent. The number of teachers in the County stands at 1,895 and the teacher/pupil ratio is 1:51.

## 1.20.5 Tertiary Education

The County has three fully fledged universities, Machakos Technical University, Daystar University, and Scott Christian University located in Mavoko and Machakos constituencies respectively. There are other several university colleges located in the major markets. There is one public medical training college and one teacher training college.

Machakos Technical University

# **CHAPTER TWO:**

# **COUNTY SPATIAL FRAMEWORK**

#### 2.0 Introduction

Spatial planning identifies development projects and programmes and locates them on specific geographic areas in a County or territory. Spatial plans also display the necessary co-ordination between various sectors, e.g. transport networks and their relationship to agricultural production and markets; industrial areas and energy projects that supply them; zoning of urban-versus-rural areas; public facilities and private home developments.

Spatial planning is a useful tool in setting development priorities of a region and cocoordinating implementation of these priorities amongst a multiplicity of actors. It provides the needed overall integrated spatial framework for co-coordinating the various development efforts by different agencies so as to have sustainable development within the County.

#### **Objectives of County spatial planning include:**

- To identify the spatial distribution of the resources within the County, their level of utilization and potential;
- To assess the existing infrastructure their current conditions, capacity and projected demand;
- To identify fragile ecosystems and suggest intervention measures for their protection and conservation;
- To investigate human settlement trends and propose an appropriate hierarchy or urban centers that will spur rural development;
- To asses capacity of the existing institutions and organizations and suggest strategies to enhance their performance;
- To suggest an integrated spatial framework that will guide the sustainable utilization of the regional resources, bring services closer to the people;
- Spur rural-urban inter-linkages and hasten economic growth and development; and.
- Suggest priority areas for intervention.

The County shall implement the GIS for purposes of better spatial planning.

## **CHAPTER THREE**

# LINKAGES WITH VISION 2030, MEDIUM TERM PLANS, MILLENNIUM DEVELOPMENT GOALS, THE CONSTITUTION OF KENYA.

#### 3.0 Introduction

For the County Integrated Development Plan to be all rounded, there is a need to link it with Vision 2030 which is the blue print for the development of the Country, the Medium Term Plans derived from Vision 2030, the Millennium Development Goals, the Constitution of Kenya 2010, sectoral plans, urban and city plans within the County.

#### 3.1 CIDP Linkage with Kenya Vision 2030 and Medium Term Plan

Vision 2030 is anchored on three key pillars: Economic; Social; and Political. Each pillar has a clearly set out objective as explained below,

- a) The objective of the Economic Pillar is to attain a growth rate of 10% per annum on average with respect to the Gross Domestic Product (GDP). It also aims to sustain that growth till 2030. The sectors that have been prioritized under this pillar include: Infrastructure; Tourism; Agriculture; Trade; Manufacturing; Business Process Outsourcing and Information Technology enabled Services and Financial services.
- b) The objective of the Social Pillar is investing in the people of Kenya in order to improve the quality of life for all Kenyans by targeting a cross-section of human and social welfare projects and programmes. The sectors that have been prioritized under this pillar include; Education and Training; Health (Medical Services and Public Services and Sanitation), Environment; Housing; Gender, Children and Social Development; Labour and Employment; Youth and Sports.
- c) The Political Pillar objective is moving to the future as one nation and envisions a democratic system that is issue based, people centred, results oriented and is accountable to the public. The pillar is anchored on transformation of Kenya's political governance across five strategic areas; the rule of law the Kenya Constitution 2010; Electoral and political processes Democracy; Public Service delivery; Transparency and accountability Security, peace building and conflict management

Since Vision 2030 implemented in phases of five years, the period 2013 – 2017 fall in the second phase whose theme is *'Transforming Kenya: Pathway To Devolution, Socio-Economic Development, Equity and National Unity"*. This County Integrated Development Plan has taken into account the Second Medium Term Plans (MTP) which broadly focus on; Constitution and devolution; National Cohesion; Security; Drought Emergencies and Food Security; Equity in access to opportunities and lower costs of living, Health; Education; Infrastructure; Industrialization; Improved Trade; Investment to support growth; Competitiveness and rebalancing growth; Strengthening social protection; Governance and public financial management reforms; Land reforms and Arts, sports and culture.

#### 3.2 CIDP Linkage with Constitution of Kenya 2010

The Fourth Schedule of the Constitution of Kenya (2010) clearly sets out the function that will be carried out by the National government and that which will be carried out in the County governments. In view of this the CIDP is linked to the fourth schedule of the Constitution. A total of 14 functions have been devolved to the counties namely; i) agriculture; ii) county health services iii) control of air pollution, noise pollution, other public nuisances and outdoor advertising; iv) cultural activities, public entertainment and public amenities; v) county transport; vi) animal control and welfare; vii) trade development and regulation; viii) county planning and development; ix) pre-primary education, village polytechnics, homecraft centres and childcare facilities; x) implementation of specific national government policies on natural resources and environmental conservation; xi) county public works and services; xii) firefighting services and disaster management; xiii) control of drugs and pornography and finally xiv) ensuring and coordinating the participation of communities and locations in governance at the local level and assisting communities and locations to develop the administrative capacity for the effective exercise of the functions and powers and participation in governance at the local level.

The national government has since 2010 enacted Acts of parliament to address the issues of devolution. The main Acts include; Urban Areas and Cities Act, 2011; The County

Governments Act, 2012; The Transition to Devolved Government Act, 2012; The Intergovernmental Relations Act, 2012 and The Public Finance Management Act, 2012.

The PFM Act 2012 provides for effective and efficient management of public resources. Article 125 of the Act requires the budget process for County governments in any financial year to consist of integrated development planning process which include long term and medium term planning as well as financial and economic priorities for the County over the medium term. Articles 126 of the Act further obligates each County government to prepare an integrated development plan that includes strategic priorities for the medium term that reflect the County government's priorities and plans, a description of how the County government is responding to changes in the financial and economic environment; and, programmes to be delivered. It is against the provisions of the PFM Act of 2012 as referred to above that this CIDP has been developed.

The County Governments has two levels namely the County Executive Committee which is comprised of the Executive Committee Members and County Assemblies which is comprised of the elected ward representatives. The mandate of the County Executive Committee is to supervise the administration and delivery of services to citizens as well as conceptualize and implement policies and County legislation. The County Assembly is the County legislative organ and plays an oversight role on all County public institutions including the urban areas and cities.

#### 3.3 Implementation of the MDGs at the County Level

#### 3.3.1 Overview

The Millennium Development Goals (MDGs) are internationally accepted standards for measuring progress towards poverty alleviation. They were agreed upon at the UN Millennium Summit in 2000 where world leaders made and adopted a declaration to 'free *all men, women and children from the abject and dehumanizing conditions of extreme poverty*'. The eight MDGs to be met by 2015 are drawn from this declaration. The eight MDGs have time-bound targets and indicators for measuring progress in the areas of: poverty alleviation, education, gender equality and empowerment of women, child and maternal health, reducing HIV/AIDS and communicable diseases, environmental sustainability, and building a Global

Partnership for Development. Kenya is one of the signatories to the Declaration and is committed to achieve the MDGs. This commitment has resulted in commendable progress in achieving a number of these goals though some are still facing challenges. As we pursue development agenda at the County level, we need to fast track the achievement of these goals.

With only two years to the end of the MDGs period, a group of world leaders appointed by the UN Secretary General are working together to find the best way to tackle global agenda on development after 2015. The post 2015 agenda will have shared responsibilities for all countries and with the fight against poverty and sustainable development at its core. This agenda will be cascaded in the Medium Term Plans and County Integrated Development Plans in order to build upon commitments already made and contribute to the acceleration of achievement of the targets both at the national and County levels.

## 3.3.2 Implementation of the MDGs at the County Level

The County has taken into account the MDGs while deciding on the project and programs that it will be implementing. The policies and strategies to be implemented by each county department have been informed largely by the MDG's. Under each goal the county shall undertake specific programs as highlighted below;

#### **Goal 1: Eradicate Extreme Poverty and Hunger**

Though the County is still experiencing high poverty levels with the absolute poverty being 60.7 per cent with the urban poor being 43.1 per cent and rural poor being 59.6 per cent, the County has prioritized the establishment of programs aimed at ensuring that poverty levels decrease. Some of the programs put in place is purchasing of tractors and ploughing the farms for free for all farmers across the County. In so doing the County will ensure that there is sufficient food for the farmers. This will also mean that the farmers will have more produce both for consumption and sale. In addition to ploughing the farms for free the County shall also give subsidized fertilizer and seeds. The County shall also launch a programme for the giving of one day old chicks to farmers. The County has also made budgetary provisions for the purchase of drilling rigs which shall be used to sink boreholes across the counties thus ensuring that there is the provision of water sufficient for household

consumption and irrigation. The County has also made budgetary provisions for the desilting of sand dams. Under the County department responsible for trade and industrialization, markets are being built across the County and the construction of industries. The County will also launch a program on water harvesting and intends to purchase water tanks for all public schools. The County will also launch feeding programs for the candidates across the County. Also emphasis on research and funding in provision of drought resistant crops is being put in place. The county government will also explore ways of finding potential local and foreign markets for fruits produced by local farmers.

#### **Goal 2: Achieve Universal Primary Education**

Though the Free Primary Education Programme (FPEP) being implemented by the national government has contributed to the achievement of this goal in the County, The County has also made budgetary provisions to see the actualization of this goal in a deeper dimension. To this effect the County will purchase Continuous Assessment Tests (CAT) for the children to do. The County takes cognizance of the fact that this function has not been devolved but be it as it may the County shall cooperate with the National Government to ensure that more primary schools are built, more classrooms and related amenities, bursaries as well as introduce a feeding program for KCPE and KCSE candidates to arrest drop-out rate caused by famine and drought in Machakos.

#### **Goal 3: Promote Gender Equality and Empower Women.**

To address this goal, the County shall incorporate boards within the County. The purpose of the boards shall be to ensure that gender equality is upheld and women are empowered financially and otherwise. The national government launched the Women Enterprise Development Fund which the County shall ensure has been fully utilized by the women in the County to the fullest extent possible. The County has ensured the promotion of gender equality that the County Executive Committee has achieved 50 percent women representation. In addition under the county department of education, youth empowerment and social welfare, the county shall provide grants to both genders as well as the youth. The County shall also give the youth, women and person with disability the opportunities to participate in supply and delivery of good and services.

