

**NYAMIRA COUNTY GOVERNMENT**

**COUNTY TREASURY**

**COUNTY FISCAL STRATEGY PAPER**

**FEBRUARY 2018**

## **FOREWORD**

The County Fiscal Strategy Paper 2018 articulates economic policies and sector priority programs that the County intends to implement in the coming 2018-2022 CIDP as it is articulated in the County government's economic blue print.

The overarching objective of the CFSP is to consolidate our past achievements and take cognizance of implementing challenges in the past as we identify opportunities and strategies for the realization of Kenya Vision 2030 and the Big four Agenda namely Manufacturing, Affordable housing, Healthcare and food security .

The transformational agenda is geared towards creating wealth & ensuring socio economic transformation of the County through reducing the poverty levels and achieving the following key objectives; develop, maintain & improve water sources and increase water distribution for domestic use, equip health facilities and recruit general and specialist staff to increase access to healthcare, increase agricultural productivity, increase access to energy, ICT, road infrastructure, improve town and urban planning, increase opportunities and economic empowerment of youth, women, men, OVCs and the physically challenged. The Government will adopt a holistic approach in matters of development and service delivery.

The realization of this strategy is premised on the support of other arms of the county and national government particularly, passing legislation, playing oversight role, promoting inter-governmental relations, enhancing public participation, civic education, monitoring and evaluation, recruitment, training and retention of skilled manpower, private public partnerships, among others.

The County Fiscal Strategy Paper 2018 has identified flagship projects that will have a quick impact on the socio-economic development. These will certainly enhance opportunities for wealth creation amongst our people. We are all tasked to think outside the box in project identifications and funding

## **ACKNOWLEDGEMENTS**

The development process of this Fiscal Strategy Paper 2018 was coordinated by a team of County Economists from the department of Finance and Planning who included Mr. Paul Onyango, Nicodemus Mutinda, Jasper Ouma, Faith Mokaya and Mr. Denis Muthuri. Their unwavering commitment and teamwork is duly acknowledged.

Similarly and with equal measure I wish to appreciate the entire Treasury staff and other sector conveners and co-conveners for their dedication, contributions and support that they provided during the preparation of this document.

We are particularly grateful to H.E the Governor, Deputy Governor, the County Executive Committee Member for Finance and Economic Planning for their role, direction and guidance in developing this document.

I also take this opportunity to thank executive committee members, chief officers, Budget & Economic Forum members and all our partners for their invaluable contribution, either through direct or indirect support.

We are also grateful for the input and contribution from the public hearings held on 21<sup>st</sup> February 2018 at the five sub-counties towards preparation of this paper.

Finally, it is our sincere hope that the Nyamira County Fiscal Strategy Paper 2018 would provide strategic guidance to the 2018/2019 annual budget.

## CHAPTER ONE

### THEME: POSITIONING NYAMIRA COUNTY ON THE PATH OF SOCIO-ECONOMIC IN CREATING OPPORTUNITIES AND TRANSFORMING LIVES

#### Introduction

The 2018 County Fiscal Strategy Paper (CFSP) is the fifth to be prepared since the assumption of office by the County Government of Nyamira. The theme of this 2018 CFSP is — **Positioning Nyamira County On The Path Of Socio-Economic Growth in Creating Opportunities And Transforming Lives**. One of the important aspects of the budget preparation is the requirement by Section 117 of the PFM Act that before 28th February of each financial year, each County Treasury shall submit a County Fiscal Strategy Paper (CFSP) to the County Assembly after approval by the County Executive Committee. The Paper is also expected to be aligned to the national policies and objectives outlined in the Budget Policy Statement. Due to limited resources, more resource allocation will focus on the following sectoral priorities:

- **Infrastructure development:** This includes interventions in roads, energy (street lighting) and ICT development.
- **Agriculture, rural and urban development:** Priority will be given to livestock, fisheries and agriculture, spatial planning and housing development.
- **Water and environment:** The priority will be given to spring protection, drilling of boreholes, wetlands conservation and promotion of bamboo tree planting.
- **Health:** Priorities in this sector will include funding healthcare infrastructure, communicable and non-communicable diseases and drugs
- **Education sector** priority areas include Early childhood education, Establishment of youth polytechnics and youth empowerment
- **Social sector:** priority areas will be Culture, sports, youth, security and opportunities for vulnerable members of our society.
- **General Economic and Commercial Affairs:** priority areas will be Trade, industrial developments, labour affairs, Industrial Estates, regional development

and related research and development, enterprises development, labour, Industrial estates.

