# 532100000 AGRICULTURE, LIVESTOCK DEVELOPMENT, FISHERIES & FORESTRY

## **Part A: Vision**

“A food secure County”

## **Part B: Mission:**

“To improve livelihoods of Nairobi City County community by promoting innovative, commercially oriented, modern urban agriculture through appropriate policy environment, effective support services and sustainable agricultural land use”.

## **Part C:**

### **Description of Sector Mandate**

The Sector comprises two Sub-sectors which are Food, Agriculture and Forestry **and** Livestock and Fisheries. The Sector performs extension and regulatory services and agri-business promotion as well as food situation assessment. Through extension services, the Sector empowers producers of crops, livestock and fisheries on new technologies that achieve greater production under the limited arable land space in the County. The Sector also promotes tree growing as a way of ensuring sustainable agricultural land use and greening of the City to enhance environmental benefits associated with trees.

The regulatory services offered by the Sector manage animal and plant diseases, pests and vectors which achieve greater health productivity of animals and plants. In addition, the Sector regulates and controls tree cutting and pruning. The Sector also inspects food for contamination with micro-organisms, agro-chemicals, veterinary medicines and environmental contaminants while also controlling zoonotic diseases to protect public health.

Under the food situation services, the Sector carries out regular surveillance for food security and advises the rest of the Government to respond appropriately. Through this service, Nairobi residents are better assured of their right to food as provided by Article 43 (1) (c) with greater contribution to the right to health under Article 43 (1) (a) of the Constitution of Kenya (2010).

Agricultural production in the County is to a large extent small-scale, market oriented and subsistence farming where farmers have small portions of land; there are also some commercial farms especially for

poultry, pigs, dairy and horticulture. The limited space available for farming requires innovative farming technologies to maximize production per unit area. These include utilizing all available spaces, vertical space, roof tops, green house farming, micro gardening, hanging gardens, fish tanks; use of high producing animal breeds and on-farm feed formulation.

Clientele are reached through various extension approaches such as trainings, on farm demonstrations, field days, trade fairs/exhibitions, exchange visits / tours and farm visits. Monitoring and evaluation is usually carried out to get feedback and to assess impact. Demonstration plots established at Jamhuri Showground serve as a demonstration farm for the Sector where various farming technologies are showcased during the Nairobi International Trade Fair.

Daily the sector regulates the operations of 9 abattoirs, 14 slaughter slabs, 11 tanneries and 9 fish markets where inspection of 2,700 cattle, sheep, goats and pigs, 700 chicken and about 14,000 tonnes Fish.