#### **Goal 4: Reduce Child Mortality**

The County is addressing this MDG through immunization programme. This programme is free to all children under five years. The infant mortality rate and the under-five mortality rate in the County is 44/1,000 and 82/1,000 respectively. The immunization coverage in the County is 85 per cent.

#### **Goal 5: Improve Maternal Health**

The indicators of maternal health are quite low in the County. For instance, only 29.2 per cent of the deliveries are in a health facility. The County Government has taken various measures to improve maternal health. They include; construction of new health facilities through CDF, ESP and Community Development Trust Fund (CDTF). In addition a lot of campaigns have been undertaken within the County on the importance of mothers to deliver in health facilities. The County is planning to purchase 70 number ambulances, one for each of the 69 County Locations to facilitate timely transport of mothers who are due for delivery from the rural areas to the maternity facilities.

#### Goal 6: Combat HIV/AIDS, Malaria and Other Diseases

The HIV prevalence rate in the County is 4.6 per cent. The National Aids Control Council has put in place various programmes within the County geared towards reducing the prevalence of HIV/AIDS. These programmes include setting up Voluntary Counseling and Testing (VCT) centres. Free antiretroviral drugs are provided to patients in designated health facilities. The government is also supporting the Orphans and Vulnerable Children (OVCs) through cash transfer and other mitigation programmes such as income-generating activities funded under Total War against Aids (TOWA).

In addition through the Ministry of Public Health and Sanitation the County is implementing the Insecticide Treated Nets Programme to encourage the community to sleep under the treated mosquito nets especially, pregnant mothers. This will reduce the prevalence of malaria which is 40.9 per cent in the County.

#### **Goal 7: Environmental Sustainability**

The forest cover in the County is 7.6 per cent. To achieve the 10 per cent cover, the County through the forestry department has been encouraging farmers to plant trees especially in water catchment areas. Afforestation is also being done in the degraded forests. The County shall develop and enact laws to ensure environmental sustainability. The national government has already enacted certain laws which the County shall use in the interim pending the development of their own laws. The County for instance is in the process of putting in place a law to govern sand harvesting in the County. The County has made budgetary provisions to launch a tree planting program

#### Goal 8: Develop a global partnership for development

The County has made tremendous efforts in creating an investors' friendly environment. I.e. in tandem with the development plan, one very successful County Investor Forum was conducted in May 2013 as a way of unveiling the investment potential of the County. In addition, strategies have been put in place to have various investor for conducted in the plan period.

Also, to create reliable sources of information and research, the County has put in place modalities to promote internet connectivity through development of a County website and establishment of a Data Centre.

The County also intends to put in place a Machakos Investment Promotion Board and an Investment Centre to address all the needs of the investors and to ensure investor friendly environment.

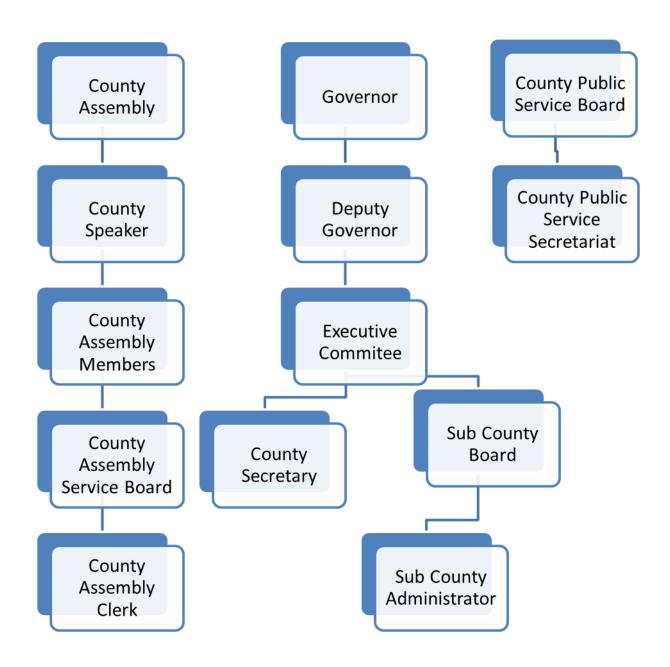

# CHAPTER FOUR: IMPLEMENTATION FRAMEWORK

## 4.0 Introduction

The chapter outlines the institutional framework and organizational structure that will be followed in implementing the plan. It also outlines the role of stakeholders in the County

# 4.0 Organizational Structure

The County will implant the projects using the structure as shown below;

#### **Governor:**

The County Governor is the Chief Executive of the County.

#### **Duties and responsibilities:**

- 1. Diligently execute the functions and exercise the authority provided for in the Constitution and legislation;
- 2. Perform such State functions within the County as the President may from time to time assign on the basis of mutual consultations;
- 3. Represent the County in national and international fora and events;
- 4. Appoint, with the approval of the County assembly, the County executive committee in accordance with Article 179(2)(b) of the Constitution;
- 5. Submit the County plans and policies to the County assembly for approval;
- 6. Consider, approve and assent to bills passed by the County assembly;
- 7. Chair meetings of the County executive committee;
- 8. Submit to the County assembly an annual report on the implementation status of the County policies and plans;

#### **Deputy Governor:**

The Deputy County Governor is the Deputy Chief Executive of the County.

### **Duties and responsibilities:**

- 1. The deputy governor shall deputize for the governor in the execution of the governor's functions.
- 2. The governor may assign the deputy governor any other responsibility or portfolio as a member of the County executive committee.

#### **County Executive Committee:**

The County Executive Committee is responsible for playing the role of the County cabinet.

#### **Duties and responsibilities:**

- 1. Implement County legislation;
- 2. Implement, within the County, national legislation to the extent that the legislation so requires;
- 3. Manage and coordinate the functions of the County administration and its departments; and

- 4. Perform any other functions conferred on it by this Constitution or national legislation.
- 5. Prepare proposed legislation for consideration by the County assembly.
- 6. Provide the County assembly with full and regular reports on matters relating to the County.
- 7. Supervise the administration and delivery of services in the County and all decentralized units and agencies in the County;

#### **County Secretary**

#### **Duties and responsibilities:**

- 1. Be the head of the County public service;
- 2. Be responsible for arranging the business, and keeping the minutes, of the County executive committee subject to the directions of the executive committee;
- 3. Convey the decisions of the County executive committee to the appropriate persons or authorities; and
- 4. Perform any other functions as directed by the County executive committee

#### **County Chief Officers:**

#### **Duties and responsibilities:**

- 1. The administration of County Ministry
- 2. Formulation and implementation of effective programmes to attain Vision 2030 and sector goals
- 3. Development and implementation of strategic plans and sector development plans
- 4. Implementation of policies and regulations
- 5. Providing strategic policy direction for effective service delivery
- 6. Ensuring compliance with the national values and principles of good governance

# 5.2 Stakeholders in the County

There are various stakeholders in the County who are involved in various sectors. The role of the stakeholders is to supplement the County Government in various development efforts.

# **CHAPTER FIVE:**

# RESOURCE MOBILIZATION FRAMEWORK

## 5.0 Introduction

This chapter contains the budget projection required for managing the County Government.

It includes the resources that are available for capital projects development, the strategies for revenue enhancement and their projections for the plan period. It also includes strategies for asset management, financial management, and capital financing. Revenue enhancement strategies, resource sharing with the central government, means of attracting external funding are also included.

# **5.1** Capital Projects Funding

Capital projects contained in this plan will be funded through budgetary allocation from the National Government; County revenue sources, grants and loans from development partners.

# 5.2 Strategies for Raising Revenue

Prior to the coming into force the County governments, the National government made budgetary allocations to the Counties. As such the County expects to gain from resources mobilized by the National Treasury. According to Article 226 of the Constitution, it is the duty of the National Treasury to mobilize domestic and external resources for financing national and County government. Loans will be another source of funding. The County Treasury is in charge of mobilizing resources for funding the budgetary requirements of the County government and putting in place mechanisms to raise revenue and resources.

Since the allocations from the national government will not be sufficient, the County shall pursue alternative modes of generating revenue. Some of these modes will include;

- 1. Increasing the revenue that can be collected in the county e.g. through increasing the markets, having a structured mode of sand harvesting
- 2. Entering into PPPs with both local and private investors
- 3. Encouraging BOTs
- 4. Partnering with local and foreign organizations
- 5. External funding.

Machakos County will make use of the already developed framework with respect to PPPs, host investor forums and conferences to woo investors, conduct feasibility studies to identify

the comparative advantages of all the wards thus mapping the resources of the County, the County will also develop a legal regulatory framework to encourage investors. For instance the County will develop the Machakos Investment Promotion Act, Industrial Policies just to name some of them.

The County also expects to receive grants from development partners for various projects. It should be noted that under the PFM Act 2012, regulations approved by the parliament shall provide for the administration, control and management of grants, including procedures to ensure that grants are spent on the basis of the Integrated County Development Plan.

The County Government of Machakos, therefore, will mobilise financial resources through local revenue, the allocation from National Government, Public Private Partnerships (PPPs) and development partners.

# 5.3 Assets and Financial Management

Article 201 of The Constitution of Kenya, 2010 lays down the principles of Public Finance which include openness, accountability and public participation in financial matters. It recommends a public finance system which promotes an equitable society.

The Public Finance Management Act, 2012 Section 103 establishes the County Treasuries. The County Treasury, subject to the Constitution, will monitor, evaluate and oversee the management of public finances and economic affairs of the County government including developing and implementing financial and economic policies in the County; preparing the annual budget for the County and coordinating the preparation of estimates of revenue and expenditure of the County government; coordinating the implementation of the budget of the County government; mobilizing resources for funding the budgetary requirements of the County government and putting in place mechanisms to raise revenue and resources.

The County Treasury will also ensure compliance with accounting standards prescribed and published by the Accounting Standards Board from time to time. It will also ensure proper management and control of, and accounting for the finances of the County government and its entities in order to promote efficient and effective use of the County's budgetary resources.