### **CFSP Process overview**

In line with the devolved functions of the County Governments, the CFSP sets out priority programs to be implemented in 2018/19 and the Medium Term expenditure Framework (MTEF). The 2018 CFSP has been aligned to the National Budget Policy Statement (BPS) which emphasizes on creating jobs and transforming lives “the big four plan”. This will create opportunities for productive jobs for Kenyans. The four Agenda aims at

- I. Support value addition and raise the manufacturing sector’s share to GDP to 15 percent by 2022. This will accelerate economic growth, create jobs and reduce poverty;
- II. Focus on initiatives that guarantee food security and nutrition to all Kenyans by 2022 through expansion of food production and supply, reduction of food prices to ensure affordability and support value addition in the food processing value chain;
- III. Provide Universal Health Coverage thereby guaranteeing quality and affordable healthcare to all Kenyans;
- IV. Provide at least five hundred thousand (500,000) affordable new houses to Kenyans by 2022, and thereby improve the living conditions for Kenyans

The Nyamira County 2018 CFSP integrates the above big four by prioritizing its development agenda on health sector, agriculture sector, housing sector and infrastructure sectors.

The purpose of this paper, therefore, is to guide the County Departments, stakeholders and the general public to understand the fiscal situation on the proposed budget strategies. This strategy paper contains the following:

- a) The principles that will guide the 2018/19 budgetary process;

- b) The broad fiscal parameters for 2018/19 budget and the key strategies and policies for management of revenues and expenditures;
- c) Discussion of risks to the budget parameters and budget strategies;
- d) The medium term outlook for the County Government revenues and expenditures;
- e) Discussion of how the budget strategies relate to the Medium Term Fiscal Strategies (MTFS) and County Integrated Development Plan (CIDP).
- f) Broad County Government priorities and strategic goals.
- g) A framework for preparation of departmental budget estimates and the development of detailed budget policies.

This document will be made available to the public as required by the Constitution 2010, Article 201 and Public Finance Management Act 2012 section 117.

### **Outline of the County Fiscal Strategy Paper (CFSP)**

This County Fiscal Strategy Paper 2018 is presented in six Chapters. After the Introduction presented in Chapter One, which presents an overview and outline of the Paper, Chapter Two outlines the recent economic and fiscal developments within which the 2018/19 budget will be prepared. It presents an overview of the recent economic and fiscal developments and the macroeconomic outlook covering the global, national and county scenes. It concludes by discussing the fiscal performance of the first half of FY 2017/18.

Chapter Three presents an overview of the forward economic and fiscal developments and the macroeconomic outlook covering the global, national and county scenes with respect to chapter two. Chapter Four looks at the county strategic priorities and interventions.

In Chapter Five, the Paper presents the Fiscal Policy and Budget Framework that will support planned growth over the medium to long term, while continuing to provide sufficient resources to support social sector programmes, agriculture as well as in infrastructure spending.

Lastly, Chapter Six presents Medium Term Expenditure Framework, Resource envelope, overall spending priorities in relation to strategic priorities and interventions, Medium-term Expenditure baseline ceilings and Sector/Department priorities with ceilings for the proposed 2018/19 budget.

### **Legal Basis for the Publication of County Fiscal Strategy Paper**

*The County Fiscal Strategy Paper is published in accordance with section 117 of the Public Finance and Management Act, 2012. The law states that;*

## CHAPTER TWO

### RECENT ECONOMIC AND FISCAL DEVELOPMENTS

#### National Economic and Fiscal Overview

**Economic growth:** Kenya's economy remained resilient; broad based and registered strong performance in the past 5 years supported by strong public and private sector investment and appropriate economic and financial policies. The economy, specifically, grew at an average of 5.5 percent per year in the five years (2013 - 2017) outperforming the average growth rate of 4.7 percent in the period 2008 to 2012. The value of goods and services produced therefore raised the per capita income from Ksh 104,700 in 2013 to an estimated Ksh 174,200 in 2017. The economy generated an average of 817.0 thousand new jobs per year in the period 2013 - 2017 up from 656.5 thousand jobs per year in the period 2008-2012.

However, uncertainty associated with elections coupled with the effects of adverse weather conditions slowed down the performance of the economy in 2017. As a result, the economy is estimated to grow by 4.8 percent in 2017, which is a slowdown from the estimated growth of 5.1 percent in 2017.