## **5.4** Resources from the National Government

To support the devolution framework, several acts of parliament have been enacted: The Urban and Cities Act 2011; The County Government Act, 2012; The transition to Devolved Government Act 2012; The Inter-government Relations Act, 2012; The Public finance management Act, 2012; The County Government Public Finance Transition Act, 2013. The Constitution and many of these laws require "Integrated Development Planning" as the process of enhancing efficiency and effectiveness of budget fund and mechanism for addressing the County mandate under the Constitution of Kenya 2010.

Release of funds from the national government will depend on whether a County has developed an integrated development plan. Integrated development planning is defined as a process through which efforts at national and devolved levels of government and other relevant public institutions are coordinated at local level, and through which economic, social, environmental, legal and spatial aspects of development are brought together to produce a plan that meet the needs and targets set for the benefit of local communities.

Part XI of the County Government Act, 2012 obligates the County government to ensure harmony of the integrated development plan with the national plans, and other sub-County plans such as sectoral plans, spatial plans and urban and city plans which are located in the County. In accordance with article 106, the plan will thereby provide mechanism for linking the County and national planning processes with the MTEF budgetary system.

The budget process for County governments consists of an integrated development planning process, which include both long-term and medium-term planning. The integrated plan establishes financial and economic priorities for the County over the medium term and makes an overall estimation of the County government's revenues and expenditures.

According to CRA, Machakos County will receive a funds allocation each financial. This allocation will be based on the County population (45%), poverty index (20%), land area (8%) basic equal share (25%) and fiscal responsibility (2%). Although prorated, prudent public resource management as stipulated in the PFM Act, 2012 will determine the amount the County receives in future on fiscal responsibility.

# CHAPTER SIX: DEVELOPMENT PRIORITY PROGRAMMES AND PROJECTS

#### **6.0 Introduction**

The chapter sets out the priority projects and programmes. The chapter identifies the ongoing projects, new projects proposals and flagships projects. The projects and programs were identified through development consultation forums which included the participation of a wide cross section of stakeholders in all the forty County wards. The information is presented guided by the guidelines communicated by the national treasury with respect to the preparation of Medium Term Expenditure Framework (MTEF) budgeting system. The MTEF budgeting system has identified nine sector working groups namely Agriculture and Rural Development; General Economic, Commercial and Labor Affairs; Energy, Infrastructure and ICT; Environmental Protection, Water and Housing; Health; Education; Governance, Justice, Law and Order; Public Administration and International Relations; and Social Protection Culture and Recreation. The sector working groups have been used in this chapter so as to present the County development priorities in tandem with the set out national framework.

Each MTEF working group sectors has a defined vision and mission which then guide the prioritization of projects and programmes. It is upon these guiding principles that the County Integrated Development Plan is premised. This chapter captures the County's response to the sector vision and mission. It also highlights and enumerates role and responsibilities of each stakeholder. Cross cutting issues in each sector are also included.

In addition to the development projects and programmes enumerated in this chapter, the County leadership will initiate additional developments along the suggested project and programmes. The County leadership is keen to spur development in the County and to ensure equitable wealth and income redistribution. In this regards, the County leadership may initiate additional projects and programmes which may not necessarily fall under the suggested projects and programmes as long as such projects and programmes will be of equal importance in terms of impact and positive spillover effects on the general economy of the County. Of particular importance is the need to reduce poverty and increase the GDP of the County by 10% in tandem with Vision 2030 economic pillar.

#### **6.1 Agriculture and Rural Development**

For purposes of this CIDP, this sector has the following sub – sectors; Agriculture, Livestock Development, Cooperative Development and Marketing, Natural resources, Fisheries Development and Lands

#### **6.1.1 Sector Vision and Mission**

The sectors vision is

"An innovative, commercially-oriented and modern Agriculture and Rural Development Sector"

The mission of the sector is

"To improve livelihoods of Kenyans through promotion of competitive agriculture and innovative research, sustainable livestock and fisheries development, growth of a viable cooperatives sub sector, equitable distribution and sustainable management of land resources and sustainable management of forestry and wildlife resources".

#### **6.1.2** County Response to Sector Vision and Mission

To increase agriculture productivity the County will expand the three existing irrigation schemes namely Kabaa, Kayatta and Yatta. The County will provide extension services so as to provide technical assistance to farmers thus increasing the productivity of the arable land. This will definitely increase the quantity and quality of the yield thus spurring food security. The extension services will play a fundamental role in controlling vector and livestock diseases through the use of environmentally friendly products. The County will utilize the services of the two research institutions located in the County to undertake research and development thus ensuring that there is the transfer of technology and skills to farmers' thus boosting production and quality in agriculture and livestock.

In order to conserve natural resources, the County has put strategies in place such as afforestation. To facilitate the economic development of the farmers, particularly with respect to improving the standards of living, the County will encourage the formation of strong co-operatives which will assist farmers in the marketing of both agricultural and livestock products. This sector will also leverage on an integrated approach of public-private partnership in provision of various agricultural services and activities.

The picture below is an illustration of the Yatta canal together with the dedication that the Yatta residents exhibit with respect to the canal.

# 6.1.3 Role of stakeholders

Stakeholder	Role	
Constitution implementation	Monitor, facilitate and oversee the	
commission	development of legislation and	
	administrative procedures required to	
	implement the Constitution.	
Transition Authority	Review the performance of each county	
	government.	
Council of Governors	The interests of the community served by	
	the Trust are appropriately represented.	
National and County Government	Promotion of internal trade, provision of	
	investment opportunities, Promotion of	
	cultural tourism and support of Jua-kali	
	sector.	
Kenya Agricultural Research	Crop research & provision of certified	
Institute(KARI); Katumani (KATDC)	planting materials.	
Cooperative organizations	Farmer's organization for economies of	
	scale and provision of technical support.	
NGO'S and other development	Financial and technical support to	

Stakeholder	Role			
partners	cooperatives and Emergency relief support			
Ministry of Environment, Water and	Provision of water for irrigation, livestock			
Natural Resource	and human use			
Transport and Infrastructure	Infrastructure development and maintenance			
CDF	Funding community initiatives			
Community	Provision of labour, consumption of			
	products and give feedback on			
	implementation			
National government	Policy direction, implementation and			
	extension services and coordination,			
	vaccination, and treatment			
Kenya Industrial Estates (KIE)	Provision and management of credit			
	facilities, training in business skills			
NCPD	Provision of storage facilities			
Tana and Athi Rivers Development	Drilling boreholes, irrigation schemes,			
Authority(TARDA)	construction of dams, support to bee keeping			

# 6.1.4 Sub-sector Priorities, Constraints and Strategies

Sub-sector	Priorities	Constraints	Strategies
Crop	Improve food	High cost of farm	Revitalize the co-
development	security;	inputs;	operative sector to offer
	Production of high	Inappropriate credit	loans and inputs at
	quality produce	facilities and high	reduced prices; More
		cost credit; Low	appropriate credit
		market prices for	facilities/ scheme to be
		the products	pursued; source for
			external markets.
Livestock	Improve the quality	Poor/Low quality	Improve skills on proper
development	of products;	breeding, High	husbandry; Intensify
	Increase quality of	disease incidence,	vaccination campaigns.
	pasture, training on	Inadequate/poor	Improve skills on proper
	livestock farming,	quality pasture due	pasture and fodder
	commercializing	to frequent drought	management techniques.
	livestock farming	leading to high	
		mortality, poor	
		fodder	
		Preservation	
		methods, poor	
		livestock	

Sub-sector	Priorities	Constraints	Strategies
		management techniques.	
Research and development	To improve on the crops and livestock quantity and quality	Inadequate resources to carry out long term research on breeding, High costs of research on seeds making replication difficult.	Collaboration with other stakeholders, Dissemination of seeds to organized groups.
Food security	Self-reliance on food production	Inadequate and unreliable rainfall, Inherently infertile and highly erodeably soils, Low usage of improved technology.	Development of early maturing/ drought tolerant varieties, Train farmers on soil fertility through use of organic manure/ inorganic fertilizers, use of modern techniques of farming
Cooperative Development	Revitalization of the sector	Poor management of cooperatives	Intensive training of the cooperative members.
Fisheries	Increase the fish production in the main dams, establish fish ponds	Lack of interest among the people.	Promote the market for fish, improve skills on fish farming
Land and settlement	Increase number of people having titles deeds.	Many land disputes, problem of squatters	Start a crush programme to deal with the cases. Address squatters problems

# 6.1.5 Projects and programmes

The details enumerated in this section include the ongoing projects/ programmes, new projects proposals, Flagship projects and stalled projects.

# A) On-going Projects / Programmes:

# i) On-going projects/programmes Agriculture Sub Sector

Project Name	Constitue ncy/Sub County / Ward	Objectives	Targets	Description of Activities
Nalep GOK R10	40 County Assembly Wards	Facilitate and coordinate extension process	12 planning Meetings 9 budget meetings 4 field visits	Planning and budgeting meetings; fields activities
Njaa Marufuku Kenya	Eight sub- Counties	Fast track Implementation of MDG- goal 1	24 Groups	Trainings; Disbursement of NMK grant
Water harvesting (GIZ,Constiue ncy,D10)	Eight Sub- Counties	Provision of water for domestic, livestock and crop production	19 Groups	Survey and designs; Excavation, construction and Training water users associations.
Small Holder Horticulture Development Project (SHEP UP)	Mwala (Kabaa Irrig. Scheme). Kathiani (Kauti Irrig.Scheme	Increase household incomes of small scale horticultural producers.	2 schemes of three groups per sub-County	Rehabilitation of irrigation Facilities; Capacity building of farmers.
EU Orphan Crops/ THVC Orphan Crops/ GIZ (THVC	Across the County	Enable small scale farmers' access high quality seeds; To commercialize production of traditional food crops.	8 Groups	Procurement of traditional crop seeds; training Development of commercial villages.
SHEP UP(Smallholde r Horticulture Empowerment & Promotion	Kathiani, Machakos and Yatta	Improve the livelihoods of small holder horticultural farmers by enhancing productivity and improved	3	-Capacity buildings of farmers and staff. -buildings of collection centers.

Project Name	Constitue ncy/Sub County / Ward	Objectives	Targets	Description of Activities
Unit Project)		marketing infrastructure		
National Accelerated Agricultural Inputs Access Programme (NAAIAP)	Across the County	Improving agricultural productivity for smallholder farmers with one acre of land.	3000	Provision of inputs for one acre of land per farmer; Trainings
Urban and Peri- Urban agriculture (UPAP);	Machakos	Improve food and nutrition security for the urban and peri-urban populations.	Urban and periurban population	Capacity building.
Food Security and Economic Development	Ndalani and Matuu; Mango, Vyulia, Mwala and Makutano	Improved Environment and technological factors of Food and Livelihood Security for Small-holder Farmers and Agro-pastoralists	Mango, Vyulia, Mwala and Makutano) Locations (900 House Holds); matuu ndalani, (25,496 people)	Capacity building of farmers; Promotion of greenhouse and drip irrigation technology; Promotion of drought tolerant crops; Support farmers with Establish lined dams for greenhouse farming; environmental conservation

# ii) On-going projects/programmes Livestock Sub Sector

Project Name	Consitituency / Ward	Objectives	Targets	Description Activities	of
Livestock	Kangundo	To increase	All livestock	Promotion	of
Resource	- Tungunus	livestock	farmers/keepers and	Apiculture	
Management		productivity	stakeholders in the Sub-	emerging	
and		To improve	County.	livestock,	
Development		households	•	Dairy g	goat

# iii) On-going projects/programmes- Veterinary Sub Sector

Project Name	Constituency/Sub County / Ward	Objectives	Targets	Description of Activities
Leather	Eight Sub	Increase	Establish a leather	Establishing a
development	Counties/	income of the	development plant	leather
	Constituencies/	livestock	by the private	processing
	Constituencies	farmers	Sector	plant.
Disease	40 County	Increase	Carry out diseases	Field visits.
surveillance	Assembly Wards	production;	surveillance twice	

Project Name	Constituency/Sub County / Ward	Objectives	Targets	Description of Activities
			annually.	
Vaccination	40 County Assembly Wards	Control diseases	Carry out vaccination across the County twice annually	Field visits, vaccination, trainings

# iv) On-going projects/programmes – Fisheries Sub Sector

<b>Project Name</b>	Constituenc ies/ Ward	Objectives	Targets	Description of Activities
Establish enough stock centre	Masinga	Increase production from water bodies	In masinga sub- County	Restocking of the dams
Demarcation of fish breeding areas	Masinga	Increase production in the dams	In masinga sub- County	Insitu stock recruitment.
Development of private sector feed/ seed system	Machakos, Yatta and Mavoko	To lower cost of fish feeds and seeds	In machakos; yatta , mavoko sub-Counties	Establish hatcheries; construction of cottage Industry
Ponds rehabilitation	Eight Sub – Counties	Increase production of fish in the County.	Across the County	Purchase of liners for existing ponds trainings;
Regulation of fishing activities in the dams	Masinga	Build capacity for monitoring, control and surveillance.	In masinga sub- County	Field visits; training of fishermen;

# v) On-going projects/programmes – Lands Sub Sector

Project	Constituencies/	Objectives	Targets	<b>Description</b> of
Name	ward			Activities
Local	All urban	To have well	Have a	Reconnaissance;
Physical	centres in the	planned urban	Physical	Base map preparation;
Development	County	centers	Development	Data collection and
plans			Plan for every	analysis; stakeholder

			Urban center	meeting; publications
Title deeds	All 40 wards	To ensure that	All land	Issuance of title deeds,
		every land	owners across	surveying.
		owner in the	the County	
		County has a		
		title deed		

vi) On-going projects/programs- water sub-sector

Project	Constituencies/	Objectives	Targets	<b>Description</b> of
Name	ward			Activities
Shower per house	All 40 wards	To ensure water security in all households within the county	All households	Drilling over 800 boreholes, 820 dams& pans and water raised tanks for treated water

# B) New Project Proposals

# i) New Project Proposals- Agriculture

Project	Constituenc	Priority ranking	Objectives	Targets	Description

of fruit	Wards	ects to be	the use of	of 50,000	of farmers to
trees		implemented	the arable	tree	benefit from

		concurrently	land	seedlings to farmers	the project and the distribution of the seedling to the farmers.
Purchase of fertilizers	40 County Assembly Wards	Programmes /projects being implemented concurrently.	Increase productivity	500 farmers per ward per year to benefit from the certified seeds 20,000*50kg s bags of subsidized fertilizer to be provided to farmers	Identification of farmers Purchase; Distribution
Purchase of green Houses	40 County Assembly Wards	Programmes /projects being implemented concurrently.	Increase food production	Identify 10 women groups per ward per year. 120 green houses to be constructed	Vetting and approval groups.; Distribution; trainings
Establishi ng of Horticultu re	40 County Assembly Wards	Programmes /projects being implemented concurrently.	Increase production	Across the County	Field visits; purchase ;training.
Purchase of tractors	40 County Assembly Wards	Programmes /projects being implemented concurrently.	Reduce cost of production.	Purchase of one tractor for each ward tractors with an aim of ploughing 40,000 acres	Purchase
Acquisitio n of strategic stock	40 County Assembly Wards	Programmes /projects being implemented concurrently.	Improve food productivity		Purchase; Distribution

# ii) New Project Proposals- Lands Sub Sector

Project Name	Location	Objectives	Targets	Description of activities
1 varie				
Base map preparation for the revision of the Machakos Physical Developme nt Plan.	Across the County	To understand emerging issues. Extend the boundary	One PDP for the County	Reconnaissance; Identification of possible new boundaries Preparation of a basemap; Ground verification of information.
Wamunyu Physical Developme nt plan	Wamunyu	To ensure a well-developed town	To develop one zoned map of Wamunyu	Reconnaissance; Base map preparation; Data collection and analysis; Stakeholder meeting; Plan publication
Planning for all urban centres	Machakos, Mavoko, Matuu and Kangundo- Tala	To have organized development through controlled development	Four urban centers to have zoning plans	Awarding contracts to planning firms
New Machakos City	Machakos Central	To ensure a well-developed New City	To have a well zoned city	Generation the master plan
Land acquisition and settlement	In all the 40 wards	To settle the landless and to provide security of tenure	To ensure all County residents are land owners and are resettled.	Purchase of land and settling of the landless

# iii) New Project Proposals- Livestock Sub Sector

<b>Project Name</b>	Constituenc	Objectives	Targets	<b>Description</b> of
	y/ Sub			activities
	County /   Ward			
Livestock	Kangundo	To increase	All livestock	Pasture establishment
Resource		livestock	farmers/keepers	and conservation;
Management		productivity;	and	Facilitate access of livestock
and		To improve	stakeholders in	products and by-
Development		households farm	the County.	products to markets
		incomes		
Dairy	Machakos ;	To increase the	Every year 200	Farmers trainings;
Development	Yatta;	no of cows and	farmers to	vaccination;
Project	Masinga	dairy goats; to	upgrade their	campaigns;
		increase milk	local cows; To	demonstrations
		production; To increase rural	form one dairy development	Construction of ideal zero grazing units;
		house hold	group per	Formation of milk
		incomes	location per	marketing groups;
			year; To raise	Value addition
			milk production	
			from an average	
			of 6kg to 15 kg	
			by 2015.	
Local poultry	Machakos ,	To promote better	Every year 10	Recruitment of more
commercializati	Masinga	housing models	groups to be	extension officers;
on project		for indigenous	identified,	training of groups;
		chicken To improve	trained, and supplied with a	construction of a model poultry unit
		To improve breeding	breeding stock	pountry unit
		management of	breeding stock	
		industries.

service	Lukenya	collaborations	within the	information sharing;
	-		Constituency/S	joint demos and field
			ub County	days; develop training
				materials; establish
				strategic feed reserves
Dairy goat	Kinanie,	Improve human	Small scale	Farmer sensitization
farming	Mathatani;	nutrition to small	farm holdings	and mobilization;

	Lukenya; Athi River North; Katani	scale farm holdings due to fragmentation	in the peri- urban	trainings; procurement of breeding stock; handing over to the identified beneficiaries; develop training materials
Improvement of meat goats	Lukenya	Improve farm income	Meat goat farmers in Lukenya	Farmer sensitization; selection and breeding; nutrition; improved health; demo; develop training materials
Sheep and goat improvement	Athi River North	Improve farm income	Sheep and goat farmers in Athi River North	Farmer sensitization; selection and breeding; nutrition; improved health; demo; develop training materials
Completion of Office block and purchasing furniture	Kathiani	Create conducive environment to the officers	3 metallic cabinets 4 Executive with chairs 10 Executive without arms 2 secretarial seats 10 arm chairs 2 Double pedestal tables 4 single pedestal tables 1 conference table 1 Book shelf (wall to wall)	New
Rehabilitation of rangelands to mitigate against drought	Kangundo East and West wards	To provide adequate livestock feeds throughout the year; To increase ASAL house hold incomes	Livestock keepers and stakeholders in ASAL Areas	Promote establishment and conservation of both natural and improved grasses,.
Environmental conservation	Kangundo	To maintain the right land carrying capacity	All Livestock keepers and stakeholders	Trainings; extension services

# iv) New Project Proposals- Co-operatives Sub Sector

Project name	Constituencies	Objectives	<b>Description</b> of
	/ Ward		activities
Promotion of Dairy	Eight Sub	Increased incomes;	Sensitization of
societies support	Counties/	Value added	dairy farmers on
project	Constituencies	products	quality
			control/bulking of
			milk, artificial
			insemination
Enhanced coffee	Eight Sub	-Improved coffee	Capacity building
production and quality	Counties/	production and	
support project	Constituencies	income to coffee	
		farmers	
Co-operative tourism	Matungulu	Promote Tourism for	Sensitization;
support project		increased incomes to	Cable car;
		the community	Rehabilitation of
			Macmillan House
			-Tourist Guest
			Houses
Handcrafts export	Mwala	-Promote market	-Sensitize on
Support Project		outlets for various	handcrafts
		Co-op. products	-Exports
Irrigation Kayatta Co-	Matungulu	-Promote of	Expansion of
operative irrigation		Horticulture farming	Kayata Co-
project Matungulu		and food security	operative
			irrigation project.