In 2017, the economy grew by 4.4 percent in Quarter 3, 5.0 percent in Quarter 2, and 4.7 percent in Quarter 1, largely supported by robust activities in the service sectors particularly; accommodation and restaurant; real estate and information and communication. The growth was somewhat constrained by subdued performances in agriculture forestry and fishing, manufacturing, electricity and financial intermediation sectors. These main sectors are;

- i. **Non-agriculture sector:** The resilient strong growth of the economy over the past five years reflects the broad based nature of our economy that has been largely driven by growth in the non-agriculture sectors. The non-agricultural sector has remained vibrant growing at 6.7 percent in 2016 from 5.4 percent in 2013 and continues to be the main source of growth.

- ii. **Service sector:** Services remain the main source of growth, the sector grew from 5.0 percent in 2012 to 6.8 percent in 2016 supported by favourable performance of ICT, real estate, wholesale and Retail Trade, Transport and Storage and Accommodation and Restaurants. Accommodation and restaurants has been the fastest growing sector. It grew from 3.1 percent in 2012 to 13.3 percent in 2016 supported by the improved security situation that led to removal of travel alerts from major tourist originating countries.
- iii. **Financial and insurance sector:** The growth of the financial and insurance sector accelerated from 6.0 percent in 2012 to 9.4 percent in 2015 supported by reforms aimed at creating a conducive business environment. However, the sector slowed down to 6.9 percent in 2016 and is estimated at 3.2 percent in 2017 partly due low domestic credit to the private sector and a decline in the growth of interest income.
- iv. **Industry sector:** The industry sector grew from 3.5 percent in 2012 to 7.0 percent in 2015 supported by the construction sector as a result of public infrastructural development. The sector slowed down in 2016 and 2017 following subdued performance of the Manufacturing and Electricity and Water Supply sectors.
- v. **Agricultural sector:** Meanwhile, growth of the agricultural sector rose from 2.8 percent in 2012 to 5.5 percent in 2015 but contracted to (-1.3) percent in first quarter of 2017 due to the prolonged drought that started in the fourth quarter of 2016. Growth in the sector recovered to 3.1 percent as weather conditions improved.

**The Big Four” Plan:** Over the medium term, growth is projected to increase by more than 7.0 percent due to investments in strategic areas under “The Big Four” Plan, namely:

- i. Increasing the share of manufacturing sector to GDP;
- ii. Ensuring all citizens enjoy food security and improved nutrition by 2022;
- iii. Expanding universal health coverage;
- iv. Delivering at least five hundred thousand (500,000) affordable housing units.

These efforts will support the business environment, create jobs and ultimately promote broad based inclusive growth.

**Inflation:** Inflation rate has been low, stable and within the Government target range of 5+/-2.5 percent in the period 2013 to 2017 as a result of prudent monetary and fiscal policies. Inflation averaged 6.7 percent in the period (2013-2017) compared with 7.4 percent in the period (2002-2007), 10.6 percent in the period (2008-2012). Inflation during the period 2008 to 2012 was highly volatile following a steep depreciation of the Kenya shilling exchange rate and policy responses.

However, inflation increased to above target in the first half of 2017 due to drought that affected food prices. Inflationary pressures started to ease in the second half of 2017 as the weather situation improved and earlier measures taken by the Government to address the food shortages took effect. These measures included:

- i. Allowing duty free imports of major food items (maize, wheat, sugar, and milk);
- ii. Introducing a temporary subsidy on maize meal prices.

As a result, overall month on month inflation was 4.5 percent in December 2017 from 6.4 percent in December 2016, and was within the Government's target range.

**The Kenya Shilling:** The Kenya Shilling exchange rate remained broadly stable against major international currencies. As at December 2017, the shilling exchange rate against the Dollar was at Ksh 103.1 from Ksh 102.1 in December 2016. Against the Euro and the Sterling pound, the Shilling weakened to Ksh 122.0 and Ksh 138.2 in December 2017 from Ksh 107.7 and Ksh 127.7 in December 2016, respectively. The Kenya Shilling exchange rate as compared to most sub-Saharan African currencies, has continued to display relatively less volatility. This stability reflected resilient receipts from tea and horticulture despite lower export volumes due to adverse weather conditions in the first quarter of 2017. Additionally, receipts from tourism, coffee exports and Diaspora remittances remained strong.