# v) New Project Proposals- Veterinary Sub Sector

Project name	Constituency/Sub	Objectives	<b>Description</b> of
	County / Ward		activities
Construction of	Eight sub-counties	To improve service delivery	Construction
offices			
Veterinary and	40 wards	To increase livestock	Vaccination of
extension services		production and to reduce	animals and
		diseases	inspection of
			slaughter houses.

# vi) New Project Proposals- Fisheries Sub Sector

<b>Project Name</b>	Constit	Objectives	Targets	<b>Description</b> of
	uency/S			activities
	ub			
	County/			
	Ward			
Construction of		To reduce post	Construction of	Construction
fish processing		catch losses; value	one processing	
plant		addition	plant	
Construction of		To reduce the cost	Construction of	Construction
aquaculture		fish farming	two aquaculture	
recirculatory			recirculatory	
systems			systems	
Construction fish	Masinga	To improve	In Masinga sub-	Construction ;
cages in the dams		production of fish	County	capacity building Cage
				culture to farmers and
				staff
Purchase of cold	Masinga	To provide for the	One cold storage	Construction
room facility and		preservation of	facility	
refrigerated van		fish following the		
		increased		
		production		
Construction of	Machak	To establish a fish	One fish hatchery	Construction and
fish hatchery	os	hatchery so as to	in Machakos	purchase of fish lings.
	Central	promote fish	central at the	
		farming	ATC	

# vii) New project proposals- Education and social services

<b>Project Name</b>	Constituency/Sub	Objectives	Targets	<b>Description</b> of
	County/ Ward			activities
Construction of	All 40 wards	To ensure that	Public schools	Construction of
classrooms		students get		new classrooms
		good education		and renovation
				of existing
				ones.
Construction of	All 40 wards	To give skills to	One out of	Construction of
polytechnics		the youths	every three	new
			locations	polytechnics
Machakos		To promote		
Innovation		innovation		
centre		among the		

						youths	
Youth	and	All	the	8	sub		
Children		cour	ities				
centres							

# viii) New project proposals- Health sub-sector

Project Name	Constituency/Sub	Objectives	Targets	<b>Description</b> of
	County/ Ward			activities
Upgrading of	All sub-locations	To improve	All dispensaries	Conversion of
dispensaries		health care	within the sub-	dispensaries to
		provision and	locations	community
		meet the WHO		hospitals
		standards of a		
		hospital every 5		
		kilometers.		
Construction of	All sub-locations.	To attract	All dispensaries	Construction of
Doctors and		health care	within the sub-	Doctors and
Nurses quarters		personnel	location	Nurses quarters
Health	Every location	To improve	All locations	To purchase
Emergency		emergence		and equip
Response		response as		ambulances for
System		demanded by		every location
		citizens		

# ix) New project proposals- Decentralized sub-sector

<b>Project Name</b>	Constituency/Sub	Objectives	Targets	<b>Description</b> of
	County/ Ward			activities
Security	All locations	To improve	All locations	Provision of 2
Emergency		police presence		cars and motor
Response		and response		cycles for each
System				of the 69
				locations
Decent police	All locations	To improve	All police	Construction of
housing units		police morale	stations	police housing
				units

# x) New project proposals- Industrialisation sub-sector

<b>Project Name</b>	Constituency/Sub	Objectives	Targets	Description	of
	County/ Ward			activities	

Machakos	Kinanie	To earn more	Kinanie	Construction of
leather city		revenue and		a leather
		create more jobs		manufacturing
				industry
New Machakos	Machakos Town	To expand the	Machakos	Development of
City		town	Town	a new city
				which will
				include an
				industrial park

# C) Flagship Projects

Project Name	Constituency/Sub	Objectives	<b>Description</b> of
	County/ Ward		activities
Fertilizer Cost	Across the County	To increase the use of	Provide subsidized farm
reduction (subsidized		fertilizer.	inputs.
farm inputs)		To increase	
		productivity	
Small scale producers	Across the County	To increase household	Sensitization
specialize to 2-3		income	Capacity building
enterprises per HH			

#### **6.1.6** Strategies to Mainstream Cross-Cutting Issues

The sector will mainstream the cross-cutting issues through various aspects. Once of the areas which will be streamlined is the access to credit. The marginalized particularly the youth and the women will be empowered. The farmers will be trained on environmental conservation, appropriate farming methods depending on their geographical location and the use of new technology in farming on a very bare minimum. In training the farmer in the above areas environmental degradation will be reduced. The marginalized particularly women and the youth will participate in capacity building activities thus strengthening and equipping them with skills aimed at income generating activities.

The sector will play a role in sensitizing the community on the dangers of contracting HIV/AIDS. The fact that nutrition plays a fundamental role in the management of HIV/AIDS, the then the presence of agricultural based enterprises such as dairy goats, kitchen gardens and traditional vegetables which provide the much needed nutrition to the infected people will be promoted.

#### 6.2 Energy, Infrastructure and ICT

For purposes of this CIDP, this sector comprises of County transport, County public works, Roads and some aspects of energy and ICT.

#### **6.2.1** Sector Vision and Mission

The vision of the sector is

"A World class provider of cost-effective physical and ICT infrastructure facilities and services"

The mission of the sector is

"To provide efficient, affordable and reliable infrastructure for sustainable economic growth and development through construction, modernization, rehabilitation and effective management of all infrastructure facilities".

#### 6.2.2 County Response to Sector Vision and Mission

The County will rehabilitate, maintain and improve infrastructure in the County so as to spur economic growth by leveraging on the other sub-sectors. Routine maintenance and upgrading of earth roads to all weather roads will be done through the roads sub - sector. This will reduce the cost of production because road networks and connectivity will be enhanced across the entire County. Rural electrification programme will be expanded to cover more trading centers which do not have electricity. The County will invest in ICT so as to increase the ICT coverage thus improving communication across the board.

#### 6.2.3 Role of stakeholders

Stakeholder	Role	
Department of Transport,	Maintenance of existing classified roads and construction of	
Roads, Public Works and	new roads	
Housing		
Constitution implementation	Monitor, facilitate and oversee the development of	
commission	legislation and administrative procedures required to	
	implement the Constitution.	
Transition Authority	Review the performance of each county government.	
Council of Governors	The interests of the community served by the Trust are	
	appropriately represented.	

Stakeholder	Role		
National and County	Promotion of internal trade, provision of investment		
Government	opportunities, Promotion of cultural tourism and support of		
	Jua-kali sector.		
Department of Lands,	Provision of energy through the rural		
Energy, Environment and	Electrification programme		
Natural Resources			
Department of Public	Collection, storage, editing and dissemination of		
Service, Labour and ICT	information		
Telecommunication service	Increase telecommunication coverage in the district		
providers			
Research Institutes	Provision of innovate ways of doing things		
	Highlight emerging issues		
	Provide feedback of previous efforts in development		
The private sector	The private sector will play a key role in the maintenance of		
	roads, as contractors or in hiring of equipment to the other		
	stakeholders.		
Kenya Power and Lighting	Supply and management of electricity.		
Company (KPLC)	Suppry and management of electricity.		

# **6.2.4** Sub-sector Priorities, Constraints and Strategies

Sub-	Priorities	Constraints	Strategies
sector			
Roads	Routine maintenance	Inaccessibility during	Avail adequate funds;
	of feeder roads;	rainy seasons;	Make roads motor able in

		Vastness of the County.	Tap solar energy;
			Start up a forestation
			programme to solve the
			problem wood fuel.
ICT	Enhance connectivity	Inadequate funding	Provide adequate funding
	in the County		

# **6.2.5** Projects and programmes

This section gives details of the ongoing projects/ programmes, new projects proposals, Flagship projects and stalled projects.

# A) On-going Projects / Programmes:

# i) On-going projects/programmes –Energy Sub Sector

Project	Constituency/Sub	Objectives	Targets	<b>Description</b> of
Name	County / Ward			Activities
Rural	All the 40 Wards	To promote more	Market	Power
Electrification		small scales	centers,	connection to
Programme.		industries and	Rural areas	rural homes,
		connect more	and public	urban Centers,
		household to	institutions	factories,
		cheaper energy		secondary
		source;		schools ,
		To supply electricity		primary
		power to open up		schools, market
		the areas		centers and
				other public
				institutions
				across the
				County

# ii) On-going projects/programmes –Roads Sub Sector

<b>Project Name</b>	Constituency/Sub	Objectives	Targets	<b>Description</b> of
	County / Ward			Activities
Masaku	Machakos Town -	Increase	Murraming of	Excavation,
Avenue	Machakos Central	accessibility	4Km	Backfilling,
				compaction and
				draining works
Renovations	Machakos Town -	Improve	Renovate offices	Demolition,
of offices for	Machakos Central	service	for ministries of	walling, painting
department of		delivery	Lands,	& fittings
public works.			Environment and	
			Natural resources;	
			Decentralized	
			units, Urban areas	
			& Municipalities	
			and Tourism &	
			Culture	

## **B)** New Project proposals

## i) New Project proposals- Public works Sub Sector

Project Name	Constituency/Sub	Objectives	Targets	Description of
Location/Division/	County / Ward			activities
Constituency/Sub				
County				
Construction of	Machakos Town -	Improve	Construction	Construction
residential	Machakos Central	service	of the	
buildings –		delivery	Governors

	the County	markets thus	Mulika	Mulika Mwizi
		improving the	Mwizi in over	flood lights.
		security	247 markets	

#### **6.2.6** Strategies to Mainstream Cross-Cutting Issues

The road sub sector is a very key sub sector with respect to economic development. The road network in the County can either spur economic development of hinder the same. In this regard the County takes cognizance of this fact as such to mainstream the cross cutting issue, this sub-sector will ensure that the roads across the County are light graded. In addition, the County will cooperate with the national government to ensure that all urban roads are maintained in a good condition so as to promote economic development. Improving the road will definitely improve access to goods and services both from a consumer perspective and from a producer/supplier perspective. For instance County residents will be able to access health and educational facilities. The roads sub - sector will also improve the accessibility to markets and agricultural inputs by farmers. The fact that the cost of transporting goods and agricultural products will reduce means that the price per item will also reduce thus translating to the general positive welfare of the entire County and in particular the consumers will benefit. Reducing the transportation cost will also means that more farmers will transport their produce to the markets thus their incomes will increase

thus increasing the purchasing power of that farmer. Increase in efficiency and reduction of production costs through improved road network will increase employment opportunities as such high numbers of youth are employed. Improving the drainage systems as the roads are being done will reduce soil erosion.

Globally, regionally and domestically ICT is continually receiving recognition particularly because of the ingenious innovations that are continually coming up. With this in mind, it then means that the establishment of ICT centers in the County will contribute significantly to the ever evolving ICT sector. This will definitely enhance technology and connectivity.

It is apparent that development leverages highly on energy. As the County pursues alternative sources of energy to reduce the cost of energy, the County will promote environment conservation through promotion of other renewable sources of energy other than wood fuel.

#### **6.3** General Economic Commercial and Labour Affairs

For purposes of this CIDP sectors covered under this sector include; Trade, Tourism, Industrialization, Labour and Research& Development

### 6.3.1 Sector Vision and Mission

The vision of the sector is:

"A globally competitive economy with sustainable and equitable socio-economic development"

The mission of the sector is:

"To promote, co-ordinate and implement integrated socio-economic policies and programs for a rapidly industrializing economy."

#### **6.3.2** County Response to Sector Vision and Mission

The County takes cognizance of the fact that a vibrant competitive economy is highly dependent on sustainable and equitable socio-economic development. So as to contribute significantly to the growth of the County's economy under this sector the County will promote all commodities and services produced in the County. The County will play a key role in the entire value chain with respect to production of goods and services. In particular the County will facilitate the acquisition of loans to enlarge small and micro enterprises.

This will promote product diversification and fragmented production. The provision of loan at low interest rates will reduce the cost of capital thus increase the small and micro enterprises. The resultant effect will be the increase in employment opportunities. An increase in employment activities will increase the demand for skills and the resultant effect will be an improvement of the educational sector. As such the sector will have a spillover effect on the education sub sector. Increasing the commercial and economic viable activities in the County will result to a conducive business environment thus promoting domestic and foreign direct investment. Having appreciated the demographics of the County, Agro-based industries will increase as value addition is a critical for development. For instance the County produces a lot of fruits particularly mangoes, oranges, pawpaw and avocados, yet their production is not at optimum. If the production of these fruits is optimized then agrobased industries will thrive and increase in large numbers thus more employment for the youth in the County. This will also result to better quality products for the consumer at fair prices.

A look at the proposed and prioritized development projects and programme under the tourism sector such as the upgrading of Wamunyu handcrafts centre and football fields in place will create more employment for the youths.

#### **6.3.3** Role of stakeholders

Stakeholder	Role
Constitution implementation	Monitor, facilitate and oversee the development of
commission	legislation and administrative procedures required to
	implement the Constitution.
Transition Authority	Review the performance of each county government.
Council of Governors	The interests of the community served by the Trust are
	appropriately represented.
Department of Education, Youth	Funding, quality control, deployment of teacher,
and Social Welfare	infrastructures development and Provision of learning
	materials
	Staffing
National and County Government	Promotion of internal trade, provision of investment
	opportunities, Promotion of cultural tourism and
	support of Jua-kali sector.

Stakeholder	Role			
Private sector and Cooperative	Hotel Development; Marketing services; Education			
Societies	and training and research			
Community	Provide market for goods and services			
Kenya National Bureau of	Provision of Data and other information for planning.

### **6.3.6** Strategies to Mainstream Cross-Cutting Issues

To mainstream cross cutting issues, the sector has continuously addressed environmental issues by ensuring that industries adhere to environmental standards and prevention of pollution of surface water. This sector through capacity development will encourage Women and youth to take up economic activities by utilizing the Women and Youth Enterprise

Development Funds. The promotion of trade, tourism and industrialization will create more job opportunities especially for the youth. In addition, this will lead to improvement of the economy in the County and this in turn will help reduce poverty. In collaboration with other sectors the sector will work towards improving the lives of people affected or infected with HIV/AIDS as a developmental issue.

#### 6.4 Health

For purposes of this CIDP, this sector consists of mainly medical health and public health sub- sectors.

#### **6.4.1 Sector Vision and Mission**

The vison of the sector is:

"An efficient and high quality health care system that is accessible, equitable and affordable for every Kenyan.

The mission of the sector is:

"To promote and participate in the provision of integrated and high quality promotive, preventive, curative and rehabilitative health care services to all Kenyans"

#### 6.4.2 County Response to Sector Vision and Mission

Medical health and public health are very important sub sectors in the County, In response to the sector vision and mission, the County has identified projects and programmes that will be implemented to fulfill the vision and mission. Good health is very important for the productivity of the County. Some of the activities to be included are the management of childhood illnesses, control of malaria and promotion of reproductive health. This will be done through improving accessibility by increasing the number of facilities, personnel and equipment. Emphasis will also be laid on preventive health which is crucial for the control of diseases like malaria, provision of bed nets and sensitizing the community on other health issues using community health workers and local leaders.

### 6.4.3 Role of stakeholder

Stakeholder	Role		
МОН	Policy making and standard evaluation		
Constitution implementation	Monitor, facilitate and oversee the development of

### 6.4.6 Strategies to Mainstream Cross-Cutting Issues

The strategies adapted to mainstream the cross-cutting issues under the sector are the collaboration with other sectors so as to improve the lives of those people invested with HIV/AIDS. As stated earlier in this CIDP, nutrition is very key in managing the health of those

living with HIV/AIDS. Several specific projects and programmes have been adapted by the County. Some of which include; increasing the accessibility to VCT services and PMTCT, incorporating men in PMTCT programmes and encourage couple testing. Provision of nutrition supplements; drugs and training care givers on how to take care of those living with HIV/AIDS is also one of the strategies adapted by the County.

#### 6.5 Education Sector

For purposes of this CIDP, this sector comprises of the pre-primary education, village polytechnics, homecraft centres and childcare facilities.

### 6.5.1 Sector Vision and Mission

The vision of the sector is:

"A globally competitive education training, research and innovation for sustainable development."

The mission of the sector is:

"To provide, promote and coordinate quality education and training, integration of science, technology and innovation in sustainable socio-economic development process."

### **6.5.2** County Response to the Sector Vision and Mission

The County made it one of its priorities to increase the enrolment, retention and transition rates especially in ECD, primary and secondary levels. The County will create a financial fund or kitty to ensure that it gives bursary to bright and needy children. The fund or kitty will also include the provision of bursaries to the physically challenged, bright and needy children. The County has also identified as a priority the building of physical educational facilities so as to create a conducive environment for the education sector to thrive. The County is also keen to ensure that the curriculums in the village polytechnics are modified to ensure that their skills are matched to what the industries require. In addition the County has set aside funds to construct village polytechnics across the County in different wards.

## 6.5.3 Role of stakeholders

Stakeholder	Role
Constitution implementation	Monitor, facilitate and oversee the development of
commission	legislation and administrative procedures required to
	implement the Constitution.
Transition Authority	Review the performance of each county government.
Council of Governors	The interests of the community served by the Trust
	are appropriately represented.
National and County Government	Promotion of internal trade, provision of investment
	opportunities, Promotion of cultural tourism and
	support of Jua-kali sector.
Department of Education, Youth	Funding, quality control, deployment of teacher,
and Social Welfare	infrastructures development and Provision of
	learning materials
	Staffing
Department of Transport, Public	Designs and technical backstopping in infrastructures
Works, Roads and Housing	development
Department of Health and	Sanitation improvement and Immunization
Emergency Services	
UNICEF	Advocacy and logistical support, bursaries and
	infrastructures development
NGOs ( Kenya Red Cross, USAID,	Infrastructures development Advocacy and
UKAID) CBOs and FBOs	mobilization of resources
Department of Water, Irrigation and	Provision of water in schools
Sanitation	
Children department	Child protection and child rights
Private sector	Establishment of private schools and supply of
	quality education materials

# **6.5.4** Sub-sector Priorities, Constraints and Strategies

Sub-sector		Priorities	Constraints	Strategies

#### **6.5.6** Strategies to Mainstream Cross-Cutting Issues

To address HIV/AIDS the sector will implement behavior change communication especially to the secondary going pupils. This will be done through introduction of abstinence clubs in secondary schools. The sector will also work with the agricultural and rural development sector to ensure that the environment is conserved at all times. The sector will also continue supporting schools for the children with disabilities with infrastructure, material and staffing

Various vocational training centres have been revived and this will provide the youth with opportunities to learn and acquire skills. Through the Economic Stimulus Programme and other programmes such as tree planting has been ongoing in various schools to increase the forest cover in the County.

#### **6.6 Public Administration and International Relations**

For purposes of this CIDP, this sector comprises the Office of the Govenor, County Executive, County Assembly, County tresury, Decentralized Units, Devolution and Planning, County Controller of Budget, County Public Service Board and County Planning.

#### 6.6.1 Sector Vision and Mission

The Vision of the sector is:

"A leading sector in legislation, public policy formulation, coordination, supervision and prudent resource management."

The mission of the sector is:

"To provide overall leadership and policy direction in resource mobilization, management and accountability for quality public service delivery"

#### **6.6.2** County Response to the Sector Vision and Mission

To achieve this vision and mission, relevant sub-sectors will be expected to play their various roles in the overall achievement of the objective of the sector. On development planning, the bottom up approach will be the basis of planning. Project identification and implementation will be undertaken in consultation with all the stakeholders and the beneficiaries. In addition the County will establish an integrated monitoring and evaluation system as guided by the National Integrated Monitoring and Evaluation System.

#### 6.6.3 Role of stakeholders

Stakeholders	Role	
Department of Trade, Economic	Collection of data and statistics and analyzing the data.	
Planning and Industrialization	Developing and implementing of sound county	
	management policies, Documenting, managing and	
	disseminating of County information	
	Enhancing capacity for local level planning, coordinating	
	and enhancing of policy dialogue and implementation.	
Constitution implementation	Monitor, facilitate and oversee the development of	
commission	legislation and administrative procedures required to	
	implement the Constitution.	
Transition Authority	Review the performance of each county government.	
Council of Governors	The interests of the community served by the Trust are	
	appropriately represented.