**Interest Rates:** Interest rates remained stable and low in the period 2013-2017 except June – December 2015 when world currencies were under pressure. During the period, the policy rate (Central Bank Rate) was adjusted appropriately to anchor inflation expectations. The rate is currently (January 2017) at 10.0 percent since August 2016. The interbank rate has remained low at 7.7 percent in December 2017 from 5.9 percent in December 2016 due to ample liquidity in the

money market. The interest rate spread narrowed to 6.0 percent in September 2017 from 6.4 percent in September 2016 with the Commercial banks' average lending interest stabilizing at 13.7 percent over the same period. Meanwhile, the average commercial banks' deposit rate increased to 7.7 percent in September 2017 from 7.3 percent in September 2016. Comparatively, Kenya has the lowest lending rates among the East African countries.

**Foreign exchange market:** The foreign exchange market has remained relatively stable supported by resilient tea and horticultural exports, strong diaspora remittances, and a continued recovery in tourism. The 12-month current account deficit stabilized at 7.0 percent of GDP in November and September 2017 and is expected to narrow to below 6.5 percent by December 2017 as the bulk of SGR-related imports are completed, while favourable weather conditions is expected to support food production and agricultural exports.

**Ease of doing business:** Kenya is ranked favorably in the ease of doing business and as a top investment destination. In 2017, the World Bank's Doing Business Report, ranked Kenya third in Africa in the ease of doing business after Rwanda and Mauritius, as the country moved up 12 places to position 80.

### **County Economic and Fiscal Overview**

Wealth creation and economic growth are largely driven by Counties. In order to recognize such growth, the subnational business situation is very imperative in spurring economic growth, not only of the counties but also of the nation as a whole.

From a macro perspective, the efficiency in the counties in 2018 is essential because successful implementation of the third Medium Term Plan (2018-2022) of Kenya Vision 2030 necessitates partnership with and active participation by the devolved units. The national government's main focus is on development agenda on four main areas;

- Growing the manufacturing sector,
- Expanding access to universal health coverage,
- Providing affordable and decent housing

- Enhancing food and nutrition security.

Nyamira County have a vital role to play, especially in the health function, which is largely devolved, and in food security. Positive relations between the two levels of government is crucial for success of devolution and the national government agenda.

With the Economy growing at 4.8 per cent as recorded last year, per capita income of Ksh 174,200, a population of nearly 45 million people providing ready market for goods and services and hosting of major global conferences points out to a vote of confidence in predominant business environment. Trade and investment opportunities that were initially held at the national level have now been devolved thus, Nyamira County needs to position itself by hosting trade and investment conferences to showcase existing investment opportunities consequently luring local and foreign investors.

Nyamira County's regulatory system including licensing procedures such as business permits, amounts of levies, charges and fees and other regulatory requirement impact on business operational cost. Higher amounts of regulatory fees suppress growth of business as it leads to higher cost of doing business. Therefore, it is essential to engage with the Nyamira County Assembly Forum in order to influence legislation and formulation of the finance Bill and policy.

The Kenyan economy impacts directly on the County economy and this need to be taken into account when developing county's economic policies. Growth of the national economy is directly linked to the counties. An expanding national economy will lead to higher revenues and ultimately higher allocations to the county governments to finance development and provision of social services. Higher growth also raises household disposable incomes thus generally raising demand for goods and services.

The Kenya Shilling exchange rate as compared to most sub-Saharan African currencies has continued to display relatively less volatility. This stability reflects resilient earnings from tea and horticulture despite lower export volumes due to adverse weather. Nyamira County is an agricultural led economy, and as such, this will lead to low cost of farm inputs and other essential agricultural and industrial inputs including essential medical supplies to our county. This will

translate to competitive prices for our county farm products and low cost of industrial and medical products.

A study done by the World Bank speculates that Kenya's economic growth will reach 5.5 percent in 2018 and rise further to 5.9 percent in 2019. This will trickle down to Nyamira County which will benefit greatly from foreign remittances due to the large number of its people working in the diaspora and greatly improve the county economy. The improvement of the liquidity situation as recorded last year has resulted in reduction of all the money market interest rates thereby affording cheaper credit and hence eases of doing business

### **Summary/ Conclusions**

County's priority strategies will continue to support economic activities while allowing implementation of the County Integrated Development Plan (CIDP) 2018-2022, Departmental Strategic Plans and the Governor's manifesto within a context of sustainable public financing. Over the past two years, the County Government has oriented expenditure towards priority programmes in health, education, agriculture, water and roads. This process will be strengthened with a revamped legislative framework and review of CIDP to enable accommodation of critical programmes that will accelerate socio-economic development.