#### 6.6.6 Strategies to Mainstream Cross-Cutting Issues

The Constitution is clear about the 30% representation of gender in management committees irrespective of the level. Environmental conservation and unemployment will be incorporated in planning stage of all development programmes. To address and maintain HIV/AIDS, the sector will ensure the implementation of the National HIV/AIDS Strategic plan 2009/10-2012/13 which aims at the prevention of new infections, improvement of the quality of life of people infected and affected by HIV/AIDs and mitigation of the socioeconomic impact of HIV/AIDs

#### 6.7 Social Protection, Culture And Recreation

This sector comprises of County Heritage and Culture, Sports, Gender Special Programmes, Youth and Social Welfare services.

#### **6.7.1** Sector Vision and Mission

#### Vision:

"Sustainable and equitable socio-cultural and economic empowerment of all Kenyans."

#### Mission:

"To formulate, mainstream and implement responsive policies through coordinated strategies for sustained and balanced socio-cultural and economic development of the Country and empowerment of vulnerable and marginalized groups and areas"

#### 6.7.2 County Response to the Sector Vision and Mission

This sector is mandated with the responsibility of facilitating relevant and responsive socioeconomic development through efficient service delivery, mobilization and utilization and greater appreciation of our uniqueness as a people and County in our various habitats. The sector will formulate, co-ordinate and implement socio-economic policies, strategies and programmes aimed at the provision of quality social services with special emphasis on the most vulnerable groups in the society.

In view of the foregoing the County takes cognizance of the role that the vulnerable and marginalized groups and areas play in economic development and is keen on an all-inclusive development strategy. The women and youth within the County play a fundamental role in as such the sector is in the forefront of mainstreaming issues of policy formulation, planning, project implementation and monitoring. The end result of the policies that will be formulated will be to empower women and youths through enterprise development funds, community mobilization and capacity building. The fact that the policies will be generated through the active participation of the public which includes the vulnerable and the marginalized will result in a practical implementable policy that will not encounter unnecessary and undue oppression

Other disadvantaged groups such as persons with disability, ethnic minorities and OVCs are also considered and incorporated in development actions in the County. The County will put in place to facilitate and encourage the partnership between persons with disability, ethnic minorities and OVCs and the County. This will give them an opportunity to demonstrate their abilities to the fullest the extent possible. Their unique needs are being mainstreamed in planning and to the extent possible; attempt is being made to meet their needs for user-friendly equipment and material/financial support.

Since the most of the County is semi-arid thus agricultural yields may not be as high, alternative strategies will be put in place to ensure that the agricultural yields of the areas that are productive is increased so as to ensure food security across the County. This will also ensure that there is an equitable distribution of food to all semi-arid areas.

In a nutshell the mandate of the sector is to address the issues of the Vulnerable Groups, Youth Gender, Equity and wealth creation.

#### 6.7.3 Role of stakeholders

The sector has a number of stakeholders that play a big role in building its capacity in identification, implementation, monitoring and evaluation of activities, projects and programmes. Specifically, the stakeholders contribute in; mobilization of resources, technical support, flood mitigation, relief distribution, mainstreaming of gender and youth issues, sports development, social protection and awareness creation on HIV/AIDS related issues.

Stakeholder	Role
County Government	Provision of personnel; Provision of grants and
	training funds
	Mobilization of communities; Formulate the
	regulatory framework
Department of Education, Youth	Provision of policies and guidelines with respect to
and Social Welfare	youth and social welfare
Department of Tourism and Culture	Marketing tourist sites, the diverse cultures in the
	County and sports
NGOs, CBOs, Youth Groups	Support to training;
	Development of relevant training modules
Credit Organizations	Continue issuing loans and conducting relevant
	training
Local Leaders and Community	Support development activities through active
	participation and contribution; Provide good
	leadership in project management
Private sector	Support sensitization and training programmes
	;Development support; Capacity Building

#### 6.7.4 Sub-sector Priorities, Constraints and Strategies

## 6.7.6 Strategies to Mainstream Cross-Cutting Issues

It is expected that there will be sufficient representation of all groups: women, youths, people living with disability, people infected or affected by HIV/AIDS and, ethnic or religious minorities in all subsectors under the productive sector. The viewpoints of all such groups will be sought, listened to and factored in the planning, implementation and monitoring of all projects and programmes under the sector.

It is also expected that ICT, HIV and AIDS and environmental conservation issues will be given due consideration in the formulation and enforcement of sectoral policies. Greater use of ICT is a major objective of the productive sector in the same way that sustainable development has been.

#### 6.8 Environmental Protection, Water And Housing

For purposes of this CIDP, this sector comprises of Water and Irrigation, Housing, Environment and Mineral resources Sub – Sectors.

#### **6.8.1** Sector Vision and Mission

This is vision of the sector is:

"Sustainable access to adequate water and housing in a clean and secure environment"

The mission of the sector is:

"To promote, conserve and protect the environment and improve access to water and housing for sustainable national and County development"

#### 6.8.2 County Response to the Sector Vision and Mission

The sector will ensure that sustainable projects and programmes are initiated in the County and Environmental Impact Assessment (EIA) is done on them. Since the County is endowed with two permanent rivers, irrigation projects will be initiated to increase food production, high yielding livestock rearing and intensive cash crop farming among others.

#### 6.8.3 Role of stakeholder

Stakeholder	Role			
County Government	Financing, Implementation, Policy Formulation,			
	Supervision and Management.			
Constitution implementation	Monitor, facilitate and oversee the development of			
commission	legislation and administrative procedures required to			
	implement the Constitution.			
Transition Authority	Review the performance of each county government.			
Council of Governors	The interests of the community served by the Trust			
	are appropriately represented.			
National and County Government	Promotion of internal trade, provision of investment			
	opportunities, Promotion of cultural tourism and			

Stakeholder	Role		
	support of Jua-kali sector.		
Water Service Providers – WASPs	Supply water to consumers;		
	Management and maintenance of resources.		
Water Services Boards	Regulation, Development of Resources and		
	Management.		
Faith Based Organizations	Financing and Development of Resources;		
	Management & Maintenance of resources.		
NGOs, CBOs, SHG	Financing and Development of Resources		
Action Aid, World Vision, German	n   Management & Maintenance of resources.

# 6.8.4 Sub-sector Priorities, Constraints and Strategies

Sub-sector	Priorities	Constraints	Strategies
Irrigation	Rehabilitation and	Inadequate Finance	Expand ,Rehabilitate
	Expansion of	and other resources,	Feasibility Studies &
	Existing Projects.	Limited Technical	New Designs,
		Personnel.	Network for fund 21
			raising activities.
Water	Rehabilitation and	Limited Resources,	Purchase
	Expansion of	Limited Personnel,	Equipment,
	Existing Water	Environmental,	Consultancy,
	Schemes.	degradation,	Recruitment,
	Construction of	Wastage,	Training,
	Boreholes, Dams,	Pollution.	Enforce the Laws.
	water pans. Rain		
	Water, Harvesting at		
	the household level.		

Sanitation	Expansion and Rehabilitation and of Existing systems, Conduct Feasibility Studies & Design New to cater for the new upcoming towns.	Dilapidated Infrastructure, Limited Resources, Limited Technical Skills.	Network for fund raising activities.
Building	Construction of new houses; Routine maintenance of government houses; Completion of electrification of Government buildings; Facilitation of provision of decent and affordable housing facilities.	Inadequate funding; Lack of appropriate building technology; Land tenure system does not encourage productive use of resources; Nomadic way of life does not encourage permanent settlements	Avail adequate fund; Identify and disseminate low cost building materials and appropriate building technologies; Develop a housing loan scheme
Energy	Rural electrification.	Inadequate funding; Vastness of the County.	Provide adequate funds; Tap solar energy; Start up a forestation programme to solve the problem wood fuel.
Natural Resources	Identification of all natural resources in the county	Quantification of the commercial viability of the natural resources	Conduct a study to identify all the natural resources as well as their commercial viability.

## **6.8.5** Projects and programmes

This section gives details of the ongoing projects/ programmes , new projects proposals , Flagship projects and stalled projects .

## A) On-going Projects / Programmes:

## i) On-going projects/programmes- Irrigation

<b>Project Name</b>	Constituency/Sub County /Ward	Objectives	Target	Description of The Activities
Yatta Canal Scheme,	Yatta	Provide water for Horticulture Farming for Export.	Yatta Sub Area	Rehabilitation & De-silting Planting trees; training Water users; Civil works.
Kamuthambya Irrigation Project		Provide water for Horticulture Farming for Export.	About 1,000 Acres	Divert water from River Athi. Open and closed conveyancing. Civil works.
Kauti Irrigation Scheme		Provide water for Horticulture for export and subsistence farming.	Kauti sub area about 400 Acres	Civil works; General reticulation and diversion. Stakeholder Education.
Kangeka - Kitoi Irrigation Scheme		Provide water for Horticulture for export and subsistence farming.	Kangeka and Kitoi area about 600 Acres	Civil works; General reticulation and diversion. Stakeholder Education.
Wakulima/ Kyangii Irrigation Scheme		Provide water for Horticulture for export and subsistence farming.	Kyangii sub area about 400 Acres	Civil works; Open and closed conveyancing; training of Stakeholder.
Ngulini Irrigation Scheme		Provide water for Horticulture for export and subsistence farming.	Ngulini sub area about 600 Acres	General reticulation and diversion; Civil works; Gravitated distribution.