The county government will reform the levies and charges through the Finance Act 2018 to expand the revenue base without necessarily imposing undue burden on the residents. This will be achieved by automation of revenue collection to promote efficiency of revenue agency and to reduce leakage of revenues and also through continuous capacity building of revenue officers so as to cope with dynamics of time and technology.

Nyamira county's strategic priorities will strive to accelerate growth of the county's economy and the standard of living of its citizens in compliance with the mandate conferred on the County Governments by the Constitution. As such, the County Government will focus more on agriculture which is part of the National's government 'Big Four' Plan through agricultural transformation and value addition, infrastructure and the social sectors especially health and education.

	<b>Percentages</b>	<b>14%</b>	<b>4%</b>	<b>76%</b>	<b>6%</b>	<b>100%</b>

In the 2017/2018 Financial Year, Nyamira County Government envisioned to spend a total of Ksh. 6,111,697,583 comprising of Ksh. 1,888,801,377 and Ksh.3,948,819,781 as development and recurrent expenditures respectively. An amount of ksh. 274, 076, 425 was set aside to be used for several funds in the departments. Revenue sources to fund the budget include un-spend balances from the previous financial year 2016/2017 of Ksh. 834,304,744 equitable share worth Ksh.4, 620,600,000, total conditional grants of Ksh. 403,922,211 and locally collected revenue of Ksh. 252,870,628

In the first half, the county performed generally well, both in revenue and expenditure scenarios. However, poor performance was realized in local revenue collections where Ksh.28, 858,590 against Ksh.126,435,314. The acute shortfall was caused by the prolonged electioneering period, leading to high rates of revenue defaulting.

### **Development and Recurrent Expenditures**

By 31<sup>st</sup> December 2017, the County Government of Nyamira had spent a total of Ksh.2,011,009,619 which comprised of Ksh.1,784,901,682 recurrent and Ksh.226,107,937 as development. This represents 34.24% absorption rate, with 13.15% development and 42.96% recurrent. The low absorption rates are associated with delays in exchequer releases from the national government and prolonged politicking period.

The tables below illustrates departmental performance by mid-year 2017/2018 for both recurrent and development.

The revenue shortfall realized can be attributed to:

- ✓ Inadequate county revenue enforcement legislations
- ✓ Unstructured markets
- ✓ Outdated valuation roll
- ✓ Boundary disputes between neighboring towns
- ✓ Inadequate citizen sensitization on the importance of paying taxes
- ✓ Political interference

To address the above issues, the following measures shall be put in place:

- ✓ Automation of revenue collection
- ✓ Frequent monitoring of revenue collection processes and procedures
- ✓ Enforcement of revenue collection function
- ✓ Creation of structured markets (i.e. fenced markets and livestock yards)
- ✓ Continuous training and capacity building of revenue officers
- ✓ Sensitization of the public on the importance of paying taxes to the county
- ✓ Expand county revenue base in our urban centers
- ✓ provision of basic facilities in our markets (i.e. Toilets, Water, garbage collection points, security lights and drainage systems);
- ✓ Develop revenue management and administration policies
- ✓ Mapping of revenue sources

As illustrated by the tables above, the county government needs to revise the local revenue targets downwards as well as the expenditures in the supplementary estimates 2017/2018. This will ensure a realistic planning and budgeting process for the county to achieve the planned objectives and outcomes. In strengthening adherence to fiscal responsibility principles, the county treasury will ensure that departments spend within their budgetary provisions without deviations.

## CHAPTER FOUR

### STRATEGIC PRIORITIES AND INTERVENTIONS

#### Overview

Prioritization of resource allocation will be based on the CIDP, departmental strategic plans and Governor’s manifesto as well as medium term priorities identified during the Sector Working Groups (SWGs) and the County public sector hearings held in from 21<sup>st</sup> February 2018.

In addition, the Constitution and the PFM Act 2012 require county governments to promote budget transparency, accountability and effective financial management of resources. Hence, use of resources at the County will be based on clearly set priorities to ensure that budgets are directly linked to plans to position the county on the path to socio-economic growth and development.