<b>Project Name</b>	Constituency/Sub County /Ward	Objectives	Target	Description of The Activities
				Stakeholder Education.
Kabaa Irrigation Scheme	Mwala	Provide water for Horticulture for export and subsistence farming.	Kabaa sub area about 2,000 Acres	Rehabilitation and excavation. General Civil works Gravitated distribution. Open and closed conveyancing. Stakeholder Education.
Muthwani Irrigation Scheme	Matungulu	Provide water for Horticulture for export and subsistence farming.	Muthwani sub area about 600 Acres	Rehabilitation of the pumping system; General Civil works Gravitated distribution. Open and closed conveyancing. Stakeholder Education.
Kinanie Irrigation Scheme		Provide water for Horticulture for export and subsistence farming.	Kinanie sub area about 300 Acres	Rehabilitation of the pumping system; General reticulation and diversion General Civil works; gravitated distribution. Open and closed conveyancing. Stakeholder Education.

		planned development in urban areas		Unit

#### iv) New Project Proposals - Environment

Project Name	Constituency/ Sub County / Ward	Objectives	Target	Description Of The Activities
Environmental management and protection	Across the county	To protect environment sensitive areas. To control pollution. To ensure environmental compliance in all projects within the County. To increase forest cover.	Environment	Identification of sensitive areas, awareness creation, planting trees, policy formulation
Sand harvesting	All wards with sand	To control sand harvesting	Sand harvesters	Policy formulation, awareness creation.

## v) Flagship Projects

<b>Project Name</b>	Location	Objectives	Targets	Description of
				activities
Yatta Dam	Yatta Sub-	Provide safe drinking	To serve	To expand its capacity.
	County	water and irrigation	over	Rehabilitation & De-
		purposes to the residents	100,000	silting.
		of Yatta sub-County.	people	
Maruba Dam	Machakos	Provide safe drinking	Will serve	Enlarge the Treatment
	Town Sub-	water to residents of	over	Works and other
	County	Machakos Town.	200,000	general civil works
			people	

## 6.8.6 Strategies to Mainstream Cross-Cutting Issues

The County will incorporate HIV/AIDS issues in the daily activities. During the plan period, the County will engage available labour force in environmental conservation to reduce the unemployment. To alleviate poverty, the sector will implement micro-irrigation to boost

food production and create surplus for sale to generate additional income. To mitigate on disasters especially during rainy season, the sector will build dams to harvest rain water. Gender parity is a crossing-cutting issue that environment, water and sanitation will be able to integrate through maintaining at least 30 per cent of either gender in the membership in the water users associations.

## **CHAPTER SEVEN:**

# IMPLEMENTATION, MONITORING AND EVALUATION

#### 7.0 Introduction

This chapter gives the monitoring and evaluation framework that will be used at the National and County level to monitor and evaluate implementation of various projects and programme that will be implemented within the plan period.

#### 7.1 Institutional Framework for Monitoring and Evaluation in the County

At the National level, Monitoring and Evaluation is conducted through National Integrated Monitoring and Evaluation System (NIMES). The County will put in place a County Monitoring and Evaluation system to serve the needs of the County Government, while complimenting the National M & E system. The system will take cognizance of the projects and programmes included in the County Integrated Development Plans as well as indicators facilitating the MTEF process, and development aspects of the County.

#### 7.2 Implementation, Monitoring and Evaluation Matrix

Prior to the development of an implementation, monitoring and evaluation matrix, the County shall adapt the national matrix in the interim.

#### 7.2.1 Agriculture and Rural Development

Probation County offices	Data not available	2013- 2014	No. of offices constructed	Reports; site Visits minutes	Department of probation	GOK; development partners	Ongoing
Residential Buildings (Police Lines)	95M	2013- 2017	No. of units constructed	Reports ; minutes	Dept of Decentralized units	County Government; development partners	Planning stage
Non- Residential Buildings	95M	2013- 2017	No. of offices constructed	Reports; site Visits minutes	Department of Decentralized units	County Government; development partners	Planning stage
Purchase of Motor Vehicles	320M	2013- 2017	No. of Motor Vehicles bought	Reports ; minutes	Department of Decentralized units	County Government; development partners	Done
Purchase of Motorcycles	47M	2013- 2017		Reports ; site visits ; minutes	Department of Decentralized units	County Government; development partners	Done
Purchase of laboratory equipment – forensic lab	320M	2013- 2015	No. of offices constructed; No. of Equipments purchased	Reports ; site visits ; minutes	Department of Decentralized units	County Government; development partners	Planning stage
Purchase CCTV equipment	10M	2013- 2015	No. of CCTV Equipments purchased	Reports ; site visits ; minutes	Department of Decentralized units	County Government; development partners	Done

# 7.2.9 Environmental Protection, Water and Housing

Project Name	Cost estimate (Ksh)	Time Frame	Monitoring Indicators	Monitoring Tools	Implementi ng Agency	Source of funds	Implementation Status
Feasibility Studies	100 M	2013- 2017	No. surveys conducted	Reports ; Minutes	Department of Water,	GOK/ County Government Development partners	Ongoing
Yatta Canal Scheme	140M	2013- 2017	No. of acres under irrigation	Reports ; Minutes	Department of Irrigation, TAWSB	GOK; County Government Development partners	On-going
Kamuthambya Irrigation Project	100M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of Irrigation, NIB	GOK; County Government Development	On-going
Kauti Irrigation Scheme	50M	2013- 2017	No. under acres irrigation	Farmers Reports	Department of Irrigation, NIB	GOK; County Government Donors Partners	On-going
Kangeka - Kitoi Irrigation Scheme	60M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Development partners	On-going
Wakulima/ Kyangii Irrigation Scheme	40M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Ngulini Irrigation Scheme	120M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kabaa Irrigation Scheme	150M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Muthwani Irrigation Scheme	40M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kinanie Irrigation Scheme	100M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Syokisinga Irrigation Scheme	50M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Katangi Irrigation Scheme	50M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Ndasuco Irrigation Scheme	30M	2013- 2017	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kombu Irrigation Scheme	70M	2013	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kyumba SHG Irrigation	40M	2013	No. of acres under	Farmers Reports	Dept of irrigation,	GOK; County Government	On-going

Project Name	Cost estimate (Ksh)	Time Frame	Monitoring Indicators	Monitoring Tools	Implementi ng Agency	Source of funds	Implementation Status
Scheme			irrigation		NIB	Donors	
KAMU Irrigation Scheme	150M	2013	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kayata – Kathama – Mbiuni (Kambi) Irrigation Scheme	200M	2013	No. of acres under irrigation	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Ekalakala Irrigation Scheme	70M	2013- 2017	Optimal operation of the Scheme	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Kyangosi Irrigation Scheme	70M	2013- 2017	Optimal operation of the Scheme	Farmers Reports	Department of irrigation , NIB	GOK; County Government Donors	On-going
Maruba Dam	500M	2013- 2017	Optimal operation of the Dam	Reports from MAWASCO	Department of Water, , MAWASCO	National Government County Government Donors	On-going
Kisekini Water Project	300M	2013- 2017	Optimal operation of the Dam	Reports from MAWASCO	Department of Water, Irrigation & Sanitation, MAWASCO	National Government County Government Donors	On-going
Boreholes, Sand Dams and Water Pans Projects	800M	2013- 2017	50 functional boreholes, water pans & Sand dams in each ward.	Reports from Wards on status of access to clean water	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Kwakiluli dam water project	300M	2013- 2017	Optimal operation of the Dam	Reports from Wards on status of access to clean water	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Muoni dam Project	200M	2013- 2017	Optimal operation of the Dam	Reports from Wards on status of access to clean water & Water Company	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
KMC Dam	500M	2013	Optimal operation of the Dam	Reports from Wards on status of access to clean water	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Portland Dam	500M	2013- 2017	Optimal operation of the Dam	Reports from Wards on status of	Department of Water, Irrigation &	National Government County	On-going

Project Name	Cost estimate (Ksh)	Time Frame	Monitoring Indicators	Monitoring Tools	Implementi ng Agency	Source of funds	Implementation Status
				access to clean water	Sanitation.	Government Donors	
Kamuthumba- Masinga, Ekalakala & Ikaatini Water Supply	600M	2013- 2017	Optimal operation of the Project	Reports from Wards on status of access to clean water	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Athiriver, Mlolongo & Syokimau Sewerage Systems	1.5B	2013- 2017	Optimal operation of the Project	Reports from MAVWASC O	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Machakos Town Sewerage Systems	1.8B	2013- 2017	Optimal operation of the Project	Reports from MAWASCO	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	On-going
Sewerage Systems in urban towns	1.8B	2013- 2017	Fully implemented Sewer systems and optimal operation of the Projects.	Reports from various sewerage companies.	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	Planning stage
Rehabilitation of boreholes in every ward	1.2B	2013- 2017	No. of borehole rehabilitated	Reports; minutes .field visits	Department of Water, Irrigation & Sanitation.	National Government County Government Development partners	Ongoing
Drilling of new boreholes	800M	2013- 2017	No. of borehole drilled anequiped, No. of beneficiaries	Reports; minutes field visits	Department of Water, Irrigation & Sanitation.	National Government County Government Development partners	Ongoing
Construction of Dams	2B	2013- 2017	No. of dams constructed , No. of beneficiaries	Reports; minutes field visits	Department of Water, Irrigation & Sanitation.	National Government County Government Donors	Ongoing
Rehabilitation of existing dams	1B	2013- 2017	No. of dams rehabilitate No. of beneficiaries	Reports; minutes field visits	Department of Water, Irrigation & Sanitation.	National Government County Government Development partners	Ongoing
Construction of water pans	300M	2013- 2107	No. of water pans constructed ;No. of beneficiaries	Reports; minutes .field visits	Department of Water, Irrigation & Sanitation.	National Government County Government Development partners	Ongoing

Project Name	Cost estimate (Ksh)	Time Frame	Monitoring Indicators	Monitoring Tools	Implementi ng Agency	Source of funds	Implementation Status
Purchase of Drilling rigs	100M	2013- 2014	No. of rigs purchased	Reports; minutes field visits	Department of Water, Irrigation & Sanitation.	National Government County Government	Done
Purchase of bulldozers and other	200M	2013- 2014	No. of bulldozers and caterpillars purchased	Reports; minutes.	Department of Water, Irrigation & Sanitation.	National Government County Government; development partners	Done
Refurbishment s of the reticulation systems and repair and maintenance if the systems	400M	2013- 2017	Length of distribution	Reports ; Minutes	Department of Water, Irrigation & Sanitation.	National Government County Government; development partners	Ongoing