Spending proposals will in this regard undergo rigorous scrutiny to identify areas of inefficient and non-priority expenditure with focus being in the areas indicated in the table below. During scrutiny of 2018/19 budget proposals, more effective use of resources will be sought across spending units and any identified savings will be re-directed to deserving priority expenditures.

## **CHAPTER FIVE**

### **FISCAL POLICY AND BUDGET FRAMEWORK**

#### **Overview**

In accordance with the Public Finance and Management Act (PFM) 2012 and other legislations, development of the County Medium Term Expenditure Framework would be guided by the 2018/2019 Medium Term Fiscal and Budget Framework. The County Government acknowledges that the fiscal direction it takes in this financial year would determine the future lives of its citizens. Therefore, and in line with the Constitution and the Public Finance Management (PFM) Act, 2012, the principle of sharing the burdens and benefits of the use of resources, fiscal responsibility has become even more important since the Constitution requires the Government to progressively provide for a minimum basic standard of economic and social rights to its citizens within available resources.

The county realizes that as devolution takes shape, the mandate of the county government to develop their people is becoming paramount day in day out. Sustainable development calls for increase in spending, which in-turn implies that strategies to increase the resource endowment for the county should be developed and enhanced. In the 2018/2019 financial year, the County Government of Nyamira would pursue this objective through efficiency in revenue collection as well as widening the revenue base. Increase in expenditure would make it possible to facilitate the medium term priorities of the county.

#### **Fiscal Policy Framework**

##### **Fiscal Responsibility Principles**

According to the 2018 BPS, Medium-Term Fiscal Policy aims at supporting rapid and inclusive economic growth, ensuring sustainable debt position and at the same time supporting the devolved system of Government for effective delivery of services. Specifically, the Fiscal policy underpinning the FY 2017/18 Budget and MTEF aims at raising revenue from estimated 20.2

per cent of GDP in FY 2016/17 to 20.4 per cent of GDP over the Medium Term while containing growth of total expenditure.

Total expenditures and net lending is projected to decline from 27.6 per cent of GDP in FY 2016/17 to 27.5 per cent of GDP over the medium term. As a County Government we shall ensure adherence to the ratio of development to recurrent of at least 40:60 over the medium term. Over the medium term the County Government of Nyamira will continue to maintain a balanced budget where total revenue equal total expenditure, meaning that the county does not envisage borrowing to finance the budget.

The fiscal policy would continue to support the development agenda of the county, while implementation of the County Integrated development Plan (CIDP), departmental strategic plans and The Governors manifesto within the context of sustainable public debt. The priority programmes over the past period included health, agriculture, infrastructure, education, water.

### **Fiscal and Public Financial Management Reform**

According to the Budget Policy Statement 2018, the national treasury will implement reforms under the revised finance management reform strategy (2016-2018) to enhance performance of county governments. The reforms are expected to guide towards:

- ✓Improved collection and efficiency of county governments Own source revenue (OSR) systems, including accounting and reporting
- ✓Improved capacity of counties to formulate realistic and credible budgets, and hence better harmony between county executive and county assembly in the budget process.
- ✓Strengthened capacity of county assembly oversight committees to produce quality reports in a timely manner
- ✓Proper documentation and management of county governments assets and liabilities
- ✓A clearer and stronger system of intergovernmental fiscal relations, particularly on management of intergovernmental conditional grants between the two levels of government

In managing the budget for 2018/2019 financial year, the county government would stabilize its revenue efforts and also modernize the revenue regimes. This would create enough fiscal space for mobilizing the required resources to facilitate the budget in a sustainable manner. Local revenue is projected to rise by 4% in 2018/2019 financial year would be enhanced through:

- ✓ Simplify the revenue code
- ✓ Improve revenue compliance through enforcement
- ✓ Increase efficiency in revenue collection
- ✓ Capacity building of revenue staff
- ✓ Expanding the revenue base
- ✓ Ensuring transparency and accountability in revenue collection and management
- ✓ Mapping of the revenue sources
- ✓ Automation of revenue collection

Going forward, the county treasury, through the enactment of Finance Act 2017 has established systems to attain sound economic policies. The county government has reformed the levies and charges to expand the revenue base without necessarily imposing undue burden on the residents. This will be achieved by automation of revenue collection to promote efficiency of revenue agency and to reduce leakage of revenues and also through continuous capacity building of revenue officers so as to cope with dynamics of time and technology.
